CIRCA Data Dictionary

The first selection when entering a report in CIRCA is adding a unit. You select the unit type and the number of people riding in that unit

Unknown is a valid code for every element.

The data dictionary is divided into sections based on the data entry screens in CIRCA. These screens consist of: **Environment, Conditions, Event, Property Damage, Unit, Unit situation, Unit Commercial, and Passenger.** (See "CIRCA Data Entry Screens.doc" for a visual reference.)

Environment Page Elements

Primary Street, Secondary Street, and Reference Street/MP

> The Primary Street is the street the on which the crash occurred. The Secondary Street is the intersecting street if the crash occurred in an intersection. The Reference Street/mile post is used if the crash did not occur in an intersection and is the cross street or mile post nearest to where the crash occurred.
>
> Street names are recorded in 4 pieces: Pre Directional, Street Name, Street Suffix and Post Directional. Click on this box to read more.
>
> Examples: Full Street Name = Pre + Street Name + Suffix + Post Dir
> > E 42nd St
> > E 1st Ave N
> > I 84   (Interstate Highway)
> > SH 41   (State Highway)
> > US 30   (US
> > US 30 B (Add "B" for business loops)
> > Lewisville Hwy
> > Yale-Kilgore Rd
> > FSR 250 (Forest Service Road)
>
> Items like N, S, E, W, Rd, St, Hwy etc., should not be placed in the street name portion, but in one of the other portions. If you are not sure what suffixes to use, look at the suffix list -- if your possible suffix is not listed, put it in the street name portion instead.
> > Interstate-84   = I 84   (Use letter "I" for Interstate + space + number)
> > State Hwy 41   = SH 41   (Use capital "SH" for State Highway + space + number)
> > US-30/Hwy 30 = US 30   (Use capital "US" for US Highway + space + number)
> > US-30 Business Loop = US 30 B (Add space + capital "B" for business)

Pre & Post Directional

Code	Pre & Post Directional
E	East
N	North
NE	Northeast
NW	Northwest
S	South
SE	Southeast
SW	Southwest
W	West

Street Name

Enter the name of the Street

Street Suffix

Code	Street Suffix
Ave	Avenue
Blvd	Boulevard
Cir	Circle
Crt	Court
Dr	Drive
Hwy	Highway
Ln	Lane
Lp	Loop
Pl	Place
Pwy	Parkway
Rd	Road
St	Street
Ter	Terrace
Tr	Trail
Way	Way

Serial Number

The unique crash identifier in CIRCA (Idaho statewide crash database). Begins with the 2-digit year, and must be nine numbers long. If the crash was submitted electronically, the third character will be the letter "C".

Agency Code

Identifies the agency the investigated the crash and submitted the crash report.

Code	Agency
0000	None
0100	Ada County Sheriff (Boise)
0101	Boise Police Dept

Officer

Badge number that identifies the officer that investigated the crash and filled out the crash report.

Report District

A code that allows the investigating agency to divide their agency into separate jurisdictions.

Agency Case ID

The unique identifier used by the investigating agency.

Accident Date

Date when the accident occurred.

Day of Week

A day of week checker. Enter 1-7 (Sunday to Saturday) to match the Accident Date. Flagged if day doesn't match the Accident Date.

Code	Day of Week
1	Sunday
2	Monday
3	Tuesday
4	Wednesday
5	Thursday
6	Friday
7	Saturday

Accident Time

Time when the accident occurred. Use military time.

If you enter one or two digits, Impact assumes you mean hour. So, 5 is changed to 05:00 and 23 is changed to 23:00.

If you enter 3 or 4 digits, Impact puts the colon in for you. So, 345 become 03:45 and 1715 becomes 17:15.

After midnight; like 12:30, is 00 hour in military time. However, midnight is 24:00. If you type in 00:00, Impact changes it to 24:00.

Police Dispatch

Time when the police where dispatched the collision. Use military time.

Police Arrival

Time when the police arrived at the collision. Use military time.

EMS Dispatch

Time when the EMS was dispatched. Use military time.

EMS Arrival

Time when EMS arrived at the collision. Use military time.

Medical Care By

If the person was transported to a medical care facility, enter or select the name of the facility.

Code	Medical Care Facility
00	No Medical Care Provider Needed
011	St. Alphonsus Medical Center - Boise

In City Limits

Select Yes if the collision occurred within the city limits of the city you selected.

Code	Value
N	No
Y	Yes

County

County where the accident occurred.

Code	County
001	Ada
003	Adams
005	Bannock
007	Bear Lake
009	Benewah
011	Bingham
013	Blaine
015	Boise
017	Bonner
019	Bonneville
021	Boundary
023	Butte
025	Camas
027	Canyon
029	Caribou

077	Power
079	Shoshone
081	Teton
083	Twin Falls
085	Valley
087	Washington

Speed Limit 1

Record the posted or legal speed limit for the primary street.

Speed Limit 2

Record the posted or legal speed limit for the secondary street.

Distance

If a crash happened in an intersection, leave this field blank. A value of 0 is not valid. The location of a non-intersection collision is identified by the distance from the collision site to one of the cross streets named in the Street Names box or to a milepost marker. Distance tells the distance from the reference point, in feet or miles -- depending on what you select for the distance units.

Distance Units (Feet/Miles)

The location of a non-intersection collision is identified by the distance from the collision site to one of the cross streets named in the Street Names box or to a milepost marker. In this box, tell whether your measurement is in feet or miles.

Code	Value
F	Feet
M	Miles

Direction

The location of a non-intersection collision is identified by the distance from the collision site to one of the cross streets named in the Street Names box or to a milepost marker.   Direction tells the direction from the reference point.

Code	Value
E	East

N	North
NE	Northeast
NW	Northwest
S	South
SE	Southeast
SW	Southwest
W	West

Road Lanes

Number of lanes on the primary street.

Include exclusive left- and right-turn lanes and center turn lanes if they are being used to start or end a turn, or to merge with traffic.

Exclude center turn lane if not being used for legal travel described above. An interstate highway that is divided and has two lanes of travel in both directions would be 4 lanes. A one-way street with three lanes of travel and a parking lane on the right and left would be 3 lanes.

Interchange Number

If the collision occurred in an interchange, record the interchange number. The interchange number is the same as the exit number. Record the number on the exit sign for that interchange.

Railroad Crossing ID Number

If the collision occurred at or near a railroad crossing, enter the railroad crossing number. The railroad crossing number has six numeric digits and one letter, such as 812672Y, 058856U, or 811554T. The number is usually displayed on a small sign located on the railroad crossing sign post.

Segment Code

Milepost And Coded Segment (MACS) six-digit segment code - The Idaho Transportation Department's linear referencing system.

Milepost

Milepost of the location of the accident, in 999.999 format. Example: 012.100- The Idaho Transportation Department's linear referencing system.

Milepost Accuracy (Tolerance Factor)

Accuracy rating for the milepost provided by the police. Based on the Distance from a reference point

Distance From	Tolerance
0-400 ft	.01
400-1000 ft	.02
1001-5280 ft	.05
0-.2 miles	.02
.21-1 mile	.05
> than 1 mile	.10

Functional Class

A classification of roadways based on the character of service they are intended to provide. If the roadway has a segment code and milepost, the functional class is automatically "looked up" and entered from the MACS tables.

Code	Functional Class
01	Int-St (R)
02	Pr-Ar (R)
06	Mi-Artr (R)
07	Ma-Col (R)
08	Mi-Col (R)
09	L-Rural
11	P.A.Int (U)
12	P.A.Exp (U)
14	Oth-P.A (U)
16	Mi-Artu (U)
17	Collter (U)
19	L-Urban

Lane of Impact

Lane code where accident occurred.

Code	Lane of Impact
00	Curb Line Off Pavemt
29	Ramp-Between Gores
30	Ramp Lane
31	Ramp--Left Turn Bay
47	Right Turn Lane (3)
48	Right Turn Lane (2)
49	Right Turn Lane (1)
50	Rght Lane
51	Inside Lane (1)
52	Inside Lane (2)
53	Inside Lane (3)
54	Inside Lane (4)
55	Inside Lane (5)
56	Inside Lane (6)
99	Center Lane/Median

Lane Direction

Ascending or Descending -- direction of lane in which accident occurred. North & East are always ascending; South & West are descending. Exceptions: one way streets are always ascending and ascending is used if the direction is unknown.

Code	Lane Direction
A	Ascending
D	Descending

Conditions Page Elements (Crash Level)

Locality

Select the item that best describes the locale in which the collision occurred.

Code	Locality
01	Business or Commercial
02	Industrial Manufacturing
03	School or Playground
04	Recreational Area
05	Agricultural
06	Undeveloped
07	Residential
09	Other

Light Condition

Select the item that best describes the light condition at the time of the collision.

Code	Light Condition
01	Day
02	Dawn or Dusk
03	Dark, Street Lights On
04	Dark, Street Lights Off
05	Dark, No Street Lights
09	Other

Weather Condition 1 & Weather Condition 2

Weather conditions at the time of the collision.

Code	Weather Conditions
01	Clear
02	Cloudy
03	Rain
04	Snow
05	Sleet/Hail
06	Fog
07	Blowing Dust/Sand
08	Severe Cross Winds
A	Smoke/Smog

Road Surface Conditions

Select the item that best describes the surface condition of the roadway at the time of the collision.

Code	Road Surface Condition
01	Dry
02	Wet
03	Slush
04	Ice
05	Snow
06	Mud
07	Water
09	Other

Road Condition

If there is a road defect in the immediate vicinity of the collision scene, select the item which best describes the defect. Otherwise, select None. If the collision occurred in or was related to a construction zone (this includes new construction and maintenance), select Under Construction.

Code	Other Road Condition
00	None
01	Ruts/Bumps/Holes
02	Slick Asphalt (Bleeding)
03	Washboard
04	High/Low Shoulder
05	Loose Gravel/Seal Coat
06	Under Construction
07	Lane Closed
08	Flooded
09	Other
A	Poor Pavement Markings
B	Work Zone

Road Type

Select the item that describes the type of roadway, at the point of contact, of the ON Street. If you have entered the name of the ON Street on the Location form, the name is displayed above the Road Type list.

Definitions:

2-Way & Raised/Depressed Divider is a two-way road that has a raised or depressed center section used to restrict traffic.

2-Way & 2-Way Left Turn Lane Divider is a two-way road that has a painted center divider used primarily as a continuous left-turn lane (often referred to as a center turn lane).

2-Way & No Divider is a two-way road that is divided by a painted line or lines. The space between the painted lines is generally less than four feet.

2-Way & 2 Double Yellow Painted Divider is a two-way road that is divided by double yellow painted lines indicating "do not cross".

Code	Road Type
01	2-Way And Raised/Depressed Divider
02	2-Way And 2-Way Left-Turn Lane/Divider
03	1-Way
04	2-Way And No Divider
05	Ramp
06	Alley
07	Rest Area
08	Port Of Entry
09	Other
A	2-Way & 2 Double Yellow Painted Divider

Road Surface Type

What road material makes up the primary road?

Code	Road Surface Type
01	Concrete
02	Paved (Asphalt)
03	Gravel/Stone
04	Dirt
09	Other

Horizontal Geometrics

Select the option that best describes the horizontal geometrics of the road at the exact location of the collision.

Code	Horizontal Geometrics
01	Straight
02	Curve
09	Other

Vertical Geometrics

Select the option that best describes the vertical geometrics of the road at the exact location of the collision.

Code	Vertical Geometrics
01	Upgrade or Downgrade
03	Hillcrest
05	Level
09	Other

Traffic Control Device

Select the item which best describes traffic control at the collision location. If there are two or more types of traffic control, one of which was not functioning, select the item that describes the non-functioning or missing device. If all were present and functioning, select the one for the street on which the collision occurred--the street identified as the primary street.

If there is no traffic control at the collision location, select No Traffic Control.

If the traffic control device has been removed and the type is known, select the list item that best describes the device. Otherwise pick Unknown.

Code	Traffic Control Device
00	None
01	Stop Sign
02	Yield
03	Traffic Signal
04	Flashing Beacon
05	Traffic Signal--Ped Only
06	RxR Gates/Signal
07	RxR Flashing Beacon
08	Officer/Flagger
09	Other
A	School Bus Signal
B	No Passing Barrier Line
C	Construction Signing
D	Work Zone / Signed

Traffic Control Device Status

The traffic control device you selected previously was working, not working, or removed (vandalism, construction, etc.).

Code	Status
01	Functioning
02	Not Functioning
03	Removed
09	Other

Severity

Non-reportable crashes include those that did not occur on a public roadway, were intentional, or did not cause more than $1,500 in property damage (with no injuries). Otherwise, severity is calculated from the highest degree of injury sustained in the crash.

Code	Severity
0	Non Reportable
1	Property Dmg Report
3	C Injury Accident
5	B Injury Accident
7	A Injury Accident
9	Fatal Accident

Number of Fatalities

Calculated from the number people in the crash with injury types that are fatalities. A fatality is any person that dies within 30 days of the crash as a result of injuries sustained from the crash.

Number of Injuries

Calculated from the number of people in the crash with Serious, Visible, or Possible (A, B, or C) injury types.

Number of Persons

Calculated from the number of people involved in the crash.

Number of Units

Calculated from the number of units involved in the crash. Pedestrians, bicyclists, and equestrians count as a unit.

Number of Commercial Vehicles

Calculated from the number of units with commercial vehicle unit types involved in the crash.

Intersection Related

Calculated from Relationship to Junction.

Update Date

The date the record is updated is automatically entered.

Update User

The user that signed in to enter or update the report is automatically recorded.

Event Page Elements (Vehicle Level)

Event

Select the item that best describes this event. Don't forget the common initial events like Loss Of Control and Ran Off Road. Any number of events can be entered.

Code	Event
01	Overturn
02	Separation Of Units
03	Cargo Loss/Shift
04	Jackknifed
05	Ran Off Road
06	Down Hill Runaway

First Unit

This first unit is the one that caused the event, or did the striking. For example, if the event is Rear End, this first unit is the one that did the rear-ending. This is a drop down box where you select any one of the units involved in the crash. Many events are on vehicle crash events, this first unit slot is the only one filled in.

Second Unit

This second unit slot is used only on collisions involving more than one unit. The second unit box is grey-out (no selection allowed) if a one if a single-unit event (overturn, tree, etc...) was selected. The second unit is the one that was struck. This is also a drop down box where you select any one of the units involved in the crash.

Event Location

Select the item that describes the area of the roadway where the event occurred. For example, a driver loses control, runs off the roadway on the right and hits a mailbox. The events in this collision should be recorded as follows:

Event	Event Location
Loss of Control	On Roadway
Ran off Road	Right Shoulder
Mailbox	On Roadside

Notes:
Roadside refers to the area between the shoulder and the property line.
Outside Right of Way refers to locations beyond the property line and includes sidewalks.

Code	Event Location
01	On Roadway
02	Left Shoulder
03	Right Shoulder
04	Roadside or Sidewalk
05	Outside Right-Of-Way
06	Off Roadway-Location Unknown
07	Median
08	Gore
09	Other
A	In Parking Lot

B	Parking Lot Access Rd
P	Private Property

Property Damage Page Elements (Crash Level)

Item Damaged

If non-vehicular property was damaged in the collision, select the item that best describes the object struck.

Code	Item Damaged
00	None
11	Street Light/Utility Pole
12	Sign
13	Traffic Control Device, temporary
14	Traffic signals, supports
15	Reflector post or delineator
16	Jersey Barrier
17	Ditch or Culvert
21	Guardrail
22	Median Barrier
23	Bridge/Overpass
24	Retaining Wall
31	Tree
32	Lawn/Shrubs
33	Embankment, hill, cliff
34	Fence
35	Mailbox
36	Animal
51	Utility Box
52	Fire Hydrant
53	Gas meter
61	Building
62	Bus Shelter
63	Parked Car
98	Multiple
99	Other

Estimated Damage

Give a rough estimate of the amount of damage done to this object.

Unit Page Elements (Vehicle & Person Level)
(First Column is mostly person level; second column is all vehicle level.)

Unit Type (Vehicle Level)

Select the item that best describes the type of the unit. For example, if the unit is a tractor with a semi trailer and a full trailer in tow, select "Tractor w/Double Trailer". This selection is the very first selection made when entering a crash report. Pictures accompany the unit types. Pedestrians, Bicyclists, and equestrians are considered a separate unit. A number of the unit level elements are automatically coded as not applicable for non-motor vehicle units: pedestrians, bicyclists and equestrians.

Code	Unit Type
01	Pedestrian
02	Pedacycle
03	Motorcycle
04	Moped
05	Atv
06	Car
07	Pickup/Van/Panel/SUV

40	Construction Equipment
99	Other
-U	Unknown

Hit and Run (Vehicle Level)

If the driver and/or vehicle left the scene, select Yes.

Code	Value
N	No
Y	Yes

Last Name (Person Level)

First Name (Person Level)

Middle Initial (Person Level)

Use a single letter only, no period.

Seating Position (Person Level)

Automatically entered as driver, pedestrian, pedalcyclist, or equestrian based on unit type selected.

Driver's License Number (Person Level)

The number on the driver's license for the driver of the vehicle.

Driver's License State (Person Level)

The state in which the drivers license was issued. (There is only one state edit table and applies to both Driver's License and License Plates)

DL Name (Check – not entered in database)

If the license was issued in Idaho, CIRCA automatically checks the Name on the report with the driver's license record and reports any discrepancies.   Also, the Date of Birth and Sex are automatically filled in based on the information on the driver's license record.

Citation Number (Person Level)

If a citation was issued to this person, enter or select the Idaho code section number for the citation. If more than one citation was issued, record the code section number for the offense that contributed to the collision.

Injury (Person Level)

Select the item that best describes the person's injuries:

None - No injury evident or reported.

Possible - Any injury reported or claimed which does not fall in the other categories. Inclusions: Momentary unconsciousness, limping, complaint of pain, nausea, hysteria, and/or claim of injuries.

Non-incapacitating - Any injury, other than a fatal or incapacitating injury, which is evident to observers at the scene of the collision in which the injury occurred. Inclusions: Lump on head, abrasions, bruises, and/or minor lacerations. NOT Limping (the injury cannot be seen).

Incapacitating - Any injury, other than a fatal injury, which prevents the injured person from walking, driving, or continuing normal activities. Severe lacerations, broken or distorted limbs, skull or chest injuries, abdominal injuries, unconscious at the scene or taken from the scene of the collision, and/or unable to leave the collision scene without assistance. NOT momentary unconsciousness.

Dead - Death resulting from a fatal injury received in the collision.

Note: If it is known that one or more of the persons involved in the collision dies within thirty (30) days of the collision as a result of injuries sustained in the crash, and a report has been filed, file an amended report.

Code	Injury Type
A	Incapacitating
B	Non-Incapacitating
C	Possible
K	Dead
O	None Evident

Ejection (Person Level)

"Ejection" refers to persons being thrown from a compartment of the vehicle during the course of the crash and includes persons riding in the bed of pickup trucks or any vehicle that has a pickup-style bed.

Ejection is not applicable to persons riding on the exterior of a vehicle, or to motorcyclists, pedacyclists, or to non-motorists. The exterior of a vehicle includes running boards, roof, fenders, and bumpers, but not the beds of pickup trucks.

The ejection choices are:

Not Ejected: The occupant was definitely not ejected from the vehicle.

Totally Ejected: No part of the body remained in the vehicle.

Partially Ejected: Some part of the body remained in the vehicle. Partial penetration may be through windshield, doors (open or closed), or the roof.

Thrown: The rider of a motorcycle or a pedalcycle was thrown from their vehicle.

Unknown: It is not reasonably known whether the occupant was ejected or not.

Code	Ejection
01	Not Ejected
02	Totally Ejected
03	Partially Ejected
09	Other
T	Thrown From Cycle/Animal

Trapped (Person Level)

This information is used to determine if a victim was trapped and if so, how they were removed from the vehicle.

Not Trapped: Occupant was not trapped in vehicle.

Trapped / Extrication unit used: Extrication unit was used for forcible entry into the vehicle to remove the occupant.

Trapped / other extrication method: Victim was trapped but was removed from vehicle without the use of an extrication unit. Other methods include crowbars to pry open doors or breaking windows.

Code	Trapped (Extrication Methods)
01	Not Trapped
02	Trapped, extrication unit use
03	Trapped, other extraction method
09	Other

Transported By (Person Level)

If this person was transported for medical care, select the item that describes the transporting agent. Otherwise, select Not Transported.

Code	Transported By
01	Ambulance

02	Police Car
03	Helicopter
04	Private Vehicle
05	Not Transported
09	Other

Fatality ID (Person Level)

Federal fatality ID assigned to the deceased person -- 3 digits with leading zeros if necessary. All fatal crashes are entered into the Idaho collision database by the FARS analyst for consistency.

License Plate (Vehicle Level)

Record the exact license plate number. Compare this with the registration certificate. If the license plate is missing or unreadable because of damage, record the license number on the vehicle registration. If multiple license plates are displayed (commercial vehicles), record the Idaho license number. If the commercial vehicle does not have an Idaho license plate, record the license plate number of a license plate that is clearly identifiable.

Plate State

Select the name of the state which issued the vehicle license plate. (There is only one state edit table and applies to both Driver's License and License Plates)

Code	State License Plate was Issued
AB	Alberta
AK	Alaska
AL	Alabama
AR	Arkansas
AZ	Arizona
BC	British Columbia
CA	California
CO	Colorado
CT	Connecticut
DC	District Of Columbia
DE	Delaware
FD	US Government Tags
FL	Florida
GA	Georgia
HI	Hawaii
IA	Iowa
ID	Idaho
IL	Illinois
IN	Indiana

YT	Yukon Territory

Vehicle Identification Number – VIN (Vehicle Level)

Record the manufacturer's vehicle identification number of the power unit. On most vehicles, the VIN is imprinted on top of the dashboard on the driver's side and is visible through the windshield. If the vehicle is demolished, the manufacturer's number can be obtained from the vehicle registration. Under extreme conditions if the number cannot be correctly identified or located, record -U (unknown). If the number can be located and clearly identified, an appropriate entry would appear something like 1GKML19X5FS311756.

Owner Last Name (Vehicle Level)

Last name of registered vehicle owner - should be obtained from the vehicle registration.

Owner First Name (Vehicle Level)

First name of registered vehicle owner - should be obtained from the vehicle registration.

Owner Middle Initial (Vehicle Level)

Middle initial of registered vehicle owner - should be obtained from the vehicle registration.

Vehicle Year (Vehicle Level)

Enter the model year of the vehicle. Example: 1993.

Vehicle Make (Vehicle Level)

Select the manufacturer of the unit. If the manufacturer is not listed, choose Other.

Code	Vehicle Make
00	None
01	American
02	Jeep

RV	RV / Snowmobile

Estimated Damage (Vehicle Level)

Enter your estimate of the cost of damage for this unit. You don't need cents or a dollar sign. If the unit was not damaged, enter 0.

Insurance (Vehicle Level)

Select Yes if liability insurance is in effect for the vehicle.

Code	Value
N	No
Y	Yes

Vehicle Use (Vehicle Level)

If the vehicle had a specialized use at the time the collision occurred, select the item that best describes the use from the list. Otherwise, choose "No Specialized Use".

Note: Select the item that describes the use of the vehicle at the time of the collision. For example, if the unit is a taxi which was being used as a private vehicle at the time of the collision, select "No Specialized Use". If it was being used as a taxi, select the "Taxi" item.

Code	Special Vehicle Use
00	No specialized use
01	Police
02	Ambulance
03	Driver Training
04	Government
05	Taxi
06	Fire
07	Wrecker
08	School Bus
09	Other
NA	Non-Vehicle

Attachment 1 and Attachment 2 (Vehicle Level)

If the unit has one or more attachments, select the item that best describes the first attachment from the list. If the vehicle had no attachments, select None. You can only enter a second attachment if a first attachment was selected.

If the unit has two attachments, select the item that best describes the second attachment from the list. If the vehicle had no second attachment, enter None.

Note: If the unit type is Truck w/ Trailer or Tractor w/ Semi, Double or Triple Trailer, enter None. In these cases, the unit type includes the attachment.

Code	Attachment
00	None
01	Boat Trailer
02	Utility Trailer
03	Travel Trailer
04	Towed Vehicle
05	Mobile Home
09	Other

Unit Situation Page Elements (Vehicle Level & Person Level)

Contributing Circumstances 1, 2, & 3 (Vehicle Level)

In the Contributing Circumstances lists, select up to three choices which indicate circumstances that contributed to the crash. Enter None if you need no contributing circumstance.

Note: If vehicle defect items are selected, use only those vehicle defects which may have contributed to the collision. For example, "Light Defect" would not be selected for a collision which occurred in daylight.

Code	Contributing Circumstance
00	None
01	Exceeded Posted Speed
02	Speed Too Fast For Conditions
03	Too Slow For Traffic
04	Improper Overtaking

99	Other
NA	Non-Vehicle

Deformity (Vehicle Level)

Select the description that best approximates the damage to this unit. The following descriptions are provided as a guide.

None - no damage
Very minor - Paint scratch and minor denting
Minor - dents and gouges in body sheet metal and trim
Minor/Moderate - large or many dents and gouges in body sheet metal and trim
Moderate - considerable crumpling of body sheet metal, but little or no distortion of the basic structure or frame
Moderate/Severe - Crumpling, distortion of the frame, but no passenger compartment penetration.
Severe - sheet metal is severely distorted, torn, or crumpled and the basic structure of the car is distorted somewhat and there is usually some penetration of the passenger compartment
Very Severe - basic structure of the vehicle is distorted, passenger compartment is penetrated

Code	Deformity
00	No Damage
01	Very Minor Damage
02	Minor Damage

03	Minor-Moderate Damage
04	Moderate Damage
05	Moderate-Severe Damage
06	Severe Damage
07	Very Severe
NA	Non-Vehicle

Towed (Vehicle Level)

Choose YES only if the vehicle had to be towed because of the damage from the crash.

Choose NO if the vehicle had to be towed because the driver could not drive. In this case, you will still enter a towing company. NO also means the vehicle was not towed.

Code	Value
N	No
Y	Yes

Substance Use (Person Level)

Was there evidence which pointed toward drugs or alcohol being in use?

Code	Substance Use
01	Neither
02	Alcohol
03	Drugs
04	Both
09	Other

Alcohol & Drug Test (Person Level)

If a test was given, select the type of test from the list. Otherwise select "None Given".

Code	Alcohol Test Given
01	None Given
02	Test Refused
03	Blood Test
04	Urine Test
05	Breath Test
06	Field Test
09	Other

Alcohol Level – BAC (Person Level)

Official alcohol level from the tests, such as .03 or .09

Drug Test Result (Person Level)

What was the result of the drug test? Valid values are: "POS" (Positive), "NEG" (Negative), "PEN" (Pending), "NA" (Not Applicable) and "-U" (Unknown).

Code	Drug Test Result
NA	Not Applicable
NEG	Negative
PEN	Pending
POS	Positive

Drug Used (Person Level)

If a drug was detected, enter or select the name of the drug.

Event 1 Relation to Junction (Vehicle Level)

Select the item that best describes the relationship of the first event for the selected unit to "Junction". Your choices are:

Nonjunction - The first event occurred in an area where there are no intersections or junctions.

In Intersection - The first event occurred within the limits of the intersection of two streets/roads. If two vehicles collided, the point of impact must have occurred within the limits of the intersection.

Intersection Related - The first event for the unit occurred on an approach to or exit from an intersection and which was related to the movement of units through the intersection but occurred outside the limits of the intersection. An example would be a rear end collision where vehicles were stopped for signals where the collision occurred outside the limits of the intersection.

At Driveway/Alley - The first event occurred at a junction of a street/road and a driveway/alley.

Driveway/Alley Related - The first event occurred on an approach to or exit from the junction of a street/road and driveway/alley and was related to the access or egress of units into or from a driveway/alley, but did not occur within the limits of the junction. An example would be a unit which was rear-ended while stopped to allow another unit to turn into or out of a driveway.

On Ramp - The first event occurred within the limits of a ramp.

Ramp Related - The first event occurred on an approach to or exit from a ramp which was related to movement of units on a ramp, but did not occur on a ramp. For example, a collision where traffic is stopped on the interstate waiting to exit on a ramp would be ramp related.

At Railroad Crossing - The first event occurred within the limits of a railroad crossing. Collisions involving vehicles waiting for a train would not be coded "At Railroad Crossing" unless the impact occurred within the limits of the crossing. This collision should be coded "Other."

Other - The first event occurred at any type of junction not defined above.

Code	Relation to Junction
00	Nonjunction
01	In Intersection
02	Intersection Related
03	At Driveway/Alley
04	Driveway/Alley Related
05	On Ramp
06	Ramp Related
07	At Railroad Crossing
08	Railroad Crossing Related
09	Other

First & Most Harmful Event (Vehicle Level)

To identify the first harmful event for a unit, review the events listed in the First Harmful Event list, and select the first event that caused property damage, injury or death.

To identify the most harmful event for a unit, review the events listed in the Most Harmful Event list, and select the event that caused the most severe injury or property damage. Observe these guidelines when determining the Most Harmful Event: Fatalities take precedence over injuries Injuries take precedence over property damage

If the First (or Most) Harmful Event list is empty or is incomplete, go to the Events tab and add the missing events. IMPACT requires that each unit in the collision report have at least 1 harmful event. A harmful event is any event which caused injury, death or property damage. The selection is made from the list of events associated with the unit that are entered on the Events Page and only includes events that can cause damage or injury. Ran Off Road, Down Hill Runaway, Loss of Control, Came Back on Road, and Drove Left of Center are not eligible as harmful events.

Note: The First Harmful Event for a unit is not always the same as the unit's first event. For example, if a unit loses control, runs off the roadway and hits a mailbox, the unit's first event would be Loss of Control, while the First Harmful Event is Mailbox.

Operator Action (Vehicle Level)

Select the item that best describes the driver/vehicle action at the time of the collision. There are separate operator actions that apply to pedestrians and bicyclists. If an improper action is assigned, it will be flagged as an error.

Code	Operator Action
01	Going Straight
02	Turning Right
03	Right Turn On Red
04	Turning Left
05	Left Turn On Red
06	U-Turn
07	Merging

50	Standing On Roadway
51	Playing On Roadway
52	Working On Roadway
60	Enter/Leave School Bus
70	Not On Roadway
99	Other
NA	No Operator

Travel Direction (Vehicle Level)

Choose the unit's general direction of travel on the roadway. This may not be the same as the unit's heading at the point of collision.

Example: A car is traveling in the northbound lane of US-95, but was heading eastward after running off the road; the unit direction for the car is north.

Code	Travel Direction
E	East
N	North
NE	Northeast
NW	Northwest
S	South
SE	Southeast
SW	Southwest
W	West

Route Unit Was On (Vehicle Level)

The street the vehicle was on at the time of the accident. Select from the either the Primary or Secondary Street listed – created from entry on the Environment Page.

Unit Commercial Page (Vehicle Level)
Additional Information that applies only to commercial motor vehicles (based on Unit type)

Cargo Body

Select the item that best describes the unit's cargo body.

(For help on commercial vehicle questions, please contact the Idaho State Police / Commercial Vehicle Safety Section (208) 884-7220).

Code	Cargo Body
00	None
01	Bus
02	Van/Enclosed Box
03	Cargo Tank
04	Flatbed
05	Dump
06	Concrete Mixer
07	Auto Transporter
08	Garbage/Refuse
09	Other
10	Pickup Bed

Number of Axles

Record the total number of axles, including auxiliary axles, of this vehicle or the vehicle combination. Include axles in the up position which are not in contact with the pavement.

Note: If a unit is transporting other units where one set of axles is on the power unit and another set is on the ground (logging trucks, piggy back bobtails), record the axles with wheels on the ground. If a unit such as a logging truck has one trailer loaded on top of another trailer, that trailer is considered part of the load; do not record those axles.

(For help on commercial vehicle questions, please contact the Idaho State Police / Commercial Vehicle Safety Section (208) 884-7220).

GVWR Power Unit

Record the gross vehicle weight rating (GVWR) of the power unit. GVWR is the manufacturer's designation for the amount of weight the Vehicle/Tractor was manufactured to haul. GVWR for trucks is usually found on the driver's side of the vehicle on the hinge pillar, door-latch post, or door edge. The manufacturer's designation for GVWR should not be confused with the registered weight. However, buses are registered at the manufacturer's GVWR, so information may be obtained from the registrations.

(For help on commercial vehicle questions, please contact the Idaho State Police / Commercial Vehicle Safety Section (208) 884-7220).

GVWR Trailers

Record the combined GVWR of all the trailers. The GVWR for most trailers is located on a plate mounted on the frame near the front left corner of the trailer.

Examples:
Suppose the unit is a tractor with a double trailer and both trailers have a GVWR of 30,000 pounds. In this case, you would enter 60000 (30000 + 30000) in the G.V.W.R All Trailers box.

Assume the unit is a tractor with a semi-trailer and a full trailer and the gross vehicle weight ratings of the individual units are as follows:
   Tractor - 27000 pounds
   Semi-trailer - 32000 pounds
   Full trailer - 30000 pounds
Enter 27000 in the G.V.W.R. Power box and 62000 (32000 + 30000) in the G.V.W.R. All Trailers box.

(For help on commercial vehicle questions, please contact the Idaho State Police / Commercial Vehicle Safety Section (208) 884-7220).

MC/ICC Number

Unless this is an exempt carrier, follow these steps to determine the ICC MC # for the carrier responsible for the load.

Not all interstate commercial carriers will have an ICC #.

If it hauls regulated commodities, it must have an Interstate Commerce Commission Motor Carrier (ICC MC) number unless the load consists of the carrier's own unprocessed agricultural product. Exempt loads do not require ICC MC numbers. The ICC MC number (up to six digits) may be preceded by ICC or MC.

Common and Contract carriers operating in Interstate Commerce should have ICC MC numbers. Private carriers who transport their own commodities are not required to have an ICC number regardless of the type of freight transported.

Note: An intrastate carrier hauling loads in state only is not required to have an ICC MC number. If hauling hazardous materials they would be required to have a DOT number but not an ICC number.

2. If interstate, who is responsible for the load? The correct US DOT or ICC MC number is that of the carrier or business that controls the movement of the load (not the movement of the truck).

Example: OK Truck Company leases a truck to Company X for a month. Company X uses the truck to haul goods for AB Freight. The loads being transported interstate during that month would be transported under AB Freight's license. You should record AB Freight's DOT and ICC MC numbers.

To determine the carrier responsible for the load, ask the driver:
"Who is directing and controlling the movement of this vehicle?"
"Who is the motor carrier responsible for the load?"
"Is the vehicle leased or rented?"
"Where is the motor carrier's principal place of business?"

Where do you find this information? Try these places:

Shipping Papers (Bill of Lading) This should give the name of the business or carrier responsible for the load. Shipping Papers are the written transportation contract between the shipper and the carrier.

Lease Agreement identifies the lessee. It may contain the correct US DOT and/or ICC MC numbers for the carrier responsible for the load.

Driver's Logs should contain the name of the motor carrier and the city and state where the motor carrier's principal place of business is located. This carrier may not be the business controlling movement of the load.

Vehicle Registration. If the registered owner is the carrier responsible for the load, then record the US DOT and/or ICC MC numbers from the tags on the side of the truck or truck/tractor (not the trailer). If these numbers are not on the side, ask the driver for the shipping documents. These documents (lease or contract papers) will have the correct US DOT and/or ICC MC numbers. If the driver is injured and unable to respond, check the shipping documents for the correct numbers.

(For help on commercial vehicle questions, please contact the Idaho State Police / Commercial Vehicle Safety Section (208) 884-7220).

DOT Load Number

Unless this is an exempt carrier, follow these steps to determine the DOT # for the carrier responsible for the load.

1. Is this an interstate load? If so, it must have a United States Department of Transportation (US DOT) number. The US DOT number (six or seven digits) is always preceded by US DOT.

Note: An intrastate carrier hauls loads in state only -- they never leave the state of Idaho. An intrastate carrier is required to have an intrastate US Dot number.   If they are hauling exempt commodities they may not need a intrastate DOT number. Also if they do not meet the weight requirement of 10,001 GVWR or GVCW they may also be exempt from having a intrastate DOT number.

View the list of regulated and unregulated commodities. If you have a question visit the CVS Website at www.isp.state.id.us/cvs or call (208) 884-7220.

Help: to verify a DOT # or name of company go to www.safersys.org website. Enter the number and it will bring up the listed company information from the federal system.

2. If interstate, who is responsible for the load? The correct US DOT number is that of the carrier or business that controls the movement of the load (not the movement of the truck).

Example: OK Truck Company leases a truck to Company X for a month. Company X uses the truck to haul goods for AB Freight. The loads being transported interstate during that month would be transported under AB Freight's license. You should record AB Freight's DOT #.

To determine the carrier responsible for the load, ask the driver:
"Who is directing and controlling the movement of this vehicle?"
"Who is the motor carrier responsible for the load?"
"Is the vehicle leased or rented?"
"Where is the motor carrier's principal place of business?"

Where do you find this information? Try these places:

Shipping Papers (Bill of Lading) This should give the name of the business or carrier responsible for the load. Shipping Papers are the written transportation contract between the shipper and the carrier.

Lease Agreement identifies the lessee. It may contain the correct US DOT for the carrier responsible for the load.

Driver's Logs should contain the name of the motor carrier and the city and state where the motor carrier's principal place of business is located. This carrier may not be the business controlling movement of the load.

Vehicle Registration. If the registered owner is the carrier responsible for the load, then record the US DOT number from the tags on the side of the truck or truck/tractor (not the trailer). If these numbers are not on the side, ask the driver for the shipping documents. These documents (lease or contract papers) may have the correct US DOT number. If the driver is injured and unable to respond, check the shipping documents for the correct number.
The DOT number may appear on the power unit registration.

(For help on commercial vehicle questions, please contact the Idaho State Police / Commercial Vehicle Safety Section (208) 884-7220).

Hazmat Placard

Is a Hazardous Material placard displayed on the unit? (Yes/No)

Code	Value
N	No
Y	Yes

Hazmat Spilled

For reporting purposes, hazardous material spills are limited to release of materials from the cargo being transported. Choose Yes if hazardous material from the load was released. If material from the load was not spilled, select No.

Note: A fuel leak from the vehicle's own fuel tanks is not considered to be a hazardous material spill.

Code	Value
N	No
Y	Yes

Hazmat Number

Placards are diamond shaped. Record either the 4-digit number or the name from the placard. If there is a number at the bottom tip of the diamond shaped placard, this should also be recorded. Examples of proper entries would be 1090-3 or flammable-3; Names might be: Poison, Explosives, Gases.

The 4-digit ID numbers may be displayed three different ways; on placards, on orange rectangular backgrounds with a black border or on a white diamond shaped background the same size as a placard. The three groups of numbers referred to are not just on international placards. They will be on Class One explosives placards both domestically and internationally.

(For help on commercial vehicle questions, please contact the Idaho State Police / Commercial Vehicle Safety Section (208) 884-7220).

Load Info Source

Select the item that describes the source of the carrier information (Carrier name and ICC MC # or DOT #).

Injury (Person Level)

Select the item that best describes the person's injuries:

None - No injury evident or reported.

Possible - Any injury reported or claimed which does not fall in the other categories. Inclusions: Momentary unconsciousness, limping, complaint of pain, nausea, hysteria, and/or claim of injuries.

Non-incapacitating - Any injury, other than a fatal or incapacitating injury, which is evident to observers at the scene of the collision in which the injury occurred. Inclusions: Lump on head, abrasions, bruises, and/or minor lacerations. NOT Limping (the injury cannot be seen).

Incapacitating - Any injury, other than a fatal injury, which prevents the injured person from walking, driving, or continuing normal activities. Severe lacerations, broken or distorted limbs, skull or chest injuries, abdominal injuries, unconscious at the scene or taken from the scene of the collision, and/or unable to leave the collision scene without assistance. NOT momentary unconsciousness.

Dead - Death resulting from a fatal injury received in the collision.

Note: If it is known that one or more of the persons involved in the collision dies within thirty (30) days of the collision as a result of injuries sustained in the crash, and a report has been filed, file an amended report.

Code	Injury Type
A	Incapacitating

B	Non-Incapacitating
C	Possible
K	Dead
O	None Evident

Ejection (Person Level)

"Ejection" refers to persons being thrown from a compartment of the vehicle during the course of the crash and includes persons riding in the bed of pickup trucks or any vehicle that has a pickup-style bed.

Ejection is not applicable to persons riding on the exterior of a vehicle, or to motorcyclists, pedacyclists, or to non-motorists. The exterior of a vehicle includes running boards, roof, fenders, and bumpers, but not the beds of pickup trucks.

The ejection choices are:

Not Ejected: The occupant was definitely not ejected from the vehicle.

Totally Ejected: No part of the body remained in the vehicle.

Partially Ejected: Some part of the body remained in the vehicle. Partial penetration may be through windshield, doors (open or closed), or the roof.

Thrown: The rider of a motorcycle or a pedalcycle was thrown from their vehicle.

Unknown: It is not reasonably known whether the occupant was ejected or not.

Code	Ejection
01	Not Ejected
02	Totally Ejected
03	Partially Ejected
09	Other
T	Thrown From Cycle/Animal

Trapped (Person Level)

This information is used to determine if a victim was trapped and if so, how they were removed from the vehicle.

Not Trapped: Occupant was not trapped in vehicle.

Trapped / Extrication unit used: Extrication unit was used for forcible entry into the vehicle to remove the occupant.

Trapped / other extrication method: Victim was trapped but was removed from vehicle without the use of an extrication unit. Other methods include crowbars to pry open doors or breaking windows.

Code	Trapped (Extrication Methods)
01	Not Trapped
02	Trapped, extrication unit use
03	Trapped, other extraction method
09	Other

Transported By (Person Level)

If this person was transported for medical care, select the item that describes the transporting agent. Otherwise, select Not Transported.

Code	Transported By
01	Ambulance
02	Police Car
03	Helicopter
04	Private Vehicle
05	Not Transported
09	Other

Fatality ID (Person Level)

Federal fatality ID assigned to the deceased person -- 3 digits with leading zeros if necessary. All fatal crashes are entered into the Idaho collision database by the FARS analyst for consistency.
