

U.S. Department of Transportation - **National Highway Traffic Safety Administration**

Fiscal Year	2019
NHTSA Grant Application	GEORGIA - Highway Safety Plan - FY 2019
State Office	Georgia Governor's Office of Highway Safety
Application Status	Submitted

Highway Safety Plan**1 Summary information****APPLICATION INFORMATION**

Highway Safety Plan Name:	GEORGIA - Highway Safety Plan - FY 2019
Application Version:	2.0

INCENTIVE GRANTS - The State is eligible to apply for the following grants. Check the grant(s) for which the State is applying.

S. 405(b) Occupant Protection:	Yes
S. 405(c) State Traffic Safety Information System Improvements:	Yes
S. 405(d) Impaired Driving Countermeasures:	Yes
S. 405(d) Alcohol-Ignition Interlock Law:	No
S. 405(d) 24-7 Sobriety Programs:	No
S. 405(e) Distracted Driving:	Yes
S. 405(f) Motorcyclist Safety Grants:	Yes
S. 405(g) State Graduated Driver Licensing Incentive:	No
S. 405(h) Nonmotorized Safety:	Yes
S. 1906 Racial Profiling Data Collection:	No

STATUS INFORMATION

Submitted By:	Robin Bazemore
Submission On:	7/9/2018 7:38 PM

Submission Deadline (EDT):	7/9/2018 11:59 PM
----------------------------	-------------------

2 Highway safety planning process

Enter description of the data sources and processes used by the State to identify its highway safety problems, describe its highway safety performance measures, establish its performance targets, and develop and select evidence-based countermeasure strategies and projects to address its problems and achieve its performance targets.

Problem Identification Process

Problem analysis is completed by Governor's Office of Highway Safety (GOHS), law enforcement, Department of Transportation, Georgia Data Driven Approaches to Crime and Traffic Safety (DDACTS), contracted epidemiologist with the Governor's Office of Highway Safety, Department of Public Health, and other involved agencies and groups. The Performance Identification process for performance measures and targets are evidence-based and consistent with the "Traffic Safety Performance Measures for States and Federal Agencies" (DOT HS 811 025). Governor's Office of Highway Safety (GOHS) will regularly review the performance measures and coordinate with other above mentioned agencies for input and update on our performance measures. A state-level analysis was completed, using the most recent data available (currently 2016 FARS data). Motor vehicle crash data, occupant protection survey results, roadway fatality data, and other data on traffic safety problems are analyzed statewide and on county levels. Program level evaluation findings for major issues (impaired driving, safety belts, and pedestrian/bicycle safety) were also included in the problem identification process. Surveillance data along with evaluation findings were used directly to link the identified crash issues, statewide performance targets, strategic partners, the State Strategic Highway Safety Plan, funding opportunities, and capacity to implement sound programs to address the problem.

Highway Safety Plan Data Sources

The Highway Safety Plan is based on the latest statistics available from the National Highway Traffic Safety

Administration (NHTSA) for highway safety problem solving. All data stated within this document will correlate and reference back to the summary of performance measures as agreed upon by National Highway Traffic Safety Administration (NHTSA) and The Governor's Highway Safety Association (GHSA). The data has been obtained through the National Fatality Analysis Reporting System (FARS) database with the exception of the number of crashes and serious injuries in traffic crashes which has been documented with state crash data files.

Data Sources Description

Data Type	Description	Citation
Roadway Fatalities	Fatality Analysis Reporting System (FARS) is a nationwide census providing National Highway Traffic Safety Administration (NHTSA), Congress and the American public yearly data regarding fatal injuries suffered in motor vehicle traffic crashes. Governor's Office of Highway Safety (GOHS) uses the raw data set (individual records for the state of Georgia) to design specific queries that are used to identify geographic regions where crashes occur, specific population groups that are disproportionately affected, and identify risk factors associated with specific crashes (i.e. alcohol impaired driving, distracted driving, speeding, unrestrained/un-helmeted, etc.).	Fatality Analysis Reporting System (FARS) Encyclopedia State Traffic Safety Information. Web. 19 Jun. 2018. < http://www_nrd.nhtsa.dot.gov >.
Roadway Crashes and Injuries	The GEARS online services provided by LexisNexis are for the exclusive use of law enforcement, approved agencies, and other authorized users in the state of Georgia. Governor's Office of Highway Safety (GOHS) uses pre-designed queries in GEARS and raw data (individual records for the state of Georgia) to design specific queries that are used to identify geographic regions where crashes occur, specific population groups that are disproportionately affected, and identify risk factors associated with specific crashes (i.e. alcohol impaired driving, distracted driving, speeding, unrestrained/un-helmeted, etc.).	Georgia Crash Reporting System (GEARS). Web. 19 Jun. 2018. < http://www_nrd.nhtsa.dot.gov >.
Occupant Protection	Dr. James Bason, on behalf of the Governor's Office of Highway Safety (GOHS) and the University of Georgia Department of Health Promotion and Behavior, conducted an observational survey of safety belt use and child safety seat use between March and September 2017. Governor's Office of Highway Safety (GOHS) uses the survey findings to identify usage rates (includes motorcycle helmets) by geographic region, gender, race/ethnicity, age group (children under 5 years) and overall statewide population.	Bason, James. J. "Statewide Use of Occupants Restraints: Observational Survey of Safety Restraint Use in Georgia" 2017. Survey Research Center, University of Georgia: Athens, Georgia

Other datasets used by Governor's Office of Highway Safety (GOHS) and strategic partners includes:

- Crash Outcomes Data Evaluation System (CODES)
- Georgia Emergency Medical Service data
- National EMS Information Systems Citation Data from the Department of Driver Services
- Georgia Emergency Department Data Vital Records
- Georgia Hospital Discharge Data

As more current data becomes available, Governor's Office of Highway Safety (GOHS) will use such in refining its Highway Safety Plan (HSP).

Identify the participants in the processes (e.g., highway safety committees, program stakeholders, community and constituent groups).

Highway Safety Planning Process Participants

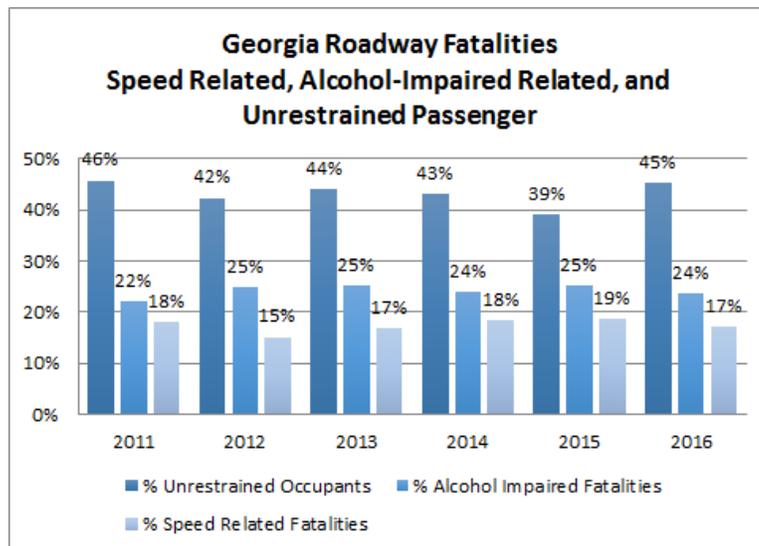

In developing the Highway Safety Plan, The Governor's Office of Highway Safety collaborates and receives input from the following agencies: Strategic Highway Safety Plan Task Teams (Aggressive Driving, Impaired Driving, Occupant Protection, Serious Crash Type, Age-related Issues, Non-motorized Users, Vehicle Types, Trauma Systems, Traffic/Crash Records Data Analysis, Traffic Incident Management Enhancement), Georgia Department of Drivers Services, Georgia Department of Public Safety, Georgia State Patrol, Georgia Department of Public Health, Georgia Department of Transportation, Georgia Public Safety Training Center, Prosecuting Attorneys Council, and the University of Georgia.

Enter description and analysis of the State's overall highway safety problems as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets, selecting countermeasure strategies, and developing projects.

State Demographics

In 2016, there were 1,554 motor vehicle fatalities in the State of Georgia. This is a 8.5% increase in roadway fatalities in comparison to the previous year but remains a reduction of 10% from 2005 when there were 1,729 roadway fatalities. Four (4) counties in Georgia had no roadway fatalities in 2016. This same year (2016), there were 19,405 serious injures and 385,221 motor vehicle crashes in Georgia. The number of roadway fatalities varied from 1994 to 2014, peaking in 2005 with 1,729 fatalities, and a rate of 1.52 fatalities per 100 vehicle miles traveled (VMT). However, in 2016 Georgia experienced a rate comparable to the 2008 rate, with 1.21 fatalities per every 100 million vehicle miles traveled (VMT). The highest fatality rate occurred in 1996 with 1.76 fatalities per 100 million vehicle miles traveled (VMT) and 1,573 roadway fatalities.

In Georgia, as described in the chart below, the percentage of impaired and speed related fatalities showed a slight decrease. Unfortunately Georgia also showed an increase in occupants killed who were not secured in a safety belt.

Although these statistics paint a tragic picture, there are ways to reduce the risk of crashes, injuries and fatalities. Strong law enforcement, effective highway safety legislation, improved road designs, public education and information, and community support, are among the proven means of reducing crashes, injuries and fatalities. The Governor's Office of Highway Safety (GOHS) will continue to leverage the benefits initiated during the last planning cycle. The agency's Highway Safety Plan provides the direction and guidance for the organization. The Highway Safety Plan (HSP) contains Education and Enforcement countermeasures for reducing motor vehicle related crashes, injuries and fatalities on Georgia roads. It also documents strategic, comprehensive, and collaborative efforts with the Enforcement, Education, Engineering Evaluation and Emergency Medical Services components to roadway safety in the State. This "5-E" approach will result in a balanced and effective strategy to saving lives on Georgia's roadways. Governor's Office of

Highway Safety (GOHS) plans to develop, promote, implement and evaluate projects designed to address those identified major contributing injury and fatal highway safety factors with the latest data available.

Enter discussion of the methods for project selection (e.g., constituent outreach, public meetings, solicitation of proposals).

Strategies for Project Selection

The Governor's Office of Highway Safety provides funding opportunities to police departments, governmental entities, and highway safety advocacy organizations for the purpose of addressing motor vehicle crash problems in local jurisdictions. Grant proposals are received through responses to request for proposals (RFP), and through unsolicited submissions where documented highway safety problems exist.

Request for Proposals (RFP)

As innovative programs are developed, specific requests for proposals are distributed to communities, special interest groups, governmental agencies and other stakeholders through electronic mediums (i.e. the Governor's Office of Highway Safety (GOHS) Website, GATEN, Georgia Association of Chiefs of Police, Sheriff's Association, Atlanta Regional Commission, Georgia Municipal Association, ACCG, GAMPO and GPSTC). The request for proposals (RFP) provides an introduction to the specific problem(s), eligibility criteria, program targets and objectives, suggested activities, and methods of evaluation. Upon receipt of all applicants responding to the request for proposals (RFP), a review team of planning and finance representatives is assigned the task of assessing applications to determine if the proposed projects are viable via the Governor's Office of Highway Safety (GOHS) online reporting system, Electronic Grants of Highway Safety (eGOHS) Plus.

Discretionary Grants

Funds are also used to support governmental entities furthering Governor's Office of Highway Safety's mission. In these instances, the purpose, scope, and funding requirements are subjected to Governor's Office of Highway Safety (GOHS) staff review and scoring prior to Governor's Office of Highway Safety (GOHS) Director Approval. Milestones and performance objectives are tailored to the specific project/purpose and established prior to any commitment of funds. All prospective applicants must follow Governor's Office of Highway Safety (GOHS) procedures in applying for highway safety funds.

Renewal Process

Projects that have been deemed vital to the Governor's Office of Highway Safety (GOHS) mission by the Director may receive funding for multiple years based on the availability of funds. All renewal applications are reviewed along with other potential funding requests.

Grant Application Process

Who Can Apply

For the FFY2019 grant year, The Governor's Office of Highway Safety created and advertised a Request for Proposal (RFP). The RFP was advertised through many resources including, but not limited to, the Georgia Municipal Association, Georgia Chief's Association, Georgia Sheriff's Association, and Georgia Regional Commissions. Applications were reviewed and selected based upon the responses to the RFP.

When to Apply

Applications for federal funds are generally accepted six months prior to the beginning of each federal fiscal year, which begins October 1. Dependent upon the time frame of the identified problem, subsequent applications for funding may also be submitted anytime during the fiscal year.

How to Apply

Prospective grantees must submit an application using Electronic Grants of Highway Safety (eGOHS) Plus using quantitative data pertinent to their jurisdiction's identified traffic safety problem(s). The Governor's Office of Highway Safety (GOHS) Grant Application consists of three (3) major parts Programmatic, Budget, and Certifications. The need to complete all major parts varies according to Program emphasis areas.

Part I – Programmatic Section

Problem Identification

The problem statement must clearly define the problem(s) planned to be addressed. The statement must provide a concise description of the problem(s), where it is occurring; the population affected, how and when the problem is occurring, etc. It must include consecutive years of the most recent data to establish the conditions and the extent of the problem(s). Charts, graphs and percentages are effective ways of displaying the required data.

Program Assessment

The applicant must identify the resources that the community/jurisdictions are currently using to address the problem(s) identified under the problem identification section mentioned above. This section will (1) review and note activities and results of past and current efforts, indicating what did or did not

work (2) assess resources to determine what is needed to more effectively address the problem(s) and (3) identify local laws, policies, safety advocate groups and organizations that may support/inhibit the success of the project.

Project Objectives, Activities and Evaluation

The objectives must clearly relate to the target problem(s) identified in the Problem Identification section mentioned above. The activities identify the steps needed to accomplish each objective. Finally, a comprehensive evaluation plan must be developed to explain how to measure the outcome of each proposed activity listed.

Milestone Chart- Part of the Activities and Evaluation Section

This chart must provide a summary of the projected activities to be accomplished on a monthly basis. This section reflects the activities described in the Project Objectives, Activities and Evaluation Section mentioned above.

Media Plan

The applicant must describe a plan for announcing the award of the grant to the local community. Media outlets available to the project must be stated. A discussion of how the public will be informed of grant activities throughout the entire project period is also included.

Resource Requirements

This section must list the resources needed in order to accomplish the objectives. Requirements may include but not be limited to personnel, equipment, supplies, training needs and public information/educational materials. A brief description of how and by whom the resources will be used is also required.

Self Sufficiency

This statement must reflect a plan of action that explains how the activities of the project will be continued after federal funds are no longer available to implement the project. The self-sufficiency plan must identify potential sources of non-federal funds.

Part II – Budget Section

Each budget item(s) must be allowable, reflect a reasonable cost and be necessary to carry out the objectives and activities of the project. Potential budget categories include:

- Personnel Services (Salaries, Pay Schedule and Benefits)
- Regular Operating Expenses
- Travel
- Equipment Purchases
- Contractual Services
- Per Diem and Fees
- Computer Charges and Equipment
- Telecommunications
- Motor Vehicle Purchases
- Rent/Real Estate

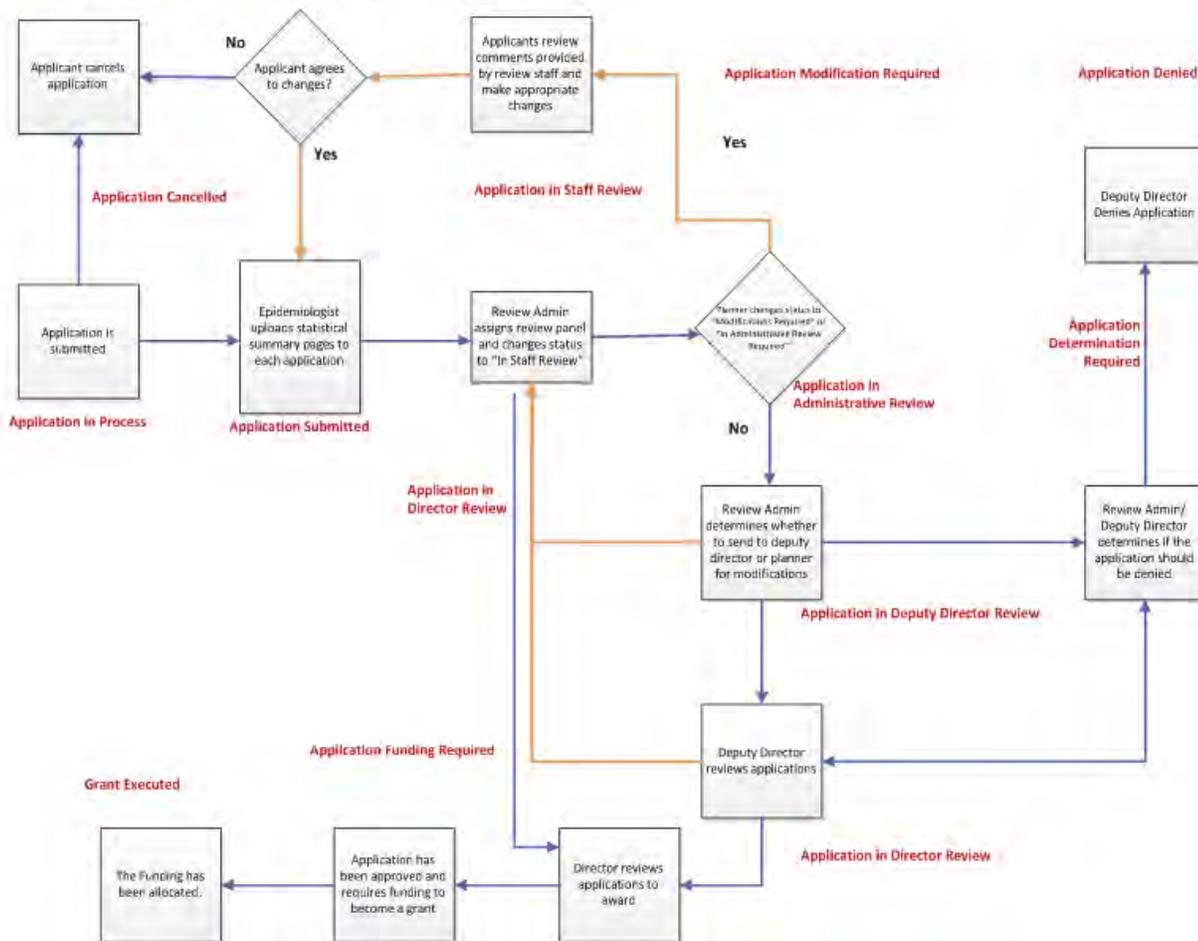

Part III: Grant Terms, Conditions and Certification

This section contains certain legal and regulatory requirements pertaining to the receipt of federal grant funds with which the grantee must agree to comply. Additionally, individuals responsible for the financial aspects of the grant are identified. The application for funding must be submitted by the appropriate Authorizing Official who may be either an elected official and/or agency head or Agency Administrator. Upon approval, the application is made part of the executed grant agreement between the Governor's Office of Highway Safety (GOHS) and the applicant.

Application Review Process

All grant applications are submitted via the Electronic Grants for the Office of Highway Safety (eGOHS) Plus System.

eGOHS Plus Application Review Process Flow

Applications are assigned to a review panel which includes one planner and a staff member from the finance division. For new applications there is also an external reviewer assigned to review and score the application. During the review phase local, county, and state data is included in the review of applications. The Electronic Grants of Highway Safety (eGOHS) Plus system maintains the information and issues the notifications regarding each step. Each member of the review panel completes scoring based on established guidelines and eGOHS Plus calculates each score. Once the review panel, along with the Division Director of Planning and Programs, Deputy Director and the Agency Director complete their review, accepted applications receive a grant number and the grant is executed.

As new applications are reviewed, they are placed in "Application Funding Required" or "Application Determination Required" status until the availability of federal funding is verified, as well as the need for special programs, based on 'data' for new projects. Once amounts are verified, the applications are executed and become a grant.

Preliminary Application Training

After extending request for proposals (RFPs), a grant funding procedures application training is arranged during which the Governor's Office of Highway Safety (GOHS) grant application and reporting documents are explained and the grant application submission date is established.

The Preliminary application training is required and facilitated for potential agencies that have never received Governor's Office of Highway Safety (GOHS) grant funding, does not have a grant with GOHS for the previous fiscal year, or does have a current grant with GOHS but is seeking funds for a new project. Requests for proposals (RFP) are only extended to new agencies based on the availability of federal funds. If sufficient funding is not available to consider the addition of new grants, the Preliminary training will not be held. If a potential grant project is established after the preliminary conference is held, GOHS can set up an individual meeting with the potential grantee.

Grant Selection Notification

The Authorizing Official and the Agency Administrator of the awarded grants receives written notification of grant award which includes the Governor's Office of Highway Safety (GOHS) Grant Terms, Conditions and Certifications. The applicant is notified electronically via eGOHS Plus and hard copy via U.S. Mail of the approval or denial of the Highway Safety Grant Application. Upon receiving notification of the grant award, the grantee is authorized to implement the grant activities during the current FFY effective October 1st through September 30th.

Agency Training

Following grant award notification, grantees are invited to attend training to learn about GOHS procedures. This training is intended to inform grantees, especially new grantees of GOHS' expectations for the grant year. This activity may be conducted via webinar, in a group setting or individually, based on the number registered for training. At this time, grantees are trained on the use of eGOHS Plus for the submission of claims, progress reports, travel requests, amendments, and final reports. GOHS' Grant Terms and Conditions are also highlighted.

Funding Formula

The Section 402 formula is:

- 75% based on the ratio of the State's population in the latest Federal census to the total population in all States.
- 25 % based on the ratio of the public road miles in the State to the total public road miles in all States.

In addition, it requires that at least 40% of the total federal annual obligation limitation must be used by or for the benefit of political subdivision of the State.

Project Funding Period

The federal government operates on a fiscal year that commences on October 1 and ends on September 30. Generally, projects will only be funded during this time span. Occasionally, prior year funds are rolled over into the current fiscal year to continue a project, but this practice is neither encouraged nor frequent.

Governor's Office of Highway Safety (GOHS) generally funds innovative traffic safety projects at the rate of 100% the first year, with the second and third year level of funding discussed and approved during the review team scoring process with final approval from the GOHS Director. The diminishing levels of funding are designed to encourage the grantee to become self-sufficient, allowing the project to develop into an ongoing part of the agency. At the discretion of the Governor's Office of Highway Safety (GOHS) Director and a Governor's Office of Highway Safety (GOHS) application review committee, a project may be funded beyond 3 years and at different rates. The local agency is expected to establish precedents and develop procedures that support continued operation of the traffic safety program using local funding.

Equipment Purchases

Under the provisions of Section 402, the purchase of equipment cannot be approved unless it is an actual component of a highway safety program. Cost of purchase for new or replacement equipment with a useful life of one year or more and an acquisition cost of \$5,000 or more, must be pre-approved by the grant approving officials. Equipment must go through the bid process and have prior approval from both The Governor's Office of Highway Safety (GOHS) and National Highway Traffic Safety Administration (NHTSA).

DOT LEP Guidance

The Georgia Governor's Office of Highway Safety (GOHS) will comply and inform its sub-recipient to comply with the "Policy Guidance Concerning Recipients' Responsibilities to Limited English Proficient (LEP) Persons" (DOT LEP Guidance).

Grant Monitoring/Evaluations

Process evaluation is continual throughout the grant year. The Governor's Office of Highway Safety (GOHS) utilizes an evaluation team to complete data sheets for each application as they are submitted as well as throughout the course of the grant. The evaluation team reviews applications to make certain that stated objectives and activities are reasonable and attainable. Grants can then be revised if updates are necessary. The evaluation team continues to work with grantees throughout the grant year to ensure an accurate evaluation is ongoing within each grant. At the completion of the grant year, the evaluation team reviews the accomplishments of each grant to determine the overall outcome obtained from Governor's Office of Highway Safety (GOHS) grantees.

The Governor's Office of Highway Safety (GOHS) conducts desktop reviews of all grantees as a means of ensuring compliance with state and federal regulations. By the 20th of each month during the grant cycle, grantees are required to submit a monthly progress report and financial claim documenting the previous month's activities. Beginning in Federal Fiscal Year (FFY) 2008, Governor's Office of Highway Safety (GOHS) accepted electronic signatures to expedite the claim process. Currently, reimbursement for claims is delivered within 45 days from receipt of the claim and programmatic reports. Effective January 1, 2012, grantees are encouraged to receive their claim for reimbursement payment electronically via Automatic Clearing House (ACH).

Governor's Office of Highway Safety (GOHS) planners complete a Grant Status Report on all awarded grants to document the progress of the project. Planners then make a recommendation for continued and future funding based on the overall performance and reach of the grant. Governor's Office of Highway Safety (GOHS) Planners must also conduct a minimum of one onsite visit per year with each grantee receiving more than \$25,000 in grant funds. Additionally, 50% of grants up to \$24,999.99 must have one onsite visit. During the onsite visit, planners discuss problems identified, progress of the project, record keeping and support documents, accountability of equipment, budget, as well as verifying that funds obligated were spent in accordance with the grant agreement.

Enter list of information and data sources consulted.

Highway Safety Plan Data Sources

The Highway Safety Plan is based on the latest statistics available from the National Highway Traffic Safety Administration (NHTSA) for highway safety problem solving. All data stated within this document will correlate and reference back to the summary of performance measures as agreed upon by National Highway Traffic Safety Administration (NHTSA) and The Governor's Highway Safety Association (GHSA). The data has been obtained through the National Fatality Analysis Reporting System (FARS) database with the exception of the number of crashes and serious injuries in traffic crashes which has been documented with state crash data files.

Data Sources Description

Data Type	Description	Citation
Roadway Fatalities	Fatality Analysis Reporting System (FARS) is a nationwide census providing National Highway Traffic Safety Administration (NHTSA), Congress and the American public yearly data regarding fatal injuries suffered in motor vehicle traffic crashes. Governor's Office of Highway Safety (GOHS) uses the raw data set (individual records for the state of Georgia) to design specific queries that are used to identify geographic regions where crashes occur, specific population groups that are disproportionately affected, and identify risk factors associated with specific crashes (i.e. alcohol impaired driving, distracted driving, speeding, unrestrained/un-helmeted, etc.).	Fatality Analysis Reporting System (FARS) Encyclopedia State Traffic Safety Information. Web. 19 Jun. 2018. < http://www_nrd.nhtsa.dot.gov >.
Roadway Crashes and Injuries	The GEARS online services provided by LexisNexis are for the exclusive use of law enforcement, approved agencies, and other authorized users in the state of Georgia. Governor's Office of Highway Safety (GOHS) uses pre-designed queries in GEARS and raw data (individual records for the state of Georgia) to design specific queries that are used to identify geographic regions where crashes occur, specific population groups that are disproportionately affected, and identify risk factors associated with specific crashes (i.e. alcohol impaired driving, distracted driving, speeding, unrestrained/un-helmeted, etc.).	Georgia Crash Reporting System (GEARS). Web. 19 Jun. 2018. < http://www_nrd.nhtsa.dot.gov >.
Occupant Protection	Dr. James Bason, on behalf of the Governor's Office of Highway Safety (GOHS) and the University of Georgia Department of Health Promotion and Behavior, conducted an observational survey of safety belt use and child safety seat use between March and September 2017. Governor's Office of Highway Safety (GOHS) uses the survey findings to identify usage rates (includes motorcycle helmets) by geographic region, gender, race/ethnicity, age group (children under 5 years) and overall statewide population.	Bason, James. J. "Statewide Use of Occupants Restraints: Observational Survey of Safety Restraint Use in Georgia" 2017. Survey Research Center, University of Georgia: Athens, Georgia

Other datasets used by Governor's Office of Highway Safety (GOHS) and strategic partners includes:

- Crash Outcomes Data Evaluation System (CODES)
- Georgia Emergency Medical Service data
- National EMS Information Systems Citation Data from the Department of Driver Services
- Georgia Emergency Department Data Vital Records
- Georgia Hospital Discharge Data

As more current data becomes available, Governor's Office of Highway Safety (GOHS) will use such in refining its Highway Safety Plan (HSP).

Enter description of the outcomes from the coordination of the Highway Safety Plan (HSP), data collection, and information systems with the State Strategic Highway Safety Plan (SHSP).

Coordination with the Strategic Highway Safety Plan

The Strategic Highway Safety Plan (SHSP) is Georgia's comprehensive transportation plan. The performance measures and targets listed in the 2019 Highway Safety Plan (HSP) have been coordinated with the data, targets and activities identified in the State SHSP.

Housed within the Governor's Office of Highway Safety (GOHS), the Operations Manager for the SHSP works closely with a variety of internal and external partners at the federal, state and local levels as well as the private sector. The SHSP was updated in 2015 and in place during FY 2018 with Task Teams developing plans for the various Emphasis Areas. The task teams are comprised of a combination of engineering, emergency services, enforcement and education professionals who come from community organizations, private businesses, schools, and public institutions. The teams work together to establish measurable target(s) that are designed to reduce serious injuries and fatalities in an established emphasis area. Throughout the year, the teams track their progress against their target(s) and report their findings to the participating groups and to GOHS. GOHS also holds biannual Safety Program Leadership Meetings for the Executive Board and quarterly meetings for task team leaders.

The SHSP emphasis areas that were identified in 2015 by the task teams included:

- Aggressive Driving
- Impaired Driving
- Occupant Protection
- Serious Crash Type
 - Intersection Safety
 - Roadway Departure Safety
- Age-Related Issues
 - Young Adult Drivers
 - Older Drivers
- Non-Motorized Users
 - Pedestrian
 - Bicyclists
- Vehicle Type
 - Heavy Trucks
 - Motorcycles
- Trauma Systems/Increasing EMS Capabilities
- Traffic/Crash Records Data Analysis
- Traffic Incident Management Enhancement Task Team

Distracted Driving was identified as an emphasis area during 2016. The Georgia SHSP document will be updated during the 2018 calendar year and will be effective from 2019-2021.

3 Performance report

Open each performance measure listed below or click **Add New** to create additional non-core performance measures to provide a program-area-level report on the State's progress towards meeting State performance targets from the previous fiscal year's HSP.

Performance Measure Name	Progress
C-1) Number of traffic fatalities (FARS)	In Progress
C-2) Number of serious injuries in traffic crashes (State crash data files)	In Progress
C-3) Fatalities/VMT (FARS, FHWA)	In Progress
C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)	In Progress
C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)	In Progress
C-6) Number of speeding-related fatalities (FARS)	In Progress
C-7) Number of motorcyclist fatalities (FARS)	In Progress
C-8) Number of unhelmeted motorcyclist fatalities (FARS)	In Progress

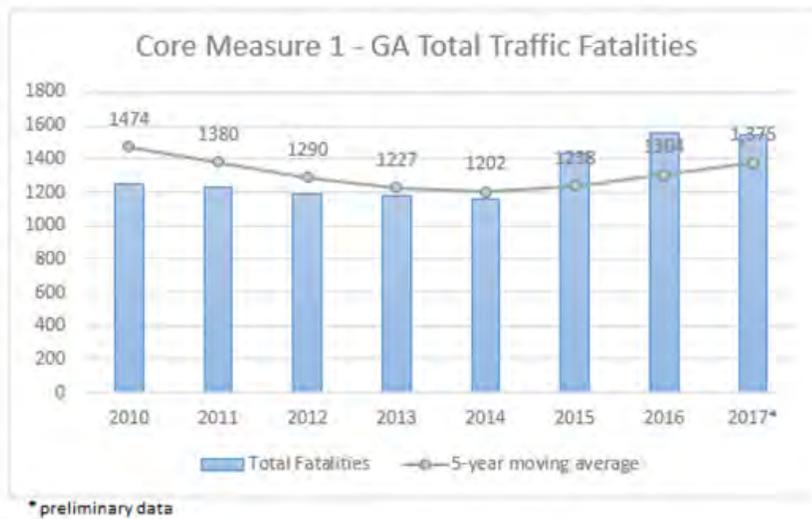

C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)	In Progress
C-10) Number of pedestrian fatalities (FARS)	In Progress
C-11) Number of bicyclists fatalities (FARS)	In Progress
B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)	In Progress

C-1) Number of traffic fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State's progress towards meeting State performance targets from the previous fiscal year's HSP.

Based upon the 2016 FARS data and 2017 GEARS preliminary data, Georgia is on track "To maintain the 5-year moving average traffic fatalities under the projected 1,593 (2014-2018) 5-year average by December 2018." Because of this, Georgia will actually show a reduction for this core measure.

C-2) Number of serious injuries in traffic crashes (State crash data files)

Progress: In Progress

Enter a program-area-level report on the State's progress towards meeting State performance targets from the previous fiscal year's HSP.

While the definition of serious injury remained the same, the count of serious injuries from 2006-2015 has increased because more records from the GSP were added to the dataset and fits the criteria of 50% visible injury, required transport, and with serious vehicle damage. Because of this and the December 2019 target begin set at 19,643, Georgia will be on track to be above the target. We will consistently be monitoring the crash data and update it as needed. The below charts (1) represents the 2018 data and HSP target and (2) represents the revised data.

Chart 1- 2018 HSP data

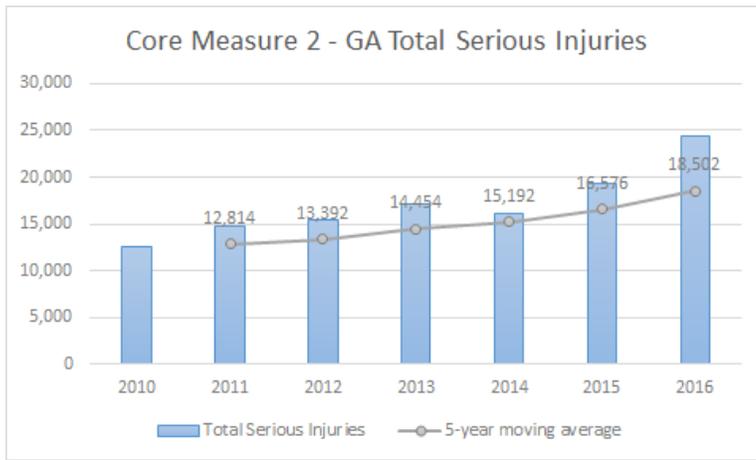

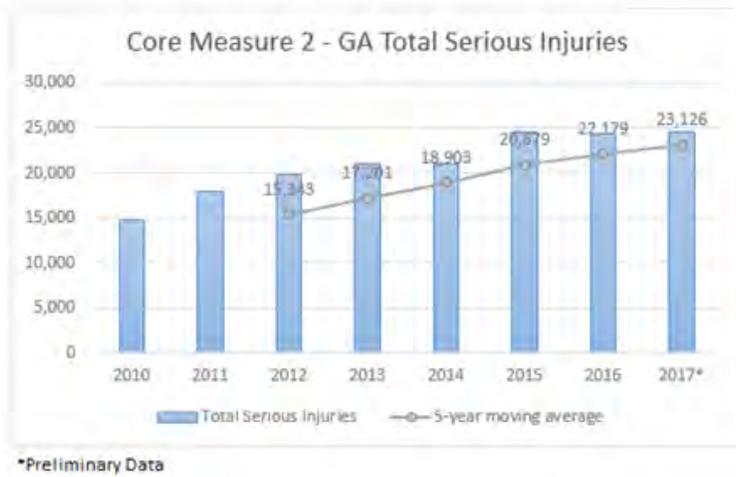

Chart 2- 2019 HSP data

C-3) Fatalities/VMT (FARS, FHWA)

Progress: In Progress

Enter a program-area-level report on the State's progress towards meeting State performance targets from the previous fiscal year's HSP.

Based upon the 2016 FARS and Preliminary 2017 data, Georgia has been able to "Maintain the 5-year moving average traffic fatalities per 100M VMT under the projected 1.32 (2014-2018) 5-year average by December 2018." This is still in progress but if the numbers continue to trend downward, Georgia will meet this core measure.

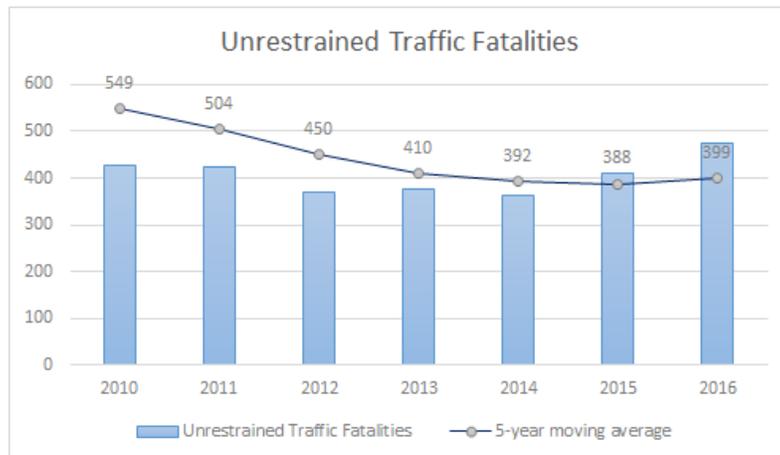

C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Based upon 2016 FARS data and preliminary trends, Georgia is on track to "Maintain the 5-year moving average unrestrained traffic fatalities under the projected 483 (2014-2018) 5-year average by December 2018." If the data continues to trend as it has based on current data, Georgia will meet this core measure.

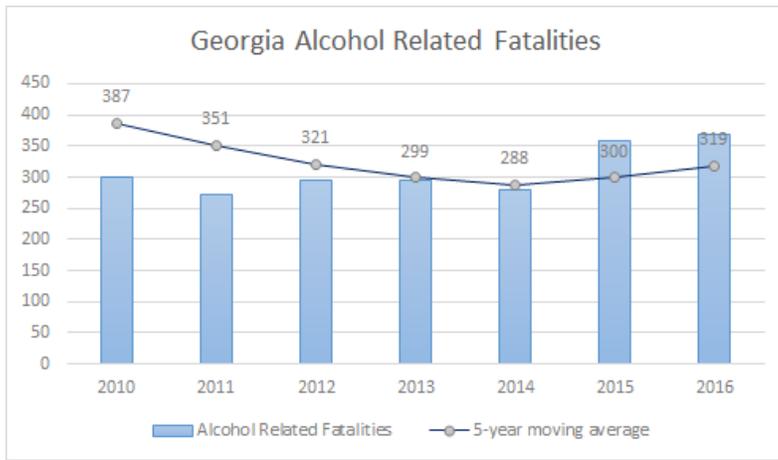

C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Current trends and data show that Georgia will fall just short of the core measure of "Maintaining the 5-year moving average of alcohol related fatalities under the projected 407 (2014-2018) 5-year average by December 2018." Georgia has approximately 24% of overall traffic related fatalities related to alcohol. We will continue to put projects into place to help reduce this overall number.

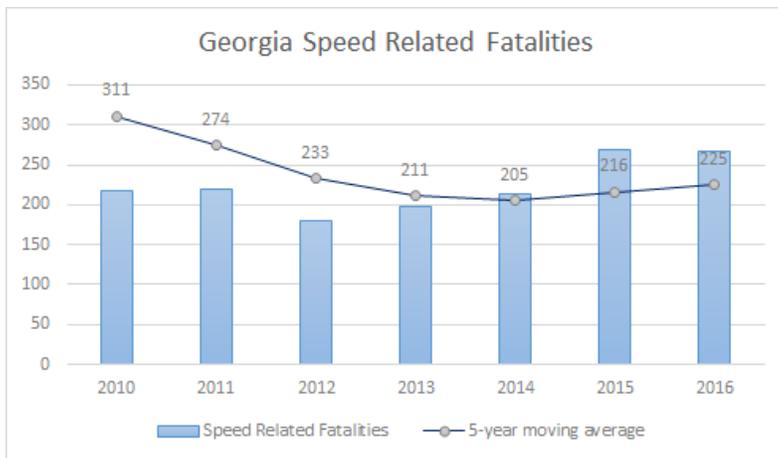

C-6) Number of speeding-related fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Based upon 2016 FARS data and current trends, Georgia will meet the target of "Maintaining the 5-year moving average speed related fatalities under the projected 292 (2014-2018) 5-year average by December 2018." If the data and trends continue, Georgia will meet this core measure.

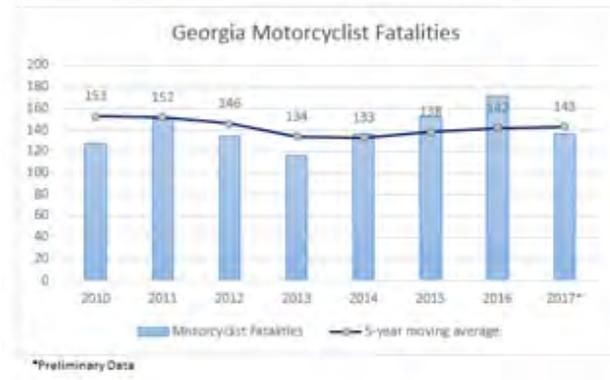

C-7) Number of motorcyclist fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Based upon 2016 FARS and 2017 preliminary data, Georgia will "Maintain the 5-year moving average motorcyclist fatalities under the projected 177 (2014-2018) 5-year average by December 2018." Georgia motorcycle fatalities are trending downward and if this continues, we will meet this core measure.

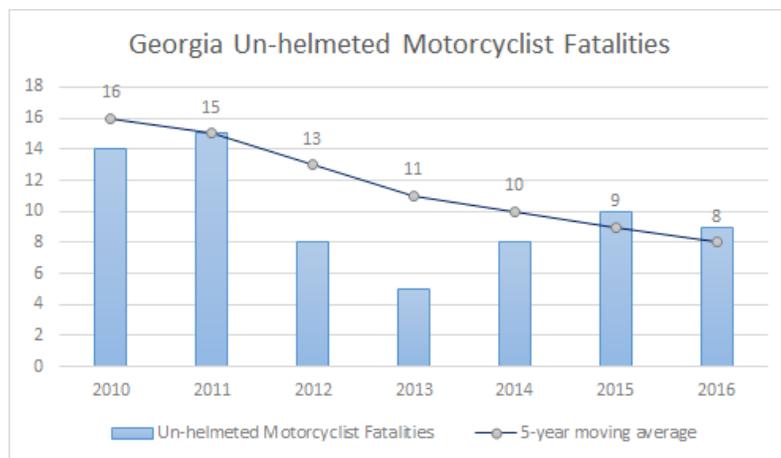

C-8) Number of unhelmeted motorcyclist fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Georgia is one of the few states that still requires motorcyclists to wear proper headgear. Based upon current trends and data, Georgia will be able to "Reduce the 5-year moving average un-helmeted motorcyclist fatalities by 11% from baseline 9 (2011-2015) 5-year average to 8 (2014-2018) 5-year average by December 2018."

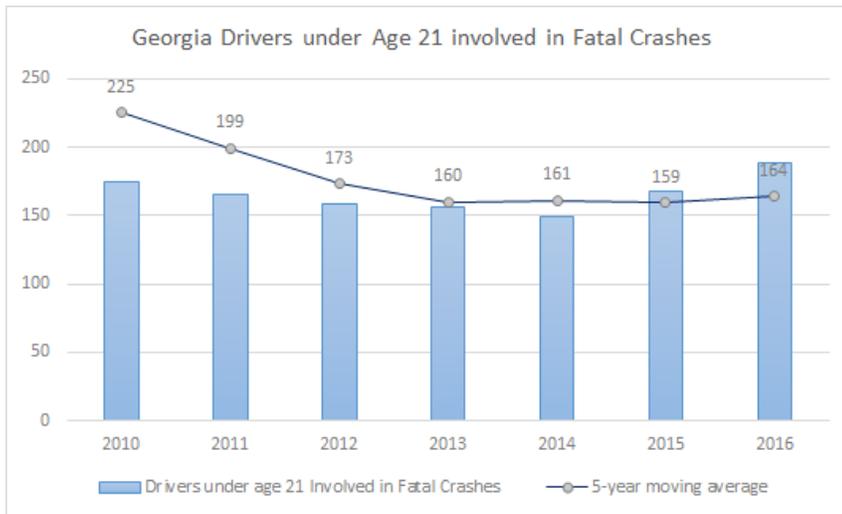

C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Based upon current data and trends, Georgia will "Maintain the 5-year moving average young drivers involved in fatal crashes under the projected 225 (2014-2018) 5-year average by December 2018."

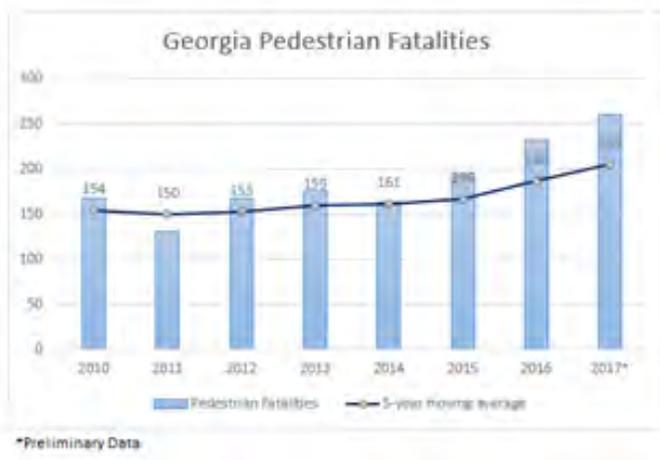

C-10) Number of pedestrian fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Based upon 2016 FARS and preliminary 2017 data, Georgia will "Maintain the 5-year moving average pedestrian fatalities under the projected 228 (2014-2018) 5-year average by December 2018." Georgia pedestrian fatalities continue to rise however we have put projects into place that focus on counties where pedestrian fatalities are highest.

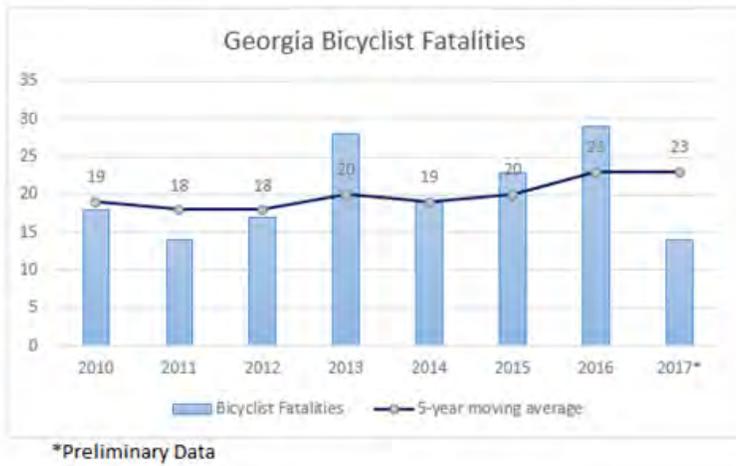

C-11) Number of bicyclists fatalities (FARS)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Based upon 2016 FARS and 2017 preliminary data, Georgia will "Maintain the 5-year moving average bicyclists fatalities under the projected 29 (2014-2018) 5-year average by December 2018.

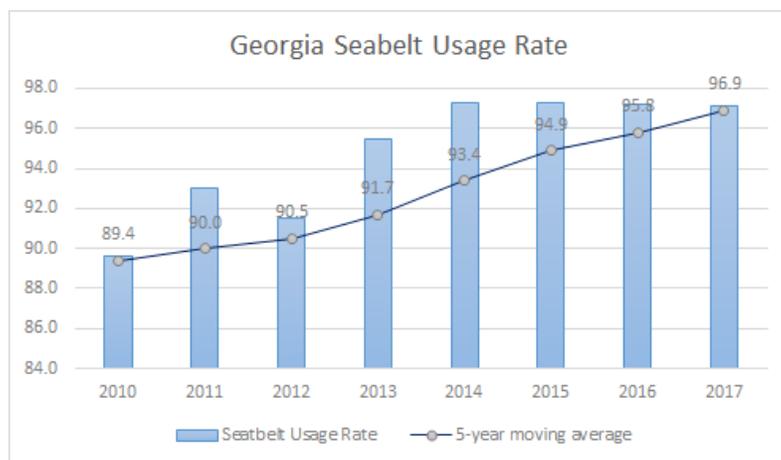

B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)

Progress: In Progress

Enter a program-area-level report on the State’s progress towards meeting State performance targets from the previous fiscal year’s HSP.

Over the past four years, Georgia has been successful in maintaining one of the highest usage rates in the country. Because of strong media presence, education, and enforcement, Georgia is on track to "Increase the 5-year moving average seatbelt usage rate from 94.9% (2011-2015) to 96.6% (2014-2018) 5-year average by December 2018.

4 Performance plan

Open each performance measure listed below or click Add New to create additional non-core performance measures to provide a list of quantifiable and measurable highway safety performance targets that are data-driven, consistent with the Uniform Guidelines for Highway Safety Programs and based on highway safety problems identified by the State during the planning process.

Performance Measure Name	Target Period(Performance Target)	Target Start Year (Performance Target)	Target End Year (Performance Target)	Target Value(Performance Target)
C-1) Number of traffic fatalities (FARS)	5 Year	2015	2019	1,652.0
C-2) Number of serious injuries in traffic crashes (State	5 Year	2015	2019	24,324.0

crash data files)				
C-3) Fatalities/VMT (FARS, FHWA)	5 Year	2015	2019	1.310
C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)	5 Year	2015	2019	507.0
C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)	5 Year	2015	2019	478.0
C-6) Number of speeding-related fatalities (FARS)	5 Year	2015	2019	306.0
C-7) Number of motorcyclist fatalities (FARS)	5 Year	2015	2019	151.0
C-8) Number of unhelmeted motorcyclist fatalities (FARS)	5 Year	2015	2019	6.0
C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)	5 Year	2015	2019	186.0
C-10) Number of pedestrian fatalities (FARS)	5 Year	2015	2019	251.0
C-11) Number of bicyclists fatalities (FARS)	5 Year	2015	2019	27.0
B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)	5 Year	2015	2019	97.8

C-1) Number of traffic fatalities (FARS)

Is this a traffic records system performance measure?

No

C-1) Number of traffic fatalities (FARS)-2019

Target Metric Type: Numeric

Target Value: 1,652.0

Target Period: 5 Year

Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

During the period of 2014-2017, there is an increase in the number of traffic fatalities and the unweighted 5-year moving average of traffic fatalities.

The number of traffic fatalities increased by 122 counts -- 9% from 1,432 fatalities in 2015 to 1,554 fatalities in 2016. Preliminary data, shows that fatalities decreased by 5 counts to 1,549 fatalities in 2017.

Using 5-year moving averaging method and using polynomial modeling (R2 of 0.98) (Figured above), GOHS has the 2019 target to maintain the 5-year moving average traffic fatalities under the project 1,652 (2015-2019) 5-year average by December 2019.

C-2) Number of serious injuries in traffic crashes (State crash data files)

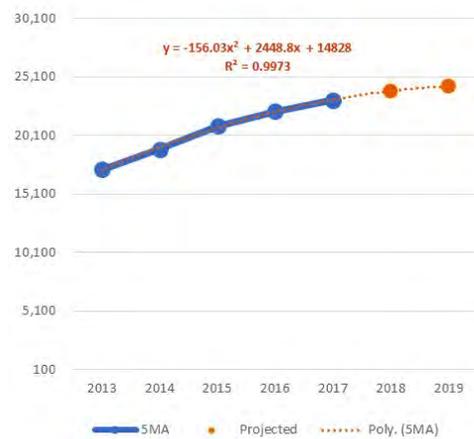

Is this a traffic records system performance measure?

No

C-2) Number of serious injuries in traffic crashes (State crash data files)-2019
Target Metric Type: Numeric
Target Value: 24,324.0
Target Period: 5 Year
Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

Since 2009, the number of serious injuries have unsteadily increased over me. The number of serious injuries decreased by 1% (175 less serious injuries) in 2016 in comparison to 2015. Using 5-year moving averaging method and using polynomial modeling (R2 of 0.9973) (figured below), GOHS has the 2019 target to maintain the 5-year moving average serious traffic injuries under the projected 24,324 (2015-2019) 5-year average by December 2019.

C-3) Fatalities/VMT (FARS, FHWA)

Is this a traffic records system performance measure?

No

C-3) Fatalities/VMT (FARS, FHWA)-2019
Target Metric Type: Numeric
Target Value: 1.310
Target Period: 5 Year
Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

In 2016, there were 1.28 traffic fatalities in Georgia for every 100 million vehicle miles traveled. The fatality rate increased by 6% from 1.21 in 2015 to 1.28 in 2016. Using 5-year moving averaging method and using polynomial modeling (R2 of 0.9233) (figured below), GOHS has the 2019 target to maintain the 5-year moving average traffic fatalities per 100M VMT under the projected 1.31 (2015-2019) 5-year average by December 2019.

C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)

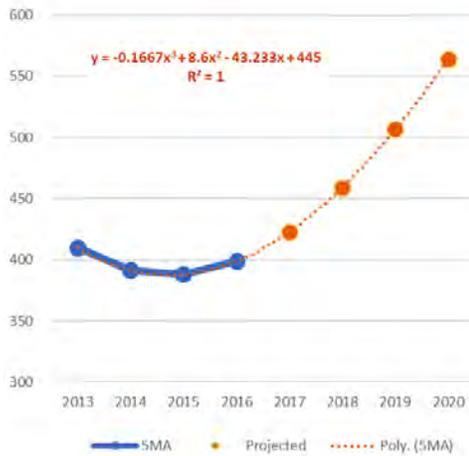

Is this a traffic records system performance measure?

No

C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)-2019
Target Metric Type: Numeric
Target Value: 507.0
Target Period: 5 Year
Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

Since 2014, the number of unrestrained traffic fatalities has steadily increased. In 2016, there were 476 unrestrained fatalities. The number of unrestrained fatalities increased by 16% (65 more fatalities) in 2016 in comparison to 2015 (table below). Using 5-year moving averaging method and using polynomial modeling (R2 of 1.0) (figured below), GOHS has the 2019 target to maintain the 5-year moving average unrestrained traffic fatalities under the projected 507 (2015-2019) 5-year average by December 2019.

C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)

Is this a traffic records system performance measure?

No

C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)-2019

Target Metric Type: Numeric

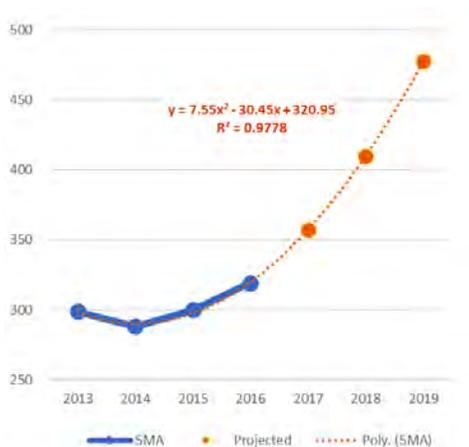

Target Value: 478.0

Target Period: 5 Year

Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

Since 2014, the number of alcohol related traffic fatalities has steadily increased. In 2016, there were 368 alcohol related fatalities. The number of alcohol related fatalities increased by 3% (10 more fatalities) in 2016 in comparison to 2015 (table below). Using 5-year moving averaging method and using polynomial modeling (R2 of 0.9778) (figured below), GOHS has the 2019 target to maintain the 5-year moving average alcohol related fatalities under the projected 478 (2015-2019) 5-year average by December 2019.

C-6) Number of speeding-related fatalities (FARS)

Is this a traffic records system performance measure?

No

C-6) Number of speeding-related fatalities (FARS)-2019

Target Metric Type: Numeric

Target Value: 306.0

Target Period: 5 Year

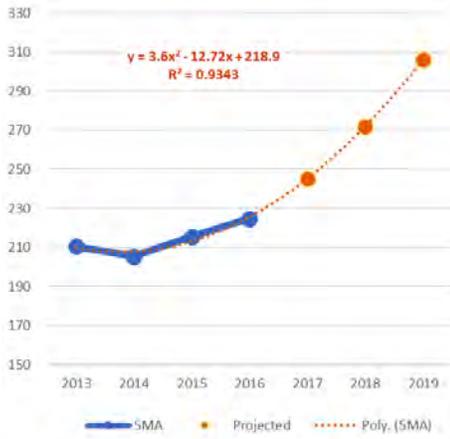

Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

Since 2012, the number of speed related traffic fatalities has steadily increased. In 2016, there were an estimated 266 speed related fatalities. The number of speed related fatalities decreased by 1% (2 less fatalities) in 2016 in comparison to 2015. Using 5-year moving averaging method and using polynomial modeling (R2 of 0.9343) (figured below), GOHS has the 2019 target to maintain the 5-year moving average speed related fatalities under the projected 306 (2015-2019) 5-year average by December 2019.

C-7) Number of motorcyclist fatalities (FARS)

Is this a traffic records system performance measure?

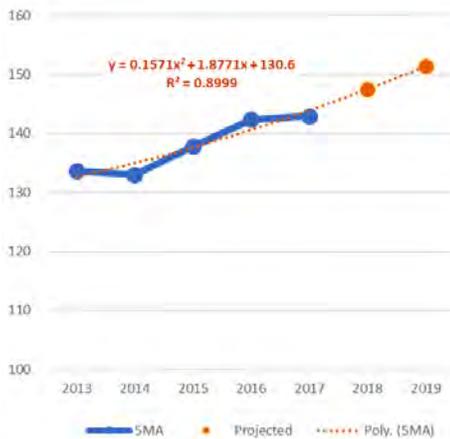

No

C-7) Number of motorcyclist fatalities (FARS)-2019
Target Metric Type: Numeric
Target Value: 151.0
Target Period: 5 Year
Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

Since 2007, more than 10% of all traffic fatalities were motorcyclists. In 2016, there were an estimated 172 motorcyclist fatalities. The number of motorcyclist fatalities increased by 13% (20 more fatalities) in 2016 in comparison to 2015. Using 5-year moving averaging method and using polynomial modeling (R2 of 0.8999) (figured below), GOHS has the 2019 target to maintain the 5-year moving average motorcyclist fatalities under the projected 151 (2015-2019) 5-year average by December 2019.

C-8) Number of unhelmeted motorcyclist fatalities (FARS)

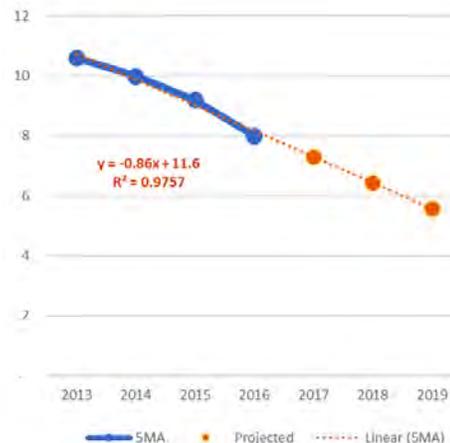

Is this a traffic records system performance measure?

No

C-8) Number of unhelmeted motorcyclist fatalities (FARS)-2019
Target Metric Type: Numeric
Target Value: 6.0
Target Period: 5 Year
Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

In 2016, there were 9 un-helmeted motorcyclist fatalities. The number of motorcyclist fatalities decreased by 10% (1 less fatalities) in 2016 in comparison to 2015. The 5-year moving average has steadily decreased by at least 1 since 2008. Using 5-year moving averaging method and using linear modeling (R2 of 0.9757) (figured below), GOHS has the 2019 target to reduce the 5-year moving average un-helmeted motorcyclist fatalities by 25% from baseline 8 (2012-2016) 5-year average to 6 (2015-2019) 5-year average by December 2019.

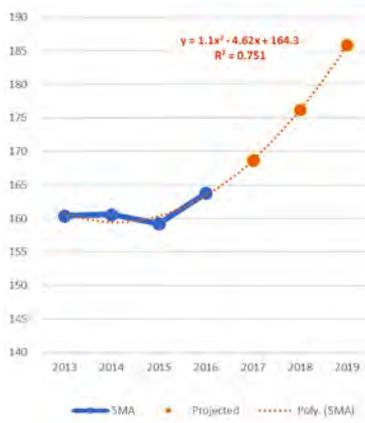

C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)

Is this a traffic records system performance measure?

No

C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)-2019
Target Metric Type: Numeric
Target Value: 186.0
Target Period: 5 Year
Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

Since 2014, the number of young drivers involved in fatal crashes has steadily increased. In 2016, there were 188 young drivers involved in fatal crashes. The number of young drivers involved in fatal crashes increased by 12% (20 more young drivers) in 2016 in comparison to 2015. Using 5-year moving averaging method and using polynomial modeling (R2 of 0.751) (figured below), GOHS has the 2019 target to maintain the 5-year moving average young drivers involved in fatal crashes under the projected 186 (2015-2019) 5-year average by December 2019.

C-10) Number of pedestrian fatalities (FARS)

Is this a traffic records system performance measure?

No

C-10) Number of pedestrian fatalities (FARS)-2019

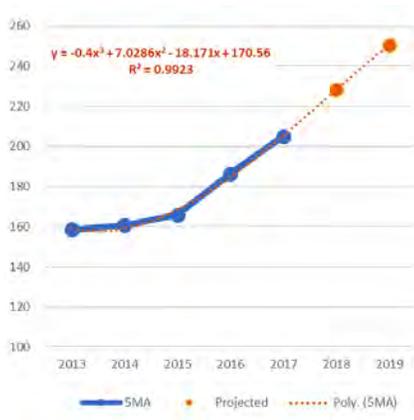

Target Metric Type: Numeric

Target Value: 251.0

Target Period: 5 Year

Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

Since 2014, the number of pedestrian fatalities have steadily increased over time. In 2016, there were 232 pedestrian fatalities in Georgia. The number of pedestrian fatalities increased by 20% (38 more fatalities) in 2016 in comparison to 2015. Using 5-year moving averaging method and using polynomial modeling (R2 of 0.9923) (figured below), GOHS has the 2019 target to maintain the 5-year moving average pedestrian fatalities under the projected 251 (2015-2019) 5-year average by December 2019.

C-11) Number of bicyclists fatalities (FARS)

Is this a traffic records system performance measure?

No

C-11) Number of bicyclists fatalities (FARS)-2019

Target Metric Type: Numeric

Target Value: 27.0

Target Period: 5 Year

Target Start Year: 2015

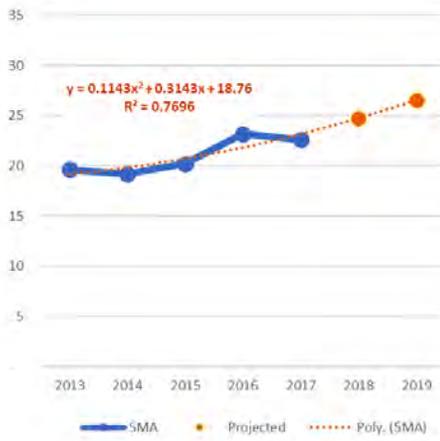

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

In 2016, there were 29 bicyclist fatalities in Georgia. The number of bicyclist fatalities increased by 26% (6 more fatalities) in 2016 in comparison to 2015. Using 5-year moving averaging method and using polynomial modeling (R2 of 0.7697) (figured below), GOHS has the 2019 target to maintain the 5-year moving average bicyclist fatalities under the projected 27 (2015-2019) 5-year average by December 2019.

B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)

Is this a traffic records system performance measure?

No

B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)-2019

Target Metric Type: Numeric

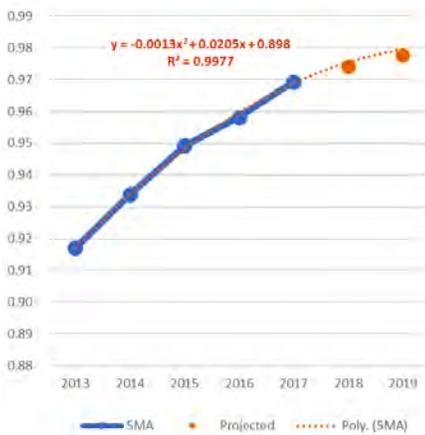

Target Value: 97.8

Target Period: 5 Year

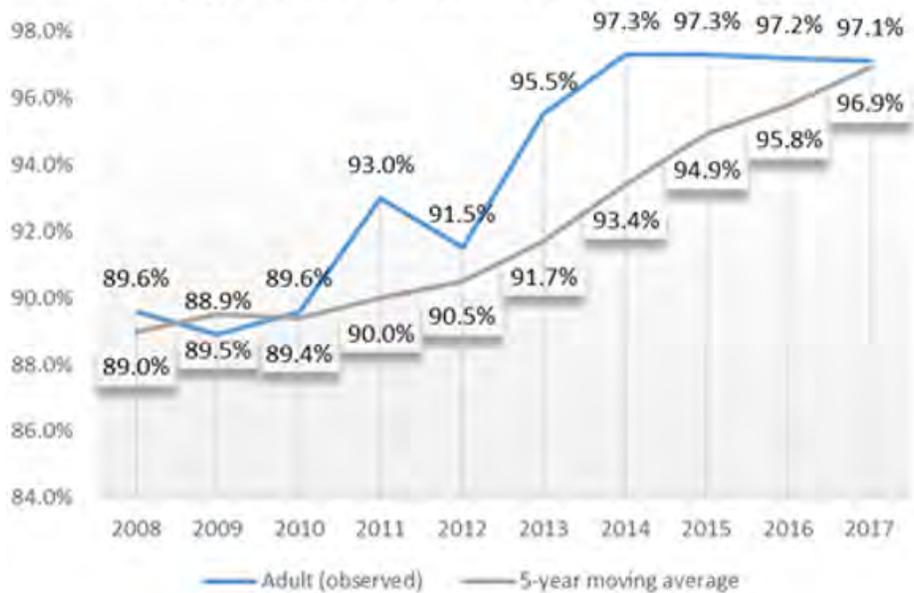

Target Start Year: 2015

Enter justification for each performance target that explains how the target is data-driven, including a discussion of the factors that influenced the performance target selection.

Statewide safety belt usage in 2016 for drivers and passengers of passenger cars, trucks, and vans was 97.5%, a 0.2% net increase from 2015. In 2016, the 5-year moving average seatbelt usage rate was 95.8%. GOHS has the 2019 target to increase the 5-year moving average seatbelt usage rate from 95.8% (2012-2016) to 97.8% (2015-2019) 5-year average by December 2019.

Georgia Restraint Use Observational Survey

State HSP performance targets are identical to the State DOT targets for common performance measures (fatality, fatality rate, and serious injuries) reported in the HSIP annual report, as coordinated through the State SHSP.

Check the box if the statement is correct.

Yes

Enter grant-funded enforcement activity measure information related to seat belt citations, impaired driving arrests and speeding citations.

A-1) Number of seat belt citations issued during grant-funded enforcement activities*

Fiscal year	2017
Seat belt citations	76030

A-2) Number of impaired driving arrests made during grant-funded enforcement activities

Fiscal year	2017
Impaired driving arrests	26077

A-3) Number of speeding citations issued during grant-funded enforcement activities*

Fiscal year	2017
Speeding citations	326734

5 Program areas

Program Area Hierarchy

1. Motorcycle Safety

- Communication Campaign
 - To use Paid Media to support ongoing Click It Or Ticket (CIOT) enforcement efforts to help decrease unbelted injury and fatality stats on Georgia's highways while increasing overall public awareness of occupant protection and increasing the use of safety belts and child safety restraint systems statewide.
 - FAST Act NHTSA 402
 - To use Paid Media to support ongoing "Operation Zero Tolerance" (OZT)/ "Drive Sober or Get Pulled Over" enforcement efforts to increase public awareness of sober driving and to encourage the use of designated drivers to improve Georgia's alcohol-related crash, fatality and injury rate.
 - FAST Act NHTSA 402
 - To use Paid Media to support the GOHS Share The Road/Motorcycle Safety Awareness campaign by targeting motorists in Georgia's secondary audience with a motorcycle safety and awareness message.
 - FAST Act NHTSA 402
 - To base Georgia's year-round Occupant Protection and Impaired Driving Paid Media Plan on the NHTSA National Communications Plan and to correlate the timetable of the GOHS Media Buy Plan to correspond with planned enforcement activities at the state, regional and national level.
 - FAST Act NHTSA 402
 - To optimize driver awareness of ongoing national highway safety campaigns during peak driving periods and during major holiday travel periods.
 - FAST Act NHTSA 402
 - To continue to expand our HeadsUPGeorgia public service distracted driving awareness campaign to include paid messages, student/parent distracted driving course segments, student distracted driving video message contest, testimonials with distracted driving crash victims and family members and live television interviews.
 - FAST Act NHTSA 402
 - Partner with Huddle Inc. Ticket Program to provide advertising on ticket backs for high school sporting and extracurricular events.
 - FAST Act NHTSA 402
 - Use paid media to support the public information and education campaign to inform the Georgia motoring public about the new Hands-Free Georgia distracted driving law.
 - FAST Act NHTSA 402
 - To partner with local agencies to implement innovative HVE, education, and advertising campaigns targeting distracted driving.
 - FAST Act NHTSA 402
 - Labor Day Impaired Driving

- FAST Act 405d Impaired Driving Low
 - Yield Behind the Wheel Share the Road With Farm Vehicles
 - FAST Act NHTSA 402
 - Thanksgiving CIOT
 - FAST Act NHTSA 402
 - Holiday Impaired Driving
 - FAST Act 405d Impaired Driving Low
 - Distracted Driving Awareness Month
 - FAST Act NHTSA 402
 - Memorial Day CIOT
 - FAST Act NHTSA 402
 - July 4th Impaired Driving
 - FAST Act 405d Impaired Driving Low
- Alcohol Impairment: Detection, Enforcement and Sanctions
 - Conduct three (3) waves of statewide enforcement with the “Drive Sober or Get Pulled Over.” campaign.
 - FAST Act NHTSA 402
 - Law enforcement will conduct 7,704 impaired driver contacts
 - FAST Act 405d Impaired Driving Low
 - FAST Act NHTSA 402
 - Provide 18 educational events to the military.
 - FAST Act 405d Impaired Driving Low
 - Conduct 3 Law Enforcement Recognition events
 - FAST Act 405d Impaired Driving Low
 - Hold 18 community events.
 - FAST Act 405d Impaired Driving Low
 - Monitor 4 local county courts.
 - FAST Act 405d Impaired Driving Low
 - Provide 32 training courses for prosecutors and police officers
 - FAST Act 405d Impaired Driving Low
 - Conduct 18 educational events.
 - FAST Act 405d Impaired Driving Low

2. Impaired Driving (Drug and Alcohol)

- High Visibility Enforcement
 - Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - Train 1,400 law enforcement officers in speed detection
 - FAST Act NHTSA 402
 - Law enforcement will conduct 47,140 speed contacts.
 - FAST Act NHTSA 402
- Drug Recognition Expert (DRE) Training
 - Train 1,050 law enforcement officers in impaired driving- both alcohol and drug related
 - FAST Act 405d Impaired Driving Low
- Alcohol Impairment: Detection, Enforcement and Sanctions
 - Conduct three (3) waves of statewide enforcement with the “Drive Sober or Get Pulled Over.” campaign.
 - FAST Act NHTSA 402
 - Law enforcement will conduct 7,704 impaired driver contacts
 - FAST Act 405d Impaired Driving Low
 - FAST Act NHTSA 402
 - Provide 18 educational events to the military.
 - FAST Act 405d Impaired Driving Low
 - Conduct 3 Law Enforcement Recognition events
 - FAST Act 405d Impaired Driving Low
 - Hold 18 community events.

- FAST Act 405d Impaired Driving Low
- Monitor 4 local county courts.
 - FAST Act 405d Impaired Driving Low
- Provide 32 training courses for prosecutors and police officers
 - FAST Act 405d Impaired Driving Low
- Conduct 18 educational events.
 - FAST Act 405d Impaired Driving Low

3. Teen Traffic Safety Program

- Graduated driver licensing (GDL)
 - Provide funds to Georgia colleges to educate students on the dangers of impaired driving
 - FAST Act NHTSA 402
 - Provide funds to Georgia high schools to operate SADD (Students Against Destructive Decisions) programs
 - FAST Act NHTSA 402

4. Police Traffic Services

- High Visibility Enforcement
 - Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - Train 1,400 law enforcement officers in speed detection
 - FAST Act NHTSA 402
 - Law enforcement will conduct 47,140 speed contacts.
 - FAST Act NHTSA 402
- Alcohol Impairment: Detection, Enforcement and Sanctions
 - Conduct three (3) waves of statewide enforcement with the "Drive Sober or Get Pulled Over." campaign.
 - FAST Act NHTSA 402
 - Law enforcement will conduct 7,704 impaired driver contacts
 - FAST Act 405d Impaired Driving Low
 - FAST Act NHTSA 402
 - Provide 18 educational events to the military.
 - FAST Act 405d Impaired Driving Low
 - Conduct 3 Law Enforcement Recognition events
 - FAST Act 405d Impaired Driving Low
 - Hold 18 community events.
 - FAST Act 405d Impaired Driving Low
 - Monitor 4 local county courts.
 - FAST Act 405d Impaired Driving Low
 - Provide 32 training courses for prosecutors and police officers
 - FAST Act 405d Impaired Driving Low
 - Conduct 18 educational events.
 - FAST Act 405d Impaired Driving Low

5. Traffic Records

6. Speed Management

- High Visibility Enforcement
 - Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - Train 1,400 law enforcement officers in speed detection

- FAST Act NHTSA 402
- Law enforcement will conduct 47,140 speed contacts.
 - FAST Act NHTSA 402

7. Community Traffic Safety Program

- Older Driver- General Communication and Education
 - Provide funds to coordinate and host a minimum of three CarFit Event Coordinator/Technician trainings
 - FAST Act NHTSA 402
 - Education and outreach events focused on the older adult population, age 65 and older.
 - FAST Act NHTSA 402

8. Distracted Driving

- High Visibility Cellphone/Text Messaging Enforcement

9. Communications (Media)

- Communication Campaign
 - To use Paid Media to support ongoing Click It Or Ticket (CIOT) enforcement efforts to help decrease unbelted injury and fatality stats on Georgia's highways while increasing overall public awareness of occupant protection and increasing the use of safety belts and child safety restraint systems statewide.
 - FAST Act NHTSA 402
 - To use Paid Media to support ongoing "Operation Zero Tolerance" (OZT)/ "Drive Sober or Get Pulled Over" enforcement efforts to increase public awareness of sober driving and to encourage the use of designated drivers to improve Georgia's alcohol-related crash, fatality and injury rate.
 - FAST Act NHTSA 402
 - To use Paid Media to support the GOHS Share The Road/Motorcycle Safety Awareness campaign by targeting motorists in Georgia's secondary audience with a motorcycle safety and awareness message.
 - FAST Act NHTSA 402
 - To base Georgia's year-round Occupant Protection and Impaired Driving Paid Media Plan on the NHTSA National Communications Plan and to correlate the timetable of the GOHS Media Buy Plan to correspond with planned enforcement activities at the state, regional and national level.
 - FAST Act NHTSA 402
 - To optimize driver awareness of ongoing national highway safety campaigns during peak driving periods and during major holiday travel periods.
 - FAST Act NHTSA 402
 - To continue to expand our HeadsUPGeorgia public service distracted driving awareness campaign to include paid messages, student/parent distracted driving course segments, student distracted driving video message contest, testimonials with distracted driving crash victims and family members and live television interviews.
 - FAST Act NHTSA 402
 - Partner with Huddle Inc. Ticket Program to provide advertising on ticket backs for high school sporting and extracurricular events.
 - FAST Act NHTSA 402
 - Use paid media to support the public information and education campaign to inform the Georgia motoring public about the new Hands-Free Georgia distracted driving law.
 - FAST Act NHTSA 402
 - To partner with local agencies to implement innovative HVE, education, and advertising campaigns targeting distracted driving.
 - FAST Act NHTSA 402
 - Labor Day Impaired Driving
 - FAST Act 405d Impaired Driving Low
 - Yield Behind the Wheel Share the Road With Farm Vehicles
 - FAST Act NHTSA 402
 - Thanksgiving CIOT
 - FAST Act NHTSA 402
 - Holiday Impaired Driving
 - FAST Act 405d Impaired Driving Low
 - Distracted Driving Awareness Month
 - FAST Act NHTSA 402
 - Memorial Day CIOT
 - FAST Act NHTSA 402
 - July 4th Impaired Driving
 - FAST Act 405d Impaired Driving Low

10. Non-motorized (Pedestrians and Bicyclist)

- Elementary-age Child Pedestrian Training
 - Will host 75 bike and pedestrian safety courses.

- FAST Act 405h Nonmotorized Safety
 - FAST Act NHTSA 402
 - Elementary-age Child Bicyclist Training
 - Host one Bike Rodeo to educate children ages 6-14.
 - FAST Act 405h Nonmotorized Safety
 - Will host 75 bike and pedestrian safety courses.
 - FAST Act 405h Nonmotorized Safety
 - FAST Act NHTSA 402
 - Bicycle safety education for adult cyclists
 - Host one Bike Rodeo to educate children ages 6-14.
 - FAST Act 405h Nonmotorized Safety
 - Will host 75 bike and pedestrian safety courses.
 - FAST Act 405h Nonmotorized Safety
 - FAST Act NHTSA 402
11. Occupant Protection (Adult and Child Passenger Safety)
- Short-term, High Visibility Seat Belt Law Enforcement
 - Conduct four (4) statewide campaigns to promote occupant safety.
 - FAST Act NHTSA 402
 - Provide funds to law enforcement agencies to conduct 7,800 occupant protection contacts.
 - FAST Act NHTSA 402
 - Host one Child Passenger Safety Caravan during National Child Passenger Safety Week.
 - FAST Act NHTSA 402
 - Provide funds to law enforcement agencies to conduct 37 local seatbelt surveys.
 - FAST Act NHTSA 402
 - Conduct Georgia's annual seatbelt survey
 - MAP 21 405b Occupant Protection High Belt Use
 - Child Restraint System Inspection Station(s)
 - Provide funds to conduct twenty-four (24) Child Passenger Safety Technician (CPST) Certification Courses
 - FAST Act NHTSA 402
 - Provide funds to conduct thirty-three (33) Child Passenger Safety Technician (CPST) Recertification Courses
 - FAST Act NHTSA 402
 - Conduct twenty-four (24) Continuing Education Unit (CEU) credit workshops
 - FAST Act NHTSA 402
 - Provide funds so at least 150 of Georgia's 159 counties are provided mini-grants for child safety seats focused on minority and low-income families.
 - FAST Act NHTSA 402
 - Distribute 4,120 child safety seats
 - FAST Act NHTSA 402
 - Facilitate an annual meeting for Georgia's certified Child Passenger Safety Technician (CPST) Instructors
 - FAST Act NHTSA 402
 - Provide funds to coordinate and conduct twenty (20) minority outreach presentations in
 - FAST Act NHTSA 402
 - Conduct 8 courses to EMS providers titled "Transporting children safely in Ambulances."
 - FAST Act NHTSA 402
 - Conduct 80 outreach events in occupant protection
 - FAST Act NHTSA 402
12. Aggressive Driving
- High Visibility Enforcement
 - Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - FAST Act NHTSA 402
 - FAST Act 405d Impaired Driving Low
 - MAP 21 405b Occupant Protection High Belt Use
 - Train 1,400 law enforcement officers in speed detection
 - FAST Act NHTSA 402
 - Law enforcement will conduct 47,140 speed contacts.

FAST Act NHTSA 402

- Alcohol Impairment: Detection, Enforcement and Sanctions
 - Conduct three (3) waves of statewide enforcement with the “Drive Sober or Get Pulled Over.” campaign.
FAST Act NHTSA 402
 - Law enforcement will conduct 7,704 impaired driver contacts
FAST Act 405d Impaired Driving Low
FAST Act NHTSA 402
 - Provide 18 educational events to the military.
FAST Act 405d Impaired Driving Low
 - Conduct 3 Law Enforcement Recognition events
FAST Act 405d Impaired Driving Low
 - Hold 18 community events.
FAST Act 405d Impaired Driving Low
 - Monitor 4 local county courts.
FAST Act 405d Impaired Driving Low
 - Provide 32 training courses for prosecutors and police officers
FAST Act 405d Impaired Driving Low
 - Conduct 18 educational events.
FAST Act 405d Impaired Driving Low

5.1 Program Area: Motorcycle Safety

Program area type Motorcycle Safety

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification

Motorcycles are an increasingly popular means of transportation. In 2017, there were 201,689 registered motorcycles in the state of Georgia, a slight increase from 2016. The number of registered motorcycles continues to increase from 2008. However, the percentage of motorcycle fatalities has remained fairly consistent during the same time period. In 2016, more than 8 out of every 10,000 registered motorcyclists died – the highest rate since 2008. GOHS partially attribute this increase to the current economic situation and the fact that people were trying to find less expensive ways to commute.

Motorcycle and scooter riders continue to face more risks of crashing and being injured than passengers in four-wheeled vehicles. Motorcycles are complex to operate and more exposed to a greater number of hazards than cars and trucks. Too many riders lack the basic skills to adapt their current driving habits to the special demands of a motorcycle. Other road users are also unaware of the special characteristics of motorcycles which can also lead to crashes.

In 2016, nearly 11.1% (172 persons) of the people killed in motor vehicle crashes in Georgia were motorcyclists—11.7% increase over the previous year. Of those motorcycle fatalities, residents within the age range of (16 – 74) were the targeted population; 97% (167 motorcycle fatalities) were riders and 2.9% were passengers.

Per FARS data, motorcycle fatalities were more prone to occurring between noon – 8:59 pm on weekdays and weekends (Mondays and Fridays) during 2016. Contributing factors include alcohol, speed, distraction, and rider inexperience. 36% of the motorcycle fatalities occurred in urban areas of Fulton (15), Gwinnett (12), Cobb (13), Clayton (11), and DeKalb County (11); while 5.8% of these fatalities occurred in rural areas with Bartow County (10) being more exposed. 89.5% of the total motorcycle fatalities were using a helmet, and 10.8% combined (not used- 5.4% and unknown- 5.4%) were not using a helmet.

Motorcyclists may not be aware that they lack the specialized skills to operate a motorcycle safely. Unlicensed riders may continue to ride under either a 'perennial permit' or with no endorsement at all and lack the basic skills needed to operate a motorcycle safely.

Georgia has utilized the *Riders Helping Riders* program and a mix of communication mechanisms to draw attention to the dangers of impaired riding (e.g. newspapers, community meetings, e-mail, posters, fliers, mini-planners and law enforcement mobilizations). *Riders Helping Riders* is a rider-training program based on findings that

Riders tend to look out for each other, but for various reasons, are hesitant to intervene in the drinking and riding behavior of their peers. The program communicates the drinking and riding problem, the need for rider intervention as it relates to drinking and riding behavior of their peers, and tools that riders can use to help prevent the drinking and riding of their peers.

According to Fatality Analysis Reporting System (FARS) data, the proportions of un-helmeted fatalities fluctuated greatly. In 2016, 5.4% (9 fatalities) of all 172 motorcyclist fatalities in Georgia were un-helmeted in comparison to 7.8% (13 fatalities) of all 178 fatalities that were un-helmeted in 2008. Un-helmeted rider deaths are trending down but we are unsure of those that are being killed while wearing the non-Department of Transportation (DOT) approved helmets.

Motorcycle Fatalities per 100,000 Registered Motorcycles 2008-2016

Year	Motorcyclist Fatalities	Registrations	Motorcyclist Fatalities per 100,000 Motorcycle Registrations
2008	178	188,072	94.64
2009	140	197,171	71
2010	128	196,958	64.99
2011	150	199,620	75.14
2012	134	201,207	66.6
2013	116	200,133	57.96
2014	137	199,575	68.65
2015	152	200,410	77.44
2016	172	196,277	87.63

Source: National Highway Traffic Safety Administration (NHTSA)/ FARS

Alcohol is also a significant risk factor among Georgia motorcycle rider fatalities. According to the Fatality Analysis Reporting System, in 2016, 19 percent of Georgia's motorcycle riders killed in fatal crashes contained a BAC at or above .08. (This is less than the national level of 25 percent of the total motorcycle riders killed with BAC at or above .08).

In 2016, Georgia has an alcohol reporting rate of 42 percent—42 percent of all drivers involved in fatal crashes were tested for alcohol consumption with recorded BAC. In Georgia 2,150 drivers were involved in fatal crashes, and 900 drivers were tested. The highest rate of alcohol testing occurred among the fatally injured (64%). Surviving drivers involved in fatal crashes were tested 24% of the time.

The chart below is based upon FARS data- 2012-2016.

**Blood Alcohol Concentration (BAC) Reporting Rates
For Drivers/Motorcycle Rider (Operators)
Involved in Fatal Crashes:
Georgia, U.S. and Best State**

Target Population

All drivers of passenger vehicles and other motorists who may endanger motorcycle and scooter riders in Georgia.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)	5 Year	2019	478.0
2019	C-7) Number of motorcyclist fatalities (FARS)	5 Year	2019	151.0
2019	C-8) Number of unhelmeted motorcyclist fatalities (FARS)	5 Year	2019	6.0

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	Communication Campaign

5.1.1 Countermeasure Strategy: Communication Campaign

Program area Motorcycle Safety

Countermeasure strategy Communication Campaign

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

Yes

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Data Used to Identify Priorities

Motorcycles are an increasingly popular means of transportation. In 2016, there were 196,277 registered motorcycles in the state of Georgia, an increase from 2014. The number of registered motorcycles continues to increase from 2008. However, the percentage of motorcycle fatalities has remained fairly consistent during the same time period. In 2016, more than 8 out of every 10,000 registered motorcyclists died – the highest rate since 2008. GOHS partially attribute this increase to the current economic situation and the fact that people were trying to find less expensive ways to commute.

In 2016, 11% percent (172 persons) of the people killed in motor vehicle crashes in Georgia were motorcyclists—a 11.7% increase over the previous year. Of these, 97 percent (167) were riders and 2.9 percent were passengers. In 2008, Georgia experienced the highest in motorcycle fatality count within fifteen years (178 motorcyclist fatalities). Contributing factors include alcohol, speed, distraction, and rider inexperience. Un-helmeted rider deaths are on the increase plus we are unsure of those that are being killed while wearing the non-Department of Transportation (DOT) approved helmets.

Nationally in 2016, motorcycle fatalities have decreased slightly from 2008 when there were 5,312 rider deaths. In 2008, motorcycle deaths accounted for 15.5% of the overall traffic deaths nationwide. In 2016, motorcyclists accounted for 14% of all traffic fatalities nationwide and 17% of all occupant (driver and passenger) fatalities.

In Georgia during the 2016 calendar year, over 60 percent of all motorcyclist crashes occurred in metropolitan areas including Atlanta, Gainesville, Augusta, Savannah, and Columbus. According to FARS data, Fulton, DeKalb, Cobb, and Gwinnett counties had the highest number of motorcycle crashes in 2016. The attached charts show FARS data from the 2016 calendar year.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Strategic Communications Plan

Overview

Georgia's Strategic Communication Plan targets those counties that account for the majority of registered motorcycles in the state. These counties include Fulton, Chatham, Cobb, Gwinnett, DeKalb, Richmond, Henry, Cherokee, Forsyth, Paulding, Hall, Houston, Coweta, Columbia, Bartow, Douglas, Clayton, and Carroll. Therefore, Georgia created a Strategic Communication Plan to educate motorists in those target counties and the Atlanta metropolitan area. In FFY 2018, the Governor's Office of Highway Safety (GOHS) will use a mix of communication mechanisms to draw attention to the problem (e.g. newspapers, community meetings, e-mail, posters, flyers, mini-planners, instructor-led training and law enforcement mobilizations) to deliver the message of motorcycle awareness.

Two agencies are responsible for executing a comprehensive motorcycle safety program, which includes public outreach and communication: The Department of Driver Services (DDS) and the Georgia Governor's Office of Highway Safety (GOHS).

The Department of Driver Services (DDS) is responsible for motorcycle licensing and administering rider education courses in Georgia. This includes contracting with possible training centers, training instructors, scheduling classes, etc. Under the legislation that created its motorcycle safety program, the Department of Driver Services (DDS) is also to provide a Public Information and Awareness effort. This activity has been executed collaboratively with the Governor's Office of Highway Safety (GOHS).

The Governor's Office of Highway Safety (GOHS) has the primary responsibility of collecting and evaluating data, developing an annual highway safety plan and longer term Strategic Highway Safety Plan (SHSP). Annually, the Governor's Office of Highway Safety (GOHS) provides highway safety funds to support the effort of eligible government agencies and private organizations to eliminate or reduce highway safety problems and enhance highway safety consistent with Georgia's Highway Safety Plan. The Governor's Office of Highway Safety (GOHS) also conducts its own public outreach and communication programs.

Efforts between the Governor's Office of Highway Safety (GOHS) and the Department of Driver Services (DDS) are coordinated through the Strategic Highway Safety Plan (SHSP) Motorcycle Task Force and the Georgia Motorcycle Program Coordinator. This plan supports the safety goals of the Highway Safety Plan and the Strategic Highway Safety Plan (SHSP).

The Governor's Office of Highway Safety (GOHS) Public Information Officer (PIO) engages the services of the media through a statewide media contract and earned media. The media efforts will aid in the development of new campaign messages and designs of new campaign collateral for the 2019 riding season. The contractor will be asked to integrate an evaluation program into the campaign as well.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

To help achieve these goals, the communication efforts will focus primarily on those areas where the majority of serious motorcycle crashes occur, in the major metropolitan area of Georgia. These metropolitan areas include: Atlanta, Gainesville, Augusta, Savannah, Athens, and Columbus, where a majority of the crashes occurred in 2016. In addition, these efforts will also focus on the counties with the highest number of registered motorcyclists and counties with the highest number of motorcycle crashes involving alcohol.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
PM-01	To use Paid Media to support ongoing Click It Or Ticket (CIOT) enforcement efforts to help decrease unbelted injury and fatality stats on Georgia's highways while increasing overall public awareness of occupant protection and increasing the use of safety belts and child safety restraint systems statewide.	
PM-02	To use Paid Media to support ongoing "Operation Zero Tolerance" (OZT)/ "Drive Sober or Get Pulled Over" enforcement efforts to increase public awareness of sober driving and to encourage the use of designated drivers to improve Georgia's alcohol-related crash, fatality and injury rate.	
PM-03	To use Paid Media to support the GOHS Share The Road/Motorcycle Safety Awareness campaign by targeting motorists in Georgia's secondary audience with a motorcycle safety and awareness message.	
PM-04	To base Georgia's year-round Occupant Protection and Impaired Driving Paid Media Plan on the NHTSA National Communications Plan and to correlate the timetable of the GOHS Media Buy Plan to correspond with planned enforcement activities at the state, regional and national level.	
PM-05	To optimize driver awareness of ongoing national highway safety campaigns during peak driving periods and during major holiday travel periods.	
PM-06	To continue to expand our HeadsUPGeorgia public service distracted driving awareness campaign to include paid messages, student/parent distracted driving course segments, student distracted driving video message contest,	

	testimonials with distracted driving crash victims and family members and live television interviews.
PM-07	Partner with Huddle Inc. Ticket Program to provide advertising on ticket backs for high school sporting and extracurricular events.
PM-08	Use paid media to support the public information and education campaign to inform the Georgia motoring public about the new Hands-Free Georgia distracted driving law.
PM-09	To partner with local agencies to implement innovative HVE, education, and advertising campaigns targeting distracted driving.
PM-10	Labor Day Impaired Driving
PM-11	Yield Behind the Wheel Share the Road With Farm Vehicles
PM-12	Thanksgiving CIOT
PM-13	Holiday Impaired Driving
PM-14	Distracted Driving Awareness Month
PM-15	Memorial Day CIOT
PM-16	July 4th Impaired Driving

5.1.1.1 Planned Activity: To use Paid Media to support ongoing Click It Or Ticket (CIOT) enforcement efforts to help decrease unbelted injury and fatality stats on Georgia's highways while increasing overall public awareness of occupant protection and increasing the use of safety belts and child safety restraint systems statewide.

Planned activity name To use Paid Media to support ongoing Click It Or Ticket (CIOT) enforcement efforts to help decrease unbelted injury and fatality stats on Georgia's highways while increasing overall public awareness of occupant protection and increasing the use of safety belts and child safety restraint systems statewide.

5.1.2 Countermeasure Strategy: Alcohol Impairment: Detection, Enforcement and Sanctions

Program area Motorcycle Safety

Countermeasure strategy Alcohol Impairment: Detection, Enforcement and Sanctions

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

Yes

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The National Highway Traffic Safety Administration (NHTSA) reports that in 2016, 37,461 people were killed in motor vehicle traffic crashes in the United States, of which 10,497 (28%) were alcohol-related. Every fifty minutes in America, someone is killed in an alcohol-related crash. Nationally, these crashes result in more than \$44 billion in economic costs on an annual basis.

In Georgia during the 2016 calendar year, over 60 percent of all motorcyclist crashes occurred in metropolitan areas including Atlanta, Gainesville, Augusta, Savannah, and Columbus. According to FARS data, Fulton, Dekalb, Cobb, and Gwinnett counties had the highest number of motorcycle crashes in 2016. The attached charts show FARS data from the 2016 calendar year.

Alcohol is a significant risk factor among Georgia motorcycle rider fatalities. Every year since 2008, alcohol related motorcycle fatalities showed a steady increase in Georgia. According to the Fatality Analysis Reporting System in 2016, 21 percent (35) of the motorcycle riders killed in fatal crashes

(167) contained a BAC at or above a .08. This is less than the national level of 1,259 (25%) of 4,950 motorcycle riders who were alcohol impaired (BAC of .08 g/dL or higher).

In 2016, Georgia has an alcohol reporting rate of 42% -- 42% of all drivers involved in fatal crashes were tested for alcohol consumption with recorded BAC. This is the highest reporting percentage in Georgia in the previous 5 years. In Georgia, 2,150 drivers were involved in fatal crashes, and 900 drivers were tested. The highest alcohol testing occurred among the fatally injured (62%), followed by Non-Incapacitating Evident Injured drivers (23%).

Alcohol Impaired Driving Motor Vehicle Fatalities in Georgia	Year					
	2011	2012	2013	2014	2015	2016
Alcohol-Impaired Driving Fatalities (BAC=.08+)**	271	295	296	279	358	368
Annual Percent Change	-9%	9%	0%	-6%	28%	3%

As indicated above, alcohol was associated with 368 highway fatalities in Georgia during 2016. This equates to twenty-four percent (24%) of Georgia's overall fatalities. Even with stricter laws, high visibility law enforcement, and increased public information and education (PI&E) programs, the number of impaired driving crashes, injuries and fatalities remains unacceptable. The chance of a crash being fatal is six times higher if exposed to impaired driving when compared to those not related to alcohol or drugs.

As presented below, The U.S. and Georgia had an increase in overall fatalities as well as increase in alcohol related fatalities. Data shows from 2011-2016, Georgia experienced increase in overall crash fatalities of 328 (27%) and an increase of 97 (36%) in alcohol-related traffic deaths. These numbers indicate that Georgia should emphasize preventative measures for countering the problems of driving under the influence of alcohol.

MEASURE	REGION	2011	2012	2013	2014	2015	2016
Total Fatalities	Georgia	1,226	1,192	1,179	1,164	1,430	1,554
	US	32,479	33,782	32,894	32,675	35,092	37,461
Alcohol Related-Fatalities	Georgia	271	295	296	279	358	368
	US	9,865	10,336	10,110	9,967	10,265	10,497
% of Alcohol Related Fatalities	Georgia	22%	25%	25%	24%	25%	24%
	US	30%	31%	31%	31%	29%	28%

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Impaired Driving Enforcement – H.E.A.T.

Aggressive traffic has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. The Governor's Office of Highway Safety's (GOHS) impaired driving program is geared toward jurisdictions where the incidences of impaired crashes among motorist and motorcyclist are the highest within the State of Georgia.

Since 2002, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form H.E.A.T. (Highway Enforcement of Aggressive Traffic). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has continued to grow with agencies being added across the state. In FFY 2018, GOHS funded eighteen (18) agencies across the state where speed and impaired driving crashes and fatalities are consistently high. The Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019.

The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

Alcohol and Other Drug Countermeasures

Governor's Office of Highway Safety (GOHS) will administer and manage alcohol programs (funding 405 (f)). This includes but is not limited to: overseeing in-house grants and contracts, seeking and managing grants that foster the agency's mission, collecting and analyzing data, seeking partnerships in the communities, and to providing training and public information necessary to ensure proper and efficient use of federal highway safety funds. The public information will include the creation of brochures, collateral messaging items and effective communication with the media and public which will be available.

The State of Georgia maintains an annual comprehensive plan for conducting high visibility impaired driving enforcement and that plan will continue for the remainder of FY 2018 and FY 2019. The plan includes the following:

1. Strategic impaired driving enforcement which is designed to reach motorcyclist and motorist in geographic subdivisions that account for a majority of the state's population and half of the state's alcohol-related fatalities. Please see list of counties in the state ranked from highest to lowest in impaired driving related crashes for all vehicle types.
2. Three statewide impaired driving mobilizations that occur during the holidays of July 4th, Labor Day (September), and December holidays.
3. Strategic mobilizations for geographic subdivisions that show abnormal increases in traffic injuries and/or deaths (Thunder Task Force).

Georgia law enforcement agencies will participate in four impaired driving mobilizations by conducting checkpoints and/or saturation patrols on at least four nights during the national impaired driving campaigns as well as on a quarterly basis throughout FY 2019.

The four (4) impaired driving mobilizations are as follows:

1. December 2018/New Year 2019
2. Thunder Task Force (Three Dates TBD)
3. July Fourth 2019
4. Labor Day 2019

Statewide Impaired Driving Mobilization

Georgia participates in three annual statewide mobilizations to combat impaired driving. These campaigns occur during the Fourth of July, Labor Day, and December holidays. Georgia utilizes its Traffic Enforcement Networks (TEN) which provide state and local law enforcement officers with a structured means of collaborating regionally on their unique highway safety priorities with emphasis on impaired driving. They also provide the ability to communicate regional highway safety priorities up the chain-of-command, to reach local and state policy makers, community leaders, legislators and others. The 16 regional networks are instrumental in carrying out this statewide impaired-driving enforcement campaign. The traffic enforcement networks work closely with The Georgia State Patrol.

Strategic Thunder Mobilizations

The Governor's Office of Highway Safety has established a taskforce consisting of state wide officers (H.E.A.T.), troopers and sheriff's deputies. The Governor's Office of Highway Safety (GOHS) "Thunder" taskforce is a specialized traffic enforcement unit designed to help Georgia communities combat unusually high amount of traffic crashes, injuries and fatalities. Their mission is to reduce highway deaths and serious injuries by changing the illegal driving behaviors of motorcyclist and motorists in the region through an increased law enforcement presence in those high crash corridors. The task force was established in 2007 and continues to be very effective in reducing highway crashes, injuries and deaths.

As you can see alcohol is also a significant risk factor for Georgia motorcycle riders. Every year since 1998, alcohol related motorcycle fatalities have been increasing in Georgia. According to the National Highway Traffic Safety Administration (NHTSA), in 2016, twenty-five percent (25%) of all fatally injured motorcycle riders had BAC levels of .08 g/dL or higher. Across the U.S., the percentage with BAC .08 g/dL or above was highest for fatally injured motorcycle riders among two age groups, 35-39 (38%), followed by 45-49 (37%). Nighttime single vehicle crashes are the most dangerous for impaired motorcycle riders. Fifty-five percent (55%) of those type crashes result in the death of a motorcyclist.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2018, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019. The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will continue to focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

Georgia will continue to fund data driven projects that focus on impaired driving enforcement and education. The Highway Enforcement of Aggressive Traffic Units operate in a majority of the counties where impaired motorcycle crashes occurred in 2016. The chart below describes the FFY2018 grantees, grant amounts, counties represented, and the total fatalities, impaired driving fatalities, and motorcycle fatalities. Georgia plans to fund projects like HEAT again in 2019.

County	Grantee	Grant Amount	Total				Alcohol .08+				Motorcycle

5.2 Program Area: Impaired Driving (Drug and Alcohol)

Program area type Impaired Driving (Drug and Alcohol)

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

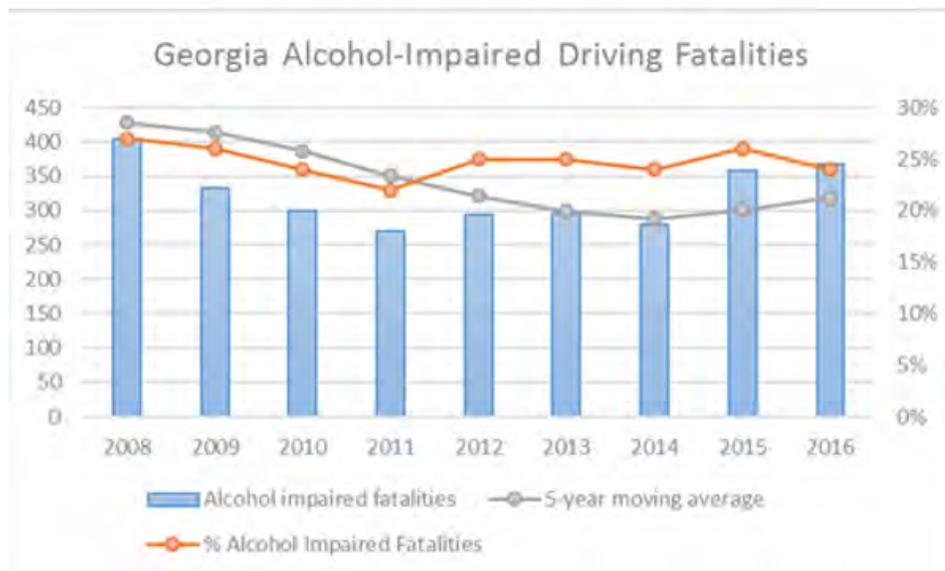

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

The National Highway Traffic Safety Administration (NHTSA) reports that in 2016, 10,497 people were killed in alcohol-impaired driving crashes which averages to 1 alcohol-impaired-driving fatality every fifty minutes. These fatalities account for twenty-eight (28%) percent of all motor vehicle traffic fatalities in the United States. Fatalities due to alcohol-impaired-driving has increased by 1.7 percent from 2015. According to data from NHTSA, in 2015 there were 10,320 fatalities. Nationally, these crashes result in more than \$44 billion in economic costs. A few examples of economic costs include: medical costs, legal/court expenses, and insurance administration.

As indicated in the attached graph, impairment was associated with 368 traffic fatalities in Georgia during 2016. Twenty-four percent of Georgia Drivers who were involved in fatal crashes had a BAC level of .08. Nationally, alcohol-impaired driving rates are 50 percent in both urban and rural. In Georgia, Alcohol-impaired driving rates are very high in urban areas where alcohol establishments are most prevalent. These areas include: Metropolitan Atlanta, Augusta, Savannah, Macon, and Columbus. College towns such as Athens and Valdosta, though not heavily populated, tend to show trends of impaired driving problems as well. NHTSA's findings show that 25- to-34 year olds had the highest percentage (27%) of drivers with BACs of .08 or higher in fatal crashes followed by 21- to 24-year-old drivers (26%).

Georgia's impaired driving statistics have been impacted by the drug culture as reflected in an increase in drug related crashes. The number of law enforcement officers properly trained to identify drug impairment has been limited because of manpower shortages and lack of understanding for the need of this training by the law enforcement community. A companion program to Drug Recognition experts (DRE), Standardized Field Sobriety Testing (SFST). Is experiencing some success although the defense bar has vigorously attacked the Standardized Field Sobriety Test (SFST) process, particularly the portion which deals with Horizontal Gaze Nystagmus (HGN). The primary problem is that many non-traffic enforcement officers are not properly trained in this procedure and their ability to detect, evaluate and help through prosecution efforts is limited.

Georgia's Administrative License Suspension (ALS) law continues to be misused by the defense bar. In assessing the effectiveness of Georgia's Administrative License Suspension procedures for impaired drivers, the initial analysis of Administrative License Suspension (ALS) hearings and data revealed that a large percentage of Administrative License Suspension (ALS) hearings were lost by the state because of the officer's failure to attend hearings. Training proves to be an effective tool to combat Administrative License Suspension (ALS) issues and Georgia will increase its efforts to train law enforcement and Administrative License Suspension (ALS) judges.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)	5 Year	2019	478.0
2019	C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)	5 Year	2019	186.0

Countermeasure strategies

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	High Visibility Enforcement
2019	Drug Recognition Expert (DRE) Training
2019	Alcohol Impairment: Detection, Enforcement and Sanctions

5.2.1 Countermeasure Strategy: High Visibility Enforcement

Program area Impaired Driving (Drug and Alcohol)

Countermeasure strategy High Visibility Enforcement

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's

problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2018, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019. The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will continue to focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

The Governor's Office of Highway Safety created sixteen regional traffic enforcement networks that encompass all 159 Georgia counties. The networks are made up of local and state traffic enforcement officers and prosecutors from each region of the state. The networks are coordinated by a coordinator and an assistant coordinator, both which are full time law enforcement officers volunteering their time and efforts to

highway safety. The dedicated support from these officers, their law enforcement agency and department heads are unsurpassed. The networks meet monthly to provide information, training and networking opportunities to the attending officers. Prosecutors, Judges and non-traditional traffic enforcement agencies such as the Georgia Department of Natural Resources, Department of Corrections and Military Police often attend the meetings and offer assistance for traffic enforcement training and initiatives. The networks are utilized to efficiently mobilize law enforcement statewide for traffic enforcement initiatives. The traffic enforcement networks have become an outstanding networking, training and communication tool for Georgia's traffic enforcement community.

In an effort to communicate legislative updates, court decisions and other pertinent information to traffic enforcement officers across the state, the Governor's Office of Highway Safety in partnership with Emory University has established an email list serve that all participating law enforcement officers can receive up to date traffic enforcement related information. Information is about traffic enforcement policies, legal updates, training opportunities, and other traffic enforcement related information. There are over 800 traffic enforcement officers and prosecutors subscribed to the Georgia Traffic Enforcement Network (GATEN) list serv.

The Governor's Office of Highway Safety recognizes that law enforcement plays an extremely important role in overall highway safety in the State of Georgia. Campaigns such as Click it or Ticket, Operation Zero Tolerance (Drive Sober or Get Pulled Over), and the 100 Days of Summer HEAT (Highway Enforcement of Aggressive Traffic) have proven that high-visibility enforcement of Georgia's traffic laws is the key to saving lives and reducing injuries on Georgia's roadways.

<i>FFY 2019 Traffic Enforcement Mobilizations</i>	<i>Dates</i>
Click it or Ticket	November 16, 2018 – November 25, 2018
Drive Sober or Get Pulled Over	December 18, 2018 – January 3, 2019
Click it or Ticket	May 14, 2019 – June 2, 2019
Drive Sober or Get Pulled Over	June 21, 2019 – July 7, 2019
Drive Sober or Get Pulled Over	August 15, 2019 – September 2, 2019

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The Governor's Office of Highway Safety Thunder Task Force is a Traffic Enforcement Special Response Team coordinated by the Law Enforcement Services Team. This is an evidence-based traffic safety enforcement program to prevent traffic violations, crashes, and injuries in locations most at risk for such incidents. The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with a Thunder Task Force mobilization. The concept is to identify a county or area of the state to deploy the Task Force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the regions with two to three months of high visibility enforcement and earned media. The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process.

A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by Governor's Office of Highway Safety (GOHS), and Georgia Electronic Accident Reporting System (GEARS). The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Law Enforcement Services Division and includes the Georgia State Patrol, Governor's Office of Highway Safety HEAT Units (Highway Enforcement of Aggressive Traffic), Department of Public Safety Motor Carrier Compliance Division (MCCD) and local law enforcement. We also use as much local crash data as available, looking at time of day, location and causation (DUI, Seatbelt, Speed, Motorcycles). The Thunder Task Force is deployed to areas of the state that data indicates unusually high incidences of traffic fatalities and serious injuries. The Task Force identifies the problem areas, and conducts mobilizations using the resources that are needed for these problem areas, such as the Motor Carrier Compliance Division (MCCD), Child Passenger Safety Technicians (CPST), and trained DUI officers. With this continued effort of putting resources where the problems are, the Governor's Office of Highway Safety (GOHS) is able to stabilize the problem with a proven effective and cost efficient method of saving lives, therefore reducing the projected numbers of annual traffic fatalities in the State of Georgia. While conducting a Thunder Task Force Mobilization, the enforcement plan is adjusted on a continuous basis, using current local data provided by the local jurisdiction. 60 to 90 days after the mobilizations end, the Task Force typically returns to the jurisdiction for a follow up visit and evaluation.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with an Thunder Task Force mobilization. A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by GOHS, and GEARS. The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Services Division and includes the Georgia State Patrol, GOHS HEAT Units (Highway Enforcement of Aggressive Traffic), DPS Motor Carrier Compliance Division and Local Law Enforcement to conduct the high visibility enforcement during the three month effort.

The concept is to identify a county or area of the state to deploy the task force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the region with high visibility enforcement and earned media. The continuous earned media and the overwhelming high visibility enforcement during the enforcement periods gives the perception that the task force is mobilized during the entire summer.

The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process. With this continued effort of putting resources where the problems are, then moving to the next location once the problem is stabilized has proven to be a very effective and cost efficient method of saving lives and reducing the projected numbers of annual traffic fatalities in the State of Georgia.

The Thunder Task Force concept was piloted in Savannah-Chatham County during April, May and June of 2007.

The three month program (12 operational days) had the following results:

- 96 Drunk Drivers were arrested.
- 175 Suspended or Revoked License arrests.
- 1617 Other traffic Violations.
- 75 Drug offenders and fugitives arrested
- 4732 Total Arrests or citations

During the three month period, the Thunder Task Force reduced fatal crashes in Savannah-Chatham County by more than **58%**.

The GOHS Thunder Task Force has found a winning recipe; data focused, cost efficient, high visibility enforcement, combined with an extensive earned media message. The result is lives saved on Georgia roadways. In every location the Task Force has been deployed we have seen a reduction in Crashes and Fatalities.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
SC-01	Train 1,400 law enforcement officers in speed detection	
SC-02	Law enforcement will conduct 47,140 speed contacts.	
AL-01	Conduct three (3) waves of statewide enforcement with the "Drive Sober or Get Pulled Over." campaign.	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-02	Law enforcement will conduct 7,704 impaired driver contacts	Alcohol Impairment: Detection, Enforcement and Sanctions

5.2.1.1 Planned Activity: Train 1,400 law enforcement officers in speed detection

Planned activity name Train 1,400 law enforcement officers in speed detection

Planned activity number SC-01

Primary countermeasure strategy

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

5.2.2 Countermeasure Strategy: Drug Recognition Expert (DRE) Training

Program area Impaired Driving (Drug and Alcohol)

Countermeasure strategy Drug Recognition Expert (DRE) Training

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The Drug Recognition Expert (DRE) Program delivered by the Georgia Public Safety Training Center Police Academy continues to offer DUI enforcement training programs to all law enforcement agencies within the State of Georgia. The current curriculum includes the following courses; Drug Recognition Expert (DRE), DRE Final Knowledge Exam, DRE Instructor, DRE Recertification, DUI Detection and Standardized Field Sobriety Testing (SFST), DUI/SFST Update, DUI/SFST Instructor, DUI/SFST Instructor Update, Advanced Roadside Impaired Driving Enforcement (ARIDE), DUI Case Preparation and Courtroom Presentation, DUI Case Report Writing (developing online format) and Advanced Traffic Law. Based on current trends in DUI enforcement, courses are updated and developed to reflect the training needs of proactive law enforcement agencies.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The Georgia Police Academy Division of the Georgia Public Safety Training Centers Impaired Driving (DRE/SFST) training programs continues to set the example in providing exceptional training to public safety personnel throughout the State of Georgia. This training program provides officers with specialized training in the areas of detecting, identifying, and removing the alcohol/drug impaired driver from the state's highways. In addition, these specialized training programs provide the officers with the ability to successfully document the elements of an impaired driving arrest and to provide clear, articulate testimony in order to successfully prosecute these cases in a court of law.

The program consists of several phases of classroom training, followed by field training, and a comprehensive final knowledge examination at the conclusion of training. Participants will receive classroom training on proper drug evaluation techniques, drug physiology, drug classifications, symptoms of drug use and abuse, and legal considerations. Students must successfully complete the classroom training portion in order to transition into field certification training. Field certification training consists of six days during which time students will be required to conduct twelve evaluations each on subjects who are suspected of being under the influence of alcohol/drugs. Once the students have completed a minimum number of field evaluations, they will be eligible to take the Final Knowledge Examination which consists of a comprehensive written examination consisting of all material covered in the classroom and in the field. After having successfully completed EACH phase of training, students will be awarded 160 hours POST credit and will be certified as Drug Recognition Experts through the International Association of Chiefs of Police. Upon completion of the drug influence evaluation officers are required to enter data into the national tracking database in an effort to identify current drug trends, the prevalence of poly drug use, and documenting incidents specific to driving under the influence of drugs other than alcohol or in combination with alcohol.

The DRE Program delivered by the GPSTC Police Academy Divisions Traffic Section continues to offer DUI enforcement training programs to all law enforcement agencies within the state of Georgia. Also, with the cooperation from agencies in surrounding states, GPSTC has provided training assistance to out of state law enforcement professionals.

Our current curriculum includes the following courses; Drug Recognition Expert (DRE), DRE Instructor, DRE Recertification, DRE Final Knowledge Exam, DUI Detection and Standardized Field Sobriety Testing (SFST), DUI/SFST Update, DUI/SFST Instructor, DUI/SFST Instructor Update, Advanced Roadside Impaired Driving Enforcement (ARIDE), DUI Case Preparation and Courtroom Presentation, and Advanced Traffic Law. Based on current trends in DUI enforcement, new courses will be developed to reflect the training needs of proactive law enforcement agencies. Increasing demands for these training programs reflect the unbridled support of the agencies we are mandated to train. See attached documentation for onsite/offsite data from years 2014 through 2016. The current number of IACP certified Drug Recognition Experts is 295.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Georgia's Drug Recognition Expert course has proven effective and now has close to 300 DRE's in the field. They are not only beneficial in their local area, often they are asked to attend The Thunder Task Force to assist with the checkpoints. In FFY2017, 51 DRE's were trained by the Georgia Public Safety Training Center. This program will be continued into FFY2019.

5.2.3 Countermeasure Strategy: Alcohol Impairment: Detection, Enforcement and Sanctions

Program area Motorcycle Safety

Countermeasure strategy Alcohol Impairment: Detection, Enforcement and Sanctions

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under §

1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

Yes

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The National Highway Traffic Safety Administration (NHTSA) reports that in 2016, 37,461 people were killed in motor vehicle traffic crashes in the United States, of which 10,497 (28%) were alcohol-related. Every fifty minutes in America, someone is killed in an alcohol-related crash. Nationally, these crashes result in more than \$44 billion in economic costs on an annual basis.

In Georgia during the 2016 calendar year, over 60 percent of all motorcyclist crashes occurred in metropolitan areas including Atlanta, Gainesville, Augusta, Savannah, and Columbus. According to FARS data, Fulton, DeKalb, Cobb, and Gwinnett counties had the highest number of motorcycle

crashes in 2016. The attached charts show FARS data from the 2016 calendar year.

Alcohol is a significant risk factor among Georgia motorcycle rider fatalities. Every year since 2008, alcohol related motorcycle fatalities showed a steady increase in Georgia. According to the Fatality Analysis Reporting System in 2016, 21 percent (35) of the motorcycle riders killed in fatal crashes (167) contained a BAC at or above a .08. This is less than the national level of 1,259 (25%) of 4,950 motorcycle riders who were alcohol impaired (BAC of .08 g/dL or higher).

In 2016, Georgia has an alcohol reporting rate of 42% -- 42% of all drivers involved in fatal crashes were tested for alcohol consumption with recorded BAC. This is the highest reporting percentage in Georgia in the previous 5 years. In Georgia, 2,150 drivers were involved in fatal crashes, and 900 drivers were tested. The highest alcohol testing occurred among the fatally injured (62%), followed by Non-Incapacitating Evident Injured drivers (23%).

Alcohol Impaired Driving Motor Vehicle Fatalities in Georgia	Year					
	2011	2012	2013	2014	2015	2016
Alcohol-Impaired Driving Fatalities (BAC=.08+)**	271	295	296	279	358	368
Annual Percent Change	-9%	9%	0%	-6%	28%	3%

As indicated above, alcohol was associated with 368 highway fatalities in Georgia during 2016. This equates to twenty-four percent (24%) of Georgia's overall fatalities. Even with stricter laws, high visibility law enforcement, and increased public information and education (PI&E) programs, the number of impaired driving crashes, injuries and fatalities remains unacceptable. The chance of a crash being fatal is six times higher if exposed to impaired driving when compared to those not related to alcohol or drugs.

As presented below, The U.S. and Georgia had an increase in overall fatalities as well as increase in alcohol related fatalities. Data shows from 2011-2016, Georgia experienced increase in overall crash fatalities of 328 (27%) and an increase of 97 (36%) in alcohol-related traffic deaths. These numbers indicate that Georgia should emphasize preventative measures for countering the problems of driving under the influence of alcohol.

MEASURE	REGION	2011	2012	2013	2014	2015	2016
Total Fatalities	Georgia	1,226	1,192	1,179	1,164	1,430	1,554
	US	32,479	33,782	32,894	32,675	35,092	37,461
Alcohol Related-Fatalities	Georgia	271	295	296	279	358	368
	US	9,865	10,336	10,110	9,967	10,265	10,497
% of Alcohol Related Fatalities	Georgia	22%	25%	25%	24%	25%	24%
	US	30%	31%	31%	31%	29%	28%

Impaired Driving Enforcement – H.E.A.T.

Aggressive traffic has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. The Governor's Office of Highway Safety's (GOHS) impaired driving program is geared toward jurisdictions where the incidences of impaired crashes among motorist and motorcyclist are the highest within the State of Georgia.

Since 2002, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form H.E.A.T. (Highway Enforcement of Aggressive Traffic). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has continued to grow with agencies being added across the state. In FFY 2018, GOHS funded eighteen (18) agencies across the

state where speed and impaired driving crashes and fatalities are consistently high. The Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019.

The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

Alcohol and Other Drug Countermeasures

Governor's Office of Highway Safety (GOHS) will administer and manage alcohol programs (funding 405 (f)). This includes but is not limited to: overseeing in-house grants and contracts, seeking and managing grants that foster the agency's mission, collecting and analyzing data, seeking partnerships in the communities, and to providing training and public information necessary to ensure proper and efficient use of federal highway safety funds. The public information will include the creation of brochures, collateral messaging items and effective communication with the media and public which will be available.

The State of Georgia maintains an annual comprehensive plan for conducting high visibility impaired driving enforcement and that plan will continue for the remainder of FY 2018 and FY 2019. The plan includes the following:

1. Strategic impaired driving enforcement which is designed to reach motorcyclist and motorist in geographic subdivisions that account for a majority of the state's population and half of the state's alcohol-related fatalities. Please see list of counties in the state ranked from highest to lowest in impaired driving related crashes for all vehicle types.
2. Three statewide impaired driving mobilizations that occur during the holidays of July 4th, Labor Day (September), and December holidays.
3. Strategic mobilizations for geographic subdivisions that show abnormal increases in traffic injuries and/or deaths (Thunder Task Force).

Georgia law enforcement agencies will participate in four impaired driving mobilizations by conducting checkpoints and/or saturation patrols on at least four nights during the national impaired driving campaigns as well as on a quarterly basis throughout FY 2019.

The four (4) impaired driving mobilizations are as follows:

1. December 2018/New Year 2019
2. Thunder Task Force (Three Dates TBD)
3. July Fourth 2019
4. Labor Day 2019

Statewide Impaired Driving Mobilization

Georgia participates in three annual statewide mobilizations to combat impaired driving. These campaigns occur during the Fourth of July, Labor Day, and December holidays. Georgia utilizes its Traffic Enforcement Networks (TEN) which provide state and local law enforcement officers with a structured means of collaborating regionally on their unique highway safety priorities with emphasis on impaired driving. They also provide the ability to communicate regional highway safety priorities up the chain-of-command, to reach local and state policy makers, community leaders, legislators and others. The 16 regional networks are instrumental in carrying out this statewide impaired-driving enforcement campaign. The traffic enforcement networks work closely with The Georgia State Patrol.

Strategic Thunder Mobilizations

The Governor's Office of Highway Safety has established a taskforce consisting of state wide officers (H.E.A.T.), troopers and sheriff's deputies. The Governor's Office of Highway Safety (GOHS) "Thunder" taskforce is a specialized traffic enforcement unit designed to help Georgia communities combat unusually high amount of traffic crashes, injuries and fatalities. Their mission is to reduce highway deaths and serious injuries by changing the illegal driving behaviors of motorcyclist and motorists in the region through an increased law enforcement presence in those high crash corridors. The task force was established in 2007 and continues to be very effective in reducing highway crashes, injuries and deaths.

As you can see alcohol is also a significant risk factor for Georgia motorcycle riders. Every year since 1998, alcohol related motorcycle fatalities have been increasing in Georgia. According to the National Highway Traffic Safety Administration (NHTSA), in 2016, twenty-five percent (25%) of all fatally

injured motorcycle riders had BAC levels of .08 g/dL or higher. Across the U.S., the percentage with BAC .08 g/dL or above was highest for fatally injured motorcycle riders among two age groups, 35-39 (38%), followed by 45-49 (37%). Nighttime single vehicle crashes are the most dangerous for impaired motorcycle riders. Fifty-five percent (55%) of those type crashes result in the death of a motorcyclist.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2018, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019. The Highway Enforcement of Aggressive Traffic (H.E.A.T.) Units were established for the purpose of reducing the number of driving incidents. This project will continue to focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

Georgia will continue to fund data driven projects that focus on impaired driving enforcement and education. The Highway Enforcement of Aggressive Traffic Units operate in a majority of the counties where impaired motorcycle crashes occurred in 2016. The chart below describes the FFY2018 grantees, grant amounts, counties represented, and the total fatalities, impaired driving fatalities, and motorcycle fatalities. Georgia plans to fund projects like HEAT again in 2019.

5.3 Program Area: Teen Traffic Safety Program

Program area type Teen Traffic Safety Program

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

Yes

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification

The National Highway Traffic Safety Administration (NHTSA) reports that in 2016, 10,497 people were killed in alcohol-impaired driving crashes which averages to 1 alcohol-impaired-driving fatality every fifty minutes. These fatalities account for twenty-eight (28%) percent of all motor vehicle traffic fatalities in the United States. Fatalities due to alcohol-impaired-driving has increased by 1.7 percent from 2015. According to data from NHTSA, in 2015 there were 10,320 fatalities. Nationally, these crashes result in more than \$44 billion in economic costs. A few examples of economic costs include: medical costs, legal/court expenses, and insurance administration.

As indicated in the graph above, Georgia motor vehicle fatalities resulted in 1,554. Twenty-four percent of Georgia Drivers who were involved in fatal crashes had a BAC level of .08. Nationally, alcohol-impaired driving rates are 50 percent in both urban and rural. In Georgia, Alcohol-impaired driving rates are very high in urban areas where alcohol establishments are most prevalent. These areas include: Metropolitan Atlanta, Augusta, Savannah, Macon, and Columbus. College towns such as Athens and Valdosta, though not heavily populated, tend to show trends of impaired driving problems as well. NHTSA's findings show that 25- to-34 year olds had the highest percentage (27%) of drivers with BACs of .08 or higher in fatal crashes followed by 21- to 24-year-old drivers (26%).

Georgia's impaired driving statistics have been impacted by the drug culture as reflected in an increase in drug related crashes. The number of law enforcement officers properly trained to identify drug impairment has been limited because of manpower shortages and lack of understanding for the need of this training by the law enforcement community. A companion program to Drug Recognition experts (DRE), Standardized Field Sobriety Testing (SFST). Is experiencing some success although the defense bar has vigorously attacked the Standardized Field Sobriety Test (SFST) process, particularly the portion which deals with Horizontal Gaze Nystagmus 9 HGN). The primary problem is that many non-traffic enforcement officers are not properly trained in this procedure and their ability to detect, evaluate and help through prosecution efforts is limited.

Georgia's Administrative License Suspension (ALS) law continues to be misused by the defense bar. In assessing the effectiveness of Georgia's Administrative License Suspension procedures for impaired drivers, the initial analysis of Administrative License Suspension (ALS) hearings and data revealed that a large percentage of Administrative License Suspension (ALS) hearings were lost by the state because of the officer's failure to attend hearings. Training proves to be an effective tool to combat Administrative License Suspension (ALS) issues and Georgia will increase its efforts to train law enforcement and Administrative License Suspension (ALS) judges.

Teenage and Young Adult Drivers (Under age 21)

In 2016, there were a total of 192 motor vehicle fatalities among young people under age 21. Of those, 92 were driving and lost their lives, 84 were passengers, and 16 were non-occupants (pedestrians or bicyclists). The number of young drivers under the age 21 involved in fatal crashes has unsteadily decreased since 2008. In 2008, young drivers represented 11% of all drivers involved in fatal crashes (221 young drivers). However in 2016, young drivers represented 9% of all drivers involved in fatal crashes (188 young drivers). Although the number of young drivers involved in fatal crashes increased by 20 in 2016, the number remains lower than in 2008.

GA Young Drivers (Under Age 21) Involved in Fatal Crashes

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)	5 Year	2019	478.0
2019	C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)	5 Year	2019	186.0
2019	B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)	5 Year	2019	97.8

Countermeasure strategies

Select existing countermeasure strategies below and/or click Add New to enter and select countermeasure strategies to submit for program area.

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	Graduated driver licensing (GDL)

5.3.1 Countermeasure Strategy: Graduated driver licensing (GDL)

Program area Teen Traffic Safety Program

Countermeasure strategy Graduated driver licensing (GDL)

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

In 2016, there were a total of 192 motor vehicle fatalities involving young drivers under age 21. Of those, 92 were driving and lost their lives, 84 were passengers, and 16 were non-occupants (pedestrians or bicyclists). The number of young drivers in fatal crashes has unsteadily decreased since 2008 when 221 (11% of all drivers) people under age 21 lost their lives. In 2016, this number was 188 (9% of all drivers), a 15% decrease from 2008.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Georgia's Alcohol and Drug Awareness Program

In accordance with O.C.G.A. Code Section 40-5-22, all Georgia teens under the age of 18 years are statutorily required to successfully complete an Alcohol and Drug Awareness Program (ADAP) as prescribed by O.C.G.A. Code Section 20-2-142(b) if they wish to obtain a Class D Georgia driver's license. Georgia ADAP is jointly administered by the Department of Driver Services (DDS) and Department of Education (DOE) and consists of a standardized curriculum designed to not only educate Georgia teens about the effects of alcohol and drugs, but also highlight their effects on a person's ability to safely operate a motor vehicle.

Teenage and Adult Driver Responsibility Act (TADRA)

TADRA directly addresses the leading killer of our young people – traffic crashes. TADRA is an intense, three-step educational process that allows the young driver to gain more experience behind the wheel: Step 1 is an instructional permit granted to 15-year-olds upon successfully passing a written examination. The driver with this permit must be accompanied by a passenger who is at least 21 years old and possesses a valid Class C driver's license at all times while driving. Step 2 is an intermediate license granted to drivers between 16 and 18 years of age who have held an Instructional Permit for 12 months and passed a driving test. The Intermediate License has several restrictions. Step 3 is a full driver's license granted to drivers ages 18 years of age and older who hold the class D license and have incurred no major traffic convictions during the previous 12 months. The law significantly changes the way young motorists earn and maintain the privilege of driving by providing a controlled means for new drivers to gain experience and by reducing high-risk driving situations. While the law does focus on young drivers, it also contains important provisions that affect drivers over 21, particularly in the area of DUI prevention and enforcement.

High-risk behavior, texting while driving, peer pressure, inexperience, limited use or no use of occupant safety devices, lack of proper driving information and education are a few of the problems that our youth face while driving on Georgia's roadways. In an effort to address these issues, the Teenage and Adult Driver Responsibility Act (TADRA) was enacted on July 1, 1997 to reduce the number of lives lost in crashes involving young drivers. Since the enactment of the Teenage and Adult Driver Responsibility Act (TADRA), there have been a number of legislative changes that have strengthened the law and consequently reduced teen driver deaths.

Governor's Commission on Teen Driving

In an effort to reduce crashes among Georgia's youngest drivers, Governor's Office of Highway Safety (GOHS) Director Harris Blackwood developed the idea of forming a teen driving commission that, for the first time in the nation, would be composed solely of teens. In August 2012, Georgia Governor Nathan Deal announced the formation of the Governor's Commission on Teen Driving. Composed solely of teens between 15 and 18 years of age, the 22-member Commission (selected via an application process administered by the Governor's Office of Highway Safety) was tasked with identifying strategies to educate their peers about the dangers of impaired driving, texting and driving, and driving distracted. The Commission held its introductory meeting October 24 and 25, 2012 at the State Capitol in Atlanta. During those two days, the Commission members heard from law enforcement, safety and licensing officials, as well as met with Governor Deal. They formed their subcommittees and began the work of determining how best to reach their peers with critical safety messages. The subcommittees worked over the next five months, via conference call and online, to formulate their recommendations. The Commission members reconvened at Lake Lanier in Buford, Georgia to finalize and announce their recommendations. Their suggestions included a call to reform the state's Alcohol and Drug Awareness Program in high schools.

Other recommendations included marking teen driving restrictions on licenses, imposing community service punishments to replace fines, encouraging high schools to use No Texting pledges in order for students to receive parking privileges, placing signage on Georgia roadways reminding motorists of Caleb's Law, and strengthening texting penalties. Throughout FFY 2014, several Commission Members participated in a statewide teen driver safety media tour with Director Blackwood during Teen Driver Safety Week, assisted in the SHSP Young Adult Driver Task Team, and served as teen ambassadors during the GOHS Youth and Young Adult Highway Safety Leadership Conference.

In FFY 2019, the Governor's Office of Highway Safety will continue working to identify opportunities to implement the recommendations set forth by the Governor's Commission on Teen Driving. The Governor's Office of Highway Safety will continue to leverage partnerships with the Departments of Driver Services, Transportation and Education, law enforcement agencies, the Georgia Legislature, and statewide media outlets to promote and advance the Commission's work.

Student's Against Destructive Decisions (SADD)

In this era of science-based prevention and increased accountability, Students Against Destructive Decisions (SADD) is strengthening and documenting the effectiveness of its activities and programming. The strong name recognition and expansive chapter base put Students Against Destructive Decisions (SADD) at an advantage to take a leadership role in implementing model prevention practices within local communities across the country. One of the foremost principles of prevention consistently cited is positive youth development, the very essence of Students Against Destructive Decisions (SADD). Through Students Against Destructive Decisions (SADD) chapters, young people of all ages and backgrounds become skilled, educated advocates for youth initiatives developed by local, state and national organizations working to promote youth safety and health. Students Against Destructive Decisions (SADD) students are valued as contributing members of their communities.

Students Against Destructive Decisions (SADD) contains elements of scientifically grounded prevention principles recognized and endorsed by National Institute for Drug Abuse (NIDA), Center for Substance Abuse Prevention (CSAP), Center for the Application of Prevention Technologies (CAPT), and National Institute of Mental Health (NIMH).

In FFY2018, The Governor's Office of Highway Safety (GOHS) targeted 15-18 year olds by supporting 33 high school Students Against Destructive Decisions (SADD) chapters throughout the state of Georgia. Students Against Destructive Decisions (SADD) comprises so many different aspects – an idea, a family, a youth movement, and a national nonprofit organization. When considered at its most grassroots level, Students Against Destructive Decisions (SADD) is a network of 10,000 student-run chapters all over the country.

Each of those chapters' function differently, moving at its own pace and with its unique assets to address the issues that are critical to its school and community. But all Students Against Destructive Decisions (SADD) chapters have a common target: to empower young people to help their peers live safer, healthier, more positive lives.

For more than a quarter-century, Students Against Destructive Decisions (SADD) has been recognized as a national leader in alcohol and drug education and prevention. What began as a small-town, grass-root response to the tragedy of two impaired driving crashes and the resulting deaths of two teenage students, became a nationwide organization fueled by millions of young people across the country.

Georgia Young Adult Program (GYAP)

The Governor's Office of Highway Safety (GOHS) recognizes the highway safety issues involving young adult drivers and partners with colleges and universities throughout the state to implement the Georgia Young Adult Program (GYAP). The mission of the Georgia Young Adult Program (GYAP) is to promote education and awareness to young adults about highway safety issues, such as but not limited to; underage drinking, impaired driving, destructive decisions, and other high-risk behaviors, in order to decrease crashes, injuries, and fatalities. This program is achieved by training peer-educators, providing educational programs to the schools, and training to campus students, faculty and staff.

In FFY2018, GOHS funded 14 college peer-education programs through the Georgia Young Adult Program. Grantees at Georgia's colleges and universities conducted school year activities focused on educating students and faculty about alcohol and highway safety. Activities include collection of highway safety statistics on campus, reviewing and updating campus alcohol policies, distributing GOHS brochures and social media messaging in conjunction with statewide/nationwide campaigns, and conducting alcohol-specific peer health education training. The program focuses primarily on reducing impaired driving among young adult drivers. Schools coordinated prevention programs including DUI simulators, highway safety speakers, peer-education trainings, and pledging events surrounding events such as National Collegiate Alcohol Awareness Week, Safe Spring Break, graduation, summer orientation, football tailgates, Halloween, and St. Patrick's Day.

Target Population:

Because the problems of alcohol impaired driving have the potential to affect all motorists, the target population is the motoring public to include young, inexperienced drivers ages 16 - 24.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Graduated driver licensing policies serve to delay full licensure and then limit exposure to the highest risk conditions after licensure, allowing young drivers to gain experience under less risky driving conditions. A similar strategy may be needed to guide parents. Researchers from the National Institute of Child Health and Human Development reports that parents do not appear to appreciate just how risky driving is for novice drivers and tend to exert less control over their teenage children driving than might be expected. Recent research has demonstrated that simple motivational strategies can persuade parents to adopt driving agreements and impose greater restrictions on teen driving. Several studies have shown that greater parent involvement is associated with less teen risky driving behavior.

The Teenage and Adult Driver Responsibility Act (TADRA) is helping tremendously to reduce the carnage, but still too many young drivers are dying. Because of this, the Governor's Office of Highway Safety (GOHS) is promoting proven countermeasures (both legal requirements and recommended best practices) for this specific audience. In our research of effective methods for addressing the safety of young drivers, we have discovered that several states are recommending parents establish short-term "rules of the road" contracts with their new teen driver. Research conducted by Dr. Bruce Simons-Morton and others at the National Institute of Child Health and Human Development demonstrated that such parental intervention positively impacts youth by influencing them to choose less risky behaviors.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
TSP-01	Provide funds to Georgia colleges to educate students on the dangers of impaired driving	
TSP-02	Provide funds to Georgia high schools to operate SADD (Students Against Destructive Decisions) programs	

5.3.1.1 Planned Activity: Provide funds to Georgia colleges to educate students on the dangers of impaired driving

Planned activity name Provide funds to Georgia colleges to educate students on the dangers of impaired driving

Planned activity number TSP-01

Primary countermeasure strategy

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d),

that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

Yes

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

5.4 Program Area: Police Traffic Services

Program area type Police Traffic Services

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

Yes

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

[Problem Identification and Program Justification](#)

For several years, the rate of highway safety fatalities in Georgia declined. However, Georgia saw an increase in the number of fatal crashes in 2016. Stringent, high visibility enforcement and education must be continued if we are to reverse this trend. Through more concentrated high visibility enforcement campaigns such as "Click It or Ticket", "Drive Sober or Get Pulled Over", "U Text U Drive U Pay" the rates are expected to drop.

The Governor's Office of Highway Safety recognizes that law enforcement plays an important role in overall highway safety in the State of Georgia. Campaigns such as "Drive Sober or Get Pulled Over", "Click it or Ticket", "Operation Southern Shield", and "Click or Ticket Border to Border" have proven that high visibility enforcement is the key to saving lives on Georgia's roadways.

Georgia has a total of 46,328 sworn law enforcement officers employed by a total of 909 law enforcement agencies, covering 159 counties and countless municipalities and college campuses.

Effective communication is crucial in penetrating and mobilizing Georgia's law enforcement. Georgia's law enforcement agencies, like many others across the country are understaffed and due to budget constraints, do not possess the tools necessary to effectively enforce Georgia's traffic laws. The challenge is to market traffic enforcement initiatives to law enforcement command staff and patrol officers on the importance of high visibility enforcement and the impact on highway safety. This same message must also be conveyed to the prosecutors and judicial communities. Changing high-risk driving behavior through public education, strict traffic law enforcement, efficient prosecution and effective sentencing is the key to reducing Georgia's traffic fatalities and injuries.

Law enforcement agencies must be provided adequate tools, training and networking opportunities in an effort to efficiently and effectively enforce Georgia's traffic laws and educate the public on highway safety issues. It is also necessary to provide law enforcement agencies, as well as law enforcement officers, with the specialized equipment needed to conduct effective traffic safety operations. Funding for printing of brochures, posters, banners and highway safety materials is necessary in order for these agencies to disseminate pertinent information to the public regarding enforcement initiatives and highway safety campaigns.

Adequate funding continues to be a problem for law enforcement agencies, large and small. Traffic enforcement is a specialized field, requiring specialized equipment for effective enforcement and prosecution. Funding is necessary to provide agencies with the proper equipment, training and support to effectively enforce Georgia's traffic laws, thereby saving countless lives on Georgia's roadways.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)	5 Year	2019	97.8

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	High Visibility Enforcement

5.4.1 Countermeasure Strategy: High Visibility Enforcement

Program area Impaired Driving (Drug and Alcohol)

Countermeasure strategy High Visibility Enforcement

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2018, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019. The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will continue to focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

The Governor's Office of Highway Safety created sixteen regional traffic enforcement networks that encompass all 159 Georgia counties. The networks are made up of local and state traffic enforcement officers and prosecutors from each region of the state. The networks are coordinated by a coordinator and an assistant coordinator, both which are full time law enforcement officers volunteering their time and efforts to highway safety. The dedicated support from these officers, their law enforcement agency and department heads are unsurpassed. The networks meet monthly to provide information, training and networking opportunities to the attending officers. Prosecutors, Judges and non-traditional traffic enforcement agencies such as the Georgia Department of Natural Resources, Department of Corrections and Military Police often attend the meetings and offer assistance for traffic enforcement training and initiatives. The networks are utilized to efficiently mobilize law enforcement statewide for traffic enforcement initiatives. The traffic enforcement networks have become an outstanding networking, training and communication tool for Georgia's traffic enforcement community.

In an effort to communicate legislative updates, court decisions and other pertinent information to traffic enforcement officers across the state, the Governor's Office of Highway Safety in partnership with Emory University has established an email list serve that all participating law enforcement officers can receive up to date traffic enforcement related information. Information is about traffic enforcement policies, legal updates, training opportunities, and other traffic enforcement related information. There are over 800 traffic enforcement officers and prosecutors subscribed to the Georgia Traffic Enforcement Network (GATEN) list serv.

The Governor's Office of Highway Safety recognizes that law enforcement plays an extremely important role in overall highway safety in the State of Georgia. Campaigns such as Click it or Ticket, Operation Zero Tolerance (Drive Sober or Get Pulled Over), and the 100 Days of Summer HEAT (Highway Enforcement of Aggressive Traffic) have proven that high-visibility enforcement of Georgia's traffic laws is the key to saving lives and reducing injuries on Georgia's roadways.

<i>FFY 2019 Traffic Enforcement Mobilizations</i>	<i>Dates</i>
Click it or Ticket	November 16, 2018 – November 25, 2018
Drive Sober or Get Pulled Over	December 18, 2018 – January 3, 2019
Click it or Ticket	May 14, 2019 – June 2, 2019
Drive Sober or Get Pulled Over	June 21, 2019 – July 7, 2019
Drive Sober or Get Pulled Over	August 15, 2019 – September 2, 2019

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The Governor's Office of Highway Safety Thunder Task Force is a Traffic Enforcement Special Response Team coordinated by the Law Enforcement Services Team. This is an evidence-based traffic safety enforcement program to prevent traffic violations, crashes, and injuries in locations most at risk for such incidents. The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with a Thunder Task Force mobilization. The concept is to identify a county or area of the state to deploy the Task Force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the regions with two to three months of high visibility enforcement and earned media. The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process.

A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by Governor's Office of Highway Safety (GOHS), and Georgia Electronic Accident Reporting System (GEARS). The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Law Enforcement Services Division and includes the Georgia State Patrol, Governor's Office of Highway Safety HEAT Units (Highway Enforcement of Aggressive Traffic), Department of Public Safety Motor Carrier Compliance Division (MCCD) and local law enforcement. We also use as much local crash data as available, looking at time of day, location and causation (DUI, Seatbelt, Speed, Motorcycles). The Thunder Task Force is deployed to areas of the state that data indicates unusually high incidences of traffic fatalities and serious injuries. The Task Force identifies the problem areas, and conducts mobilizations using the resources that are needed for these problem areas, such as the Motor Carrier Compliance Division (MCCD), Child Passenger Safety Technicians (CPST), and trained DUI officers. With this continued effort of putting resources where the problems are, the Governor's Office of Highway Safety (GOHS) is able to stabilize the problem with a proven effective and cost efficient method of saving lives, therefore reducing the projected numbers of annual traffic fatalities in the State of Georgia. While conducting a Thunder Task Force Mobilization, the enforcement plan is adjusted on a continuous basis, using current local data provided by the local jurisdiction. 60 to 90 days after the mobilizations end, the Task Force typically returns to the jurisdiction for a follow up visit and evaluation.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with an Thunder Task Force mobilization. A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by GOHS, and GEARS. The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Services Division and includes the Georgia State Patrol, GOHS HEAT Units (Highway Enforcement of Aggressive Traffic), DPS Motor Carrier Compliance Division and Local Law Enforcement to conduct the high visibility enforcement during the three month effort.

The concept is to identify a county or area of the state to deploy the task force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the region with high visibility enforcement and earned media. The continuous earned media and the overwhelming high visibility enforcement during the enforcement periods gives the perception that the task force is mobilized during the entire summer.

The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process. With this continued effort of putting resources where the problems are, then moving to the next location once the problem is stabilized has proven to be a very effective and cost efficient method of saving lives and reducing the projected numbers of annual traffic fatalities in the State of Georgia.

The Thunder Task Force concept was piloted in Savannah-Chatham County during April, May and June of 2007.

The three month program (12 operational days) had the following results:

- 96 Drunk Drivers were arrested.
- 175 Suspended or Revoked License arrests.
- 1617 Other traffic Violations.
- 75 Drug offenders and fugitives arrested
- 4732 Total Arrests or citations

During the three month period, the Thunder Task Force reduced fatal crashes in Savannah-Chatham County by more than **58%**.

The GOHS Thunder Task Force has found a winning recipe; data focused, cost efficient, high visibility enforcement, combined with an extensive earned media message. The result is lives saved on Georgia roadways. In every location the Task Force has been deployed we have seen a reduction in Crashes and Fatalities.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
SC-01	Train 1,400 law enforcement officers in speed detection	
SC-02	Law enforcement will conduct 47,140 speed contacts.	
AL-01	Conduct three (3) waves of statewide enforcement with the "Drive Sober or Get Pulled Over." campaign.	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-02	Law enforcement will conduct 7,704 impaired driver contacts	Alcohol Impairment: Detection, Enforcement and Sanctions
PT-06	Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects	High Visibility Enforcement

5.4.1.1 Planned Activity: Train 1,400 law enforcement officers in speed detection

Planned activity name Train 1,400 law enforcement officers in speed detection

Planned activity number SC-01

Primary countermeasure strategy

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active

network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

Training to law enforcement focusing on reducing serious injury and fatality related crashes through proactive speed enforcement training programs.

5.4.2 Countermeasure Strategy: Alcohol Impairment: Detection, Enforcement and Sanctions

Program area Motorcycle Safety

Countermeasure strategy Alcohol Impairment: Detection, Enforcement and Sanctions

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under §

1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

Yes

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The National Highway Traffic Safety Administration (NHTSA) reports that in 2016, 37,461 people were killed in motor vehicle traffic crashes in the United States, of which 10,497 (28%) were alcohol-related. Every fifty minutes in America, someone is killed in an alcohol-related crash. Nationally, these crashes result in more than \$44 billion in economic costs on an annual basis.

In Georgia during the 2016 calendar year, over 60 percent of all motorcyclist crashes occurred in metropolitan areas including Atlanta, Gainesville, Augusta, Savannah, and Columbus. According to FARS data, Fulton, DeKalb, Cobb, and Gwinnett counties had the highest number of motorcycle

crashes in 2016. The attached charts show FARS data from the 2016 calendar year.

Alcohol is a significant risk factor among Georgia motorcycle rider fatalities. Every year since 2008, alcohol related motorcycle fatalities showed a steady increase in Georgia. According to the Fatality Analysis Reporting System in 2016, 21 percent (35) of the motorcycle riders killed in fatal crashes (167) contained a BAC at or above a .08. This is less than the national level of 1,259 (25%) of 4,950 motorcycle riders who were alcohol impaired (BAC of .08 g/dL or higher).

In 2016, Georgia has an alcohol reporting rate of 42% -- 42% of all drivers involved in fatal crashes were tested for alcohol consumption with recorded BAC. This is the highest reporting percentage in Georgia in the previous 5 years. In Georgia, 2,150 drivers were involved in fatal crashes, and 900 drivers were tested. The highest alcohol testing occurred among the fatally injured (62%), followed by Non-Incapacitating Evident Injured drivers (23%).

Alcohol Impaired Driving Motor Vehicle Fatalities in Georgia	Year					
	2011	2012	2013	2014	2015	2016
Alcohol-Impaired Driving Fatalities (BAC=.08+)**	271	295	296	279	358	368
Annual Percent Change	-9%	9%	0%	-6%	28%	3%

As indicated above, alcohol was associated with 368 highway fatalities in Georgia during 2016. This equates to twenty-four percent (24%) of Georgia's overall fatalities. Even with stricter laws, high visibility law enforcement, and increased public information and education (PI&E) programs, the number of impaired driving crashes, injuries and fatalities remains unacceptable. The chance of a crash being fatal is six times higher if exposed to impaired driving when compared to those not related to alcohol or drugs.

As presented below, The U.S. and Georgia had an increase in overall fatalities as well as increase in alcohol related fatalities. Data shows from 2011-2016, Georgia experienced increase in overall crash fatalities of 328 (27%) and an increase of 97 (36%) in alcohol-related traffic deaths. These numbers indicate that Georgia should emphasize preventative measures for countering the problems of driving under the influence of alcohol.

MEASURE	REGION	2011	2012	2013	2014	2015	2016
Total Fatalities	Georgia	1,226	1,192	1,179	1,164	1,430	1,554
	US	32,479	33,782	32,894	32,675	35,092	37,461
Alcohol Related-Fatalities	Georgia	271	295	296	279	358	368
	US	9,865	10,336	10,110	9,967	10,265	10,497
% of Alcohol Related Fatalities	Georgia	22%	25%	25%	24%	25%	24%
	US	30%	31%	31%	31%	29%	28%

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Impaired Driving Enforcement – H.E.A.T.

Aggressive traffic has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. The Governor's Office of Highway Safety's (GOHS) impaired driving program is geared toward jurisdictions where the incidences of impaired crashes among motorist and motorcyclist are the highest within the State of Georgia.

Since 2002, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form H.E.A.T. (Highway Enforcement of Aggressive Traffic). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has continued to grow with agencies being added across the state. In FFY 2018, GOHS funded eighteen (18) agencies across the

state where speed and impaired driving crashes and fatalities are consistently high. The Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019.

The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

Alcohol and Other Drug Countermeasures

Governor's Office of Highway Safety (GOHS) will administer and manage alcohol programs (funding 405 (f)). This includes but is not limited to: overseeing in-house grants and contracts, seeking and managing grants that foster the agency's mission, collecting and analyzing data, seeking partnerships in the communities, and to providing training and public information necessary to ensure proper and efficient use of federal highway safety funds. The public information will include the creation of brochures, collateral messaging items and effective communication with the media and public which will be available.

The State of Georgia maintains an annual comprehensive plan for conducting high visibility impaired driving enforcement and that plan will continue for the remainder of FY 2018 and FY 2019. The plan includes the following:

1. Strategic impaired driving enforcement which is designed to reach motorcyclist and motorist in geographic subdivisions that account for a majority of the state's population and half of the state's alcohol-related fatalities. Please see list of counties in the state ranked from highest to lowest in impaired driving related crashes for all vehicle types.
2. Three statewide impaired driving mobilizations that occur during the holidays of July 4th, Labor Day (September), and December holidays.
3. Strategic mobilizations for geographic subdivisions that show abnormal increases in traffic injuries and/or deaths (Thunder Task Force).

Georgia law enforcement agencies will participate in four impaired driving mobilizations by conducting checkpoints and/or saturation patrols on at least four nights during the national impaired driving campaigns as well as on a quarterly basis throughout FY 2019.

The four (4) impaired driving mobilizations are as follows:

1. December 2018/New Year 2019
2. Thunder Task Force (Three Dates TBD)
3. July Fourth 2019
4. Labor Day 2019

Statewide Impaired Driving Mobilization

Georgia participates in three annual statewide mobilizations to combat impaired driving. These campaigns occur during the Fourth of July, Labor Day, and December holidays. Georgia utilizes its Traffic Enforcement Networks (TEN) which provide state and local law enforcement officers with a structured means of collaborating regionally on their unique highway safety priorities with emphasis on impaired driving. They also provide the ability to communicate regional highway safety priorities up the chain-of-command, to reach local and state policy makers, community leaders, legislators and others. The 16 regional networks are instrumental in carrying out this statewide impaired-driving enforcement campaign. The traffic enforcement networks work closely with The Georgia State Patrol.

Strategic Thunder Mobilizations

The Governor's Office of Highway Safety has established a taskforce consisting of state wide officers (H.E.A.T.), troopers and sheriff's deputies. The Governor's Office of Highway Safety (GOHS) "Thunder" taskforce is a specialized traffic enforcement unit designed to help Georgia communities combat unusually high amount of traffic crashes, injuries and fatalities. Their mission is to reduce highway deaths and serious injuries by changing the illegal driving behaviors of motorcyclist and motorists in the region through an increased law enforcement presence in those high crash corridors. The task force was established in 2007 and continues to be very effective in reducing highway crashes, injuries and deaths.

As you can see alcohol is also a significant risk factor for Georgia motorcycle riders. Every year since 1998, alcohol related motorcycle fatalities have been increasing in Georgia. According to the National Highway Traffic Safety Administration (NHTSA), in 2016, twenty-five percent (25%) of all fatally

injured motorcycle riders had BAC levels of .08 g/dL or higher. Across the U.S., the percentage with BAC .08 g/dL or above was highest for fatally injured motorcycle riders among two age groups, 35-39 (38%), followed by 45-49 (37%). Nighttime single vehicle crashes are the most dangerous for impaired motorcycle riders. Fifty-five percent (55%) of those type crashes result in the death of a motorcyclist.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2018, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019. The Highway Enforcement of Aggressive Traffic (H.E.A.T.) Units were established for the purpose of reducing the number of driving incidents. This project will continue to focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

Georgia will continue to fund data driven projects that focus on impaired driving enforcement and education. The Highway Enforcement of Aggressive Traffic Units operate in a majority of the counties where impaired motorcycle crashes occurred in 2016. The chart below describes the FFY2018 grantees, grant amounts, counties represented, and the total fatalities, impaired driving fatalities, and motorcycle fatalities. Georgia plans to fund projects like HEAT again in 2019.

County	Grantee	Grant Amount	Total				Alcohol .08+				Motorcycle

5.5 Program Area: Traffic Records

Program area type Traffic Records

Will countermeasure strategies and planned activities be described in this plan to address the program area?

No

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

a

5.6 Program Area: Speed Management

Program area type Speed Management

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification

Excess speed can contribute to both the frequency and severity of motor vehicle crashes. At higher speeds, additional time is required to stop a vehicle and more distance is traveled before corrective maneuvers can be implemented. Speeding reduces a driver's ability to react to emergencies created by driver inattention, by unsafe maneuvers of other vehicles, by roadway hazards, by vehicle system failures (such as tire blowouts), or by hazardous weather conditions. The fact that a vehicle was exceeding the speed limit does not necessarily mean that this was the cause of the crash, but the probability of avoiding the crash would likely be greater had the driver or drivers been traveling at slower speeds.

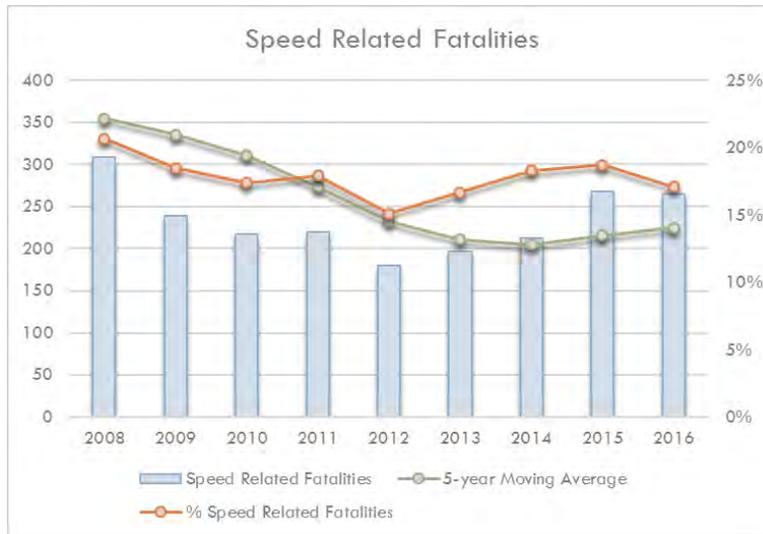

The Governor's Office of Highway Safety, along with state and local law enforcement conducts a 100-day sustained education and enforcement program entitled "100 Days of Summer HEAT (Highway Enforcement of Aggressive Traffic)" from Memorial Day through Labor Day. Nationally, FARS data shows a 5.67% increase in overall fatalities from 2015 to 2016, however the percentage of speed related crashes remained the same at 27% of the overall fatalities. The economic cost to society of speed-related crashes in the U.S. was estimated at \$52 billion.

Total Fatalities, Speeding-Related Fatalities, and Percentage Speed-Related

Region		2011	2012	2013	2014	2015	2016
Georgia	Speed-Related Fatalities	220	180	197	213	268	266
	% Speed-Related	18%	15%	17%	18%	19%	17%
	Annual % Change in	1%	-18%	9.7%	8.1%	25.8%	-7%
National	Speed-Related Fatalities	10,001	10,219	9,613	9,283	9,723	10,111
	% Speed-Related	31%	30%	29%	28%	27%	27%
	Annual % Change in	-5%	2%	-6%	-4%	3%	4%

The chance of a crash being fatal is over three times higher in crashes related to speed than crashes not related to speed. More young male drivers are involved in fatal crashes as a result of speeding. In 2016, 22 percent of the 15 to 24-year-old drivers who were involved in fatal crashes were also speeding at the time of the crash in Georgia. During the same year, 27 percent of all young (ages 15-24 years) motorcycle operators involved in fatal crashes were speeding, as compared to 18 percent for light truck drivers; which includes pickup truck, SUV, and Van.

Seventeen percent (17%) of all Georgia fatalities were related to speed in 2016. This is among the lowest percent in the country however there were still 266 lives lost at the hands of speeding vehicles. This is a slight decrease from 2015 but still higher than 2012 when there were 180 speed related fatalities (15% of all roadway fatalities).

Thunder Task Force

The Governor’s Office of Highway Safety Thunder Task Force is a Traffic Enforcement Special Response Team coordinated by the Law Enforcement Services Team. The Thunder Task Force is deployed to areas of the state where data indicates unusually high incidences of traffic fatalities and serious injuries.

The Task Force is made up of selected members of the Georgia State Patrol, Motor Carrier Compliance Division, and the Governor’s Office of Highway Safety H.E.A.T. (Highway Enforcement of Aggressive Traffic) Teams. The concept is to identify a county or area of the state to deploy the task force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the region with three months of high visibility enforcement and earned media.

The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process. With this continued effort of putting resources where the problems are, then moving to the next location once the problem is stabilized. The Thunder Task Force has proven to be a very effective and cost efficient method of saving lives and reducing the projected numbers of annual fatalities in the State of Georgia.

Target Population

The target population is the motoring public of Georgia.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State	5 Year	2019	24,324.0

	crash data files)			
2019	C-6) Number of speeding-related fatalities (FARS)	5 Year	2019	306.0

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	High Visibility Enforcement

5.6.1 Countermeasure Strategy: High Visibility Enforcement

Program area Impaired Driving (Drug and Alcohol)

Countermeasure strategy High Visibility Enforcement

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2018, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019. The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will continue to focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

The Governor's Office of Highway Safety created sixteen regional traffic enforcement networks that encompass all 159 Georgia counties. The networks are made up of local and state traffic enforcement officers and prosecutors from each region of the state. The networks are coordinated by a coordinator and an assistant coordinator, both which are full time law enforcement officers volunteering their time and efforts to highway safety. The dedicated support from these officers, their law enforcement agency and department heads are unsurpassed. The networks meet monthly to provide information, training and networking opportunities to the attending officers. Prosecutors, Judges and non-traditional traffic enforcement agencies such as the Georgia Department of Natural Resources, Department of Corrections and Military Police often attend the meetings and offer assistance for traffic enforcement training and initiatives. The networks are utilized to efficiently mobilize law enforcement statewide for traffic enforcement initiatives. The traffic enforcement networks have become an outstanding networking, training and communication tool for Georgia's traffic enforcement community.

In an effort to communicate legislative updates, court decisions and other pertinent information to traffic enforcement officers across the state, the Governor's Office of Highway Safety in partnership with Emory University has established an email list serve that all participating law enforcement officers can receive up to date traffic enforcement related information. Information is about traffic enforcement policies, legal

updates, training opportunities, and other traffic enforcement related information. There are over 800 traffic enforcement officers and prosecutors subscribed to the Georgia Traffic Enforcement Network (GATEN) list serv.

The Governor's Office of Highway Safety recognizes that law enforcement plays an extremely important role in overall highway safety in the State of Georgia. Campaigns such as Click it or Ticket, Operation Zero Tolerance (Drive Sober or Get Pulled Over), and the 100 Days of Summer HEAT (Highway Enforcement of Aggressive Traffic) have proven that high-visibility enforcement of Georgia's traffic laws is the key to saving lives and reducing injuries on Georgia's roadways.

<i>FFY 2019 Traffic Enforcement Mobilizations</i>	<i>Dates</i>
Click it or Ticket	November 16, 2018 – November 25, 2018
Drive Sober or Get Pulled Over	December 18, 2018 – January 3, 2019
Click it or Ticket	May 14, 2019 – June 2, 2019
Drive Sober or Get Pulled Over	June 21, 2019 – July 7, 2019
Drive Sober or Get Pulled Over	August 15, 2019 – September 2, 2019

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The Governor's Office of Highway Safety Thunder Task Force is a Traffic Enforcement Special Response Team coordinated by the Law Enforcement Services Team. This is an evidence-based traffic safety enforcement program to prevent traffic violations, crashes, and injuries in locations most at risk for such incidents. The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with a Thunder Task Force mobilization. The concept is to identify a county or area of the state to deploy the Task Force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the regions with two to three months of high visibility enforcement and earned media. The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process.

A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by Governor's Office of Highway Safety (GOHS), and Georgia Electronic Accident Reporting System (GEARS). The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Law Enforcement Services Division and includes the Georgia State Patrol, Governor's Office of Highway Safety HEAT Units (Highway Enforcement of Aggressive Traffic), Department of Public Safety Motor Carrier Compliance Division (MCCD) and local law enforcement. We also use as much local crash data as available, looking at time of day, location and causation (DUI, Seatbelt, Speed, Motorcycles). The Thunder Task Force is deployed to areas of the state that data indicates unusually high incidences of traffic fatalities and serious injuries. The Task Force identifies the problem areas, and conducts mobilizations using the resources that are needed for these problem areas, such as the Motor Carrier Compliance Division (MCCD), Child Passenger Safety Technicians (CPST), and trained DUI officers. With this continued effort of putting resources where the problems are, the Governor's Office of Highway Safety (GOHS) is able to stabilize the problem with a proven effective and cost efficient method of saving lives, therefore reducing the projected numbers of annual traffic fatalities in the State of Georgia. While conducting a Thunder Task Force Mobilization, the enforcement plan is adjusted on a continuous basis, using current local data provided by the local jurisdiction. 60 to 90 days after the mobilizations end, the Task Force typically returns to the jurisdiction for a follow up visit and evaluation.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with an Thunder Task Force mobilization. A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by GOHS, and GEARS. The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Services Division and includes the Georgia State Patrol, GOHS HEAT Units (Highway Enforcement of Aggressive Traffic), DPS Motor Carrier Compliance Division and Local Law Enforcement to conduct the high visibility enforcement during the three month effort.

The concept is to identify a county or area of the state to deploy the task force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the region with high visibility enforcement and earned media. The continuous earned media and the overwhelming high visibility enforcement during the enforcement periods gives the perception that the task force is mobilized during the entire summer.

The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process. With this continued effort of putting resources where the problems are, then moving to the next location once the problem is stabilized has proven to be a very effective and cost efficient method of saving lives and reducing the projected numbers of annual traffic fatalities in the State of Georgia.

The Thunder Task Force concept was piloted in Savannah-Chatham County during April, May and June of 2007.

The three month program (12 operational days) had the following results:

- 96 Drunk Drivers were arrested.
- 175 Suspended or Revoked License arrests.
- 1617 Other traffic Violations.
- 75 Drug offenders and fugitives arrested
- 4732 Total Arrests or citations

During the three month period, the Thunder Task Force reduced fatal crashes in Savannah-Chatham County by more than **58%**.

The GOHS Thunder Task Force has found a winning recipe; data focused, cost efficient, high visibility enforcement, combined with an extensive earned media message. The result is lives saved on Georgia roadways. In every location the Task Force has been deployed we have seen a reduction in Crashes and Fatalities.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
SC-01	Train 1,400 law enforcement officers in speed detection	
SC-02	Law enforcement will conduct 47,140 speed contacts.	
AL-01	Conduct three (3) waves of statewide enforcement with the "Drive Sober or Get Pulled Over." campaign.	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-02	Law enforcement will conduct 7,704 impaired driver contacts	Alcohol Impairment: Detection, Enforcement and Sanctions
PT-06	Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects	High Visibility Enforcement

5.6.1.1 Planned Activity: Train 1,400 law enforcement officers in speed detection

Planned activity name	Train 1,400 law enforcement officers in speed detection
Planned activity number	SC-01

Primary countermeasure strategy

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

5.7 Program Area: Community Traffic Safety Program

Program area type Community Traffic Safety Program

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification

Crashes are one of the leading causes of death for people age 2-74 years and the largest contributor to spinal and head injuries. These crashes take a major toll on community resources such as health care costs, workplace productivity and human services. However, community awareness of the extent of the problem remains limited because of fragmented and incomplete data.

Year	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
Traffic Fatalities	1,641	1,495	1,929	1,247	1,226	1,192	1,180	1,164	1,430	1,554
Fatality Rate	1.46	1.37	1.18	1.12	1.13	1.11	1.08	1.04	1.21	1.28

In 2016, Georgia experienced 1,554 roadway fatalities per (Fatality Analysis Reporting System). Of all 159 counties in Georgia, Fulton County (having the largest population per square mile) continues to have the largest number of fatalities (129 fatalities in 2016). Within Georgia, the total number of fatalities occurred between midnight and 11:59pm, with 54% (843 of 1,554 fatalities) of fatalities occurring between the specific timeframe of 12:00pm – 11:59pm. Thursdays – Mondays were more prone to fatal crashes occurring during 2016.

In reducing motor vehicle fatalities, Georgia will focus on programs to increase awareness, outreach, education and first responder's training targeting; Older Drivers, Railroad Safety and various other programs to reach the population that other funding sources cannot support. Within each program area, Georgia's total motor vehicle fatalities have affected the various populations as each problem identified is unique.

The Older Driver program area focuses on citizens of ages 65 and older. The concern of Older Drivers is of the normal aging process serves as a contributing factor due to loss of mobility, vision, and cognition is experienced. Nationally in 2016, there were 6,764 people of age 65 and older killed in motor vehicle crashes which equal eighteen percent (18%) of all traffic fatalities. This is a three percent (3%) increase over 2015. In Georgia of the 1,554 residents involved in fatal crashes, 267 or 17% were of ages 65 or older. Although there are still unknown factors in data to help best define this problem on a state level, NHTSA has national findings to help support the outreach and awareness for Older Drivers across the US. In correlation of "when" the motor vehicle fatalities occurred, nationally, 74% of older drivers were killed during the daytime, but on weekdays in 2016.

Georgia has a Car fit program that aims to assist that older generation to get the proper fit within their vehicle. We will encourage growth in the Yellow Dot program which provides important medical information to first responders about the driver involved in a crash.

In addition to the Older Driver population, Railroad Safety has been another program area that targets all ages of the general population in Georgia as well as first responders. In 2016, 28% (26 fatal crashes out of 101 crashes) of train- motor vehicle crashes were fatalities due to Highway- rail grade crossings and trespassing. Of those train- motor vehicle fatalities contributing factors were pedestrians walking on privately owned railroad tracks, failure to stop at railroad crossings, insufficient police reporting for railroad collisions and lack of state statutes. The top fifteen counties identified as high risk areas were of the following: Fulton, Richmond, Cobb, Chatham, Gwinnett, Muscogee, Bartow, Gordon, DeKalb, Douglas, Ware, Houston, Pierce, Barrow and Clayton. Georgia as a whole, is still limited to the data received in the identified problem, but with the details provided, this has helped in reaching the community through education, awareness and first responders training.

Georgia provides a program via statewide that is geared towards educating the general public and training First Responders on the importance of railroad safety. Exhibiting events of the OL Mobile Exhibit Truck/ desktop presentation and training being provided in partnership with (Georgia Public Safety Center) for First Responders statewide covers trespassing, state statutes, and corrective reporting for the first responders.

Within in other program areas, Georgia has increased the outreach potentials to the minority populations of (Hispanics and African Americans. Within the minority population, alcohol and seatbelt related crashes have been a concern within the state of Georgia. Alcohol-related crashes account for about half of all Hispanic traffic-related fatalities. One in four persons (24%) age 16 to 64 has driven a motor vehicle within two hours of consuming alcohol in the past year. Twenty-eight percent (28%) of white, non-Hispanic persons, which make up the largest sample, are more likely than any other racial group to report having driven within two (2) hours of consuming alcohol in the past month. American Indian/Eskimos report the second highest prevalence at twenty-one percent (21%). Hispanics, Blacks, and Asians report 17%, 16%, and 13%, respectively, for having driven within two hours after drinking in the past month. Whites age 21 to 29 report the highest prevalence of this behavior thirty-seven percent (37%), which is almost twice the rate for other racial groups.

Males are more likely to exhibit such behaviors than females (37 vs. 15 percent), and this pattern is found across all races and ethnicities. These men may also have a reluctance to admit they cannot "hold their drink", and they may refuse help from someone who offers to drive them home.

Injuries in these crashes are increased by lack of seat belt usage, which appears to be influenced by cultural attitudes which increase while under the influence. Also, young men especially may feel seatbelts challenge their masculinity and bravery. National and state studies have shown that Hispanics have a higher risk of fatal car crashes than non-Hispanic whites. Traffic crashes are the leading cause of death for Hispanics ages 1 - 34 in the United States. Attitudinal data on safety belt usage among Hispanics reflects their cultural biases. The Pew Hispanic Center recently published a study noting that Hispanics, especially those who are foreign born, tend to agree that fate determines their future. The 2000 Motor Vehicle Occupant Safety Study provided support for that by noting that 30% of all Hispanics (compared to 25% of other groups) agreed with the statement "If it is your time to die, you'll die, so it doesn't matter whether you wear your seat belt." Hispanics were also more likely than Non-Hispanics to indicate that wearing a safety belt made them worry more about being in a crash (30% and 13%, respectively) and that safety belts were more likely to harm you than help you in a crash (48% to 34%,

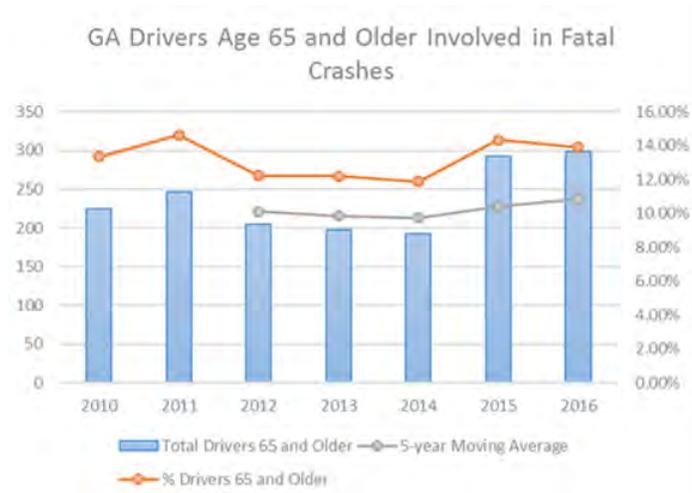

respectively). Hispanics are also more than twice as likely (39% compared to 17%) to say that wearing a safety belt makes them self-conscious around their friends.

The Governor’s Office of Highway Safety (GOHS) believes that traffic safety needs and problems differ across populations. Efforts to improve traffic safety in the Hispanic and Black community have stalled by a lack of information on communication strategies that would be helpful in determining and shaping effective interventions. There are some differences among racial and ethnic groups in drinking and driving attitudes and behaviors.

The Governor’s Office of Highway Safety (GOHS) plans to promote traffic safety programs among the Hispanic and Black population to make a significant difference in the State’s overall highway safety fatality problem working through various minority programs and schools.

Target Population

Rural Georgia, teens, Hispanic, older drivers, law enforcement, emergency responders and traffic safety advocates.

Resource Information Center and Clearinghouse

The public often goes uninformed about the valuable resources and successful projects related to roadway safety. Without a systematic means of disseminating information, there is no way of determining who needs information and what kinds of items would be helpful. Governor’s Office of Highway Safety (GOHS) has dramatically enhanced its website, URL www.gahighwaysafety.org, to increase the general public and stakeholder’s ability to acquire highway safety data and information. This site also provides an online store for the ability to order brochures and materials related to traffic safety; with the ability to download each of these media in a PDF format. Governor’s Office of Highway Safety (GOHS) also maintains a resource center for direct public access.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-3) Fatalities/VMT (FARS, FHWA)	5 Year	2019	1.310

2019	C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)	5 Year	2019	507.0
------	--	--------	------	-------

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	Older Driver- General Communication and Education

5.7.1 Countermeasure Strategy: Older Driver- General Communication and Education

Program area Community Traffic Safety Program

Countermeasure strategy Older Driver- General Communication and Education

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Since 2006, the Older Driver Safety Program has engaged in leading and building sustainability for the ODTF, a collaboration of more than 80 members who represent a variety of statewide and national organizations in the fields of highway safety, public health, aging, health care, academia, and law enforcement. In the upcoming grant year (2019), the Program will convene ODTF meetings, guided by the priorities chosen by members and GOHS. MVCs are the second leading cause of unintentional injury deaths among Georgia's older adults. Keeping older adults stable and strong may delay or improve the age-related decline of motor skills that contribute to delayed reaction time in older drivers. One way to reach this audience is to target older adults at high risk for a fall, as falls intersect with the risk of a MVC. A 2013 article published in the Journal of the American Geriatrics Society (JAGS) discussed the relationship between falls and risk for MVC. The study found that frequent falling was significantly associated with at-fault MVC involvement of older drivers (19). This audience is reached by collaborating with Georgia's aging network and other organizations (Diagram 1). This supports the Program's goal of encouraging physicians and other health care providers to take an active role in driver safety conversations and assessments with their older patients and/or their caregivers as a regular part of all doctor visits.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The Program partners express the need for policy that addresses the changing functional and cognitive abilities of aging drivers and was identified as a top priority in a needs assessment previously conducted. Previous success in this area includes the collaboration between ODTF and Georgia Department of Driver Services (DDS). Together they created the Request for Driver Review Form (available on the DDS website). The Program will review data and other program across the state that focus on legislative and policy recommendations. The goal is to institute system-wide change by that balance the mobility of older adults with safety initiatives addressing their changing functional and cognitive abilities. The Program will work on a new initiative to educate physicians on liability policies in Georgia. This education will help physicians provide resources to discuss older driver safety, recommend appropriate assessment services (e.g., certified driving rehabilitation specialists), and when necessary, report at-risk drivers. The program will create at least two opportunities for feedback from physicians and related health-care professionals to help us better understand the perceived barriers, how to best to promote appropriate reporting of at-risk drivers, and improve awareness of available resources.

EMS: The Yellow Dot program is designed to provide first responders with important medical information about the driver of a vehicle involved in a crash. The older driver safety program has worked with partners around the state to bring the program to Georgia. After a pilot program in Laurens and Clark counties, the program will now be translated for use in a broader roll-out. First, the program is well received by the community. Participants in both pilot sites had positive remarks about the program and communities around the state have expressed interest in implementing the program. The PC will engage local professionals through PRN work to implement Yellow Dot in at least fifteen areas throughout the state. Communities interested in starting yellow dot will be provided with 500 packets once they've convened a local planning and implementation group. The group must consist of first responders,

community organizations, and other local partners. The group will then work to train first responders, local hospitals, and the community about the program. Once EMS and/or fire responders have taken the online training, the community will be eligible to receive another 500 packets. These packets will be available for use in motor vehicles. Communities are strongly encouraged to raise additional funds to purchase additional packets.

EDUCATION: Area Agencies on Aging (AAAs) are charged with serving older adults and their families in assigned regions. The Program will provide outreach to Georgia's AAAs to increase their representation on the ODTF, to provide educational presentations and technical support, and to collaborate on older driver safety and mobility events. The Program Consultant will build and expand collaborations with local and national partners to publicize and conduct activities that support the 10th annual Older Driver Safety Awareness Week. This nationally recognized event is guided by the American Occupational Therapy Association (AOTA) and promotes understanding of the importance of mobility and transportation. As one of the co-creators of CarFit, the AOTA plays a critical role in national efforts to address older driver safety.

The Older Driver safety program will work to stabilize and expand the reach of the CarFit program with the assistance of a part-time program associate, and PRN professionals. CarFit events are free and provide an opportunity for older drivers to learn about age-related driver safety and empower them to make vehicular adjustments that can increase their safety – and the safety of others – while they are driving. Georgia currently has 423 trained technicians/coordinators, but had very few events in 2017. The older driver safety team will work with the GOHS grant evaluator to craft and deliver a survey to existing Georgia technicians and coordinators. The survey will help determine what the needs are for help increase events and also help determine barriers that might be easily solved (e.g., need partner help or need O.T. kit for events). The PC will also train contracted professionals to be CarFit technicians (or the Program Coordinator will train them to be technicians). The PC and program associate will work with the aging network, public health districts, and other local partners to host at least three CarFit events. In addition, the PC will work toward CarFit Instructor status. Until then, the PC will rely on Georgia's current only instructor to assist with at least one coordinator training during the grant cycle.

The Program Consultant and program associate will use presentations, data, and interactive activities to educate and engage professionals and community members about older driver issues, the Georgia Older Driver Safety Program, the SHSP, the importance of transportation options, mobility beyond driving, and GOHS' support of older driver safety. We will collaborate with community partners in health care related industries. Partnerships with organizations such as the National Aging in Place Council (NAIPC) have afforded the Project Coordinator the opportunity to share resources and learn about innovations in transportation.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Funding for the older driver program will go to the Department of Public Health and they will handle communication and outreach across Georgia.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
CP-01	Provide funds to coordinate and host a minimum of three CarFit Event Coordinator/Technician trainings	
CP-02	Education and outreach events focused on the older adult population, age 65 and older.	

5.7.1.1 Planned Activity: Provide funds to coordinate and host a minimum of three CarFit Event Coordinator/Technician trainings

Planned activity name Provide funds to coordinate and host a minimum of three CarFit Event Coordinator/Technician trainings

Planned activity number CP-01

Primary countermeasure strategy

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active

network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

Training is to certify individuals to conduct events at local senior centers, churches and other locations where older drivers frequently visit in an effort to help older drivers become safer drivers for a longer time.

Enter intended subrecipients.

5.8 Program Area: Distracted Driving

Program area type Distracted Driving

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification

"The National Highway Traffic Safety Administration states that "In 2016, there was a total of 34,439 fatal crashes in the United States involving 51,914 drivers. As a result of those fatal crashes, 37,461 people were killed". Of those fatal crashes, NHTSA reports that there were 3,450 fatalities related to distractions. Based on the data presented it shows a decrease by 2.2 percent from 2015.

Distracted driving is suspected to be greatly underreported in fatal and serious injury collisions, as information pointing to distraction is gathered through self-reporting, witness testimony, and evidence indicating distraction. Despite the data limitations, current trends and observations suggest distracted driving is a growing issue particularly among young drivers.

Among the areas of greatest concern with respect to cell phone use is texting while driving, which was banned in Georgia on July 1, 2010. Additionally, the increase in the number of wireless subscriptions (estimated at more than 300 million) - and a growing number of devices and services designed to keep people connected- has greatly increased the number of people using cell phones while driving.

Starting July 1, 2018 Georgia's Governor, Nathan Deal amended the original bill. The addition has now considered Georgia a "hands-free" state. Any driver cannot have a phone in their hand or use any part of their body to support their phone. Drivers can only use their phones to make or receive phone calls by using speakerphone, earpiece, wireless headphone, phone is connected to vehicle or an electronic watch.

Based on the data from 2012-2016 there has been both an increase and decrease in the number of people who were involved in fatal crashes. Specifically, from 2015-2016 there was a 1,900 increase in overall fatal crashes.

In developing strong countermeasures to address this problem(s), Georgia will look to national research in developing distracted driving prevention strategies. Controlling this epidemic will require an educational effort similar to the one Georgia implemented aimed in recent years at improving the safety belt use rate and controlling impaired driving. This effort included the development of a public service announcement, enforcement and increased public awareness.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash	5 Year	2019	24,324.0

	data files)			
2019	C-3) Fatalities/VMT (FARS, FHWA)	5 Year	2019	1.310
2019	C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)	5 Year	2019	186.0

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	High Visibility Cellphone/Text Messaging Enforcement

5.8.1 Countermeasure Strategy: High Visibility Cellphone/Text Messaging Enforcement

Program area Distracted Driving

Countermeasure strategy High Visibility Cellphone/Text Messaging Enforcement

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve

seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Problem Identification and Program Justification

"The National Highway Traffic Safety Administration states that "In 2016, there was a total of 34,439 fatal crashes in the United States involving 51,914 drivers. As a result of those fatal crashes, 37,461 people were killed". Of those fatal crashes, NHTSA reports that there were 3,450 fatalities related to distractions. Based on the data presented it shows a decrease by 2.2 percent from 2015. Studies show that texting simultaneously involves manual, visual, and mental distraction and is among the worst of all driver distractions" (NHTSA Blueprint for Ending Distracted Driving, (www.distraction.gov)). Nearly all motor vehicle crashes are a result of distracted driving, simply because one of the drivers involved wasn't paying attention to the road for whatever reason(s). There are many different ways drivers can become distracted while driving. Talking on a cell phone, texting, using GPS or other devices, talking and looking to a passenger, and eating among many other distractions, always increases the possibility of a crash.

Based on the data from 2010-2015 there has been great unsteady decline in the percentage of drivers involved in fatal crashes that were distracted at the time of crash. The number of drivers distracted during the time of the fatal crash has nearly remained the same in 2013 and 2014, with 3.1% of all drivers reported being distracted. In 2015, there was a slight increase to 3.5% of all drivers reported as being distracted when involved in a fatal crash.

Distracted driving is suspected to be greatly underreported in fatal and serious injury collisions, as information pointing to distraction is gathered through self-reporting, witness testimony, and evidence indicating distraction. Despite the data limitations, current trends and observations suggest distracted driving is a growing issue particularly among young drivers.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

In developing strong countermeasures to address this problem(s), Georgia will look to national research in developing distracted driving prevention strategies. Controlling this epidemic will require an educational effort similar to the one Georgia implemented aimed in recent years at improving the safety belt use rate and controlling impaired driving. This effort included the development of a public service announcement, enforcement and increased public awareness. Georgia will target young adult drivers in Georgia with the messaging of "One Text Could Wreck it All" and our state developed campaign "HeadsUPGeorgia" with Georgia Public Broadcasting. The HeadsUPGeorgia" public service campaign allows us to reach our target audience with repeated messaging on-air and online during the high school football season and throughout the calendar year.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Starting July 1, 2018 Georgia's Governor, Nathan Deal amended the original bill. The addition has now considered Georgia a "hands-free" state. Any driver cannot have a phone in their hand or use any part of their body to support their phone. Drivers can only use their phones to make or receive phone calls by using speakerphone, earpiece, wireless headphone, phone is connected to vehicle or an electronic watch.

In developing strong countermeasures to address this problem(s), Georgia will look to national research in developing distracted driving prevention strategies. Controlling this epidemic will require an educational effort similar to the one Georgia implemented aimed in recent years at improving the safety belt use rate and controlling impaired driving. This effort included the development of a public service announcement, enforcement and increased public awareness.

Georgia's Distracted Driving Laws

Georgia Hands-Free Law (O.C.G.A. 40-6-241)

House Bill 673 also known as the "Hands Free Law" was passed by the Georgia General Assembly and signed into law by Governor Nathan Deal. The Hands Free Law will take effect on July 1, 2018. The following is a brief description what the law states and some frequently asked questions.

- A driver cannot have a phone in their hand or use any part of their body to support their phone. Drivers can only use their phones to make or receive phone calls by using speakerphone, earpiece, wireless headphone, phone is connected to vehicle or an electronic watch. GPS navigation devices are allowed.
- Headsets and earpieces can only be worn for communication purposes and not for listening to music or other entertainment.
- A driver may not send or read any text-based communication unless using voice-based communication that automatically converts message to a written text or is being used for navigation or GPS
- A driver may not write, send or read any text messages, e-mails, social media or internet data content
- A driver may not watch a video unless it is for navigation.
- A driver may not record a video (continuously running dash cams are exempt)
- Music streaming apps can be used provided the driver activates and programs them when they are parked. Drivers cannot touch their phones to do anything to their music apps when they are on the road. Music streaming apps that include video also are not allowed since drivers cannot watch videos when on the road. Drivers can listen to and program music streaming apps that are connected to and controlled through their vehicle's radio.

Exceptions to the law are as follows:

1. Reporting a traffic crash, medical emergency, fire, criminal activity or hazardous road conditions.
2. An employee or contractor of an utility service provider acting within the scope of their employment while responding to an utility emergency.
3. A first responder (law enforcement, fire, EMS) during the performance of their official duties.
4. When in a lawfully parked vehicle—this DOES NOT include vehicles stopped for traffic signals and stop signs on the public roadway.

5.9 Program Area: Communications (Media)

Program area type Communications (Media)

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

Yes

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification

IMPAIRED DRIVING: Drive Sober or Get Pulled Over

In 2016, the State of Georgia suffered 1,554 fatalities in motor vehicle crashes. Impaired driving killed 368 persons in those crashes. Alcohol related fatal crashes accounted for almost 24% of all fatal crashes in Georgia in 2016. Nearly one-out-of-every-four traffic fatalities in Georgia are currently alcohol-related. The overall cost of crashes, injuries, and deaths related to crashes in Georgia is \$7.8 billion a year. Improvement is still needed for the state in as much as alcohol-related fatalities are anticipated to continue to be a prominent factor in Georgia's 2019 stats.

For both paid and earned media projects, Georgia's impaired driving campaigns promote the "Operation Zero Tolerance" (OZT) and "Drive Sober Or Get Pulled Over" campaign messages in reference to GOHS' statewide DUI enforcement initiatives. As an integral element of Georgia's impaired driving message, all GOHS brochures, rack cards, media advisories, news releases, media kit components, and scripts for radio and TV Public Service Ads use one or a combination of these messages.

OCCUPANT PROTECTION: Click It or Ticket

Failure to use safety belts and child safety seats is one of the leading causes of motor vehicle injuries and deaths in this country. This persists despite NHTSA data that shows safety belts have proven to reduce the risk of fatal injury to front seat passenger car occupants by forty-five percent (45%). In pick-up trucks, SUVs', and mini-vans, properly worn seatbelts reduce fatal injury by sixty percent (60%).

NHTSA research data show more than seventy-three percent (73%) of nationwide passenger vehicle occupants involved in serious crashes survive when wearing safety belts correctly. Although Georgia has one of the highest recorded safety belt usage rate in the southeast at 97.1%, sustaining this number necessitates a rigorous, ongoing public awareness campaign that combines attention-getting Paid Media in conjunction with concentrated earned media efforts and high profile enforcement measures.

SPEED: 100 Days of Summer H.E.A.T.

More than 17% of crash deaths in Georgia involve unsafe or illegal speed. For every 10mph increase in speed, there's a doubling of energy release when a crash occurs. The faster we drive, the more our reaction time is reduced. The chances of

being involved in a fatal crash increase three-fold in crashes related to speed. The majority of drivers in those speed-related crashes fall within the demographics of Georgia's primary audience for Paid Media.

The **100 Days of Summer H.E.A.T.** campaign is a multi-jurisdictional highway safety enforcement strategy designed to reduce high-fatality crash-counts due to speed and aggressive driving during the potentially deadly summer holiday driving period from Memorial Day through Labor Day. **H.E.A.T.** stands for "*Highway Enforcement of Aggressive Traffic.*" GOHS' public information team promotes this initiative with summer-long earned media via news conferences, social media messaging and cross-promotional paid media Public Service Announcements (PSAs) run in rotation with occupant safety and alcohol counter measure campaign ads.

MOTORCYCLE SAFETY: Share The Road

Based on data from 2008 to 2016, there has been an unsteady and fluctuating decrease of motorcyclist fatalities with the most fatalities occurring in 2008 with 178. The most recent year of certified data shows 172 motorcycle fatalities in 2016. As part of the GOHS speed and impaired driving countermeasure message strategy, the Governor's Office of Highway Safety uses paid media funds when available to target motorists in Georgia's secondary audience with a motorcycle safety and awareness message. When available, funds will also be allocated to out-of-home advertising such as billboards, which was done in 2018

DISTRACTED DRIVING: One Text Could Wreck It All/HeadsUPGeorgia/Hands Free Georgia

After fatalities in Georgia declined for an eight year period, it spiked by more than 20% in 2015 with 1,430 traffic deaths. Distracted driving, especially the use of electronic devices, is certainly one of the factors in this increase. There were 3,477 deaths across the nation in 2015 due to distracted driving according to NHTSA. There are a number of actions that can take a driver's attention away from the wheel, but electronic devices such as cell phones are one of the biggest problems when it comes to drivers keeping their focus on the road.

The Governor's Office of Highway Safety's countermeasure message strategy is to target young adult drivers including those between the ages 16-24 where cell phone use is the highest with a paid public service message campaign. The public service message campaign will target the youngest drivers in Georgia with the messaging of "One Text Could Wreck It All" and our state developed campaign "HeadsUPGeorgia!" with Georgia Public Broadcasting. The "HeadsUPGeorgia" public service campaign allows us to reach our target audience with repeated messaging on-air and online during the high school football season and throughout the calendar year.

In addition, GOHS began an aggressive public information and education campaign in 2018 regarding the Hands-Free Georgia law that went into effect on July 1, 2018 and bans all handheld-phone use for all drivers while behind the wheel. This PI&E campaign will continue statewide in 2019 with both paid and earned media.

Target Population - Georgia's Primary Audience

The Occupant Protection/Impaired Driving Paid Media message is directed at a statewide audience. NHTSA relies upon the results of a national study which shows the use of paid advertising is clearly effective in raising driver safety awareness and specifically has a greater impact on "younger drivers in the 18-to-34 year-old demographic". Based on NHTSA audience research data, Georgia's occupant protection and impaired driving messages are directed at two target audiences during the course of regularly-scheduled and nationally-coordinated statewide paid media campaigns. Georgia's primary audience is composed of male drivers, age 18 to 34.

In its secondary audience, GOHS seeks to reach all Georgia drivers with occupant protection and impaired driving highway safety messages. However, because Georgia is a state with a growing Hispanic population, newly arrived Latinos also represent a portion of the secondary Paid Media target market. Hispanic radio and TV will continue to represent a portion of the GOHS targeted statewide media buy. Furthermore, because Georgia sees a growing potential for an erosion of occupant safety numbers among young African Americans, that community is also a targeted secondary demographic for GOHS Paid Media highway safety campaigns.

Paid/Earned Media

Paid and earned media programs represent a major component of the Governor's Office of Highway Safety's (GOHS) efforts to reduce the prevalence of traffic crashes, injuries and fatalities. GOHS has adopted a "year round messaging" approach delivered through statewide media campaigns to reach Georgians. Lifesaving highway safety messages are utilized to increase awareness, promote safety belt and child restraint use, promote sober driving and encourage safe driving practices overall.

GOHS will continue to produce paid media in conjunction with the National Highway Traffic Safety Administration (NHTSA) campaigns and according to campaign buy guidelines. Market buys will be NHTSA-approved and consistent with previous campaigns to reach our primary and secondary target audiences. Television and radio buys will occur in markets statewide to provide the best possible reach. These markets include Atlanta, Albany, Augusta, Columbus, Macon, and Savannah, with the additional possibilities of border markets such as Chattanooga, Tallahassee and Jacksonville that include coverage in Georgia. Targeted buys will also occur in counties where data indicates a weakness in distracted driving or where we wish to reinforce existing strong numbers. Percentages of the buys will vary based on metro Atlanta, outside metro Atlanta, urban and rural counties.

GOHS will maintain current strategies of using social media, media tours, adjusted press event schedules and statewide media alerts to ensure maximum earned media exposure.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-3) Fatalities/VMT (FARS, FHWA)	5 Year	2019	1.310
2019	C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)	5 Year	2019	507.0
2019	C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)	5 Year	2019	478.0
2019	C-6) Number of speeding-related fatalities (FARS)	5 Year	2019	306.0
2019	C-7) Number of motorcyclist fatalities (FARS)	5 Year	2019	151.0
2019	C-8) Number of unhelmeted motorcyclist fatalities (FARS)	5 Year	2019	6.0
2019	C-9) Number of drivers age 20 or younger involved in fatal crashes (FARS)	5 Year	2019	186.0
2019	C-10) Number of pedestrian fatalities (FARS)	5 Year	2019	251.0
2019	C-11) Number of bicyclists fatalities (FARS)	5 Year	2019	27.0
2019	B-1) Observed seat belt use for passenger vehicles, front seat outboard occupants (survey)	5 Year	2019	97.8

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	Communication Campaign
2019	Communication Campaign

5.9.1 Countermeasure Strategy: Communication Campaign

Program area Occupant Protection (Adult and Child Passenger Safety)

Countermeasure strategy Communication Campaign

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Data Used to Identify Priorities

Motorcycles are an increasingly popular means of transportation. In 2016, there were 196,277 registered motorcycles in the state of Georgia, an increase from 2014. The number of registered motorcycles continues to increase from 2008. However, the percentage of motorcycle fatalities has remained fairly consistent during the same time period. In 2016, more than 8 out of every 10,000 registered motorcyclists died – the highest rate since 2008. GOHS partially attribute this increase to the current economic situation and the fact that people were trying to find less expensive ways to commute.

In 2016, 11% percent (172 persons) of the people killed in motor vehicle crashes in Georgia were motorcyclists—a 11.7% increase over the previous year. Of these, 97 percent (167) were riders and 2.9 percent were passengers. In 2008, Georgia experienced the highest in motorcycle fatality count within fifteen years (178 motorcyclist fatalities). Contributing factors include alcohol, speed, distraction, and rider inexperience. Un-helmeted rider deaths are on the increase plus we are unsure of those that are being killed while wearing the non-Department of Transportation (DOT) approved helmets.

Nationally in 2016, motorcycle fatalities have decreased slightly from 2008 when there were 5,312 rider deaths. In 2008, motorcycle deaths accounted for 15.5% of the overall traffic deaths nationwide. In 2016, motorcyclists accounted for 14% of all traffic fatalities nationwide and 17% of all occupant (driver and passenger) fatalities.

In Georgia during the 2016 calendar year, over 60 percent of all motorcyclist crashes occurred in metropolitan areas including Atlanta, Gainesville, Augusta, Savannah, and Columbus. According to FARS data, Fulton, DeKalb, Cobb, and Gwinnett counties had the highest number of motorcycle crashes in 2016. The attached charts show FARS data from the 2016 calendar year.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Strategic Communications Plan

Overview

Georgia's Strategic Communication Plan targets those counties that account for the majority of registered motorcycles in the state. These counties include Fulton, Chatham, Cobb, Gwinnett, DeKalb, Richmond, Henry, Cherokee, Forsyth, Paulding, Hall, Houston, Coweta, Columbia, Bartow, Douglas, Clayton, and Carroll. Therefore, Georgia created a Strategic Communication Plan to educate motorists in those target counties and the Atlanta

metropolitan area. In FFY 2018, the Governor's Office of Highway Safety (GOHS) will use a mix of communication mechanisms to draw attention to the problem (e.g. newspapers, community meetings, e-mail, posters, flyers, mini-planners, instructor-led training and law enforcement mobilizations) to deliver the message of motorcycle awareness.

Two agencies are responsible for executing a comprehensive motorcycle safety program, which includes public outreach and communication: The Department of Driver Services (DDS) and the Georgia Governor's Office of Highway Safety (GOHS).

The Department of Driver Services (DDS) is responsible for motorcycle licensing and administering rider education courses in Georgia. This includes contracting with possible training centers, training instructors, scheduling classes, etc. Under the legislation that created its motorcycle safety program, the Department of Driver Services (DDS) is also to provide a Public Information and Awareness effort. This activity has been executed collaboratively with the Governor's Office of Highway Safety (GOHS).

The Governor's Office of Highway Safety (GOHS) has the primary responsibility of collecting and evaluating data, developing an annual highway safety plan and longer term Strategic Highway Safety Plan (SHSP). Annually, the Governor's Office of Highway Safety (GOHS) provides highway safety funds to support the effort of eligible government agencies and private organizations to eliminate or reduce highway safety problems and enhance highway safety consistent with Georgia's Highway Safety Plan. The Governor's Office of Highway Safety (GOHS) also conducts its own public outreach and communication programs.

Efforts between the Governor's Office of Highway Safety (GOHS) and the Department of Driver Services (DDS) are coordinated through the Strategic Highway Safety Plan (SHSP) Motorcycle Task Force and the Georgia Motorcycle Program Coordinator. This plan supports the safety goals of the Highway Safety Plan and the Strategic Highway Safety Plan (SHSP).

The Governor's Office of Highway Safety (GOHS) Public Information Officer (PIO) engages the services of the media through a statewide media contract and earned media. The media efforts will aid in the development of new campaign messages and designs of new campaign collateral for the 2019 riding season. The contractor will be asked to integrate an evaluation program into the campaign as well.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

To help achieve these goals, the communication efforts will focus primarily on those areas where the majority of serious motorcycle crashes occur, in the major metropolitan area of Georgia. These metropolitan areas include: Atlanta, Gainesville, Augusta, Savannah, Athens, and Columbus, where a majority of the crashes occurred in 2016. In addition, these efforts will also focus on the counties with the highest number of registered motorcyclists and counties with the highest number of motorcycle crashes involving alcohol.

Planned activities

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
PM-01	To use Paid Media to support ongoing Click It Or Ticket (CIOT) enforcement efforts to help decrease unbelted injury and fatality stats on Georgia's highways while increasing overall public awareness of occupant protection and increasing the use of safety belts and child safety restraint systems statewide.	
PM-02	To use Paid Media to support ongoing "Operation Zero Tolerance" (OZT)/ "Drive Sober or Get Pulled Over" enforcement efforts to increase public awareness of sober driving and to encourage the use of designated drivers to improve Georgia's alcohol-related crash, fatality and injury rate.	
PM-03	To use Paid Media to support the GOHS Share The Road/Motorcycle Safety Awareness campaign by targeting motorists in Georgia's secondary audience with a motorcycle safety and awareness message.	

PM-04	To base Georgia's year-round Occupant Protection and Impaired Driving Paid Media Plan on the NHTSA National Communications Plan and to correlate the timetable of the GOHS Media Buy Plan to correspond with planned enforcement activities at the state, regional and national level.
PM-05	To optimize driver awareness of ongoing national highway safety campaigns during peak driving periods and during major holiday travel periods.
PM-06	To continue to expand our HeadsUPGeorgia public service distracted driving awareness campaign to include paid messages, student/parent distracted driving course segments, student distracted driving video message contest, testimonials with distracted driving crash victims and family members and live television interviews.
PM-07	Partner with Huddle Inc. Ticket Program to provide advertising on ticket backs for high school sporting and extracurricular events.
PM-08	Use paid media to support the public information and education campaign to inform the Georgia motoring public about the new Hands-Free Georgia distracted driving law.
PM-09	To partner with local agencies to implement innovative HVE, education, and advertising campaigns targeting distracted driving.
PM-10	Labor Day Impaired Driving
PM-11	Yield Behind the Wheel Share the Road With Farm Vehicles
PM-12	Thanksgiving CIOT
PM-13	Holiday Impaired Driving
PM-14	Distracted Driving Awareness Month
PM-15	Memorial Day CIOT
PM-16	July 4th Impaired Driving

5.9.2.1 Planned Activity: To use Paid Media to support ongoing Click It Or Ticket (CIOT) enforcement efforts to help decrease unbelted injury and fatality stats on Georgia's highways while increasing overall public awareness of occupant protection and increasing the use of safety belts and child safety restraint systems statewide.

Planned activity number PM-08

Primary countermeasure strategy

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

5.9.2.9 Planned Activity: To partner with local agencies to implement innovative HVE, education, and advertising campaigns targeting distracted driving.

Planned activity name To partner with local agencies to implement innovative HVE, education, and advertising campaigns targeting distracted driving.

Planned activity number PM-09

Primary countermeasure strategy

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d),

that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

5.10 Program Area: Non-motorized (Pedestrians and Bicyclist)

Program area type Non-motorized (Pedestrians and Bicyclist)

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

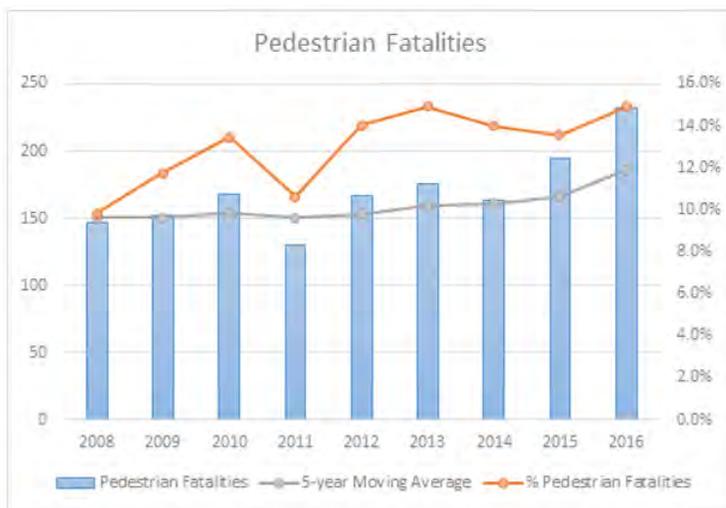

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification – Pedestrians

In 2016, 1,554 residents were killed in motor vehicle crashes in the state of Georgia, an increase of 9.2 % over 2015. Walking is encouraged as an alternate mode of transportation to motor vehicle travel. In many trips, in big cities and small towns around the state can be accomplished entirely on foot. The fast growing metropolitan areas and economic hubs of Georgia rely on safe and attractive pedestrian walkways to accommodate pedestrian travel, enhance business districts, and provide access to homes, businesses, and schools. Many non-driving residents around the state rely on accessible walkways to access public transit. The safety and accessibility of pedestrian walkways are critical issues throughout the state and in urban areas.

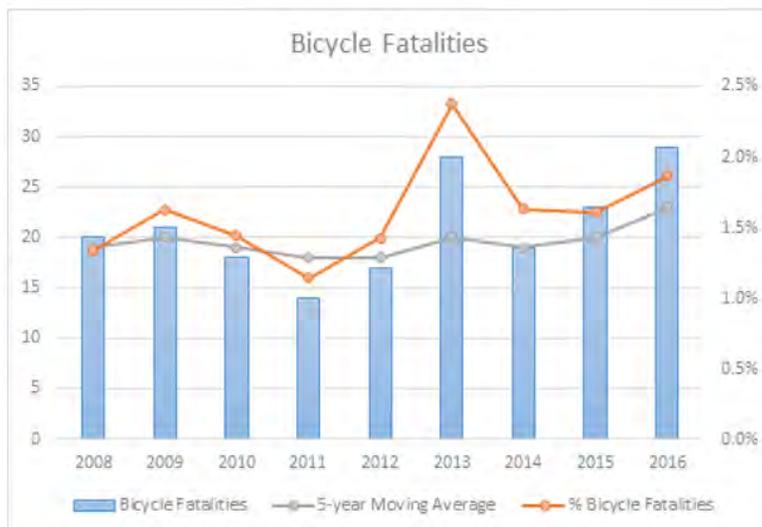

Within Georgia, 232 pedestrians were killed in motor vehicle crashes. Pedestrian fatalities accounted for nearly 14.9% alone of all motor vehicle crashes in 2016. Per FARS data, the top five contributing factors for pedestrian fatalities were; Failure to yield right of way, Improper crossing of roadway or intersection, not visible (dark clothing, no lighting, etc.), in roadway improperly (standing, lying, working, and playing), and darting or running into road. Within these top ten counties (Fulton, DeKalb, Clayton, Gwinnett, Cobb Bibb, Chatham, Dougherty, Muscogee and Catoosa), residents ages 16 – 74, were more affected by the pedestrian fatalities. The pedestrian fatalities for this age group occurred between the hours of 6:00pm and 11:59pm on Mondays, Fridays, Saturdays, and Sundays.

Problem Identification and Program Justification - Bicyclists

Bicycling is a healthy, inexpensive, and efficient mode of transportation throughout Georgia. The metropolitan areas around the state offer opportunities for bicycle commuting and active transportation while the rural roads offer many miles of scenic highway for exploring the state.

Nationally in 2016, there were 840 bicycle related deaths, an increase of nearly 13.3% over 2015. In Georgia, 29 bicyclists were killed in motor vehicle crashes and bicycle fatalities alone accounted for nearly 1.8% of all roadway motor vehicle crashes for 2016.

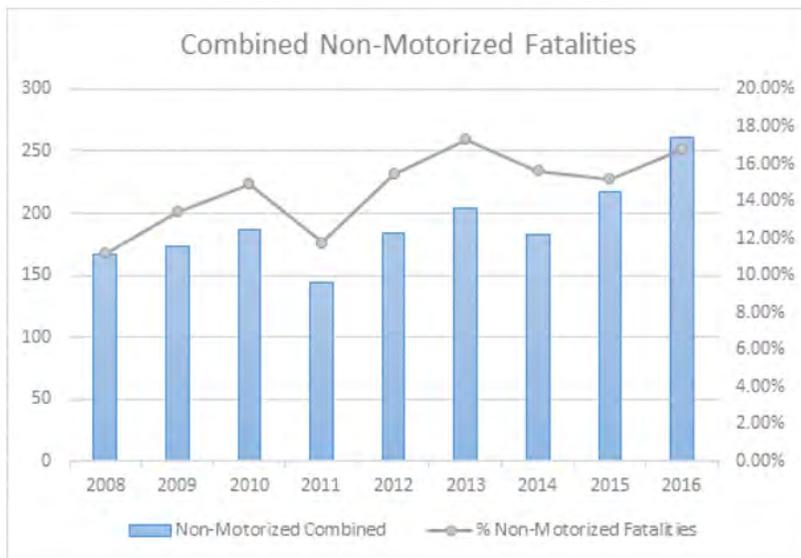

Similar to pedestrian fatalities, the contributing factors for bicycle fatalities resulted in failure to yield right of way, not visible (dark clothing, no lighting, etc.), failure to obey traffic signs, signals, or officer, wrong way riding, and operating without required equipment. Although, there were many other contributing factors in 2016, “none reported” accounted for 2.9% of the bicycle fatalities that occurred in Georgia.

These types of fatalities were more prone to occurring during the weekday between 6:00pm - 8:59pm and on the weekend between noon – 2:59pm. Per FARS data, Mondays and Fridays were accounted for as the weekday and weekend; resulting in males residents of various age groups (10 -15, 45 - 54 and 55 – 64 years of age.) becoming the target population of bicycle fatalities within Georgia.

Rapid urban growth has contributed to more and more roads being built with few considerations for the movement of pedestrians and bicyclists. Organizations that advocate for a balanced approach to development are beginning to impact planning and development. Neighborhood associations, faith communities, and city governments are working together to address these emerging safety concerns.

In 2016, Georgia reported a 9% increase in roadway fatalities (from 1,432 in 2015 to 1,554 in 2016). The total number of non-motorist (pedestrian and bicyclists) fatalities increased by 20% from 217 in 2015 which represents 15% of all roadway fatalities to 261 in 2016, representing 17% of all roadway fatalities. Statewide, nearly 24% (370 out of 1,554) of all roadway traffic fatalities were non-motorists. The following urban counties (DeKalb, Clayton, Fulton and Gwinnett) accounted for 22% (206 out of 944) of roadway fatalities for non-motorists. In addition, Georgia rural areas fatalities rose in 2016, representing a 9% (55 out of 610).

Target Population

The target population is pedestrians and bicyclists in Georgia.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0

2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-10) Number of pedestrian fatalities (FARS)	5 Year	2019	251.0
2019	C-11) Number of bicyclists fatalities (FARS)	5 Year	2019	27.0

2019	Bicycle safety education for adult cyclists

5.10.1 Countermeasure Strategy: Elementary-age Child Pedestrian Training

Program area Non-motorized (Pedestrians and Bicyclist)

Countermeasure strategy Elementary-age Child Pedestrian Training

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Problem Identification and Program Justification – Pedestrians

In 2016, 1,554 residents were killed in motor vehicle crashes in the state of Georgia, an increase of 9.2 % over 2015. Walking is encouraged as an alternate mode of transportation to motor vehicle travel. In many trips, in big cities and small towns around the state can be accomplished entirely on foot. The fast growing metropolitan areas and economic hubs of Georgia rely on safe and attractive pedestrian walkways to accommodate pedestrian travel, enhance business districts, and provide access to homes, businesses, and schools. Many non-driving residents around the state rely on accessible walkways to access public transit. The safety and accessibility of pedestrian walkways are critical issues throughout the state and in urban areas.

Within Georgia, 232 pedestrians were killed in motor vehicle crashes. Pedestrian fatalities accounted for nearly 14.9% alone of all motor vehicle crashes in 2016. Per FARS data, the top five contributing factors for pedestrian fatalities were; Failure to yield right of way, Improper crossing of roadway or intersection, not visible (dark clothing, no lighting, etc.), in roadway improperly (standing, lying, working, and playing), and darting or running into road. Within these top ten counties (Fulton, DeKalb, Clayton, Gwinnett, Cobb Bibb, Chatham, Dougherty, Muscogee and Catoosa), residents ages 16 – 74, were more affected by the pedestrian fatalities. The pedestrian fatalities for this age group occurred between the hours of 6:00pm and 11:59pm on Mondays, Fridays, Saturdays, and Sundays.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

In 2016, 1,554 residents were killed in motor vehicle crashes in the state of Georgia, an increase of 9.2 % over 2015. Walking is encouraged as an alternate mode of transportation to motor vehicle travel. In many trips, in big cities and small towns around the state can be accomplished entirely on foot. The fast growing metropolitan areas and economic hubs of Georgia rely on safe and attractive pedestrian walkways to accommodate pedestrian travel, enhance business districts, and provide access to homes, businesses, and schools. Many non-driving residents around the state rely on accessible walkways to access public transit. The safety and accessibility of pedestrian walkways are critical issues throughout the state and in urban areas.

Within Georgia, 232 pedestrians were killed in motor vehicle crashes. Pedestrian fatalities accounted for nearly 14.9% alone of all motor vehicle crashes in 2016. Per FARS data, the top five contributing factors for pedestrian fatalities were; Failure to yield right of way, Improper crossing of roadway or intersection, not visible (dark clothing, no lighting, etc.), in roadway improperly (standing, lying, working, and playing), and darting or running into road. Within these top ten counties (Fulton, DeKalb, Clayton, Gwinnett, Cobb, Bibb, Chatham, Dougherty, Muscogee and Catoosa), residents ages 16 – 74, were more affected by the pedestrian fatalities. The pedestrian fatalities for this age group occurred between the hours of 6:00pm and 11:59pm on Mondays, Fridays, Saturdays, and Sundays.

Georgia plans to provide funds to agencies for the purpose of increasing pedestrian education and enforcement. Grantees will increase bicycle education and enforcement to encourage the ability for vehicles and pedestrians to safely “share the road”. We will work closely with the Georgia Department of Transportation’s Pedestrian/ Bicycle safety coordinator to implement projects in the areas where data indicates a problem.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Pedestrians are increasing in Georgia and so are pedestrian deaths. Georgia will fund programs to reach elementary aged children to educate them about pedestrian safety.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
Non-Motorized-02	Will host 75 bike and pedestrian safety courses.

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Non-motorized fatalities have increased in Georgia and the main contributing factors are failure to yield right of way, riders not being visible (daytime and nighttime), failure to obey traffic signals, wrong way riding, and operating without proper equipment. Projects we will put into place will address these factors with the public, including riders and pedestrians.

Nationally in 2016, there were 840 bicycle related deaths, an increase of nearly 13.3% over 2015. In Georgia, 29 bicyclists were killed in motor vehicle crashes and bicycle fatalities alone accounted for nearly 1.8% of all roadway motor vehicle crashes for 2016.

Similar to pedestrian fatalities, the contributing factors for bicycle fatalities resulted in failure to yield right of way, not visible (dark clothing, no lighting, etc.), failure to obey traffic signs, signals, or officer, wrong way riding, and operating without required equipment. Although, there were many other contributing factors in 2016, "none reported" accounted for 2.9% of the bicycle fatalities that occurred in Georgia.

These types of fatalities were more prone to occurring during the weekday between 6:00pm - 8:59pm and on the weekend between noon – 2:59pm. Per FARS data, Mondays and Fridays were accounted for as the weekday and weekend; resulting in males residents of various age groups (10 -15, 45 - 54 and 55 – 64 years of age.) becoming the target population of bicycle fatalities within Georgia.

Rapid urban growth has contributed to more and more roads being built with few considerations for the movement of pedestrians and bicyclists. Organizations that advocate for a balanced approach to development are beginning to impact planning and development. Neighborhood associations, faith communities, and city governments are working together to address these emerging safety concerns.

In 2016, Georgia reported a 9% increase in roadway fatalities (from 1,432 in 2015 to 1,554 in 2016). The total number of non-motorist (pedestrian and bicyclists) fatalities increased by 20% from 217 in 2015 which represents 15% of all roadway fatalities to 261 in 2016, representing 17% of all roadway fatalities. Statewide, nearly 24% (370 out of 1,554) of all roadway traffic fatalities were non-motorists. The following urban counties (DeKalb, Clayton, Fulton and Gwinnett) accounted for 22% (206 out of 944) of roadway fatalities for non-motorists. In addition, Georgia rural areas fatalities rose in 2016, representing a 9% (55 out of 610).

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Because of the increase in non-motorized fatalities, Georgia will address these problems with elementary aged children. This will include a bicycle rodeo to educate children on proper safety gear and riding techniques as well as projects that educate this age group within their schools and summer camps.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

More and more people are riding bicycles as their main form of transportation. Children are also riding bicycles, many still without helmets. GOHS will help fund elementary school aged projects, including a bicycle rodeo.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
Non-motorized-01	Host one Bike Rodeo to educate children ages 6-14.	
Non-Motorized-02	Will host 75 bike and pedestrian safety courses.

5.10.3 Countermeasure Strategy: Bicycle safety education for adult cyclists

Program area Non-motorized (Pedestrians and Bicyclist)

Countermeasure strategy Bicycle safety education for adult cyclists

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's

problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Nationally in 2016, there were 840 bicycle related deaths, an increase of nearly 13.3% over 2015. In Georgia, 29 bicyclists were killed in motor vehicle crashes and bicycle fatalities alone accounted for nearly 1.8% of all roadway motor vehicle crashes for 2016.

Similar to pedestrian fatalities, the contributing factors for bicycle fatalities resulted in failure to yield right of way, not visible (dark clothing, no lighting, etc.), failure to obey traffic signs, signals, or officer, wrong way riding, and operating without required equipment. Although, there were many other contributing factors in 2016, "none reported" accounted for 2.9% of the bicycle fatalities that occurred in Georgia.

These types of fatalities were more prone to occurring during the weekday between 6:00pm - 8:59pm and on the weekend between noon – 2:59pm. Per FARS data, Mondays and Fridays were accounted for as the weekday and weekend; resulting in males residents of various age groups (10 -15, 45 - 54 and 55 – 64 years of age.) becoming the target population of bicycle fatalities within Georgia.

Rapid urban growth has contributed to more and more roads being built with few considerations for the movement of pedestrians and bicyclists. Organizations that advocate for a balanced approach to development are beginning to impact planning and development. Neighborhood associations, faith communities, and city governments are working together to address these emerging safety concerns.

In 2016, Georgia reported a 9% increase in roadway fatalities (from 1,432 in 2015 to 1,554 in 2016). The total number of non-motorist (pedestrian and bicyclists) fatalities increased by 20% from 217 in 2015 which represents 15% of all roadway fatalities to 261 in 2016, representing 17% of all roadway fatalities. Statewide, nearly 24% (370 out of 1,554) of all roadway traffic fatalities were non-motorists. The following urban counties (DeKalb, Clayton, Fulton and Gwinnett) accounted for 22% (206 out of 944) of roadway fatalities for non-motorists. In addition, Georgia rural areas fatalities rose in 2016, representing a 9% (55 out of 610).

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Georgia will use non-motorized funds across the state, in areas where data shows higher bicycle and pedestrian fatalities occur. The project will focus on the highest factors shows in these types of crashes, including proper safety gear and clothing, and following the rules of the road.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

In 2016, Georgia reported a 9% increase in roadway fatalities (from 1,432 in 2015 to 1,554 in 2016). The total number of non-motorist (pedestrian and bicyclists) fatalities increased by 20% from 217 in 2015 which represents 15% of all roadway fatalities to 261 in 2016, representing 17% of all roadway fatalities. Statewide, nearly 24% (370 out of 1,554) of all roadway traffic fatalities were non-motorists. The following urban counties (DeKalb, Clayton, Fulton and Gwinnett) accounted for 22% (206 out of 944) of roadway fatalities for non-motorists. In addition, Georgia rural areas fatalities rose in 2016, representing a 9% (55 out of 610).

5.11 Program Area: Occupant Protection (Adult and Child Passenger Safety)

Program area type Occupant Protection (Adult and Child Passenger Safety)

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

Yes

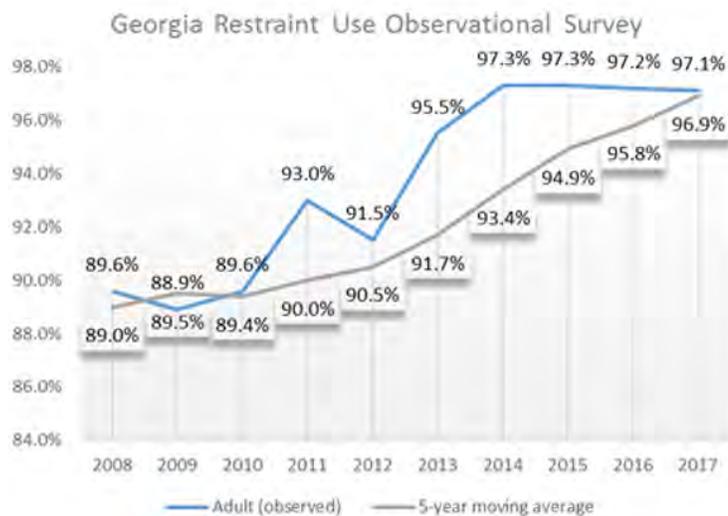

Problem identification

Enter description and analysis of the State’s highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

One of the leading causes of motor vehicle injuries and deaths is failure to wear safety belts or to properly secure children in age, height, and weight appropriate child safety seats. In Georgia, forty-five (45%) of all vehicle crash fatalities in 2016 were attributed to non-restraint use. The National Highway Traffic Safety Administration (NHTSA) data that shows nationally safety belts, when used, reduce the risk of fatal injury to front seat passenger car occupants by forty-five percent (45%) and the risk of moderate-to-critical injury by fifty percent (50%). For light-truck occupants, seat belts reduce the risk of fatal injury by sixty percent (60%) and moderate-to-critical injury by sixty-five percent (65%). Research on the effectiveness of child safety seats has found them to reduce fatal injury by seventy-one percent (71%) for infants and by fifty-four percent (54%) for toddlers in passenger vehicles. For infants and toddlers in light trucks, the corresponding reductions are fifty-eight percent (58%) and fifty-nine percent (59%), respectively.

The Governor’s Office of Highway Safety (GOHS), partners with a research contractor to conduct an annual observational survey of restraint use. Results suggest that safety belt use varies geographically and demographically. Highlights from the September 2017 report are as follows:

- Statewide safety belt usage in 2016 for drivers and passengers of passenger cars, trucks, and vans was 97.1%, a decrease of 0.1% from 2015.
- Safety belt usage was 98.3% in passenger cars, 97.3% in vans, and 95.5% in trucks.
- Observed safety belt use for front seat occupants was highest in the Atlanta Metropolitan Statistical Area (100%), followed by non-Atlanta MSAs (96.4%), and rural areas (94.8%).
- Child safety seat usage in 2016 was 99.0%, a decrease of 0.3% from the 2015 usage rate. Child safety seat usage was highest in the Atlanta MSA and non-Atlanta MSAs (100%) than in rural areas (92.9%).

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)

2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-4) Number of unrestrained passenger vehicle occupant fatalities, all seat positions (FARS)	5 Year	2019	507.0

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	Short-term, High Visibility Seat Belt Law Enforcement
2019	Child Restraint System Inspection Station(s)

5.11.1 Countermeasure Strategy: Short-term, High Visibility Seat Belt Law Enforcement

Program area Occupant Protection (Adult and Child Passenger Safety)

Countermeasure strategy Short-term, High Visibility Seat Belt Law Enforcement

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

OCCUPANT PROTECTION: Click It or Ticket

According to the NHTSA's "Countermeasures that work: Eighth Edition, 2015," The most common high visibility belt law enforcement method consists of short (typically lasting for two weeks), intense, highly publicized periods of increased belt law enforcement, frequently using checkpoints, saturation patrols, or enforcement zones. All high visibility enforcement programs include communications and outreach strategies that use some combination of earned media (news stories) and paid advertising. Communications and outreach can be conducted at local, State, regional, or national levels.

The Governor's Office of Highway Safety recognizes that law enforcement plays an extremely important role in overall highway safety in the State of Georgia. Campaigns such as Click it or Ticket has proven that high-visibility enforcement of Georgia's traffic laws is the key to saving lives and reducing injuries on Georgia's roadways. Georgia will continue to encourage all law enforcement agencies to participate in the NHTSA safety campaign, Click It or Ticket.

Failure to use safety belts and child safety seats is one of the leading causes of motor vehicle injuries and deaths in this country. This persists despite NHTSA data that shows safety belts have proven to reduce the risk of fatal injury to front seat passenger car occupants by forty-five percent (45%). In pick-up trucks, SUVs', and mini-vans, properly worn seatbelts reduce fatal injury by sixty percent (60%).

NHTSA research data show more than seventy-three percent (73%) of nationwide passenger vehicle occupants involved in serious crashes survive when wearing safety belts correctly. Although Georgia had one of the highest recorded safety belt usage rate in the southeast at 97.2%, sustaining this number necessitates a rigorous, ongoing public awareness campaign that combines attention-getting Paid Media in conjunction with concentrated earned media efforts and high profile enforcement measures.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The Occupant Protection Paid Media message, during Click It or Ticket, is directed at a statewide audience. NHTSA relies upon the results of a national study which shows the use of paid advertising is clearly effective in raising driver safety awareness and specifically has a greater impact on "younger drivers in the 18-to-34 year-old demographic". Based on NHTSA audience research data, Georgia's occupant protection and impaired driving messages are directed at two target audiences during the course of regularly-scheduled and nationally-coordinated statewide paid media campaigns. Georgia's primary audience is composed of male drivers, age 18 to 34.

In its secondary audience, GOHS seeks to reach all Georgia drivers with occupant protection and impaired driving highway safety messages. However, because Georgia is a state with a growing Hispanic population, newly arrived Latinos also represent a portion of the secondary Paid Media target market. Hispanic radio and TV will continue to represent a portion of the GOHS targeted statewide media buy. Furthermore, because Georgia sees a growing potential for an erosion of occupant safety numbers among young African Americans, that community is also a targeted secondary demographic for GOHS Paid Media highway safety campaigns.

In an effort to communicate important campaign dates, legislative updates, court decisions and other pertinent information to traffic enforcement officers across the state, the Governor's Office of Highway Safety in partnership with Emory University maintains an email list serve that all participating law enforcement officers can receive up to date traffic enforcement related information. There are over 800 traffic enforcement officers and prosecutors subscribed to the Georgia Traffic Enforcement Network (GATEN) list serv.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The Governor's Office of Highway Safety (GOHS), partners with a research contractor to conduct an annual observational survey of restraint use. Results suggest that safety belt use varies geographically and demographically. Non-users are typically male pickup truck occupants in the rural areas of Georgia. Highlights from the September 2017 report are as follows:

- Statewide safety belt usage in 2017 for drivers and passengers of passenger cars, trucks, and vans was 97.1%, a decrease of 0.1% from 2016.
- Safety belt usage was 98.3% in passenger cars, 97.3% in vans, and 95.5% in trucks.
- Observed safety belt use for front seat occupants was highest in the Atlanta Metropolitan Statistical Area (97.4%), followed by non-Atlanta MSAs (96.4%), and rural areas (94.8%).
- Child safety seat usage in 2017 was 99.0%, a decrease of 0.3% from the 2016 usage rate.
- Child safety seat usage was higher in the Atlanta MSA and the non-Atlanta MSA (100%), than in rural areas (92.9%).

Based upon this Observational seatbelt survey result, Georgia will continue to reach rural Georgians. The results in child safety restraint survey showed statewide usage at 99.0%; however, rural Georgia was at 92.9% versus Metro Atlanta at 100%.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
OP-01	Conduct four (4) statewide campaigns to promote occupant safety.	Short-term, High Visibility Seat Belt Law Enforcement
OP-09	Provide funds to law enforcement agencies to conduct 7,800 occupant protection contacts.	Short-term, High Visibility Seat Belt Law Enforcement
OP-10	Host one Child Passenger Safety Caravan during National Child	Short-term, High Visibility Seat Belt Law

	Passenger Safety Week.	Enforcement
OP-11	Provide funds to law enforcement agencies to conduct 37 local seatbelt surveys.	Short-term, High Visibility Seat Belt Law Enforcement
OP-13	Conduct Georgia's annual seatbelt survey	Short-term, High Visibility Seat Belt Law Enforcement
PT-06	Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects	High Visibility Enforcement

5.11.1.1 Planned Activity: Conduct four (4) statewide campaigns to promote occupant safety.

Planned activity name Conduct four (4) statewide campaigns to promote occupant safety.

Planned activity number OP-01

Primary countermeasure strategy Short-term, High Visibility Seat Belt Law Enforcement

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

Yes

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

Yes

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

Yes

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

5.11.2 Countermeasure Strategy: Child Restraint System Inspection Station(s)

Program area Occupant Protection (Adult and Child Passenger Safety)

Countermeasure strategy Child Restraint System Inspection Station(s)

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

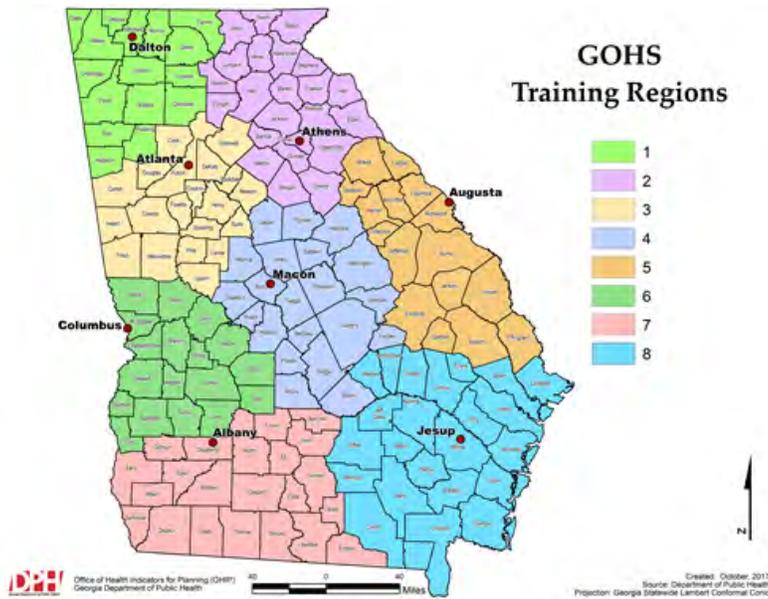

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Georgia hosts Child Restraint Inspection Stations statewide and most of the 159 counties. Certified Child Passenger Safety Technicians (CPST) are available by appointment at each fitting station to assist local parents and caregivers with properly installing child safety seats and providing extra resources when necessary. The Governor's Office of Highway Safety (GOHS) maintains an updated list of Inspection Stations on the website at www.gahighwaysafety.org. This list identifies the location and contact person of each station. The list also represents and/or services the majority of Georgia's population and illustrates the Governor's Office of Highway Safety (GOHS) outreach efforts in reaching and providing services to the underserved areas through the inclusion of Health Departments, Fire departments, and local agencies statewide serving as active inspection stations in most of the 159. The Governor's Office of Highway Safety (GOHS) will work with partners to expand the number of statewide inspection stations and keep updated lists posted on the Governor's Office of Highway Safety (GOHS) website.

Georgia is currently maintaining 2,308 certified Child Passenger Safety Technicians (CPST) and eighty (80) certified Child Passenger Safety (CPS) Instructors. In calendar year 2017 Georgia held 44 Child Passenger Safety courses. Of these, there were 35 certification courses and 9 renewal courses. Georgia certified a total of 477 new technicians, more than any other state in NHTSA Region 4. The average National recertification rate was about 58.4% in calendar year 2017, while Georgia was above the average recertification rate at 60.7%.

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Based upon the 2016 Observational seatbelt survey results, Georgia began working with The Georgia Department of Public Health Child Occupant Safety Project to focus on a new approach to reach rural Georgians. The results in the 2017 child safety restraint survey continues to show rural Georgia at 92.9%, a decrease over the 2016 survey. The GA Department of Public Health (DPH) has set up Regional Coordinators across the state that are focused on child passenger safety education within their local region. These coordinators are full time employees of DPH and reside within their region. We feel this will help with trainings and coordination among fire, EMS, and law enforcement. The project is currently in its first year and we are unable to determine effectiveness at this time however we do expect the rural usage rate to increase.

Georgia will also host the annual Child Safety Seat Caravan during Child Passenger Safety Week. This is a statewide event where law enforcement, public health, non-profits, etc come together and saturate the state with child safety seat events.

Certification courses will be held statewide in an effort to reach all areas of the state. Locations have been chosen based on requests from high-risk areas. Every attempt will be made to schedule courses outside of Georgia’s hottest and coldest months due to the required outdoor training. In compliance with the National Certification program all courses end with a seat check event on the final day. The courses are generally open to the public for participation with special outreach to law enforcement, fire and emergency rescue, public health, school systems and child care.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The Child Occupant Safety Project staff will continue to operate using a regional model for statewide outreach. Regional coordinators will attend local EMS Regional Council, EMS-C, and/or RTAC meetings, local traffic enforcement network meetings, and other local networking opportunities. Connections made during these meetings will be leveraged into recruitment opportunities for CPST courses.

For retention, COSP staff will host more than 20 CEU classes throughout the state, providing multiple opportunities for Technicians to attend in-person recertification sessions. Regional coordinators will also maintain a local listserv to advertise local classes and community check events to ensure Techs have ample opportunities to gain their seat-checks and community event.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
OP-01	Conduct four (4) statewide campaigns to promote occupant safety.	Short-term, High Visibility Seat Belt Law Enforcement
OP-02	Facilitate an annual meeting for Georgia's certified Child Passenger Safety Technician (CPST) Instructors	
OP-03	Provide funds to conduct twenty-four (24) Child Passenger Safety Technician (CPST) Certification Courses	Child Restraint System Inspection Station(s)
OP-04	Provide funds to conduct thirty-three (33) Child Passenger Safety Technician (CPST) Recertification Courses	Child Restraint System Inspection Station(s)
OP-05	Conduct twenty-four (24) Continuing Education Unit (CEU) credit workshops	Child Restraint System Inspection Station(s)
OP-06	Provide funds to coordinate and conduct twenty (20) minority outreach presentations in	

OP-07	Provide funds so at least 150 of Georgia's 159 counties are provided mini-grants for child safety seats focused on minority and low-income families.	Child Restraint System Inspection Station(s)
OP-08	Conduct 8 courses to EMS providers titled "Transporting children safely in Ambulances."	
OP-09	Provide funds to law enforcement agencies to conduct 7,800 occupant protection contacts.	Short-term, High Visibility Seat Belt Law Enforcement
OP-10	Host one Child Passenger Safety Caravan during National Child Passenger Safety Week.	Short-term, High Visibility Seat Belt Law Enforcement
OP-11	Provide funds to law enforcement agencies to conduct 37 local seatbelt surveys.	Short-term, High Visibility Seat Belt Law Enforcement
OP-12	Distribute 4,120 child safety seats	Child Restraint System Inspection Station(s)
OP-13	Conduct Georgia's annual seatbelt survey	Short-term, High Visibility Seat Belt Law Enforcement
OP-14	Conduct 80 outreach events in occupant protection	

5.11.2.1 Planned Activity: Facilitate an annual meeting for Georgia's certified Child Passenger Safety Technician (CPST) Instructors

Planned activity name Facilitate an annual meeting for Georgia's certified Child Passenger Safety Technician (CPST) Instructors

Planned activity number OP-02

Primary countermeasure strategy

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

Yes

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

Yes

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Enter description of the planned activity.

Will provide Georgia's certified Child Passenger Safety Technician (CPST) Instructors program updates and improve Child Passenger Safety (CPS) class instructions.

Enter intended subrecipients.

5.12 Program Area: Aggressive Driving

Program area type Aggressive Driving

Will countermeasure strategies and planned activities be described in this plan to address the program area?

Yes

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification

Excess speed can contribute to both the frequency and severity of motor vehicle crashes. At higher speeds, additional time is required to stop a vehicle and more distance is traveled before corrective maneuvers can be implemented. Speeding reduces a driver's ability to react to emergencies created by driver inattention, by unsafe maneuvers of other vehicles, by roadway hazards, by vehicle system failures (such as tire blowouts), or by hazardous weather conditions. The fact that a vehicle was exceeding the speed limit does not necessarily mean that this was the cause of the crash, but the probability of avoiding the crash would likely be greater had the driver or drivers been traveling at slower speeds.

The Governor's Office of Highway Safety, along with state and local law enforcement conducts a 100-day sustained education and enforcement program entitled "100 Days of Summer HEAT (Highway Enforcement of Aggressive Traffic)" from Memorial Day through Labor Day. Nationally, FARS data shows a 5.67% increase in overall fatalities from 2015 to 2016, however the percentage of speed related crashes remained the same at 27% of the overall fatalities. The economic cost to society of speed-related crashes in the U.S. was estimated at \$52 billion.

Total Fatalities, Speeding-Related Fatalities, and Percentage Speed-Related

Region		2011	2012	2013	2014	2015	2016
Georgia	Speed-Related Fatalities	220	180	197	213	268	266
	% Speed-Related	18%	15%	17%	18%	19%	17%
	Annual % Change in	1%	-18%	9.7%	8.1%	25.8%	-7%
National	Speed-Related Fatalities	10,001	10,219	9,613	9,283	9,723	10,111
	% Speed-Related	31%	30%	29%	28%	27%	27%
	Annual % Change in	-5%	2%	-6%	-4%	3%	4%

The chance of a crash being fatal is over three times higher in crashes related to speed than crashes not related to speed. More young male drivers are involved in fatal crashes as a result of speeding. In 2016, 22 percent of the 15 to 24-year-old drivers who were involved in fatal crashes were also speeding at the time of the crash in Georgia. During the same year, 27 percent of all young (ages 15-24 years) motorcycle operators involved in fatal crashes were speeding, as compared to 18 percent for light truck drivers; which includes pickup truck, SUV, and Van.

Seventeen percent (17%) of all Georgia fatalities were related to speed in 2016. This is among the lowest percent in the country however there were still 266 lives lost at the hands of speeding vehicles. This is a slight decrease from 2015 but still higher than 2012 when there were 180 speed related fatalities (15% of all roadway fatalities).

Thunder Task Force

The Governor’s Office of Highway Safety Thunder Task Force is a Traffic Enforcement Special Response Team coordinated by the Law Enforcement Services Team. The Thunder Task Force is deployed to areas of the state where data indicates unusually high incidences of traffic fatalities and serious injuries.

The Task Force is made up of selected members of the Georgia State Patrol, Motor Carrier Compliance Division, and the Governor’s Office of Highway Safety H.E.A.T. (Highway Enforcement of Aggressive Traffic) Teams. The concept is to identify a county or area of the state to deploy the task force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the region with three months of high visibility enforcement and earned media.

The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process. With this continued effort of putting resources where the problems are, then moving to the next location once the problem is stabilized. The Thunder Task Force has proven to be a very effective and cost efficient method of saving lives and reducing the projected numbers of annual fatalities in the State of Georgia.

Target Population

The target population is the motoring public of Georgia.

Performance measures

Select at least one performance measure that is data-driven, that enables the State to track progress toward meeting the quantifiable annual target. For program areas where performance measures have not been jointly developed (e.g., distracted driving, drug-impaired driving) for which States are using HSP funds, the State shall develop its own performance measures and performance targets that are data-driven.

Performance Measures in Program Area

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-6) Number of speeding-related fatalities (FARS)	5 Year	2019	306.0

Countermeasure strategies

Select existing countermeasure strategies below and/or click Add New to enter and select countermeasure strategies to submit for program area.

Countermeasure Strategies in Program Area

Fiscal Year	Countermeasure Strategy Name
2019	High Visibility Enforcement
2019	Alcohol Impairment: Detection, Enforcement and Sanctions

5.12.1 Countermeasure Strategy: High Visibility Enforcement

Program area Impaired Driving (Drug and Alcohol)

Countermeasure strategy High Visibility Enforcement

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education,

communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2018, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019. The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will continue to focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

The Governor's Office of Highway Safety created sixteen regional traffic enforcement networks that encompass all 159 Georgia counties. The networks are made up of local and state traffic enforcement officers and prosecutors from each region of the state. The networks are coordinated by a coordinator and an assistant coordinator, both which are full time law enforcement officers volunteering their time and efforts to highway safety. The dedicated support from these officers, their law enforcement agency and department heads are unsurpassed. The networks meet monthly to provide information, training and networking opportunities to the attending officers. Prosecutors, Judges and non-traditional traffic enforcement agencies such as the Georgia Department of Natural Resources, Department of Corrections and Military Police often attend the meetings and offer assistance for traffic enforcement training and initiatives. The networks are utilized to efficiently mobilize law enforcement statewide for traffic enforcement initiatives. The traffic enforcement networks have become an outstanding networking, training and communication tool for Georgia's traffic enforcement community.

In an effort to communicate legislative updates, court decisions and other pertinent information to traffic enforcement officers across the state, the Governor's Office of Highway Safety in partnership with Emory University has established an email list serve that all participating law enforcement officers can receive up to date traffic enforcement related information. Information is about traffic enforcement policies, legal updates, training opportunities, and other traffic enforcement related information. There are over 800 traffic enforcement officers and prosecutors subscribed to the Georgia Traffic Enforcement Network (GATEN) list serv.

The Governor's Office of Highway Safety recognizes that law enforcement plays an extremely important role in overall highway safety in the State of Georgia. Campaigns such as Click it or Ticket, Operation Zero Tolerance (Drive Sober or Get Pulled Over), and the 100 Days of Summer HEAT (Highway Enforcement of Aggressive Traffic) have proven that high-visibility enforcement of Georgia's traffic laws is the key to saving lives and reducing injuries on Georgia's roadways.

<i>FFY 2019 Traffic Enforcement Mobilizations</i>	<i>Dates</i>
Click it or Ticket	November 16, 2018 – November 25, 2018
Drive Sober or Get Pulled Over	December 18, 2018 – January 3, 2019
Click it or Ticket	May 14, 2019 – June 2, 2019
Drive Sober or Get Pulled Over	June 21, 2019 – July 7, 2019
Drive Sober or Get Pulled Over	August 15, 2019 – September 2, 2019

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

The Governor's Office of Highway Safety Thunder Task Force is a Traffic Enforcement Special Response Team coordinated by the Law Enforcement Services Team. This is an evidence-based traffic safety enforcement program to prevent traffic violations, crashes, and injuries in locations most at risk for such incidents. The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with a Thunder Task Force mobilization. The concept is to identify a county or area of the state to deploy the Task Force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the regions with two to three months of high visibility enforcement and earned media. The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process.

A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by Governor's Office of Highway Safety (GOHS), and Georgia Electronic Accident Reporting System (GEARS). The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Law Enforcement Services Division and includes the Georgia State Patrol, Governor's Office of Highway Safety HEAT Units (Highway Enforcement of Aggressive Traffic), Department of Public Safety Motor Carrier Compliance Division (MCCD) and local law enforcement. We also use as much local crash data as available, looking at time of day, location and causation (DUI, Seatbelt, Speed, Motorcycles). The Thunder Task Force is deployed to areas of the state that data indicates unusually high incidences of traffic fatalities and serious injuries. The Task Force identifies the problem areas, and conducts mobilizations using the resources that are needed for these problem areas, such as the Motor Carrier Compliance Division (MCCD), Child Passenger Safety Technicians (CPST), and trained DUI officers. With this continued effort of putting resources where the problems are, the Governor's Office of Highway Safety (GOHS) is able to stabilize the problem with a proven effective and cost efficient method of saving lives, therefore reducing the projected numbers of annual traffic fatalities in the State of Georgia. While conducting a Thunder Task Force Mobilization, the enforcement plan is adjusted on a continuous basis, using current local data provided by the local jurisdiction. 60 to 90 days after the mobilizations end, the Task Force typically returns to the jurisdiction for a follow up visit and evaluation.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with an Thunder Task Force mobilization. A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by GOHS, and GEARS. The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Services Division and includes the Georgia State Patrol, GOHS HEAT Units (Highway Enforcement of Aggressive Traffic), DPS Motor Carrier Compliance Division and Local Law Enforcement to conduct the high visibility enforcement during the three month effort.

The concept is to identify a county or area of the state to deploy the task force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate

the region with high visibility enforcement and earned media. The continuous earned media and the overwhelming high visibility enforcement during the enforcement periods gives the perception that the task force is mobilized during the entire summer.

The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process. With this continued effort of putting resources where the problems are, then moving to the next location once the problem is stabilized has proven to be a very effective and cost efficient method of saving lives and reducing the projected numbers of annual traffic fatalities in the State of Georgia.

The Thunder Task Force concept was piloted in Savannah-Chatham County during April, May and June of 2007.

The three month program (12 operational days) had the following results:

- 96 Drunk Drivers were arrested.
- 175 Suspended or Revoked License arrests.
- 1617 Other traffic Violations.
- 75 Drug offenders and fugitives arrested
- 4732 Total Arrests or citations

During the three month period, the Thunder Task Force reduced fatal crashes in Savannah-Chatham County by more than **58%**.

The GOHS Thunder Task Force has found a winning recipe; data focused, cost efficient, high visibility enforcement, combined with an extensive earned media message. The result is lives saved on Georgia roadways. In every location the Task Force has been deployed we have seen a reduction in Crashes and Fatalities.

Planned activities

Select existing planned activities below and/or click Add New to enter and select planned activities that the State will conduct to support the countermeasure strategies within each program area to address its problems and achieve its performance targets.

Planned activities in countermeasure strategy

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
SC-01	Train 1,400 law enforcement officers in speed detection	
SC-02	Law enforcement will conduct 47,140 speed contacts.	
AL-01	Conduct three (3) waves of statewide enforcement with the "Drive Sober or Get Pulled Over." campaign.	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-02	Law enforcement will conduct 7,704 impaired driver contacts	Alcohol Impairment: Detection, Enforcement and Sanctions
PT-06	Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects	High Visibility Enforcement

5.12.1.1 Planned Activity: Train 1,400 law enforcement officers in speed detection

Planned activity name	Train 1,400 law enforcement officers in speed detection
Planned activity number	SC-01
Primary countermeasure strategy	

Is this planned activity part of the evidence-based traffic safety enforcement program (TSEP)? § 1300.11(d)(5)

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this planned activity part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification, at the level of detail required under § 1300.11(d)]

No

Is this planned activity part of the State traffic safety information system improvements grant application (§ 405(c)) for the State traffic records strategic plan? § 1300.22(b)(2)(iii) [Planned activities, at the level of detail required under § 1300.11(d), that implement a recommendation(s) from the State's most recent highway safety data and traffic records system assessment]

No

Is this planned activity part of the impaired driving countermeasure grant application (§ 405(d)) for spending grant funds on impaired driving activities as a high-range State? § 1300.23(f)(1)(ii) [Planned activities, at the level of detail required under § 1300.11(d), for spending grant funds on impaired driving activities listed in § 1300.23(j)(4) that must include high-visibility enforcement efforts]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

No

Is this planned activity part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

No

Is this planned activity part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

5.12.2 Countermeasure Strategy: Alcohol Impairment: Detection, Enforcement and Sanctions

Program area Motorcycle Safety

Countermeasure strategy Alcohol Impairment: Detection, Enforcement and Sanctions

Innovative countermeasure strategies are countermeasure strategies which have not yet been proven effective in the highway safety arena but show potential based on limited practical application. Justification of innovative countermeasure strategies can be based on past successes when applied to other behavioral safety problems.

Is this countermeasure strategy innovative?

No

Is this countermeasure strategy part of the planned high visibility enforcement strategies that support national mobilizations? § 1300.11(d)(6)

Yes

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child restraint inspection stations? § 1300.21(d)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) for child passenger safety technicians? § 1300.21(d)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the seat belt enforcement criterion? § 1300.21(e)(3) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d)(5), demonstrating that the State conducts sustained enforcement (i.e., a program of recurring efforts throughout the fiscal year of the grant to promote seat belt and child restraint enforcement), and that based on the State's problem identification, involves law enforcement agencies responsible for seat belt enforcement in geographic areas in which at least 70 percent of either the State's unrestrained passenger vehicle occupant fatalities occurred or combined fatalities and serious injuries occurred]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the high risk population countermeasure programs criterion? § 1300.21(e)(4) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs to improve seat belt and child restraint use for at least two of the following at-risk populations: (i) Drivers on rural roadways; (ii) Unrestrained nighttime drivers; (iii) Teenage drivers; (iv) Other high-risk populations identified in the occupant protection program area plan required under § 1300.21(d)(1)]

No

Is this countermeasure strategy part of the State occupant protection grant application (§ 405(b)) under the comprehensive occupant protection program criterion? § 1300.21(e)(5)(ii)(B) [Countermeasure strategies (such as enforcement, education, communication, policies/legislation, partnerships/outreach), at the level of detail required under § 1300.11(d), designed to achieve the performance targets of the strategic plan]

No

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the motorcyclist awareness program criterion? § 1300.25(f) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest]

Yes

Is this countermeasure strategy part of the State motorcyclist safety grant application (§ 405(f)) under the impaired driving program criterion? § 1300.25(h)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest]

Yes

Is this countermeasure strategy part of the State racial profiling data collection grant application (§ 1906)? § 1300.28(b)(2) [Countermeasure strategies and planned activities, at the level of detail required under § 1300.11(d), supporting the assurances that the State will undertake activities during the fiscal year of the grant to comply with the requirements of § 1300.28(b)(1)]

No

Countermeasure strategy description

To describe the program area countermeasure strategy that will help the State complete its program and achieve specific performance targets, complete the following:

Enter assessment of the overall projected traffic safety impacts of the countermeasure strategy chosen and of the planned activities to be funded.

The National Highway Traffic Safety Administration (NHTSA) reports that in 2016, 37,461 people were killed in motor vehicle traffic crashes in the United States, of which 10,497 (28%) were alcohol-related. Every fifty minutes in America, someone is killed in an alcohol-related crash. Nationally, these crashes result in more than \$44 billion in economic costs on an annual basis.

In Georgia during the 2016 calendar year, over 60 percent of all motorcyclist crashes occurred in metropolitan areas including Atlanta, Gainesville, Augusta, Savannah, and Columbus. According to FARS data, Fulton, Dekalb, Cobb, and Gwinnett counties had the highest number of motorcycle crashes in 2016. The attached charts show FARS data from the 2016 calendar year.

Alcohol is a significant risk factor among Georgia motorcycle rider fatalities. Every year since 2008, alcohol related motorcycle fatalities showed a steady increase in Georgia. According to the Fatality Analysis Reporting System in 2016, 21 percent (35) of the motorcycle riders killed in fatal crashes (167) contained a BAC at or above a .08. This is less than the national level of 1,259 (25%) of 4,950 motorcycle riders who were alcohol impaired (BAC of .08 g/dL or higher).

In 2016, Georgia has an alcohol reporting rate of 42% -- 42% of all drivers involved in fatal crashes were tested for alcohol consumption with recorded BAC. This is the highest reporting percentage in Georgia in the previous 5 years. In Georgia, 2,150 drivers were involved in fatal crashes, and 900 drivers were tested. The highest alcohol testing occurred among the fatally injured (62%), followed by Non-Incapacitating Evident Injured drivers (23%).

Alcohol Impaired Driving Motor Vehicle Fatalities in Georgia	Year					
	2011	2012	2013	2014	2015	2016
Alcohol-Impaired Driving Fatalities (BAC=.08+)**	271	295	296	279	358	368
Annual Percent Change	-9%	9%	0%	-6%	28%	3%

As indicated above, alcohol was associated with 368 highway fatalities in Georgia during 2016. This equates to twenty-four percent (24%) of Georgia's overall fatalities. Even with stricter laws, high visibility law enforcement, and increased public information and education (PI&E) programs, the number of impaired driving crashes, injuries and fatalities remains unacceptable. The chance of a crash being fatal is six times higher if exposed to impaired driving when compared to those not related to alcohol or drugs.

As presented below, The U.S. and Georgia had an increase in overall fatalities as well as increase in alcohol related fatalities. Data shows from 2011-2016, Georgia experienced increase in overall crash fatalities of 328 (27%) and an increase of 97 (36%) in alcohol-related traffic deaths. These numbers indicate that Georgia should emphasize preventative measures for countering the problems of driving under the influence of alcohol.

MEASURE	REGION	2011	2012	2013	2014	2015	2016
Total Fatalities	Georgia	1,226	1,192	1,179	1,164	1,430	1,554
	US	32,479	33,782	32,894	32,675	35,092	37,461

Enter description of the linkage between program area problem identification data, performance targets, identified countermeasure strategy and allocation of funds to planned activities.

Impaired Driving Enforcement – H.E.A.T.

Aggressive traffic has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. The Governor's Office of Highway Safety's (GOHS) impaired driving program is geared toward jurisdictions where the incidences of impaired crashes among motorist and motorcyclist are the highest within the State of Georgia.

Since 2002, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-

four officers to form H.E.A.T. (Highway Enforcement of Aggressive Traffic). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has continued to grow with agencies being added across the state. In FFY 2018, GOHS funded eighteen (18) agencies across the state where speed and impaired driving crashes and fatalities are consistently high. The Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019.

The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

Alcohol and Other Drug Countermeasures

Governor's Office of Highway Safety (GOHS) will administer and manage alcohol programs (funding 405 (f)). This includes but is not limited to: overseeing in-house grants and contracts, seeking and managing grants that foster the agency's mission, collecting and analyzing data, seeking partnerships in the communities, and to providing training and public information necessary to ensure proper and efficient use of federal highway safety funds. The public information will include the creation of brochures, collateral messaging items and effective communication with the media and public which will be available.

The State of Georgia maintains an annual comprehensive plan for conducting high visibility impaired driving enforcement and that plan will continue for the remainder of FY 2018 and FY 2019. The plan includes the following:

1. Strategic impaired driving enforcement which is designed to reach motorcyclist and motorist in geographic subdivisions that account for a majority of the state's population and half of the state's alcohol-related fatalities. Please see list of counties in the state ranked from highest to lowest in impaired driving related crashes for all vehicle types.
2. Three statewide impaired driving mobilizations that occur during the holidays of July 4th, Labor Day (September), and December holidays.
3. Strategic mobilizations for geographic subdivisions that show abnormal increases in traffic injuries and/or deaths (Thunder Task Force).

Georgia law enforcement agencies will participate in four impaired driving mobilizations by conducting checkpoints and/or saturation patrols on at least four nights during the national impaired driving campaigns as well as on a quarterly basis throughout FY 2019.

The four (4) impaired driving mobilizations are as follows:

1. December 2018/New Year 2019
2. Thunder Task Force (Three Dates TBD)
3. July Fourth 2019
4. Labor Day 2019

Statewide Impaired Driving Mobilization

Georgia participates in three annual statewide mobilizations to combat impaired driving. These campaigns occur during the Fourth of July, Labor Day, and December holidays. Georgia utilizes its Traffic Enforcement Networks (TEN) which provide state and local law enforcement officers with a structured means of collaborating regionally on their unique highway safety priorities with emphasis on impaired driving. They also provide the ability to communicate regional highway safety priorities up the chain-of-command, to reach local and state policy makers, community leaders, legislators and others. The 16 regional networks are instrumental in carrying out this statewide impaired-driving enforcement campaign. The traffic enforcement networks work closely with The Georgia State Patrol.

Strategic Thunder Mobilizations

The Governor's Office of Highway Safety has established a taskforce consisting of state wide officers (H.E.A.T.), troopers and sheriff's deputies. The Governor's Office of Highway Safety (GOHS) "Thunder" taskforce is a specialized traffic enforcement unit designed to help Georgia communities combat unusually high amount of traffic crashes, injuries and fatalities. Their mission is to reduce highway deaths and serious injuries by changing the illegal driving behaviors of motorcyclist and motorists in the region through an increased law enforcement presence in those high crash corridors. The task force was established in 2007 and continues to be very effective in reducing highway crashes, injuries and deaths.

As you can see alcohol is also a significant risk factor for Georgia motorcycle riders. Every year since 1998, alcohol related motorcycle fatalities have been increasing in Georgia. According to the National Highway Traffic Safety Administration (NHTSA), in 2016, twenty-five percent (25%) of all fatally injured motorcycle riders had BAC levels of .08 g/dL or higher. Across the U.S., the percentage with BAC .08 g/dL or above was highest for fatally injured motorcycle riders among two age groups, 35-39 (38%), followed by 45-49 (37%). Nighttime single vehicle crashes are the most dangerous for impaired motorcycle riders. Fifty-five percent (55%) of those type crashes result in the death of a motorcyclist.

Evidence of effectiveness

Enter a rationale for selecting the countermeasure strategy and funding allocation for each planned activity.

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers. Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2018, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2019. The Highway Enforcement of Aggressive Traffic (H.E.A.T) Units were established for the purpose of reducing the number of driving incidents. This project will continue to focus on impaired driving and speeding, two of the main aggressive driving related violations. This will be accomplished through enforcement and education.

Georgia will continue to fund data driven projects that focus on impaired driving enforcement and education. The Highway Enforcement of Aggressive Traffic Units operate in a majority of the counties where impaired motorcycle crashes occurred in 2016. The chart below describes the FFY2018 grantees, grant amounts, counties represented, and the total fatalities, impaired driving fatalities, and motorcycle fatalities. Georgia plans to fund projects like HEAT again in 2019.

5.13 Program Area: Planning & Administration

Program area type Planning & Administration

Will countermeasure strategies and planned activities be described in this plan to address the program area?

No

Is this program area part of the State occupant protection program area plan for a 405(b) application that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems, at the level of detail required under § 1300.11(c) and (d)?

No

Problem identification

Enter description and analysis of the State's highway safety problems (for this program area) as identified through an analysis of data, including but not limited to fatality, injury, enforcement, and judicial data, to be used as a basis for setting performance targets and developing countermeasure strategies.

Problem Identification and Program Justification

As directed by the Highway Safety Act of 1966, 23 USC Chapter 4, the Governor is responsible for the administration of a program through a State highway safety agency which has adequate powers and is properly equipped and organized to carry out the mission of traffic safety programs. In Georgia, Governor Deal has authorized the Governor's Office of Highway Safety (GOHS) to assemble staff and resources for planning and administering effective programs and projects to save lives, reduce injuries and reduce crashes. This responsibility is guided by written policies and procedures for the efficient operation of personnel, budgetary and programmatic functions. The major Governor's Office of Highway Safety (GOHS) document produced annually is the Highway Safety Plan (HSP). The Highway Safety Plan (HSP) is prepared by highway safety professionals who are driven by leadership principles for finding solutions to State and local highway safety problems. The Governor's Office of Highway Safety (GOHS) manages these efforts to mitigate the major problems in a cost-effective and lifesaving manner. The State's Strategic Highway Safety Plan is used to document the problems and to propose countermeasures. The Governor's Office of Highway Safety (GOHS) Planning and Administration (P&A) staff responsibilities include a continuous process of fact-finding and providing guidance and direction for achieving the greatest impact possible. The target of the Planning and Administration staff is to make highway use less dangerous and to contribute to the quality of life in Georgia and the nation.

In 2016, there were 1,554 motor vehicle fatalities in the State of Georgia. This is a 8.5% increase in roadway fatalities in comparison to the previous year and a 10% decline from 2005 roadway fatalities. Four (4) counties in Georgia had no roadway fatalities in 2016. This same year (2016), there were 19,405 serious injuries and 385,221 motor vehicle crashes in Georgia. The total number of motor vehicle crashes has increased by thirty-three percent (33%) since 2011. The number of roadway fatalities varied from 1994 to 2016, peaking in 2005 with 1,729 fatalities, and a rate of 1.52 fatalities per 100 vehicle miles traveled (VMT). However, in 2016 Georgia experienced a fatality rate comparable to the 2008 rate, with 1.21 fatalities per every 100 million vehicle miles traveled (VMT). The highest fatality rate occurred in 1996 with 1.76 fatalities per 100 million vehicle miles traveled (VMT) and 1,573 roadway fatalities.

Although these statistics paint a tragic picture, there are ways to reduce the risk of crashes, injuries and fatalities. Strong law enforcement, effective highway safety legislation, improved road designs, public education and information, and community support, are among the proven means of reducing crashes, injuries and fatalities. The Governor's Office of Highway Safety (GOHS) will continue to leverage the benefits initiated during the last planning cycle. The agency's Highway Safety Plan provides the direction and guidance for the organization.

Strategic Highway Safety Planning

The majority of activities undertaken by the Governor's Office of Highway Safety (GOHS) are oriented towards encouraging the use of passenger restraint systems, minimizing dangers associated with individuals driving under the influence of drugs and alcohol, reducing unlawful speeds and encouraging safe behavior while driving in general. While these activities are associated with behavioral aspects of transportation system usage, it is clear that the substantive safety issues these programs are seeking to address require further transportation planning efforts aimed at increasing transportation system safety. The relationship between the highway safety agency and the planning efforts of various transportation agencies is one that needs to be strengthened and strategies found to better integrate these processes.

The effective integration of safety considerations into transportation planning requires the collaborative interaction of numerous groups. In most cases, parties involved will depend on what issue is being addressed. Governor's Office of Highway Safety (GOHS) has collaborated with the Georgia Department of Transportation (GDOT), the Georgia Department of Public Safety (DPS), the Department of Driver Services (DDS), the Georgia Department of Public Health (DPH), the Office of State Administrative Hearings, the Georgia Association of Chief of Police, the Georgia Sheriff's Association, the Atlanta Regional Commission (ARC), other Metropolitan Planning Organizations (MPOs), local law enforcement, health departments, fire departments and other stakeholder groups to produce Georgia's Strategic Highway Safety Plan (SHSP). Collectively we will develop and implement on a continual basis a highway safety improvement program that has the overall objective of reducing the number and severity of crashes and decreasing the potential for crashes on all highways. The comprehensive SHSP is data driven and aligns safety plans to address safety education, enforcement, engineering, and emergency medical services. The requirements for our highway safety improvement program include:

Planning

A process of collecting and maintaining a record of crashes, traffic and highway data, analyzing available data to identify hazardous highway locations; conducting engineering study of those locations; prioritizing implementation; conducting benefit-cost analysis and paying special attention to railway/highway grade crossings.

Implementation

A process for scheduling and implementing safety improvement projects and allocating funds according to the priorities developed in the planning phase.

Evaluation

A process for evaluating the effects of transportation improvements on safety including the cost of the safety benefits derived from the improvements, the crash experience before and after implementation, and a comparison of the pre- and post-project crash numbers, rates and severity.

Target Population

Planning, implementing, and evaluating highway safety programs and efforts that will benefit of all Georgia's citizens and visitors.

6 Evidence-based Traffic Safety Enforcement Program (TSEP)

Evidence-based traffic safety enforcement program (TSEP) information

Identify the planned activities that collectively constitute an evidence-based traffic safety enforcement program (TSEP).

Planned activities in the TSEP:

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
SC-02	Law enforcement will conduct 47,140 speed contacts.	
OP-01	Conduct four (4) statewide campaigns to promote occupant safety.	Short-term, High Visibility Seat Belt Law Enforcement
AL-01	Conduct three (3) waves of statewide enforcement with the "Drive Sober or Get Pulled Over." campaign.	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-02	Law enforcement will conduct 7,704 impaired driver contacts	Alcohol Impairment: Detection, Enforcement and Sanctions
TSP-01	Provide funds to Georgia colleges to educate students on the dangers of impaired driving	
TSP-02	Provide funds to Georgia high schools to operate SADD (Students Against Destructive Decisions) programs	
PT-06	Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects	High Visibility Enforcement

Analysis

Enter analysis of crashes, crash fatalities, and injuries in areas of highest risk.

Approach

Georgia utilizes a comprehensive array of activities combining statewide coordination of enforcement and complementary local level projects with the target to reduce the number of overall traffic related fatalities on Georgia roadways resulting from impaired driving, speeding, occupant protection violations, and other high-risk behaviors. Programs include Highway Enforcement of Aggressive Traffic (HEAT), Thunder Task Force, Traffic Enforcement Networks, and High Visibility Enforcement surrounding NHTSA campaigns including Click it or Ticket and Drive Sober or Get Pulled Over.

Problem Identification and Program Description

In 2016, the State of Georgia suffered 1,554 fatalities in motor vehicle crashes. Impaired driving killed 368 persons in those crashes, and unrestrained fatalities numbered 476. Two hundred and sixty-six (266) of the total 1,554 fatalities were related to speeding – a slight decrease from 2015. While this data is showing a slight decrease from 2015, the total number of traffic fatalities has steadily increased over the past two years. In 2005 Georgia experienced 1,729 traffic fatalities, the highest recorded number of roadway deaths in the state. Since then Georgia has continued to implement projects as part of the evidence-based traffic safety enforcement plan through The Governor's Office of Highway Safety to reduce the number of crashes, injuries, and fatalities.

The National Highway Traffic Safety Administration has proven the effectiveness of programs that are documented in "Countermeasures That Work: Eighth Edition, 2015" (CTW). Data throughout this Georgia's Highway Safety Plan is in response to these countermeasures. Georgia will continue to participate in these programs which include High Visibility Enforcement, Thunder Task Force, Traffic Enforcement Networks, and H.E.A.T., (CTW, Chapter 1: pages 21-28)

Georgia has 42,955 law enforcement officers employed by a total of 1,038 law enforcement agencies, covering 159 counties and countless municipalities and college campuses, many of which partner with the Governor's Office of Highway Safety on a regular basis. The summary of each program below will provide the details of GOHS enforcement activities including the 5 W's - who, what, when, where, and why.

Enter explanation of the deployment of resources based on the analysis performed.

H.E.A.T. (Highway Enforcement of Aggressive Traffic)

Aggressive driving has been determined to be one of the leading causes of death and serious injury crashes on the roadways of Georgia. Driving under the influence of alcohol and speed are among the worst behaviors identified with aggressive drivers.

Since 2001, the Georgia Governor's Office of Highway Safety has maintained a multi-jurisdictional task force to address aggressive and impaired driving in Georgia. Originally, three officers from six counties, the City of College Park, and the City of Atlanta came together to form a team of twenty-four officers to form Highway Enforcement of Aggressive Traffic (H.E.A.T.). Since this formation, the Highway Enforcement of Aggressive Traffic (H.E.A.T.) team has maintained consistency across the state. In FFY 2017, the Governor's Office of Highway Safety (GOHS) funded eighteen (18) Highway Enforcement of Aggressive Traffic (H.E.A.T.) units across the state where speed and impaired driving crashes and fatalities are consistently high. Governor's Office of Highway Safety (GOHS) will maintain the Highway Enforcement of Aggressive Traffic (H.E.A.T.) program in FFY 2018. The overall targets of the Highway Enforcement of Aggressive Traffic (H.E.A.T.) programs are to reduce the number of impaired driving crashes in jurisdictions identified by 10%, and enforce laws targeting aggressive driving around Georgia.

Thunder Task Force

The Governor's Office of Highway Safety Thunder Task Force is a Traffic Enforcement Special Response Team coordinated by the Law Enforcement Services Team. This is an evidence-based traffic safety enforcement program to prevent traffic fatalities, crashes, and injuries in locations most at risk for such incidents. The Thunder Task Force is a data driven, high visibility, sustained, traffic enforcement response team, designed to impact a jurisdiction with a Thunder Task Force mobilization. The concept is to identify a county or area of the state to deploy the Task Force based on the data, partner with the local law enforcement jurisdictions and courts, develop an enforcement strategy based on current crash reports and data, and infiltrate the regions with two to three months of high visibility enforcement and earned media. The Task Force identifies the areas, conducts the mobilizations, turns the numbers around in that region, then moves to another region of the state and repeats the process.

A significant part of Thunder Task Force is educating local citizens regarding necessary changes in their driving behavior to further reduce traffic fatalities and injuries. The enforcement efforts are directed by traffic crash fatality data analysis updated within the Fatality Analysis Surveillance Tool (FAST) developed by Governor's Office of Highway Safety (GOHS), and Georgia Electronic Accident Reporting System (GEARS). The Thunder Task Force is coordinated by the Governor's Office of Highway Safety Law Enforcement Services Division and includes the Georgia State Patrol, Governor's Office of Highway Safety H.E.A.T. Units (Highway Enforcement of Aggressive Traffic), Department of Public Safety Motor Carrier Compliance Division (MCCD) and local law enforcement. We also use as much local crash data as available, looking at time of day, location and causation (DUI, Seatbelt, Speed, Motorcycles).

The Thunder Task Force is deployed to areas of the state that data indicates unusually high incidences of traffic fatalities and serious injuries. The Task Force identifies the problem areas, and conducts mobilizations using the resources that are needed for these problem areas, such as the Motor Carrier Compliance Division (MCCD), Child Passenger Safety Technicians (CPST), and trained DUI officers.

With this continued effort of putting resources where the problems are, the Governor's Office of Highway Safety (GOHS) is able to stabilize the problem with a proven effective and cost efficient method of saving lives, therefore reducing the projected numbers of annual traffic fatalities in the State of Georgia. While conducting a Thunder Task Force Mobilization, the enforcement plan is adjusted on a continuous basis, using current local data provided by the local jurisdiction. 60 to 90 days after the mobilizations end, the Task Force often returns to the jurisdiction for a follow up visit and evaluation.

Traffic Enforcement Networks

The Governor's Office of Highway Safety has law enforcement partnerships across the state through sixteen regional traffic enforcement networks that encompass all 159 Georgia counties. The networks are made up of local and state traffic enforcement officers and prosecutors from each region of the state. The networks are coordinated by a coordinator and an assistant coordinator, both which are full time law enforcement officers volunteering their time and efforts to highway safety. The dedicated support GOHS receives from these officers, their law enforcement agency and department heads are unsurpassed. The networks meet monthly to provide information, training and networking opportunities to the attending officers. Prosecutors, Judges and non-traditional traffic enforcement agencies such as the Georgia Department of Natural Resources, Department of Corrections and Military Police often attend the meetings and offer assistance for traffic enforcement training and initiatives. The networks are utilized to efficiently mobilize law enforcement statewide for traffic enforcement initiatives. The traffic enforcement networks have become an outstanding networking, training and communication tool for Georgia's traffic enforcement community.

In an effort to communicate legislative updates, court decisions and other pertinent information to traffic enforcement officers across the state, the Governor's Office of Highway Safety in partnership with Emory University has established an email list serve that all participating law enforcement officers can receive up to date traffic enforcement related information. Information is about traffic enforcement policies, legal updates, training opportunities, and other traffic enforcement related information. There are over 800 traffic enforcement officers and prosecutors subscribed to the Georgia Traffic Enforcement Network (GATEN) list serv.

High Visibility Enforcement (HVE)

Effective, high-visibility communications and outreach are an essential part of successful seat belt law high-visibility enforcement programs (Solomon et al., 2003). Paid advertising can be a critical part of the media strategy. Paid advertising brings with it the ability to control message content, timing, placement, and repetition (Milano et al., 2004). In recent years, NHTSA has supported a number of efforts to reduce alcohol-impaired driving using publicized sobriety checkpoints. Evaluations of statewide campaigns in Connecticut and West Virginia involving sobriety checkpoints and extensive paid media found decreases in alcohol-related fatalities following the program, as well as fewer drivers with positive BACs at roadside surveys (Zwicker, Chaudhary, Maloney, & Squeglia, 2007; Zwicker, Chaudhary, Solomon, Siegler, & Meadows, 2007).

The Governor's Office of Highway Safety recognizes that law enforcement plays an important role in overall highway safety in the state of Georgia. Campaigns such as "Drive Sober or Get Pulled Over," "100 Days of Summer HEAT" and "Click it or Ticket" have proven that high visibility enforcement is the key to saving lives on Georgia's roadways as well as interdicting the criminal element through traffic enforcement.

The "Drive Sober or Get Pulled Over" campaign: GOHS' statewide DUI enforcement initiatives play an integral part in Georgia's impaired driving campaigns and messaging. All GOHS impaired driving related brochures, rack cards, media advisories, news releases, media kit components, and scripts for radio and TV Public Service Ads use this campaign message.

The "Click It or Ticket" campaign: Failure to use safety belts and child safety seats is one of the leading causes of motor vehicle injuries and deaths in this country. This persists despite NHTSA data showing that proper use of lap/shoulder seat belts reduce the risk of fatal injury to front seat passenger car occupants by forty-five percent (45%). In pick-up trucks, SUVs', and mini-vans, properly worn seatbelts reduce fatal injury by sixty percent (60%). NHTSA

research data show more than seventy percent (70%) of nationwide passenger vehicle occupants involved in serious crashes survive when wearing safety belts correctly. Although Georgia has one of the highest recorded safety belt usage rates in the southeast at 97.1%, sustaining this number necessitates a rigorous, ongoing High Visibility Enforcement campaign that combines attention-getting Paid Media in conjunction with concentrated earned media efforts and high profile enforcement measures.

100 Days of Summer H.E.A.T. (Highway Enforcement of Aggressive Traffic) campaign: Over the previous five (5) years, on average 17% of crash deaths in Georgia involve unsafe or illegal speed. For every 10mph increase in speed, there's a doubling of energy release when a crash occurs. The faster we drive, the more our reaction time is reduced. The chances of being involved in a fatal crash increase three-fold in crashes related to speed. The majority of drivers in those speed-related crashes fall within the demographics of Georgia's primary audience for Paid Media. The 100 Days of Summer H.E.A.T. campaign is a multi-jurisdictional highway safety enforcement strategy designed to reduce high-fatality crash-counts due to speed and aggressive driving during the potentially deadly summer holiday driving period from Memorial Day through Labor Day. GOHS Public Affairs promotes this initiative with summer-long earned media via news conferences and cross-promotion paid media Public Service Announcements (PSAs) run in rotation with occupant safety and alcohol counter measure campaign ads as well as increased enforcement from statewide partners.

Enter description of how the State plans to monitor the effectiveness of enforcement activities, make ongoing adjustments as warranted by data, and update the countermeasure strategies and projects in the Highway Safety Plan (HSP).

GOHS will review on an annual basis the evidence based traffic safety performance plan and coordinate with stateside partners for input and updates. Motor vehicle crash data, occupant protection survey results, roadway fatality data, and other data on traffic safety problems are analyzed statewide and on county levels. Program level evaluation findings for major issues (Impaired driving, safety belts, and pedestrian/bicycle safety) will also be included. Surveillance data along with evaluation findings will be used directly to link the identified crash issues, statewide performance targets, strategic partners, the State Strategic Highway Safety Plan, funding opportunities, and capacity to implement sound programs to address the problem. Process evaluation of the plan will be continual throughout the year and outreach efforts will be revised as needed.

7 High Visibility Enforcement

High-visibility enforcement (HVE) strategies

Planned HVE strategies to support national mobilizations:

***Reminder: When associating a countermeasure strategy to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.**

Countermeasure Strategy Name
Short-term, High Visibility Seat Belt Law Enforcement
Highway Safety Office Program Management
High Visibility Enforcement
High Visibility Cellphone/Text Messaging Enforcement
Communication Campaign
Child Restraint System Inspection Station(s)
Alcohol Impairment: Detection, Enforcement and Sanctions

HVE activities

Select specific HVE planned activities that demonstrate the State's support and participation in the National high-visibility law enforcement mobilizations to reduce alcohol-impaired or drug impaired operation of motor vehicles and increase use of seat belts by occupants of motor vehicles.

HVE Campaigns Selected

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
PT-06	Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects	High Visibility Enforcement

8 405(b) Occupant Protection Grant

Occupant protection information

405(b) qualification status: High seat belt use rate State

Occupant protection plan

Submit State occupant protection program area plan that identifies the safety problems to be addressed, performance measures and targets, and the countermeasure strategies and planned activities the State will implement to address those problems.

Program Area
Teen Traffic Safety Program
Police Traffic Services
Communications (Media)
Occupant Protection (Adult and Child Passenger Safety)

Participation in Click-it-or-Ticket (CIOT) national mobilization

Select or click Add New to submit the planned participating agencies during the fiscal year of the grant, as required under § 1300.11(d)(6).

Enter description of the State's planned participation in the Click-it-or-Ticket national mobilization.

The Governor's Office of Highway Safety (GOHS) recognizes that law enforcement plays an important role in overall highway safety in the State. Campaigns such as "Click It or Ticket" have proven that high visibility enforcement is the key to saving lives on Georgia's roadways. Georgia has a total of 46,328 sworn law enforcement officers employed by a total of 909 law enforcement agencies, covering 159 counties and countless municipalities and college campuses. The Governor's Office of Highway Safety (GOHS) continues to seek the support of everyone in implementing the campaign activities.

The Georgia Governor's Office of Highway Safety coordinates two statewide, high visibility Click it or Ticket Mobilizations each fiscal year. During FFY2018, GOHS also coordinated the Click-It or Ticket Border 2 Border event. Mobilization dates, enforcement strategies and logistics are discussed with Georgia law enforcement officers during Regional Traffic Enforcement Network meetings and also communicated on the Georgia Traffic Enforcement Network (GATEN) list-serve to over 800 law enforcement officers and prosecutors. The plan is to involve all Georgia law enforcement officers with a blanket approach of high visibility Click it or Ticket enforcement initiatives across the entire state. Jurisdictions that are over represented with unbelted fatalities are targeted with extra efforts and stepped up night time seat belt enforcement checkpoints. In addition to enforcement efforts during the two week Click it or Ticket campaigns, Georgia law enforcement are encouraged, through the Regional Traffic Enforcement Networks, a philosophy of 24/7 occupant protection enforcement efforts.

Georgia's fatalities have been reduced every year for the past nine years and Georgia law enforcement recognizes that continued high visibility enforcement of seat belt and child safety seat violations are vital to this continued trend of traffic fatality reductions.

In Federal Fiscal Year (FFY) 2019, the Governor's Office of Highway Safety (GOHS) has two Click it or Ticket (CIOT) Traffic Enforcement Mobilization Campaigns planned:

- November 2018 which covers the Thanksgiving Holiday Period
- May 2019 which covers the Memorial Day Holiday Period

The Governor's Office of Highway Safety (GOHS) requires its grantees, both law enforcement and educational, to participate in these statewide initiatives, resulting in major statewide efforts to reduce occupant protection violations.

The inspection/fitting station list is maintained on the GOHS website at [h. ps://www.gahighwaysafety.org/campaigns/child-safety-seat-fitting-locations/](https://www.gahighwaysafety.org/campaigns/child-safety-seat-fitting-locations/)

Child restraint inspection stations

Submit countermeasure strategies, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification.

***Reminder: When associating a countermeasure strategy to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.**

Countermeasure Strategy Name
Short-term, High Visibility Seat Belt Law Enforcement
Communication Campaign
Child Restraint System Inspection Station(s)

Submit planned activities, at the level of detail required under § 1300.11(d), demonstrating an active network of child passenger safety inspection stations and/or inspection events based on the State's problem identification.

***Reminder: When associating a planned activity to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.**

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
OP-01	Conduct four (4) statewide campaigns to promote occupant safety.	Short-term, High Visibility Seat Belt Law Enforcement
OP-02	Facilitate an annual meeting for Georgia's certified Child Passenger Safety Technician (CPST) Instructors	
OP-03	Provide funds to conduct twenty-four (24) Child Passenger Safety Technician (CPST) Certification Courses	Child Restraint System Inspection Station(s)
OP-04	Provide funds to conduct thirty-three (33) Child Passenger Safety Technician (CPST) Recertification Courses	Child Restraint System Inspection Station(s)
OP-05	Conduct twenty-four (24) Continuing Education Unit (CEU) credit workshops	Child Restraint System Inspection Station(s)
OP-06	Provide funds to coordinate and conduct twenty (20) minority outreach presentations in	
OP-07	Provide funds so at least 150 of Georgia's 159 counties are provided mini-grants for child safety seats focused on minority and low-income families.	Child Restraint System Inspection Station(s)
OP-08	Conduct 8 courses to EMS providers titled "Transporting children safely in Ambulances."	
OP-09	Provide funds to law enforcement agencies to conduct 7,800 occupant protection contacts.	Short-term, High Visibility Seat Belt Law Enforcement
OP-10	Host one Child Passenger Safety Caravan during National Child Passenger Safety Week.	Short-term, High Visibility Seat Belt Law Enforcement
OP-11	Provide funds to law enforcement agencies to conduct 37 local seatbelt surveys.	Short-term, High Visibility Seat Belt Law Enforcement
OP-12	Distribute 4,120 child safety seats	Child Restraint System Inspection Station(s)
OP-13	Conduct Georgia's annual seatbelt survey	Short-term, High Visibility Seat Belt Law Enforcement
OP-14	Conduct 80 outreach events in occupant protection	

Enter the total number of planned inspection stations and/or events in the State.

Planned inspection stations and/or events: 283

Enter the number of planned inspection stations and/or inspection events serving each of the following population categories: urban, rural, and at-risk.

Populations served - urban 146

Populations served - rural 137

Populations served - at risk 218

CERTIFICATION: The inspection stations/events are staffed with at least one current nationally Certified Child Passenger Safety Technician.

Child passenger safety technicians

Submit countermeasure strategies, at the level of detail required under § 1300.11(d), for recruiting, training and maintaining a sufficient number of child passenger safety technicians based on the State's problem identification.

***Reminder: When associating a countermeasure strategy to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.**

Enter a direct copy of the section of the State traffic records strategic plan that identifies which recommendations the State intends to address in the fiscal year, the countermeasure strategies and planned activities, at the level of detail required

under 23 C.F.R. 1300.11(d), that implement each recommendation, and the performance measures to be used to demonstrate quantifiable and measurable progress.

Test Data Linkage Tools Update

DPH/EMS has tested WinPure and Linkage Wiz with simulated and real Georgia data for MITRE. There were pro and cons for each linkage software. MITRE have submitted initial draft of the *Linked Information for Nonfatal Crash Surveillance (LINCS) Guide* and edits by Georgia are due by April 2nd. It will not go out to the whole group and those who want to examine it contact Denise. Also Linksolve was about \$3,500 for the initial software.

IPRCE/Emory Update

Emory University gave the update that there was work related to the distract driving law proposal. Bob Dallas has various things going on related to that. These are continuing to work on the impaired driving analysis, looking into the hospital reports, looking into impaired pedestrians, bicycles and motorists. About 28% of pedestrians treated in the ED are .08 whereas drivers are less. How often are we missing other drugs with which are testing. There needs to be a review for drugs administered from pre-hospital EMS. Fatalities are in a separate file. They also working on spatial analysis for pedestrian and bicycle crashes, initially worked with GDOT. Emory/IPRCE is working on our CDC injury center application and will need letters of support

Data Updates

The new crash report and crash updates. Crash reports being held up by SunGuard and Smart Cop has not fully deployed to law enforcement. SmartCop, software update for GSP taking a long time and that is the priority. Hopefully we can get them on board. David will be giving an update at the April 17th SHSP executive meeting. The 2017 fatalities have not be closed out and finalized.

Most EMS consultants have finished rolling out their services. NEMSIS data sat, owned by NHTSA went from 425 elements to over 700 elements, We allow no "nil". Includes demographic data for services and some registry fields. 2.2 million records in 2016 and a little lower in 2017. 60% of that is emergency medical transport. Includes neonatal transport. Got 405c funding and got funding to host our own data mart. They have a reporting tool that we do not like. Reporting against live data. Second silo that is 40 minutes old. We will be using Click and not Tableau which is similar. Want to figure out how to connect and link, stroke, stemi, and trauma registries.

Trauma sent in their update that the final download of 2017 data is due March 31st. Prepared injury data analysis reports for 2015 and 2016 data sets. If interested, please contact Danlin for a copy of the reports.

Death data will be finalized in March. The Hospital discharge data and ED are waiting for preliminary 2017 data from GHA. Denise brought up that with the coding change from ICD 9 and ICD 10. The STIPDA guidelines was using the ICD 9 codes. This has not been updated and the discussion of place code, which is pulled out for the first valid ecode. This has reduced the numbers up on OASIS. We will be investigating the place code. Ernie said that the new ICD 10 codes were brought up in the NEMSIS data managers group. There is a place of injury code, in GA we will use top level code for place.

In FY 2018, the Georgia Office of EMS and Trauma (SOEMS) has used the funds from the GOHS grant to implement the transition from version 2.2 of the NEMSIS EMS Data Standard to V 3.4. As of the end of June 2018, approximately 45% of the 411 licensed EMS agencies are submitting their EMS run data to GEMSIS which is then sent on to NEMSIS, the National EMS Database (funded by NHTSA). The NEMSIS V 3.4 database currently has over 600,000 EMS responses in it from Georgia. We are also using the funding to establish a Georgia EMS Data Mart, which will be a data repository of all EMS runs from V 3.4 GEMSIS in a standard database format that will allow for connections to other data sets in the future such as the Georgia Trauma Registry, Georgia Cardiac Registry, Coverdell Acute Stroke Registry and even to crash data.

In FFY 18, the GUMVAR, the latest version of the MMUCC Complaint crash report was implemented across a number of software vendors through the grant. At this point, four vendors have not participated, despite offers of payment through the grant. It is apparent that some of them may be leaving the law enforcement software business.

Submit the planned activities, at the level of detail required under § 1300.11(d), that implement recommendations.

***Reminder: When associating a planned activity to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.**

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure Strategy
AL-01	Conduct three (3) waves of statewide enforcement with the "Drive Sober or Get Pulled Over." campaign.	Alcohol Impairment: Detection, Enforcement and Sanctions

AL-02	Law enforcement will conduct 7,704 impaired driver contacts	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-03	Train 1,050 law enforcement officers in impaired driving- both alcohol and drug related	
AL-04	Provide 32 training courses for prosecutors and police officers	
AL-05	Provide 18 educational events to the military.	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-06	Conduct 3 Law Enforcement Recognition events	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-07	Hold 18 community events.	Alcohol Impairment: Detection, Enforcement and Sanctions
TRCC-01	Fund agencies working on the submission of records electronically.	
TRCC-02	Fund law enforcement agencies with updated computers.	

Enter a direct copy of the section of the State traffic records strategic plan that identifies which recommendations the State does not intend to address in the fiscal year and explains the reason for not implementing the recommendations.

Quantitative improvement

Enter a direct copy of the section of the State traffic records strategic plan that describes specific, quantifiable and measurable improvements, as described in 23 C.F.R. 1300.22(b)(3), that are anticipated in the State's core safety databases, including crash, citation or adjudication, driver, emergency medical services or injury surveillance system, roadway, and vehicle databases. Specifically, the State must demonstrate quantitative improvement in the data attribute of accuracy, completeness, timeliness, uniformity, accessibility or integration of a core database by providing a written description of the performance measures that clearly identifies which performance attribute for which core database the State is relying on to demonstrate progress using the methodology set forth in the "Model Performance Measures for State Traffic Records Systems" (DOT HS 811 441), as updated.

In FY2019, SOEMS will be working towards getting 100% of all EMS agencies in Georgia reporting V3.4 data to GEMSIS. Part of this process will involve analyzing the data for accuracy and validity, and educating the EMS community on the importance of accurate, valid and timely data. To that end, SOEMS is in the process of partnering with Biospatial, which is part of the National Collaborative for Bio-Preparedness. This partnership will provide additional ways to visualize both V 2.2 and V 3.4 Georgia EMS data, including Opioid overdoses, as well as the linkage of traffic and EMS records via an MVC dashboard.

The purpose of GECPS Outreach is to provide a secure and accurate method of electronic transmission of conviction data from Georgia courts to the State within 10 days of adjudication; to train and educate courts on the GECPS system for this purpose. This program is based on statics that show the following: numbers from courts error messages, it drivers and commercial drives whether updates have been submitted to the courts. The GECPS system's error rate has decreased from the start of the initiation of the grant. As of May 2018, the error rate has decreased to 3%. The phone calls for assistance has decreased showing that the training has been effective. In conjunction to those highlights, Driver Services' IT has accomplished the following: Real Time interface—held meeting with Administrative Office of the Courts (AOC) to discuss the scope of the real-time changes; Conducted research concerning reasons for the three error codes that will be addressed in the initial research; Court Admin role—held meeting with DDS ISO to get approval for design; worked on modifications to screen designs and workflows following meeting; began working on development. The implementation guide is being updated by GECPS IT personnel. The new guide will include recent system updates and some previously-undocumented processes and procedures for GECPS. Activity: Partner with court technical personnel and court software vendors to facilitate use of the GECPS system. Expand the testing and validation process for new courts and court vendors as they apply for certification to DDS. Continued working on creating testing bank for specific errors; Prepared documentation for GECPS team. The grantee has a total of (7) activities to complete by September 30th, 2018. As this current time the grantee has completed 68% of all activities listed within the grant. Six of the activities has a total goal set at (12) per each activity and those are: technical assistance and trainings (8 out of 12) completed, editing to education materials (8 out of 12) completed, implementation of guides for courts (8 out of 12) completed, AOC interface development (8 out 12) completed, maintenance of GECPS system (8 out of 12) completed, Partnerships and facilitations of GECPS system (8 out of 12) completed. Driver Services has already met the goal for Regional Conferences presentations and Trainings (4 out of 4) completed. Within the application for FFY19, Georgia Department of Driver Services will continue to strive in providing a secure and accurate methods of electronic transmission of conviction data. No adjustments have been made to the goals set for the activities and all activities will remain the same as presented within the current grant executed with FFY2018.

Upload supporting documentation covering a contiguous 12-month performance period starting no earlier than April 1 of the calendar year prior to the application due date, that demonstrates quantitative improvement when compared to the

comparable 12-month baseline period.

12 405(f) Motorcyclist Safety Grant

Motorcycle safety information

To qualify for a Motorcyclist Safety Grant in a fiscal year, a State shall submit as part of its HSP documentation demonstrating compliance with at least two of the following criteria. Select application criteria from the list below to display the associated requirements.

Motorcycle rider training course	No
Motorcyclist awareness program	Yes
Reduction of fatalities and crashes	No
Impaired driving program	Yes
Reduction of impaired fatalities and accidents	No
Use of fees collected from motorcyclists	No

Motorcyclist awareness program

Enter the name and organization of the head of the designated State authority over motorcyclist safety issues.

State authority agency: Driver Services, Georgia Department of

State authority name/title: Mr. Spencer R. Moore, Commissioner

CERTIFICATION: The State's motorcyclist awareness program was developed by or in coordination with the designated State authority having jurisdiction over motorcyclist safety issues.

Select one or more performance measures and corresponding performance targets developed for motorcycle awareness that identifies, using State crash data, the counties or political subdivisions within the State with the highest number of motorcycle crashes involving a motorcycle and another motor vehicle.

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-1) Number of traffic fatalities (FARS)	5 Year	2019	1,652.0
2019	C-2) Number of serious injuries in traffic crashes (State crash data files)	5 Year	2019	24,324.0
2019	C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)	5 Year	2019	478.0
2019	C-8) Number of unhelmeted motorcyclist fatalities (FARS)	5 Year	2019	6.0

Enter the counties or political subdivisions within the State with the highest number of motorcycle crashes (MCC) involving a motorcycle and another motor vehicle. Such data shall be from the most recent calendar year for which final State crash data are available, but data no older than three calendar years prior to the application due date.

Submit countermeasure strategies that demonstrate that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest. The State shall select countermeasure strategies to address the State’s motorcycle safety problem areas in order to meet the performance targets identified above.

***Reminder: When associating a countermeasure strategy to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.**

Countermeasure Strategy Name
Communication Campaign
Alcohol Impairment: Detection, Enforcement and Sanctions

Submit planned activities that demonstrate that the State will implement data-driven programs in a majority of counties or political subdivisions where the incidence of crashes involving a motorcycle and another motor vehicle is highest. The State shall select planned activities to address the State’s motorcycle safety problem areas in order to meet the performance targets identified above.

***Reminder: When associating a planned activity to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.**

Planned activity unique identifier	Planned Activity Name	Primary Countermeasure
AL-01	Conduct three (3) waves of statewide enforcement with the “Drive Sober or Get Pulled Over.” campaign.	Alcohol Impairment: Detection, Enforcement and Sanctions
AL-02	Law enforcement will conduct 7,704 impaired driver contacts	Alcohol Impairment: Detection, Enforcement and Sanctions

AL-09	Monitor 4 local county courts.	Alcohol Impairment: Detection, Enforcement and Sanctions
CP-03	Provide highway safety informational publications	
CP-04	Participation in the Strategic Highway Safety Plan Task Teams	
CP-08	Georgia will host the 2019 GOHS Highway Safety Conference.	
Motorcycle-01	Communication efforts will focus primarily on those areas where the majority of serious motorcycle crashes occur, in the major metropolitan areas of Georgia.	
motorcycle-02	Provide funds to schedule and coordinate 30 motorcycle outreach events	
motorcycle-03	Utilize all Department of Driver Service Centers for disseminating literature to target audiences.	
motorcycle-04	Develop and promulgate a Public Service Announcement (PSA) designed to educate about motorcycle safety	
motorcycle-05	Create and disseminate effective educational and awareness communications to riders on how alcohol and other drugs affect motorcycle operator skills in the top 10 counties where motorcycle fatalities occur.	
motorcycle-06	Provide funds to conduct one Annual Update / Professional Development for Department of Driver Services Rider Coaches.	
PT-02	To promote attendance of all task forces in Traffic Enforcement Network meetings and activities.	
PT-06	Fund H.E.A.T. (Highway Enforcement of Aggressive Traffic) Projects	High Visibility Enforcement

Impaired driving program

Select one or more performance measures and corresponding performance targets developed to reduce impaired motorcycle operation. Each performance measure and performance target shall identify the impaired motorcycle operation problem area to be addressed. Problem identification must include an analysis of motorcycle crashes involving an impaired operator by county or political subdivision.

Fiscal Year	Performance Measure Name	Target Period(Performance Target)	Target End Year	Target Value(Performance Target)
2019	C-5) Number of fatalities in crashes involving a driver or motorcycle operator with a BAC of .08 and above (FARS)	5 Year	2019	478.0

Submit the countermeasure strategies demonstrating that the State will implement data-driven programs designed to reach motorcyclists in those jurisdictions where the incidence of motorcycle crashes involving an impaired operator is highest (i.e., the majority of counties or political subdivisions in the State with the highest numbers of motorcycle crashes involving an impaired operator) based upon State data.

***Reminder: When associating a countermeasure strategy to an incentive grant, you must ensure sufficient detail is provided to satisfy the additional incentive grant criteria, where applicable.**

Certification & Assurances for FY 2019 Highway Safety Grants.pdf

**Certifications and Assurances
for Fiscal Year 2019 Highway Safety Grants
(23 U.S.C. Chapter 4 and Sec. 1906, Pub. L. 109-59, as Amended)**

[The Governor's Representative for Highway Safety must sign these Certifications and Assurances each fiscal year. Requirements that also apply to subrecipients are noted under the applicable caption, and must be included in agreements with subrecipients.]

State: Georgia

By applying for Federal grants under 23 U.S.C. Chapter 4 or Section 1906, the State Highway Safety Office, through the Governor's Representative for Highway Safety, agrees to the following conditions and requirements.

GENERAL CERTIFICATIONS AND ASSURANCES

In my capacity as the Governor's Representative for Highway Safety, I hereby affirm that—

- I have reviewed the information in support of the State's application for 23 U.S.C. Chapter 4 and Section 1906 grants, and based on my review, the information is accurate and complete to the best of my personal knowledge.
- In addition to the certifications and assurances contained in this document, I am aware and I acknowledge that each statement in the State's application bearing the designation "CERTIFICATION" or "ASSURANCE" constitutes a legal and binding Certification or Assurance that I am making in connection with this application.
- As a condition of each grant awarded, the State will use the grant funds in accordance with the specific statutory and regulatory requirements of that grant, and will comply with all applicable laws, regulations, and financial and programmatic requirements for Federal grants, including but not limited to—
 - 23 U.S.C. Chapter 4 – Highway Safety Act of 1966, as amended
 - Sec. 1906, Pub. L. 109-59, as amended by Sec. 4011, Pub. L. 114-94
 - 23 CFR part 1300 – Uniform Procedures for State Highway Safety Grant Programs
 - 2 CFR part 200 – Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards
 - 2 CFR part 1201 – Department of Transportation, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards
- I understand and accept that incorrect, incomplete, or untimely information submitted in support of the State's application may result in the denial of a grant award. If NHTSA seeks clarification of the State's application, I authorize the State Highway Safety Office to provide additional information in support of the State's application for a 23 USC Chapter 4 and Section 1906 grant.

SECTION 402 CERTIFICATIONS AND ASSURANCES

In my capacity as the Governor's Representative for Highway Safety, I hereby affirm that—

- The Governor is the responsible official for the administration of the State highway safety program, by appointing a Governor's Representative for Highway Safety who shall be responsible for a State highway safety agency that has adequate powers and is suitably equipped and organized (as evidenced by appropriate oversight procedures governing such areas as procurement, financial administration, and the use, management, and disposition of equipment) to carry out the program. (23 U.S.C. 402(b)(1)(A))
- The political subdivisions of this State are authorized, as part of the State highway safety program, to carry out within their jurisdictions local highway safety programs which have been approved by the Governor and are in accordance with the uniform guidelines promulgated by the Secretary of Transportation. (23 U.S.C. 402(b)(1)(B))
- At least 40 percent of all Federal funds apportioned to this State under 23 U.S.C. 402 for this fiscal year will be expended by or for the benefit of political subdivisions of the State in carrying out local highway safety programs (23 U.S.C. 402(b)(1)(C)) or 95 percent by and for the benefit of Indian tribes (23 U.S.C. 402(h)(2)), unless this requirement is waived in writing. (This provision is not applicable to the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.)
- The State's highway safety program provides adequate and reasonable access for the safe and convenient movement of physically handicapped persons, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks. (23 U.S.C. 402(b)(1)(D))
- The State will provide for an evidenced-based traffic safety enforcement program to prevent traffic violations, crashes, and crash fatalities and injuries in areas most at risk for such incidents. (23 U.S.C. 402(b)(1)(E))
- The State will implement activities in support of national highway safety goals to reduce motor vehicle related fatalities that also reflect the primary data-related crash factors within the State, as identified by the State highway safety planning process, including:
 - Participation in the National high-visibility law enforcement mobilizations as identified annually in the NHTSA Communications Calendar, including not less than 3 mobilization campaigns in each fiscal year to –
 - Reduce alcohol-impaired or drug-impaired operation of motor vehicles; and
 - Increase use of seat belts by occupants of motor vehicles;
 - Sustained enforcement of statutes addressing impaired driving, occupant protection, and driving in excess of posted speed limits;
 - An annual Statewide seat belt use survey in accordance with 23 CFR part 1340 for the measurement of State seat belt use rates, except for the Secretary of Interior on behalf of Indian tribes;

- Development of Statewide data systems to provide timely and effective data analysis to support allocation of highway safety resources;
- Coordination of Highway Safety Plan, data collection, and information systems with the State strategic highway safety plan, as defined in 23 U.S.C. 148(a). (23 U.S.C. 402(b)(1)(F))
- The State will actively encourage all relevant law enforcement agencies in the State to follow the guidelines established for vehicular pursuits issued by the International Association of Chiefs of Police that are currently in effect. (23 U.S.C. 402(j))
- The State will not expend Section 402 funds to carry out a program to purchase, operate, or maintain an automated traffic enforcement system. (23 U.S.C. 402(c)(4))

OTHER REQUIRED CERTIFICATIONS AND ASSURANCES

In my capacity as the Governor's Representative for Highway Safety, I hereby provide the following additional certifications and assurances:

Intergovernmental Review of Federal Programs

The State has submitted appropriate documentation for review to the single point of contact designated by the Governor to review Federal programs, as required by Executive Order 12372 (Intergovernmental Review of Federal Programs).

Federal Funding Accountability and Transparency Act (FFATA)

The State will comply with FFATA guidance, OMB Guidance on FFATA Subaward and Executive Compensation Reporting, August 27, 2010, (https://www.fsrs.gov/documents/OMB_Guidance_on_FFATA_Subaward_and_Executive_Compensation_Reporting_08272010.pdf) by reporting to FSRS.gov for each sub-grant awarded:

- Name of the entity receiving the award;
- Amount of the award;
- Information on the award including transaction type, funding agency, the North American Industry Classification System code or Catalog of Federal Domestic Assistance number (where applicable), program source;
- Location of the entity receiving the award and the primary location of performance under the award, including the city, State, congressional district, and country; and an award title descriptive of the purpose of each funding action;
- A unique identifier (DUNS);
- The names and total compensation of the five most highly compensated officers of the entity if:
 - (i) the entity in the preceding fiscal year received—

- (I) 80 percent or more of its annual gross revenues in Federal awards;
- (II) \$25,000,000 or more in annual gross revenues from Federal awards; and
- (ii) the public does not have access to information about the compensation of the senior executives of the entity through periodic reports filed under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78m(a), 78o(d)) or section 6104 of the Internal Revenue Code of 1986;

- Other relevant information specified by OMB guidance.

Nondiscrimination

(applies to subrecipients as well as States)

The State highway safety agency will comply with all Federal statutes and implementing regulations relating to nondiscrimination (“Federal Nondiscrimination Authorities”). These include but are not limited to:

- **Title VI of the Civil Rights Act of 1964** (42 U.S.C. 2000d *et seq.*, 78 stat. 252), (prohibits discrimination on the basis of race, color, national origin) and 49 CFR part 21;
- **The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970**, (42 U.S.C. 4601), (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);
- **Federal-Aid Highway Act of 1973**, (23 U.S.C. 324 *et seq.*), **and Title IX of the Education Amendments of 1972**, as amended (20 U.S.C. 1681-1683 and 1685-1686) (prohibit discrimination on the basis of sex);
- **Section 504 of the Rehabilitation Act of 1973**, (29 U.S.C. 794 *et seq.*), as amended, (prohibits discrimination on the basis of disability) and 49 CFR part 27;
- **The Age Discrimination Act of 1975**, as amended, (42 U.S.C. 6101 *et seq.*), (prohibits discrimination on the basis of age);
- **The Civil Rights Restoration Act of 1987**, (Pub. L. 100-209), (broadens scope, coverage and applicability of Title VI of the Civil Rights Act of 1964, The Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms "programs or activities" to include all of the programs or activities of the Federal aid recipients, subrecipients and contractors, whether such programs or activities are Federally-funded or not);
- **Titles II and III of the Americans with Disabilities Act** (42 U.S.C. 12131-12189) (prohibits discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing) and 49 CFR parts 37 and 38;
- **Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations** (prevents discrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations); and

- **Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency** (guards against Title VI national origin discrimination/discrimination because of limited English proficiency (LEP) by ensuring that funding recipients take reasonable steps to ensure that LEP persons have meaningful access to programs (70 FR 74087-74100).

The State highway safety agency—

- Will take all measures necessary to ensure that no person in the United States shall, on the grounds of race, color, national origin, disability, sex, age, limited English proficiency, or membership in any other class protected by Federal Nondiscrimination Authorities, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any of its programs or activities, so long as any portion of the program is Federally-assisted;
- Will administer the program in a manner that reasonably ensures that any of its subrecipients, contractors, subcontractors, and consultants receiving Federal financial assistance under this program will comply with all requirements of the Non-Discrimination Authorities identified in this Assurance;
- Agrees to comply (and require its subrecipients, contractors, subcontractors, and consultants to comply) with all applicable provisions of law or regulation governing US DOT's or NHTSA's access to records, accounts, documents, information, facilities, and staff, and to cooperate and comply with any program or compliance reviews, and/or complaint investigations conducted by US DOT or NHTSA under any Federal Nondiscrimination Authority;
- Acknowledges that the United States has a right to seek judicial enforcement with regard to any matter arising under these Non-Discrimination Authorities and this Assurance;
- Agrees to insert in all contracts and funding agreements with other State or private entities the following clause:

“During the performance of this contract/funding agreement, the contractor/funding recipient agrees—

- a. To comply with all Federal nondiscrimination laws and regulations, as may be amended from time to time;
- b. Not to participate directly or indirectly in the discrimination prohibited by any Federal non-discrimination law or regulation, as set forth in appendix B of 49 CFR part 21 and herein;
- c. To permit access to its books, records, accounts, other sources of information, and its facilities as required by the State highway safety office, US DOT or NHTSA;
- d. That, in event a contractor/funding recipient fails to comply with any nondiscrimination provisions in this contract/funding agreement, the State highway safety agency will have the right to impose such contract/agreement sanctions as it or NHTSA determine are appropriate, including but not limited to withholding payments to the contractor/funding

recipient under the contract/agreement until the contractor/funding recipient complies; and/or cancelling, terminating, or suspending a contract or funding agreement, in whole or in part; and

- e. To insert this clause, including paragraphs (a) through (e), in every subcontract and subagreement and in every solicitation for a subcontract or sub-agreement, that receives Federal funds under this program.

The Drug-Free Workplace Act of 1988 (41 U.S.C. 8103)

The State will provide a drug-free workplace by:

- a. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;
- b. Establishing a drug-free awareness program to inform employees about:
 - 1. The dangers of drug abuse in the workplace;
 - 2. The grantee's policy of maintaining a drug-free workplace;
 - 3. Any available drug counseling, rehabilitation, and employee assistance programs;
 - 4. The penalties that may be imposed upon employees for drug violations occurring in the workplace;
 - 5. Making it a requirement that each employee engaged in the performance of the grant be given a copy of the statement required by paragraph (a);
- c. Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will –
 - 1. Abide by the terms of the statement;
 - 2. Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such conviction;
- d. Notifying the agency within ten days after receiving notice under subparagraph (c)(2) from an employee or otherwise receiving actual notice of such conviction;
- e. Taking one of the following actions, within 30 days of receiving notice under subparagraph (c)(2), with respect to any employee who is so convicted –
 - 1. Taking appropriate personnel action against such an employee, up to and including termination;

2. Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;
- f. Making a good faith effort to continue to maintain a drug-free workplace through implementation of all of the paragraphs above.

Political Activity (Hatch Act)

(applies to subrecipients as well as States)

The State will comply with provisions of the Hatch Act (5 U.S.C. 1501-1508), which limits the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

Certification Regarding Federal Lobbying

(applies to subrecipients as well as States)

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement;
2. If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions;
3. The undersigned shall require that the language of this certification be included in the award documents for all sub-award at all tiers (including subcontracts, subgrants, and contracts under grant, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

Restriction on State Lobbying
(applies to subrecipients as well as States)

None of the funds under this program will be used for any activity specifically designed to urge or influence a State or local legislator to favor or oppose the adoption of any specific legislative proposal pending before any State or local legislative body. Such activities include both direct and indirect (e.g., "grassroots") lobbying activities, with one exception. This does not preclude a State official whose salary is supported with NHTSA funds from engaging in direct communications with State or local legislative officials, in accordance with customary State practice, even if such communications urge legislative officials to favor or oppose the adoption of a specific pending legislative proposal.

Certification Regarding Debarment and Suspension
(applies to subrecipients as well as States)

Instructions for Primary Tier Participant Certification (States)

1. By signing and submitting this proposal, the prospective primary tier participant is providing the certification set out below and agrees to comply with the requirements of 2 CFR parts 180 and 1200.
2. The inability of a person to provide the certification required below will not necessarily result in denial of participation in this covered transaction. The prospective primary tier participant shall submit an explanation of why it cannot provide the certification set out below. The certification or explanation will be considered in connection with the department or agency's determination whether to enter into this transaction. However, failure of the prospective primary tier participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.
3. The certification in this clause is a material representation of fact upon which reliance was placed when the department or agency determined to enter into this transaction. If it is later determined that the prospective primary tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency may terminate this transaction for cause or default or may pursue suspension or debarment.
4. The prospective primary tier participant shall provide immediate written notice to the department or agency to which this proposal is submitted if at any time the prospective primary tier participant learns its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
5. The terms *covered transaction*, *civil judgment*, *debarment*, *suspension*, *ineligible*, *participant*, *person*, *principal*, and *voluntarily excluded*, as used in this clause, are defined in 2 CFR parts 180 and 1200. You may contact the department or agency to which this proposal is being submitted for assistance in obtaining a copy of those regulations.
6. The prospective primary tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency entering into this transaction.

7. The prospective primary tier participant further agrees by submitting this proposal that it will include the clause titled "Instructions for Lower Tier Participant Certification" including the "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transaction," provided by the department or agency entering into this covered transaction, without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions and will require lower tier participants to comply with 2 CFR parts 180 and 1200.
8. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any prospective lower tier participants, each participant may, but is not required to, check the System for Award Management Exclusions website (<https://www.sam.gov/>).
9. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
10. Except for transactions authorized under paragraph 6 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, the department or agency may terminate the transaction for cause or default.

Certification Regarding Debarment, Suspension, and Other Responsibility Matters-Primary Tier Covered Transactions

- (1) The prospective primary tier participant certifies to the best of its knowledge and belief, that it and its principals:
- (a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency;
 - (b) Have not within a three-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;
 - (c) Are not presently indicted for or otherwise criminally or civilly charged by a governmental entity (Federal, State or Local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and
 - (d) Have not within a three-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

(2) Where the prospective primary tier participant is unable to certify to any of the Statements in this certification, such prospective participant shall attach an explanation to this proposal.

Instructions for Lower Tier Participant Certification

1. By signing and submitting this proposal, the prospective lower tier participant is providing the certification set out below and agrees to comply with the requirements of 2 CFR parts 180 and 1200.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.
3. The prospective lower tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
4. The terms *covered transaction*, *civil judgment*, *debarment*, *suspension*, *ineligible*, *participant*, *person*, *principal*, and *voluntarily excluded*, as used in this clause, are defined in 2 CFR parts 180 and 1200. You may contact the person to whom this proposal is submitted for assistance in obtaining a copy of those regulations.
5. The prospective lower tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
6. The prospective lower tier participant further agrees by submitting this proposal that it will include the clause titled "Instructions for Lower Tier Participant Certification" including the "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion – Lower Tier Covered Transaction," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions and will require lower tier participants to comply with 2 CFR parts 180 and 1200.
7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that it is not proposed for debarment under 48 CFR part 9, subpart 9.4, debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant is responsible for ensuring that its principals are not suspended, debarred, or otherwise ineligible to participate in covered transactions. To verify the eligibility of its principals, as well as the eligibility of any prospective lower tier participants, each participant may, but is not required to, check the System for Award Management Exclusions website (<https://www.sam.gov/>).
8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information

of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.

9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is proposed for debarment under 48 CFR part 9, subpart 9.4, suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension or debarment.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion -- Lower Tier Covered Transactions:

1. The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participating in covered transactions by any Federal department or agency.
2. Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Buy America Act

(applies to subrecipients as well as States)

The State and each subrecipient will comply with the Buy America requirement (23 U.S.C. 313) when purchasing items using Federal funds. Buy America requires a State, or subrecipient, to purchase with Federal funds only steel, iron and manufactured products produced in the United States, unless the Secretary of Transportation determines that such domestically produced items would be inconsistent with the public interest, that such materials are not reasonably available and of a satisfactory quality, or that inclusion of domestic materials will increase the cost of the overall project contract by more than 25 percent. In order to use Federal funds to purchase foreign produced items, the State must submit a waiver request that provides an adequate basis and justification for approval by the Secretary of Transportation.

Prohibition on Using Grant Funds to Check for Helmet Usage

(applies to subrecipients as well as States)

The State and each subrecipient will not use 23 U.S.C. Chapter 4 grant funds for programs to check helmet usage or to create checkpoints that specifically target motorcyclists.

Policy on Seat Belt Use

In accordance with Executive Order 13043, Increasing Seat Belt Use in the United States, dated April 16, 1997, the Grantee is encouraged to adopt and enforce on-the-job seat belt use policies and programs for its employees when operating company-owned, rented, or personally-owned vehicles. The National Highway Traffic Safety Administration (NHTSA) is responsible for providing leadership and guidance in support of this Presidential initiative. For information and resources on traffic safety programs and policies for employers, please contact the Network of Employers for Traffic Safety (NETS), a public-

private partnership dedicated to improving the traffic safety practices of employers and employees. You can download information on seat belt programs, costs of motor vehicle crashes to employers, and other traffic safety initiatives at www.trafficsafety.org. The NHTSA website (www.nhtsa.gov) also provides information on statistics, campaigns, and program evaluations and references.

Policy on Banning Text Messaging While Driving

In accordance with Executive Order 13513, Federal Leadership On Reducing Text Messaging While Driving, and DOT Order 3902.10, Text Messaging While Driving, States are encouraged to adopt and enforce workplace safety policies to decrease crashes caused by distracted driving, including policies to ban text messaging while driving company-owned or rented vehicles, Government-owned, leased or rented vehicles, or privately-owned vehicles when on official Government business or when performing any work on or behalf of the Government. States are also encouraged to conduct workplace safety initiatives in a manner commensurate with the size of the business, such as establishment of new rules and programs or re-evaluation of existing programs to prohibit text messaging while driving, and education, awareness, and other outreach to employees about the safety risks associated with texting while driving.

I understand that the information provided in support of the State's application for Federal grant funds and these Certifications and Assurances constitute information upon which the Federal Government will rely in determining qualification for grant funds, and that knowing misstatements may be subject to civil or criminal penalties under 18 U.S.C. 1001. I sign these Certifications and Assurances based on personal knowledge, and after appropriate inquiry.
