Revised November 2008

PLEASE MAKE COPIES AND DISTRIBUTE AS NEEDED

FOREWORD

The law enforcement officer is absolutely the most important element of the UD-10!

The data produced from approximately 400,000 traffic crash reports processed each year can be no better than the accuracy of the original reports submitted by Michigan's law enforcement agencies. If the law enforcement officer completing the UD-10 Traffic Crash Report does an incomplete or incorrect job of filling out the form, the resulting data will be of poor quality. As a result, traffic safety experts will be unable to evaluate public education campaigns, make improvements to roadways, and dangerous drivers will continue to pose a threat to all motorists.

The UD-10 Traffic Crash Report is a two-sided form designed to capture information about a motor vehicle crash. Each form is designed to capture information pertaining to two units, two injured passengers and up to four uninjured passengers. If there are more than two units involved in a crash, additional forms will need to be submitted. In this case, a Serial Override Number, Data Element 71 will be used on the additional forms.

To improve the quality of the UD-10 Traffic Crash Reports,
please be mindful of these common errors.

Missing Date and/or Unit Number: The date must be written as MM/DD/YYYY and the Unit Number is also of special importance so please remember to complete this field for each unit recorded.

Both "Corrected" and "Replace" Bubbles are Marked: It cannot be both, it must be one or the other. Also, when submitting a form to CORRECT, REPLACE or DELETE, the OVERRIDE box must have the serial number of the original form.

Missing Override Number (in the lower left corner): If the officer is submitting a form other than the original or is using a supplemental form because more than two units were involved, the original serial number must be written in the OVERRIDE box. This number links the subsequent information with the original form.

Stray Marks or Damaged Forms: These cause the form to be rejected by the system. Do not make ANY STRAY marks, including personal initials in a corner to indicate it has been reviewed by a supervisor, slashes through areas that do not apply, signatures that extend outside the box, drawing in the margins, etc.

Location: Do not guess or estimate distances. When accurate distances are not received, traffic specialists cannot properly identify areas of concern. Also, do not use familiar local landmarks as locations; for example, "Ford Plant 7, Gate 2." The road name and intersecting road name must be the name of a public roadway within the county of the crash.

Vehicle Registration: PRINT LEGIBLY AND CLEARLY!

Total Number of Units do not Match Total Number of Units Submitted: Make sure that the total Number of Units, Data Element 10 matches the completed number of units. Example: Number of Units is 3, be sure that 3 separate units are completed and marked as Unit 1, Unit 2 and Unit 3.

If you have questions about the UD-10:
CONTACT THE TRAFFIC CRASH REPORTING UNIT AT (517) 322-1658

Concept of the State of Michigan TRAFFIC CRASH REPORT

This manual has been prepared to provide guidance for completion of the State of Michigan Traffic Crash Report form (UD-10) prescribed by the Director of the Department of State Police pursuant to Section 257.622 of the Compiled Laws of 1970, as amended.

Michigan law requires that the completed crash reports be forwarded to the Director of the Department of State Police on forms prescribed by that office. UD-10's cannot be available for use in any court action (MCL 257.624) but are used for the purpose of furnishing statistical information on crashes. They also provide the basis for traffic legislation, enforcement, engineering, education, driver licensing and public information generally not available from any other source pursuant to MCL Section 257.624 of the Compiled Laws of 1970, as amended.

Every reasonable effort shall be made to obtain factual information for the completion of the report. If this is not possible, law enforcement shall use their best judgment and record their considered opinions based on their investigation and experience. This should be done even though it may not be possible to substantiate all recorded information or have sufficient evidence to initiate prosecution.

When prosecution is initiated, "a police officer may issue a citation to a person who is a driver of a motor vehicle involved in an accident if, based upon PERSONAL INVESTIGATION, the officer has reasonable cause to believe that the person has committed a misdemeanor under the act" or "is responsible for a civil infraction in connection with the crash." MCL Section 257.728(8) and 257.742(3).

Each crash report is a display of the ability of the professional traffic crash investigator. Compliance with instructions in the manual will help ensure that reports are filled out completely, accurately, uniformly, and will be of greatest possible value for crash prevention purposes.

Lastly, the UD-10 Traffic Crash Report is not only for insurance companies! Data reported on the UD-10 is used by:

- Traffic engineers to help redesign unsafe roads and intersections.
- Road Commissions to recoup repair costs from insurance companies when public property is damaged.
- Law enforcement to assign patrols to roads where an unusually high number of crashes occur.
- Department of State to update driver records and get "problem" drivers off our roads.
- Federal safety agencies that develop safety initiatives, implement safety programs, and contribute to making and changing laws.

Accurate and timely data is important to everyone!

INSTRUCTIONS FOR COMPLETION

CRASH DEFINITION

The UD-10 Traffic Crash Report will be used to report to the State of Michigan, all traffic related motor vehicle crashes. The form is also used to record **any crash** involving a snowmobile or off-road vehicle (ORV), whether traffic or non-traffic related. The property damage for a snowmobile or ORV is \$100.00.

*The Michigan criteria for a crash is, “**DID THE CRASH INVOLVE...**”*

1. **a motor vehicle that**
2. **was in transport, and**
3. **on the roadway, that resulted in death, injury or property damage of \$1,000 or more (effective January 1, 2004).**

Exclusions of a crash include: Deliberate Intent (i.e., suicide, self-inflicted injury, homicide); Legal Intervention (i.e., pit-maneuver, deliberate acts engaged in by law enforcement) **Note:** A pit-maneuver that causes two other vehicles to crash, those two vehicles would then be reported on a crash form.

FORM DESIGN

The UD-10 is a two-sided form designed to record the information pertaining to a crash involving two (2) units. Additional forms need to be submitted if the crash involves more than two units. One unit (vehicle, driver and passengers) will be entered on the front side of the form and that of a second unit on the back. Bubbled entries and written areas will be entered into the State of Michigan Traffic Crash Records System.

Note: The shading on the form has no significant value and is only used to visually differentiate the areas on the form. You shall complete all sections applicable to best describe the crash being submitted.

FATAL CRASHES

In crashes involving fatalities, the State of Michigan requires that all passengers, injured and uninjured, be listed on the crash report and that the Crash Diagram and Remarks, Data Element 75 be completed with a thorough description of the crash. Include all supplemental reports relating to this crash. All fatalities occurring on non-public highways (driveways, shopping centers, etc.) shall also be submitted. All fatalities must be reported to MSP Operations via the Law Enforcement Information Network (LEIN), using the format shown in Section 8.

Note: Any **injured** person(s) involved in the crash must be recorded in the Unit/Passenger section. See Section 3, Data Element 35.

PARKED VEHICLES

Legally Parked Vehicle: A LEGALLY parked vehicle is a traffic unit on the UD-10. All occupants (including the person sitting behind the steering wheel) of a LEGALLY parked vehicle are passengers. Do NOT include a Drivers License Number (DLN) of the occupant seated behind the wheel. Michigan law does not require a person to have a driver license in order to sit in a legally parked vehicle. Code the person sitting behind the wheel in the Passenger section in Position “01.”

Illegally Parked Vehicle: An ILLEGALLY parked vehicle is a traffic unit on the UD-10 and is considered a motor vehicle “in transport.” If the vehicle is ILLEGALLY parked, list the DLN of the occupant seated behind the steering wheel. Notice we have intentionally avoided calling this person the “driver” because the car is PARKED, but the person’s DLN, name, address, etc. should be listed in the Driver section of the UD-10.

Unoccupied Vehicle: If the vehicle is UNOCCUPIED (parked legally or illegally), do not list any information in the Driver section.

INSTRUCTIONS FOR COMPLETION (Cont.)

IMPORTANT REMINDERS

Here are some important points to keep in mind when using this form:

1. A No. 2 pencil or a pen (blue or black ink only) may be used to complete this form. Do not use felt tip or gel pens, they have a tendency to bleed through to other data fields.
2. Do not write or make any marks on the paper outside the rectangular form. These marks may go through hash marks or into other bubbles and cause an incorrect reading of the data.
3. If an error is made in the "write-in" or "bubble" areas please correct accordingly. If using a pencil, erase the answer completely. If ink was used, correction tape or whiteout may be used (correction tape is preferred).
4. Do not use staples. The staples tear the report and cause an incorrect reading of the data.
5. Damaged, ripped, torn or taped forms cannot be processed. They will be returned to be re-written.
6. When a single digit response is recorded in a field that has two columns, a zero in the first column must also be filled in. For example, if the correct response to an item is "3," fill in a "0" in the first column and a "3" in the second column. The result will be "03."
7. If recording the distance as a decimal, the decimal point must occupy its own box. See example below.

Distance			.	25
----------	--	--	---	----

STATE OF MICHIGAN TRAFFIC CRASH REPORT

Revised 11/07

Crash Type (First Impact)

Single Motor Vehicle includes Car/Pedestrian, Car/Bicyclist, Car/Animal, Car/Train, Car/Fixed Object

Special Vehicles

1 Police	4 Ambulance
2 Fire	5 Farm equipment
3 Bus	6 Construction/maintenance equip.

Vehicle Use

- Private
- Commercial
- In pursuit/emergency
- Farm
- School/education
- Club/church (all Y-plates)
- Military
- Other government
- Utility (gas, cable, etc.)
- Road construction/road maintenance
- Other

Vehicle Defects

1 Brakes	4 Tires/wheels
2 Lights/reflectors	5 Windows
3 Steering	6 Other

Area

Freeway

- Entrance/exit ramp related
- Median crossing related
- Transition area*
- Rest area related
- Scale/weight station related
- All other freeway areas

Intersection

- Within intersection
- Intersection driveway related (within 150 feet of intersection)
- Intersection related-other

Other Non-Freeway Areas

- Straight roadway Not related to other selections
- Curved roadway Not related to other selections
- Driveway related
- Parking related (legal roadside)
- Transition area*
- Median crossing related
- Rail crossing related
- Rest area related
- Scale/weight station related
- Non-traffic area
- Other
- Unknown

*Increase/decrease in the number of travel lanes.

Position

B Bicyclist
P Pedestrian
E Engineer (railroad/train)

1-9 Vehicle Interior See Representation Below

- Sleeper section
- Other enclosed passenger area/cargo area
- Other unenclosed passenger area/cargo area
- Riding in/on trailing unit
- Riding on vehicle exterior
- Unknown

Motorcycles, snowmobiles, etc. (In-line seating)

- Driver
- Passenger one
- Passenger two
- Other unenclosed passenger area/cargo area

Private Trailer Type

- Utility
- Travel trailer
- Boat trailer
- Farm equipment
- Towed auto
- Recreation double
- Other

Sequence of Events/ Most Harmful Event

Non-Collision

- Loss of control
- Cross centerline/median
- Ran off roadway-left
- Ran off roadway-right
- Re-enter roadway
- Overtum
- Separation of units
- Fire/explosion
- Immersion
- Jackknife
- Downhill runaway
- Cargo loss/shift
- Individual fell from vehicle
- Other noncollision

Restraint Use

- No belts available
- Shoulder belt only used
- Lap belt only used
- Shoulder & lap belt used
- No belt used
- Child restraint used
- Child restraint not used, not available or improper
- Restraint failure
- Restraint use unknown
- Helmet worn
- Helmet not worn
- Helmet use unknown

Action Prior To Crash

Driver Action

- Going straight ahead
- Turning left
- Turning right
- Stopped on roadway
- Involved in prior crash at same location
- Changing lanes
- Backing
- Slowing/stopping on roadway
- Slowing/stopping other area
- Starting up on roadway
- Starting up other area
- Entering parking
- Leaving parking
- Entering roadway
- Leaving roadway
- Making U-turn
- Overtaking or passing
- Avoiding object
- Avoiding pedestrian
- Avoiding vehicle (front/back)
- Avoiding vehicle (angle)
- Driverless moving
- Parked
- Avoiding animal

Had a Collision With

Non-Fixed Objects

- Pedestrian
- Bicyclist
- Motor vehicle in transport*
- Parked motor vehicle
- Engineer (railroad/train)
- Animal
- Other non-fixed object

Trafficway

- Not physically divided (2-way Trafficway)
- Divided highway, median strip, without traffic barrier
- Divided highway, median strip, with traffic barrier
- One-way Trafficway

Code of Injury

K- Fatal Injury Any injury which results in death.
A- Incapacitating Injury Any injury other than fatal which prevents normal activities and generally requires hospitalization.
B- Non-Incapacitating Injury Any injury not incapacitating but evident to others at the scene.
C- Possible Injury No visible injury but complaint of pain or momentary unconsciousness.
O- No Injury No indication of injury.

Fixed Objects

- Bridge/pier/abutment
- Bridge parapet end
- Bridge rail
- Guardrail face
- Guardrail end
- Median barrier
- Highway traffic sign post
- Highway signal post
- Luminaire/light support
- Utility pole
- Other pole
- Culvert
- Curb
- Ditch
- Embankment
- Fence
- Mailbox
- Tree
- Railroad crossing signal
- Building
- Traffic island
- Fire hydrant
- Impact attenuator
- Other fixed object

*In transport means a motor vehicle in motion or on a roadway.

Access Control

- No access control (unlimited access)
- Full access control (ramp entry & exit only)
- Other (Partial access control)

Hazardous Action

- None
- Speed too fast
- Speed too slow
- Failed to yield
- Disregard traffic control
- Drove wrong way
- Drove left of center
- Improper passing
- Improper lane use
- Improper turn
- Improper/no signal
- Improper backing
- Unable to stop in assured clear distance
- Other
- Unknown
- Reckless Driving
- Careless/Negligent Driving

Driver Condition

- Appeared normal
- Had been drinking
- Illegal drug use
- Sick
- Fatigue
- Asleep
- Medication
- Driver Distracted
- Driver Using Cellular Phone
- Unknown

Unit Type

MV Motor Vehicle
B Bicyclists(all pedalcyclists)
P Pedestrian
E Engineer (railroad/train)

UD-10 Help Sheet (Back)

Commercial Motor Vehicle Categories

Group "A" is any combination of vehicles with a gross combination weight rating (GCWR) of 26,001 pounds or more, provided the gross vehicle weight rating (GVWR) of the vehicle(s) being towed is in excess of 10,000 pounds GVWR.

Vehicle Type

Code Definition

AA = Group A vehicle
 AH = Group A vehicle, Hazardous
 AN = Group A vehicle, Tanks
 AP = Group A vehicle, Passenger
 AT = Group A vehicle, Double/Triple
 AX = Group A vehicle, Tank & Hazardous
 AY = Group A vehicle, Tank & Double/Triple
 AZ = Group A vehicle, Hazardous, Double/Triple
 AL = Group A vehicle, Hazardous, Tank, Double/Triple
 AS = Group A vehicle, School Bus

Group "B" is any single vehicle with a GVWR of 26,001 pounds or more or any combination of vehicles with a gross combination weight rating (GCWR) of 26,001 pounds or more, provided the gross vehicle weight rating (GVWR) of the vehicle(s) being towed is not in excess of 10,000 pounds GVWR.

Vehicle Type

BB = Group B vehicle
 BH = Group B vehicle, Hazardous
 BN = Group B vehicle, Tank
 BP = Group B vehicle, Passenger
 BX = Group B vehicle, Tank & Hazardous
 BS = Group B vehicle, School Bus

Group "C" is any single vehicle with a GVWR of less than 26,001 pounds or a combination of vehicles having a combined GCWR under 26,001 pounds when the vehicle is required to display placards for hazardous material or designed to carry 16 passengers (including driver). Group "C" is also any vehicle carrying 15 or less people (including driver) transporting children to or from school and home on a regular basis for compensation.

Vehicle Type

CH = Group C vehicle, Hazardous
 CP = Group C vehicle, Passenger
 CX = Group C vehicle, Tank & Hazardous
 CS = Group C vehicle, School Bus

"Other" is any vehicle being used for commercial purposes and does not fall into the categories of Group A, B or C but is over 10,001 pounds and less than 26,001 pounds. Vehicle type must be marked as Truck/Bus, and the Truck/Bus section must be completed. Within the Truck/Bus section, vehicle type should be marked "Other."

Truck/Bus

Truck or Bus Definition

The Truck/Bus information box located on the back of the form must be completed for each of these vehicles regardless of whether a CDL is issued. Do not report motor homes or implements of husbandry.

1. A truck or truck/trailer having a Gross Vehicle Weight Rating (GVWR) of more than 10,000 pounds.
2. Any vehicle that displays a hazardous materials placard including automobiles and vans.
3. Any bus or school bus designed or used to transport 9 or more passengers including the driver (this includes courtesy vans and limousines).

Cargo Body Type

1 Van (enclosed box)	5 Concrete mixer
2 Cargo Tank	6 Auto transport
3 Flatbed/platform	7 Garbage/refuse
4 Dump	8 Other/unknown

Type and Axles Per Unit

Enter the total number of axles for the truck or bus in the first box. Include the steering axle. There will always be at least two axles. Include axles whether they are on the ground or raised. Place the letter "T" before the number of axles if the truck is a truck tractor (equipped with a fifth wheel for towing, semi-trailer and there is no cargo body mounted on the truck.)

Next, enter the total number of axles for each trailer by entering one trailer per box. Place an "S" before the number of axles if the trailer is a semi-trailer which is designated when a portion of the load is supported by the towing unit.

NOTE: a Bus (commercial or school) is now designated by the number of seats in the vehicle (including the driver's) and will not list the number of axles. Use the following rules:

1. Mark Truck/Bus in Vehicle Type in the Unit section and mark appropriate vehicle type in the Truck/Bus section.
2. For Type and Axles:
 - a. Enter B1 in the first box if a bus has seating of 9 to 15 including driver
 - b. Enter B2 in the first box if a bus has seating of 16+

Vehicle Type

PA = Passenger car & station wagon	OR = Off road vehicle (ATV type)
VA = Van, motor home	Other = Non-registered vehicles (e.g., farm equip, trains, front-end loader)
PU = Pickup truck	Truck/Bus = Complete the Truck/Bus Section (includes medium trucks, limousines and courtesy vans)
ST = Small truck (under 10,000 lbs.)	
CY = Cycle	
MO = Moped	
GC = Go-cart	
SM = Snowmobile	

Location of Greatest Damage/ First Impact

For each vehicle, select the degree of severity, "1" being least severe and "7" most severe, with "0" representing no damage. When a vehicle has multiple areas of damage, all damage should be considered.

Extent of Vehicle Damage

Questions concerning the UD-10 should be directed to the Traffic Crash Reporting Unit at (517) 322-1658.

UD-10 Traffic Crash Report Instruction Manual

SECTION 1

Administrative Elements

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

Administrative Elements

The following crash data element numbers coincide with the UD-10 Quick Reference where the data elements are identified by number on the form:

1 ORI (Originating Agency Number)

ORI: MI- [] [] [] [] [] [] []

Enter each law enforcement agency's nine character ORI. The first two characters, MI, are preprinted on the form. The remaining seven digits will need to be completed. **Mark one digit per box.**

The first two (2) digits identify the county in which the agency resides. The next three (3) digits identify the agency's jurisdiction number that is assigned by the Michigan State Police, CJIS Field Services Section. The last two (2) digits are normally zeros (00), unless the CJIS Field Services Section has assigned a specific precinct number.

The ORI is a unique identifier for every law enforcement agency. **It is important that it be correct and complete.**

2 Department Name

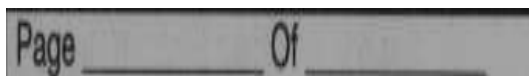

Department Name

Enter the full name of the law enforcement agency. Do not abbreviate the agency name, although agency type may be abbreviated, e.g., Police Department (**PD**), Sheriff Department (**SD**) and Michigan State Police (**MSP**).

Michigan State Police must identify their non-abbreviated post location. The post number may be listed in addition to the post name.

3 Page Number

Page ___ Of ___

Since there is the possibility that more than one UD-10 form will be used to report a traffic crash, each form must be numbered in sequence. For example, if five vehicles are involved in a crash, three forms must be completed. The first UD-10 form would be numbered Page 1 of 3, the second UD-10 form, Page 2 of 3, and the third UD-10 form, Page 3 of 3. If only one form is used, it would be numbered page 1 of 1. See Serial Override Number, Data Element 71 to add additional pages.

4

Incident Number

Incident #										
------------	--	--	--	--	--	--	--	--	--	--

Enter the agency's incident number. **Mark one digit or letter per box. Dashes are allowed.**

Note: When giving the incident number to parties involved in a crash, the incident number must be identified exactly as written on the UD-10.

5

File Class

File Class

Enter the appropriate file class for this crash.

54001 – Hit & Run Motor Vehicle Accident 54002 – Operating Under Influence of Liquor or Drugs 93001 – Accident, Traffic 93002 – Accident, Non-Traffic
--

6

Disposition

Incident Disposition
<input type="radio"/> Open <input type="radio"/> Closed

This box is used for local investigative purposes. Mark the appropriate status of the crash investigation at the time of submittal. Do not hold the UD-10 form pending closure. If the only change to the report is closing the disposition, do not submit a corrected copy.

7

Reviewer

Reviewer

The person reviewing the report at a supervisory level will enter initials or other identifier.

8

Crash Date

Crash Date					
Month	Day	Year			
M	M	D	D	Y	Y

Enter the date the crash occurred in the boxes. A future date is not valid. **Mark one digit per box.**

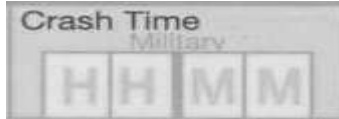

If the date is unknown and cannot be reasonably estimated, use the date the crash was reported by the complainant.

Crash Date – Cont.

A valid date is necessary to update records of each involved driver. If a crash report is submitted with an incorrect date, the original report must be deleted and a new report submitted. There **must** be a total of eight digits, **MM/DD/YYYY**.

9

Crash Time

A form titled "Crash Time Military" with four input boxes labeled "H", "H", "M", and "M" for entering the time in military format.

Enter the military time at which the crash occurred. **All military time must include four digits. Mark one digit per box.**

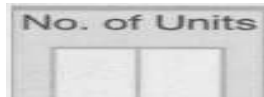

If time occurred is unknown, enter an estimated time.

One minute after midnight is entered 0001 (this is the start of the day). 9:15 AM is 0915, 12:00 noon is 1200.

From 1:00 PM on, simply add 12 to the hour to get the military time. For example, 1:00 PM equals 1300 (1:00 + 12:00 = 13:00), 2:25 PM equals 1425 (2:25 + 12:00 = 1425), and 10:05 PM equals 2205 (10:05 + 12:00= 22:05).

10

Number of Units

A form titled "No. of Units" with two input boxes for entering the number of units.

Enter the total number of units (Motor Vehicles, Pedestrians, Bicycles and Engineers [railroad/train]) that were physically involved, up to a maximum of nine. Each unit counted in a crash **must** have a separate unit section completed. **Mark one digit with a leading zero e.g., 01-09.**

Example: A crash involving a car that strikes two pedestrians would be listed as **three** units.

Example: All of the following would be crashes involving **two** units:

- car-train
- car-moped
- car-pedestrian
- car-snowmobile
- car-bicycle
- car-farm tractor
- car-snowplow

Example: A police officer used the push-bumper of the patrol car to push a disabled vehicle, Unit 1. The "operator" of Unit 1 hit another car, Unit 2. This would be a **two** unit crash. The police officer would be listed as the Driver of Unit 1 and the disabled vehicle would be listed as a trailer. Even though the "operator" of Unit 1 may have steered into Unit 2, the police officer driving the patrol car is listed as the Driver of Unit 1 because the patrol car was supplying the power.

Number of Units – Cont.

Example: A car/animal crash or car/tree crash would involve only **one** unit because an animal or tree is not a Motor Vehicle, Bicycle, Pedestrian or Engineer (railroad//train).

Note: Do not include non-contact vehicles in the total number of units. Non-contact units shall be described in the Crash Diagram and Remarks, Data Element 75.

Example: If one car forces another off the road and into a collision with an off-road object, this would be a **one** unit crash. It would be a two-unit crash only if the two cars actually made contact with one another.

Note: If one vehicle sets an object in motion; such as a stone, piece of metal, loose tire or other debris that damages another vehicle, this would be a **two** unit crash. There may be very little or no information about the vehicle that initially set the object in motion. Even though there was not direct contact between the vehicles, an object was set in motion that made contact and caused damage. Further explain such occurrences in the Crash Diagram and Remarks, Data Element 75.

More than 9 Units

If a crash involves more than nine units, the same incident number may be used. Record any additional units as a second crash with the same DATE, TIME and LOCATION. The first form of this second crash must be completed in its entirety since it is a “new” crash. Do not enter the UD-10 Serial numbers in the Crash Diagram and Remarks, Data Element 75 on the reverse side of each form.

Example: A crash involving ten motor vehicles and one pedestrian would have 11 units. For reporting purposes, the units in this crash would be divided into two distinct crashes. Up to nine units could be reported in the first crash with the remainder being reported in the second crash.

11

Crash Type

Crash Type	
<input type="radio"/>	Single Motor Vehicle
<input type="radio"/>	Head On
<input type="radio"/>	Head On-Left Turn
<input type="radio"/>	Angle
<input type="radio"/>	Rear End
<input type="radio"/>	Rear End-Left Turn
<input type="radio"/>	Rear End-Right Turn
<input type="radio"/>	Sideswipe-Same
<input type="radio"/>	Sideswipe-Opposite
<input type="radio"/>	Other/Unknown

Choose **only one** crash type that best identifies the crash. In a multi-impact crash only the first crash type will be coded.

Crash Type – Cont.

Determine Crash Type:

Crash Type is based on the intended direction of travel, regardless of point(s) of impact or direction vehicles ultimately face after crash. Damage area on the vehicle alone does not determine crash type.

Example: Two motor vehicles are approaching each other and one vehicle loses control and starts to spin. The rear of the out of control vehicle impacts the front of the other vehicle. This would be considered a "Head On" crash because the intended direction of travel of both vehicles was toward each other.

The following definitions will be applied to Crash Types. Except for "Single Motor Vehicle," the selection will be based on the first impact of the first two motor vehicles involved in the crash. Crash types of head-on, angle, rear-end, sideswipe same or sideswipe other, can include one "parked" vehicle.

1. **Single Motor Vehicle:** A crash that involves only one motor vehicle as defined in this manual. This includes those cases, in which a motor vehicle was the only traffic unit, and the only motor vehicle involved that collided with a bicyclist, pedestrian, engineer (railroad train), animal or any other non-motorized object.

Any motorized vehicle or device is considered a "motor vehicle" even though the vehicle or device may not be defined as a motor vehicle in the Michigan Motor Vehicle Code or other applicable legislation. In that manner, traffic units such as ORV's, snowmobiles, ATV's, mopeds, farm tractors, garden tractors and motorized wheelchairs are motor vehicles for the purposes of completing this form. Please see Unit Type, Data Element 31 for a complete description of motorized vehicles.

Examples of Single Motor Vehicle crashes:

- One motor vehicle and two pedestrians
- One motor vehicle and a railroad train
- One motor vehicle and a bicycle
- While in transport, a wheel on a vehicle caught fire. If a fire occurs in or on any part of a vehicle while in transport on a roadway resulting in death, injury or property damage of \$1,000 or more.

Note: For the above listed examples, a UD-10 would be completed listing the crash as a "Single Motor Vehicle" crash. These types of occurrences are defined as non-collision crashes which are any road vehicle crash other than a collision crash.

2. **Head On:** The intended direction of travel of both vehicles must be toward each other. The direction that the vehicles are facing when they come to rest or the points of impact on the vehicles are not the determining factors.
3. **Head On-Left Turn:** When two vehicles are approaching head on and at least one is attempting a left turn.
4. **Angle:** This will be marked when the intended direction of travel is basically perpendicular for both drivers and there is a side impact of approximately 90 degrees.

An angle crash is a more direct impact and may stop the forward movement of one vehicle.

Do not mark Angle if the side impact takes place during a Head On-Left Turn, Rear End-Left Turn, or Rear End-Right Turn.

Crash Type – Cont.

5. **Rear End:** When the vehicles are traveling in the same direction, one behind the other, and no turn is involved. Area of damage on the vehicles is not the determining factor.

Note: Any crash involving a vehicle backing up into another vehicle is not considered a rear end crash. This type of crash would be considered as Other/Unknown.

6. **Rear End-Left Turn:** When the intention of one driver was to make a left turn and he was struck by a following vehicle not necessarily in the same lane, Rear End-Left Turn will be marked. Initial impact damage to the turning vehicle may not necessarily be to the rear end.
7. **Rear End-Right Turn:** Same as Rear End-Left Turn (6) except involving right turns.
8. **Sideswipe-Same:** Vehicles traveling in the same direction making side contact will be marked Sideswipe Same. If a vehicle spins out of control and makes contact with another vehicle traveling in the same direction Sideswipe Same will still be marked regardless of points of contact on the vehicles. Sideswipe crashes differ from Angle crashes in that a Sideswipe is a glancing impact and should not in itself stop the forward movement of the vehicle. (An angle crash is a more direct impact and may stop the forward movement of one vehicle.)
9. **Sideswipe-Opposite:** This will be marked when vehicles are traveling in opposite directions and they make a glancing side impact. Instructions for #8 also apply to this selection.
10. **Other/Unknown:** This will be marked if it is determined the crash does not fit in one of the first nine selections.

Example: The only motor vehicle involved in a crash, runs off the road and overturns. This crash type would be marked as a “Single Motor Vehicle.”

Example: A car striking any of the following, on or adjacent to the roadway, would be marked as a “Single Motor Vehicle” crash type because none of the objects struck is a motor vehicle:

- Pedestrian
- Bicyclist
- Engineer (railroad/train)

Any crash involving two or more motor vehicles will require a Crash Type of 2 through 10, depending upon the profile of the collision.

Example: A car is stopped waiting to make a left turn and is struck in the rear by another car. **Rear End-Left Turn** will be marked.

Example: A car proceeding straight through an intersection collides with an oncoming snowmobile that suddenly makes a left turn. **Head On-Left Turn** will be marked because of the type of crash and because, for UD-10 traffic crash reporting purposes, the snowmobile is considered a motor vehicle.

Example: A car rear-ends an ATV. Both are headed straight ahead at impact. **Rear End** will be marked since the ATV is considered to be a motor vehicle. The same code would be used if any other type of motorized vehicle was struck (e.g., car, farm tractor, snowmobile, etc.).

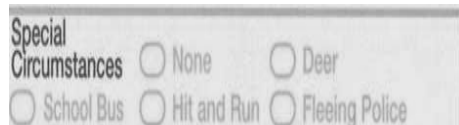

Crash Type – Cont.

If multiple impacts are involved, only the first impact will determine the crash type.

Example: An oncoming truck sideswipes a car. The car then proceeds into a head-on crash with an oncoming vehicle. Because the first impact involved a sideswipe with an oncoming vehicle, **sideswipe-opposite** will be marked.

12

Special Circumstances

Special Circumstances None Deer
 School Bus Hit and Run Fleeing Police

Indicate special circumstances that were in any way involved or associated in the crash. **At least one bubble must be marked and more than one bubble may be marked if circumstances warrant.**

None

No special circumstances exist. If None is selected, no other selections can be made.

Deer

If a deer is a contributing factor in a crash, mark Deer. **Do not mark deer if any other animal is struck other than a deer.**

Example: A driver swerves to miss a deer, loses control and collides with an oncoming vehicle. This is a deer associated crash, mark Deer.

School Bus

School bus shall be selected in situations where a school bus is related to the crash in any way. This includes situations where the school bus was a contact vehicle or where other units crashed due to the presence and influence of a school bus, even though the bus itself was not a contact unit.

Example: A school bus is hit by another vehicle. The school bus is actually involved in the crash, mark School Bus.

Example: An automobile that has stopped for a school bus is struck by another vehicle. The school bus was not involved in this crash but was associated with it, mark School Bus.

Example: A school bus has stopped. While a student is crossing the road, a driver disregards the bus flashing lights and hits the student. The bus was associated with the incident but not involved, mark School Bus.

Hit & Run

If the crash was a hit and run, mark Hit and Run.

Fleeing Police

If a police pursuit situation causes other vehicles to crash, mark Fleeing Police.

Example: A patrol car collides with a vehicle it is pursuing, mark Fleeing Police.

Example: A patrol car is in pursuit of a car that disregards a red traffic signal and collides with another car, mark Fleeing Police.

Special Circumstances – Cont.

Example: A patrol car is pursuing Car 1. Car 1's erratic driving causes two other vehicles to collide, but Car 1 is not a contact vehicle in that crash, nor is the patrol car, mark Fleeing Police.

Example: A vehicle being pursued by police collides with a school bus, mark School Bus and Fleeing Police.

If no special circumstances exist, you must mark None.

13

Special Study

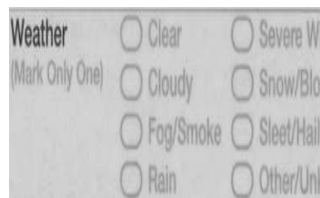

Special Study Local State

The Special Study box allows both state and local officials to highlight specific crash situations for statistical studies. Personnel will receive instructions from the agency if a special study is implemented. Otherwise, leave blank. Contact the Michigan State Police – Traffic Crash Reporting Unit prior to implementing a local study.

14

Weather

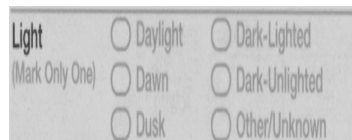

Weather Clear Severe W
(Mark Only One) Cloudy Snow/Blo
 Fog/Smoke Sleet/Hail
 Rain Other/Uni

Indicate the **one most significant** weather condition at the time of the crash. If there are multiple weather factors, only the **most** significant factor must be indicated. **Fill in only one bubble.**

Other factors may be noted in the Crash Diagram and Remarks, Data Element 75.

15

Light

Light Daylight Dark-Lighted
(Mark Only One) Dawn Dark-Unlighted
 Dusk Other/Unknown

Indicate the **one most significant** light condition at the time of the crash. If there are multiple light factors only the **most** significant factor must be indicated. **Fill in only one bubble.**

Other factors may be noted in the Crash Diagram and Remarks, Data Element 75.

16

Road Condition

Road Condition	<input type="radio"/> Dry	<input type="radio"/> Snowy	<input type="radio"/> Debris
(Mark Only One)	<input type="radio"/> Wet	<input type="radio"/> Muddy	<input type="radio"/> Other/ Unknown
	<input type="radio"/> Icy	<input type="radio"/> Slushy	

Mark the **one most significant** condition that applies to the crash. Other conditions may be described in the Crash Diagram and Remarks, Data Element 75. **Fill in only one bubble.**

17

Special Checks

Special Checks	
<input type="radio"/>	Fatal (Report All)
<input type="radio"/>	Corrected Copy
<input type="radio"/>	Replace (Entire Report)
<input type="radio"/>	Delete (Entire Report)
<input type="radio"/>	Non-Traffic Area
<input type="radio"/>	ORV/Snowmobile

More than one bubble can be filled in.

FATAL

Mark this box when a fatality is known to have occurred as of the date the report is submitted. When the Fatal bubble is marked, be sure to also mark the Injury code 'K' for the appropriate person.

If a person dies after the report has been submitted, a Corrected Copy **must** be submitted. The Fatal bubble would be marked on the corrected form. **Be sure to fill in the Fatal bubble and the Corrected Copy bubble and write the original serial number in the override box.** See guidelines on submitting a Corrected Copy.

Mark Fatal whenever any person listed on a UD-10 dies. Those deaths are reported to Special Operations via LEIN and should be marked with a 'K' Injury code on the UD-10. Fatalities will fall within four categories:

1. **NORMAL Fatalities:** These are deaths that occur within 30 days of a crash as the result of injuries received in that crash. Should the death occur after the UD-10 has been submitted, but within the 30-day time frame, a Corrected Copy must be forwarded for the death to be counted statistically.
2. **NON-COUNT Fatalities:** Unlike Normal Fatalities, these deaths are not counted statistically because the person expired more than 30 days after the crash date. Upon submission of the UD-10 by the policing agency (with the appropriate FATAL and Injury code 'K' marked), FARS Unit personnel will process the information they require and will then remove the FATAL bubble and change the 'K' to an 'A' Injury code. The UD-10 will be processed as an injury crash.
3. **MEDICAL Fatalities:** When a person dies from medical causes not related to the crash the death is not statistically counted as a traffic fatality. Upon receipt of the UD-10 with the appropriate FATAL and Injury code 'K' marked by the policing agency, FARS Unit personnel will change the 'K' to an 'O' Injury code before the report is processed, upon verification by the agency or a death certificate.

Special Checks – Cont.

4. **NON-TRAFFIC Fatalities:** Are those that occur in or on areas not publicly maintained and/or open to the public for thru traffic; i.e., parking lots, fields, lake surfaces, etc.

Fatalities deemed Non-Traffic are not compiled with the Normal Fatalities, but the data is utilized by the Department of State concerning driver records, the Department of Community Health concerning death certificates, and the Department of Natural Resources concerning activities and tourism.

Non-traffic snowmobile and ORV crashes are required by state law to be submitted and compiled. Non-traffic fatalities are used simply as a name list for queries and to make sure driver records are cleared; they are not processed for statistics.

BUS/TRAIN Fatalities: If you are reporting a FATAL bus/train crash you only have to include all injured passengers and the driver. This is the only time you would exclude uninjured persons in a fatal crash.

CORRECTED COPY (A change to a form previously submitted)

Select Corrected Copy to submit a change to a crash form **previously submitted** to the Michigan State Police. The corrected copy requires certain information in addition to the content item(s) being changed or added. The following items **must** be submitted on all corrected copies submitted:

Required Data Elements for a Corrected Copy

- Agency ORI
- Department Name
- Original Incident Number
- Crash Date (previously submitted)
- Number of Units
- Special Checks (Corrected Copy)
- County
- City/Township
- Unit Number
- The preprinted serial number of the original traffic crash report being corrected. See Serial Override Number, Data Element 71.

Do not write over, cross out or white-out the pre-printed serial number.

When using the Corrected Copy option, start by marking one of the Unit Number, bubbles on the front of the form. Mark the appropriate Unit Number, Data Element 30 needing the correction. **Start on the front page, even if it is Unit 2-9.**

If changes are being made to an area that does not relate to a unit number, A '1' must be placed in the unit number box. This allows a link of information between the corrected copy and the original.

Example: Crash Type is being changed from Other/Unknown to Head On. The Unit Number 1 must still be filled in.

No correction will be made if the Unit Number field is not completed.

Special Checks – Cont.

Note: Units or passengers **cannot** be added or deleted via the corrected copy process. Use the **Replace** process for this type of change.

Note: Date change **cannot** be made via the Corrected Copy process. Use the **Delete and Replace** process for this type of change.

REPLACE (Replace an entire report previously submitted)

When changing the number of units, identity of a driver or crash date, a new report must be submitted.

If an investigation of a crash reveals a major change in the circumstances known to have occurred in that crash, resubmit an entire rewritten report to supersede the initial report submitted. The completely rewritten report must include the preprinted serial number of the traffic crash report being replaced in the override serial # box. See Serial Override Number, Data Element 71. **The entire report must be replaced. A single page of a report cannot be replaced.**

Example: The investigation reveals the number of units reported was inaccurate on a previously submitted crash report. To correct the number of units, replace the original UD-10 crash report with a rewritten, updated report.

Example: In a previously submitted report, John Jones was listed as the driver of a vehicle. Later, he is determined to have been a passenger instead. This change will require a replace of the original UD-10 crash report because the driver information is changing.

In order to change the date of a crash previously reported, first delete the original crash and then submit a new UD-10 crash form. UD-10's have three items that tie that particular incident together: ORI Number, Serial Number and Crash Date. These three elements must be consistently correlated.

DELETE (Delete an entire report from system)

Mark Delete only to delete an entire report from the system.

The report form submitted to delete an entire previously submitted traffic crash report must have the following information:

Required Data Elements for a Delete

- Agency ORI
- Department Name
- Original Incident Number
- Crash Date (previously submitted)
- Number of Units
- Special Checks (Delete)
- County
- City/Township
- Unit Number
- Preprinted serial number of the previously submitted traffic crash report being deleted. See Serial Override Number, Data Element 71.

Example: A previously submitted Hit-Run crash is determined to be a false police report.

Special Checks – Cont.

Example: A traffic crash proves to be the result of an intentional act; i.e., an assault.

In order to change the date of a crash previously reported, first delete the original crash and then submit a new UD-10 crash form. UD-10's have three items that tie that particular incident together: ORI Number, Serial Number and Crash Date. These three elements must be consistently correlated.

NON-TRAFFIC

Except for the following situations, non-traffic crashes will not be submitted to the state records system:

1. Non-traffic snowmobile crashes
2. Non-traffic Off Road Vehicle (ORV) crashes
3. Fatal non-traffic crashes

Please remember when submitting the above types of non-traffic crashes that Area, Data Element 23 must be marked 19 (Non-traffic Area).

The State of Michigan requires that both traffic crashes and non-traffic crashes involving snowmobiles and ORVs be reported. This requirement applies whenever an ORV or snowmobile is involved in a crash resulting in a fatality, personal injury, or property damage estimated at **\$100 or more**.

There is no state law requiring the reporting of non-traffic crashes, however, the State of Michigan requests that fatal non-traffic crashes be reported via the UD-10 Traffic Crash Report and the LEIN Fatal Crash Notification shown in Section 8.

Remember, more than one selection may be marked in Special Checks.

Example: A fatal crash occurs in a shopping center parking lot, mark Fatal and Non-Traffic.

Example: A snowmobile fatally injures a pedestrian in an off-road collision on private property, mark Fatal, Non-Traffic and ORV/Snowmobile.

18

County

County

Enter the county number in which the crash occurred. See Appendix C for the County/City/Township Code List. **Mark one digit per box.**

This is a required field. If not completed properly, the form cannot be processed.

19

City/Township

 A small rectangular form field with the label "City/Twp" at the top. The field is divided into two columns by a vertical line, with the left column being slightly wider than the right column.

Enter the City or Township code for the political jurisdiction in which the crash occurred. See Appendix C for the County/City/Township Code List. **Mark one digit per box.**

This is a required field. If not completed properly, the form cannot be processed.

20

Traffic Control

 A form field titled "Traffic Control" containing four radio button options: "None of These", "Signal", "Stop Sign", and "Yield Sign".

FOR ALL CRASHES, select only one bubble. If there was no traffic control present, mark "None of These."

A traffic signal is a 3-light (red-yellow-green) device that alternately assigns right-of-way. Even if the light is in a red-yellow flashing pattern, it is still considered a traffic signal. Mark 1-Signal regardless of whether the traffic signal was operating properly at the time of the crash.

A 1-light beacon that flashes red or yellow is not considered a traffic signal. A stop or yield sign would accompany this 1-light beacon. Indicate which type of sign is present.

If the crash occurred within 150' of an intersection and the traffic control device was a contributing factor in the crash, mark which of the traffic control devices was present at the intersection.

Note: If a person is "holding" a sign and officially directing traffic, select the appropriate sign. For example, if a person is holding a stop sign at a school crossing to allow the children to cross the street, select "stop sign."

Note: An officer using hand signals is not considered a traffic control device. Mark "None of These."

21

Relation to Roadway

 A form field titled "Relation to Roadway" with the sub-label "(Location of First Impact)". It contains six radio button options: "Shoulder", "Outside of Shoulder/Curb", "On Road", "Median", "Gore", and "Other/Unknown".

Identify the location of the first impact of the crash in relationship to the roadway. **Fill in only one bubble.**

Relation to Roadway – Cont.

On Road

An on-roadway crash is one of two circumstances. Either a collision crash in which the initial point of contact between the colliding units in the first harmful event is within a roadway or a non-collision crash in which the road vehicle involved was partly or entirely on the roadway at the time of the first harmful event.

Example: A crash occurs in the normally traveled area of the roadway, including left turn lanes and right and left turn flares. **Mark 1 – On Road.**

Example: A car leaves the thru lane, moves to the right into a parking lane, and strikes a parked car. The parked car is on the road, not on the shoulder. **Mark 1 – On Road.**

Median

A median is an area of a trafficway between parallel roads separating travel in opposite directions.

Example: A car drives into the area between the inside left-hand pavement edges of a divided highway striking a bridge abutment. **Mark 2 – Median.**

Shoulder

A shoulder is that part of a trafficway adjoining with the roadway for emergency use, for accommodation of stopped road vehicles and for lateral support of the roadway structure.

Example: A car drifts out of the normally traveled lanes, striking a car parked on the shoulder. **Mark 3 – Shoulder.**

Outside of Shoulder/Curb

A driver avoids a collision in an intersection by swerving off the road and striking a culvert end. **Mark 4 – Outside of Shoulder/Curb.**

Gore

The gore is the narrow area between the main roadway and an exit or entrance ramp where the two completely separate or come together. The area is bounded on both sides by the edges of the roadways that join at the point of divergence or convergence. The direction of traffic must be the same on both sides of these roadways.

Example: A driver attempts to exit a freeway; however, the car goes off into the gore area and overturns. **Mark 5 – Gore.**

Construction Zone

Construction Zone (if applicable) <small>(Mark One From Each Group)</small>		
Type	Lane Closed	Activity
<input type="radio"/> Const./Maint.	<input type="radio"/> Yes	<input type="radio"/> On Road
<input type="radio"/> Utility	<input type="radio"/> No	<input type="radio"/> Off Road
		<input type="radio"/> None

If the crash took place within a construction zone, indicate the specific type of area by marking one choice in each of the three categories. **If applicable, all 3 fields must be completed.**

If a construction zone is NOT present, do NOT complete any of the three fields within this box.

If any of these three fields are completed, the crash is recorded as a construction zone crash.

Type

Construction/Maintenance: Indicates roadway construction, maintenance or repair. The building, maintenance or repair of the road itself and roadway-related features (e.g., overhead signs, signals, etc.).

Utility: Indicates work on facilities other than the roadway such as telephone, electrical, cable television, water, or sewer.

Note: A construction/maintenance zone may or may not be posted as such. If posted, the zone extends from the first "Construction Ahead" warning sign to the final "Construction Ends" sign. If there are no posted warning signs marking the start of the zone, the first or last traffic cone or barricade may be used instead. If a crash occurs outside of the construction zone as a result of backup caused by the construction, do not complete any fields.

Lane Closed

Complete if Type has been selected. Indicate whether one or more lanes were closed in the construction zone.

Activity

Complete if Type and Lane Closed are selected. Indicate whether the construction activity was, (1) on the road, (2) off the road, or (3) no activity was occurring at the time of the crash. If the zone is several miles long, judge whether there was activity in the general area of the crash.

Area

Area
<input type="text"/>

This section is used to describe the nature of the area in which the crash occurred. The basic distinction is between freeway and non-freeway areas. Select the one option that most clearly describes the nature of the collision area. **Mark one digit per box.**

Area – Cont.

Freeway Crash – 01 thru 06

- 01 Entrance/exit ramp related
- 02 Median crossing related
- 03 Transition area (increase or decrease in travel lanes)
- 04 Rest area related
- 05 Scale/weigh station related
- 06 All other freeway areas

Non-Freeway Intersections – 07 thru 09

- 07 Within intersection
- 08 Intersection Driveway related (within 150 feet of nearest edge of intersection)
- 09 Intersection related - other

Other Non-Freeway Areas – 10 thru 21

- 10 Straight roadway - not related to other selections
- 11 Curved roadway - not related to other selections
- 12 Driveway related (not within 150 feet of intersection)
- 13 Parking related (legal roadside)
- 14 Transition area (increase or decrease in travel lanes)
- 15 Median crossing related
- 16 Railroad grade crossing-related
- 17 Rest area related
- 18 Scale/weigh station related
- 19 Non-traffic area
- 20 Other
- 21 Unknown

Example: A collision occurs on a freeway between a vehicle on the freeway and another vehicle attempting to merge into thru traffic from a half-mile long acceleration lane. The crash occurs in an area marked with “Lane Ends” warning signs. **Mark 03 – Transition area (increase or decrease in travel lanes).**

Example: A car fails to negotiate a freeway curve, leaves the roadway and overturns down an embankment. It does not occur near an exit ramp, rest area, or weigh station. **Mark 06 – All other freeway areas.**

Example: A car exiting a service station driveway collides with a passing vehicle. The driveway is 100 feet from the nearest edge of the intersection. **Mark 08 – Driveway related (within 150 feet of nearest edge of intersection).**

Example: A car traveling on a 4-lane road with two through lanes in each direction collides with a car illegally parked in the right lane. If this crash occurred on a freeway, whether the roadway was straight or curved, **mark 06 – All other freeway areas.** If the road is straight and not a freeway, **mark 10 – Straight Roadway.** If the road were curved, **mark 11 – Curved Roadway.** Option 13 – Parking related (legal roadside) would not be marked because the vehicle struck was illegally parked.

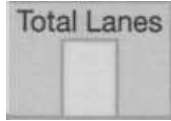

Example: On a straight city street near an intersection, a motorist opens his/her driver’s door to exit his/her legally parked vehicle. A passing car collides with the open door. The most descriptive code is **13 – Parking-related**, since that is more significant than the roadway being straight or the impact occurring near an intersection.

Area – Cont.

Example: A fatal car-pedestrian crash takes place in an off-street parking lot. **Mark 19 – Non-traffic area.** In this case, also make sure that Non-Traffic Area is marked under Special Checks, Data Element 17.

24

Total Lanes

A rectangular form with the text "Total Lanes" at the top and a single vertical input box below it.

Mark the total number of lanes, including flare lanes, curb to curb, or edge of roadway (excluding shoulders) of the roadway which is listed as the crash location. **Mark one digit per box.**

Count the total number of legal travel lanes. As long as a vehicle can legally operate in a marked lane, the lane will be counted. However, legal parking lanes (whether occupied or not) shall not be counted.

If the crash took place on a divided roadway, indicate the number of lanes available to a single direction of traffic at the point where the first impact of the crash took place. If the crash occurred other than on a roadway, mark "0."

25

Speed Limit

A rectangular form with the text "Speed Limit" at the top and two vertical input boxes below it.

Indicate the speed of the road (NOT the speed of the vehicle) on which the crash took place. **Mark one digit per box.**

If the crash took place within an intersection, enter the highest speed limit of the roads involved.

Note: Use the posted speed limit of the freeway for all exit/entrance ramp crashes.

26

Posted

A rectangular form with the text "Posted" at the top and two radio button options below it: "Yes" and "No".

Indicate whether or not the speed limit was posted. **Fill in only one bubble.**

Posted Roadways

Posted speed limits are those speed limits posted through the use of regulatory signs (black numbers on a white background) or on electronic variable message signs.

Posted – Cont.

Do not consider advisory speeds as posted speed limits. Advisory speed limits are the black numbers on yellow background signs posted underneath advance warning signs such as Curve Ahead signs. Advisory speeds should be shown in the Crash Diagram and Remarks, Data Element 75.

Unposted Roadways

Do not estimate a safe speed limit based upon Basic Speed Law and the conditions existing at the time and place of the crash. Refer to Michigan Motor Vehicle Code Section 627, re: prima facie speed limits in (unposted) business, residential and park districts for additional information.

Example: A crash occurs on a rural road. There are no posted speed limit signs and the area is not a business, residential, park, or school zone. The roadway is snow-covered at the time of the crash. Mark 55 and No in this instance.

71

Serial Override Number

Serial Override Number

--	--	--	--	--

Each form is designed to record information pertaining to two units. Each form provides space for two injured passengers or up to four uninjured passengers per unit. If there are more than two units involved in the crash, additional forms shall be used.

The use of an additional form makes it necessary to override the preprinted serial number of the additional form(s) being used. Enter the preprinted serial number of the first form in the Serial Override Number box of all additional forms submitted for a particular crash. This will override the preprinted serial number in the lower left corner of each form.

When using additional pages, certain administrative fields do not need to be repeated. Only the following fields are required for the top portion of additional UD-10 pages: **AGENCY ORI, DEPARTMENT NAME, ORIGINAL INCIDENT NUMBER, CRASH DATE (previously submitted), NUMBER OF UNITS, COUNTY and CITY/TOWNSHIP.**

Do NOT WHITEOUT, CROSS OUT or make any MARKS on the preprinted UD-10 serial number.

Example: A five (5) vehicle crash is being reported:

Units 1 and 2 are reported on Form 1811700. This will become “Page 1 of 3” in the upper right corner of the front page of the report.

Units 3 and 4 are reported on Form 1811701; however, on that form enter 1811700 in the Serial Override Number box. This form is now marked “Page 2 of 3” on the front page of the report.

Unit 5 will be reported on form 1811702; and 1811700 is also entered in the Serial Override Number box of this form. This form becomes “Page 3 of 3.”

All three forms are now considered UD-10 Traffic Crash Form 1811700.

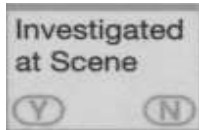

Serial Override Number – Cont.

Example: Two commercial vehicles collide. Since each form provides space to record only one commercial vehicle driver and one commercial vehicle, two UD-10 forms for this crash will need to be used. The preprinted serial number of the first form will be entered in the Serial Override Number block of the second form (and all subsequent forms used to report this crash).

In the upper right hand corner of the UD-10, enter “Page 1 of 2” on the first form, and “Page 2 of 2” on the other form.

76

Investigated at Scene

Investigated
at Scene

(Y) (N)

Mark whether or not the crash was investigated at the scene. **Fill in only one bubble.**

77

Reported Date/Time

Reported Date/Time

Enter the date (month, day, and year) and military time that this crash was reported to the law enforcement agency. This is NOT necessarily the date and time of the crash.

78

Photos By

Photos By

Enter the photographer's initials, name, badge number or other identifying data.

79

Investigator Name(s) and Badge Number(s)

Investigator Name(s) &
Badge # (Print Only)

Please PRINT the name(s) and badge number(s) of the investigating officer(s).

UD-10 Traffic Crash Report Instruction Manual

SECTION 2

Location Elements

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

Location

27

Location

LOCATION	Prefix	Road Name										Divided Roadway (N S E W)				Road Type		Suffix
	Distance	<input type="radio"/> FT	<input type="radio"/> MI	<input type="radio"/> North	<input type="radio"/> South	<input type="radio"/> East	<input type="radio"/> West	<input type="radio"/> Beginning of Ramp	<input type="radio"/> End of Ramp	Trafficway (1 2 3 4)				Access Control (1 2 3)				
	Prefix	Intersecting Road										Divided Roadway (N S E W)				Road Type		Suffix

The location of a crash is defined by the following factors:

- Road Name on which the crash occurred
- Distance and Direction of the point of impact from an Intersecting Road (located within the county of the crash)
- Intersecting Road name

Landmarks, freeway mile markers, private roadways, addresses, or factory gate numbers cannot be used as a reference point to identify the location of a crash. **Mark one digit or letter per box.**

Location for private property crashes can be documented using: 123 Main St., cornfield, Sue's restaurant parking lot, trail 57, etc.

Road Name

From the following bulleted items, choose all that apply with relation to the roadway.

- Prefix (N, S, E, W, NE, NW, SE, SW)
- Primary or intersecting road names
- Road Type (Dr, St, Rd, Ave, etc.)
- Road Suffix (NE, SE, etc.)
- Identifying number(s) – (County Rd 524)
- Traffic directions (if a median exists) of a street or highway (i.e., S (I75), E (I94))

Be sure to use the **local road name** in the jurisdiction in which the crash occurred.

<u>Example</u>	<u>Prefix</u>	<u>Road Name</u>	<u>Written</u>	<u>Road Type</u>	<u>Suffix</u>
Hall Road (M-59)		Hall		Rd	
8255 Saginaw Street		Saginaw		St	
South Beltline Ave NW	S	Beltline		Ave	NW

Divided Roadway

When referencing divided roadways, always mark the direction assigned of the roadway involved. Only fill in one bubble. Following are examples:

Location – Cont.

<u>Divided Roadway</u>	<u>Road Name</u>	<u>Divided Roadway Bubble</u>
North US-41	US-41	N
South N. Telegraph	Prefix = N Road Name = Telegraph	S
West I-94	I-94	W
East 8 Mile	8 Mile	E

Distance

Locate all crashes by measuring along a road from the point where the projected centerlines of the intersecting roadways cross. Document the measurement in feet with whole numbers or in miles with decimal numbers (instead of fractions $\frac{1}{2}=.5$). Refer to Appendix E, Mileage Conversion Chart for a complete list of conversions.

A location AT an intersection is at the exact point where the projected centerlines of the intersecting roadways cross. It is rare that the point of impact from a crash is AT an intersection since it is normally off the center point by feet or inches. However, if it is the case, the letter “X” needs to be placed in the distance section of the location field instead of the word “AT.”

LOCATION	Prefix	Road Name	Divided Roadway (N) (S) (E) (W)	Road Type	Suffix
		HALL		RD	
	Distance	X	<input type="radio"/> FT <input type="radio"/> North <input type="radio"/> East <input type="radio"/> Beginning of Ramp <input type="radio"/> MI <input type="radio"/> South <input type="radio"/> West <input type="radio"/> End of Ramp	Trafficway (1) (2) (3) (4)	Access Control (1) (2) (3)
	Prefix	Intersecting Road	Divided Roadway (N) (S) (E) (W)	Road Type	Suffix
		PLATT		RD	

Measurements should be made from the AT point to the point of impact of the unit(s), staying within county boundaries.

LOCATION	Prefix	Road Name	Divided Roadway (N) (S) (E) (W)	Road Type	Suffi
		W GRAND RIVER		AVE	
	Distance	300	<input checked="" type="radio"/> FT <input type="radio"/> North <input type="radio"/> East <input type="radio"/> Beginning of Ramp <input type="radio"/> MI <input type="radio"/> South <input checked="" type="radio"/> West <input type="radio"/> End of Ramp	Trafficway (1) (2) (3) (4)	Access Control (1) (2) (3)
	Prefix	Intersecting Road	Divided Roadway (N) (S) (E) (W)	Road Type	Suffix
		OAK		ST	

Mark the direction bubbles as needed. If, however, the roadway runs northeast, southwest, etc., then mark the two bubbles to show the road direction, i.e., NE, SW.

The sign on each ramp can be considered the street name assigned to that stretch of roadway and therefore follows the normal rules for any other street in the total system. There are two exceptions when using ramp signs in the crash location portion of the UD-10.

Location – Cont.

Distance – Cont.

1. A ramp is considered starting (Figure 1) and/or ending (Figure 2) at a right angle to the gore (area of land where two roadways diverge or converge). See Section 9 for the definition of gore.

When the ramp intersects a crossroad, the imaginary centerlines shall be used (Figure 3).

Figure 1

Figure 2

Figure 3

2. The intersecting street used for a ramp must be either the street at the beginning or the street at the end of the ramp, whichever street the distance given is measured from.

Prefix	Road Name	Divided Roadway	Road Type	Suffix
	RAMP 202D	() () () ()		
Distance	200	● FT	○ North	○ East
		○ MI	○ South	○ West
			● Beginning of Ramp	○ End of Ramp
Prefix	Intersecting Road	Divided Roadway	Road Type	Suffix
	I 96	() () () ()		

Directions for Railroad Crossings

Most railroad crossings have a National Inventory (NI) number. This NI number is usually attached to the railroad crossing signal support or the crossbuck sign support at the grade crossing. When locating crashes at or near a railroad crossing, the NI number can be used as a reference point just as a street name could. The NI number has a maximum of six numbers followed by a letter and is displayed at the crossing in this format 233-106-P. When using the NI number to reference a traffic crash, record it as the intersecting street with the following format RR233106P.

Trafficway

Select the trafficway that best describes the area of the crash. An example would be a divided highway or roadway. Although the traffic is one-way traffic, it is better described as a divided highway since the divided highway already implies the roadway is one-way traffic.

Trafficway is a code indicating whether or not a roadway is divided and whether it serves one-way or two-way traffic. This is used in classifying crashes as well as identifying the environment of a particular crash. This information is important to guide future trafficway design and traffic control. **Fill in only one bubble.**

Indicate the degree of trafficway division at the site of the crash.

- 1 Not physically divided (two-way trafficway)
- 2 Divided highway, median strip, without traffic barrier (roundabouts)
- 3 Divided highway, median strip, with traffic barrier
- 4 One-way trafficway

A traffic barrier is a device that provides a physical limitation through which a motor vehicle would not normally pass and is designed to contain or redirect an errant motor vehicle (i.e., guardrails, cement barrier, etc.).

Access Control

Access Control is the degree that access to abutting land, light, air, or view in connection with a roadway is fully or partially controlled by public authority. This information is highly correlated with crash rates and is important to guide future highway design and traffic control. **Fill in only one bubble.**

Indicate the degree that public authority controls access to an adjoining roadway.

1. No access control (unlimited access)
2. Full access control (ramp entry & exit only)
3. Other (partial access control), (i.e., roundabouts, Michigan left turns)

Note: Access is controlled by roadway configuration, not traffic control devices, i.e., No Left Turn sign, etc.

UD-10 Traffic Crash Report Instruction Manual

SECTION 3

Unit Elements

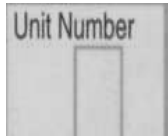

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

Units

30

Unit Number

Every unit involved in a crash must be given a unit number. Each of these units will be described as either a **Motor Vehicle** (including a parked vehicle), **Bicycle**, **Pedestrian** or **Engineer** (train) as outlined in Unit Type, Data Element 31. **Mark only one digit per box.**

An animal (horse, deer, cow, etc.) is **NOT** a traffic unit.

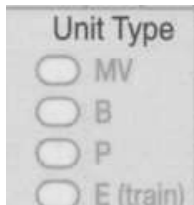

Note: A non-contact unit that may have caused the crash is not listed as a unit and the driver information can only be entered in the Crash Diagram and Remarks Section.

If a horseback rider is involved in a crash, the rider will be entered as a pedestrian unit; the horse will not be considered a unit. If a horse and buggy are involved in a crash, they will not be entered as a unit; each human occupant of the buggy will be listed as a separate pedestrian unit.

Note: The vehicle designated as Unit 1 must be on the first page of any UD-10 submitted whether it is determined to be "at fault" or not. Remember this does not apply when submitting a Corrected Copy. See Special Checks, Data Element 17.

31

Unit Type

For each unit involved in the crash, one Unit Type must be selected:

- MV** Motor vehicle (any motorized unit designed to be operated on land)
- P** Pedestrian
- B** Bicycle
- E** Engineer (railroad/train)

Fill in only one bubble.

Unit Type – Cont.

The following examples are intended to assist in selecting the correct unit type.

(MV) Motor Vehicle

- “Standard” motor vehicle – cars, pickups, vans, buses, trucks, motorcycles, etc.
- Emergency vehicles – police, fire, ambulance
- Farm equipment – farm tractors, combines, etc.
- Off Road Vehicles (ORV's)
- Snowmobiles
- Mopeds
- All-Terrain Vehicles (ATV's)
- Dirt bikes, motorbikes, go-carts
- Garden Tractor
- Motorized wheel chair
- Cushman scooters
- Road maintenance equipment – dump trucks, snowplow, road graders
- Construction Equipment – rollers, front-end loaders, scrapers, mobile cranes, etc.

(P) Pedestrian

- Person on foot, person on skis, skates or rollerblades, rider of a horse, horse and buggy (each occupant, including driver will be listed as a separate pedestrian unit)
- Non-motorized wheelchair

(B) Bicycle

- All forms of pedalcycles, including those with one, two and three wheels
- Multiple persons on a bicycle must be listed as a separate bicycle (B) unit.
- Tag alongs and affixed bicycle cart occupants are considered separate bicycle units.

Note: Two people riding one bicycle struck by a motor vehicle will be listed as a three (3) unit crash.

(E) Engineer (Train)

- Engineer (railroad/train)

Driver (If Known)

State	Driver License Number	Date of Birth
		MM DD YYYY
Name		
Street Address		
City	State	Zip
Phone Number		

The person behind the wheel in physical control of the vehicle, or unit providing the power, is considered the driver. A person seated behind the steering wheel of a towed vehicle is not a driver because he is not in control of the power unit. They would be considered a passenger in a trailing unit, see Passenger, Data Element 59. The vehicle would be a Towed Auto (5), see Private Trailer Type, Data Element 56.

Do not list driver information for an UNOCCUPIED parked vehicle.

Note: If there is not a driver of the vehicle, leave the section blank. Do not write hit and run, unknown, parked, etc., in this field.

State

Enter the state in which the driver license was issued.

INTERNATIONAL

International	XX
---------------	----

Driver License Number

Enter the driver license number of the driver; if no OPS available, leave blank and make notation in the Remarks section. If the driver license number is longer than spaces provided, enter as much as space allows and write full license number in the Crash Diagram and Remarks section (i.e., Canadian, New Jersey, Wisconsin, etc.). **Do not list a Driver License Number for a Bicyclist, Pedestrian, or Engineer/Train.**

Do not list driver information for an unoccupied-parked vehicle.

Name

Enter first name, middle name or initial, last name of a driver, bicyclist, pedestrian or train engineer.

Address

Enter the complete street, city/township, state and zip code of the person/driver. If the zip code is the extended nine-digit code, enter all nine digits.

Driver – Cont.

Phone Number

Enter the area code and phone number where the person/driver is most likely to be contacted.

Date of Birth

Enter the person/driver date of birth: MM/DD/CCYY. There must be a total of eight digits.

License Type and Endorsements

License Type

(mark only one)

O – Operators

C – Chauffeurs

M – Moped

Endorsements

(choose all that apply)

CY – Cycle

F – Farm

R – Recreational Double

Note: If a driver does not have a valid license (i.e., suspended, revoked, etc.), leave this area blank and indicate what the driving status is in the Crash Diagram and Remarks section.

See examples of various driver licenses in back of manual.

Sex

Mark the person/driver gender, M or F.

33

Driver Condition

Select the condition of the driver that may have contributed to the crash. This is important for evaluating the effect that driver fatigue, medications, alcohol, drugs, or other conditions have on the crash. **Fill in at least one bubble.**

Indicate the apparent condition of the driver at the time of the crash. Medical tests or documentation are not required to indicate a condition. More than one bubble may be marked, except if:

1 – Appeared Normal is selected, no other selections can be made.

99 – Unknown is selected, no other selections can be made.

- | | | | |
|---|-------------------|----|----------------------|
| 1 | Appeared normal | 6 | Asleep |
| 2 | Had been drinking | 7 | Medication |
| 3 | Illegal drug use | 8 | Distracted |
| 4 | Sick | 9 | Using cellular phone |
| 5 | Fatigue | 99 | Unknown |

Alcohol/Drug Evaluation & Ignition Interlock

Interlock	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Refused	<input type="radio"/> Not offered	(Submit Results To FARS When Available)		
Alcohol	<input type="radio"/> Yes <input type="radio"/> No	Test Type	<input type="radio"/> Field <input type="radio"/> PBT <input type="radio"/> Breath <input type="radio"/> Blood <input type="radio"/> Urine	Test Results		
Drugs	<input type="radio"/> Yes <input type="radio"/> No	Test Type	<input type="radio"/> Blood <input type="radio"/> Urine	Test Results		

Alcohol

Indicate whether, in the officer’s opinion, drinking had been involved. Next, indicate the type of test, if any, that was administered. If a test was given, enter the test results on the blank line. If drinking was involved, but no test was given, indicate whether the test was Refused by the subject or Not Offered by the officer. If no alcohol was suspected, still indicate ‘not offered.’

The Field entry refers to the administration of any field sobriety tests (also known as psycho-physical tests). If any type of balance test, “finger-to-nose,” or similar type of field sobriety test(s) were conducted, mark **Field**. Otherwise leave that entry blank.

If multiple chemical tests were administered and results obtained, record the test results. Multiple bubbles may be marked. Other tests and results may be described in the Crash Diagram and Remarks, Data Element 75.

NOTE: A blood test is required by law for all deceased drivers or deceased railroad engineers involved in a traffic crash. Do not delay submission of a UD-10 report while awaiting the results of this test. As soon as these test results become available, call the Fatality Analysis Reporting System (FARS) at (517) 322-6910 or (517) 322-5030.

*The FARS Unit requests that information on the blood alcohol/drug test results of **all persons** involved in fatal crashes be submitted if available (including surviving drivers, passengers, pedestrians, and bicyclists).*

DRUGS

Interlock	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Refused	<input type="radio"/> Not offered	(Submit Results To FARS When Available)		
Alcohol	<input type="radio"/> Yes <input type="radio"/> No	Test Type	<input type="radio"/> Field <input type="radio"/> PBT <input type="radio"/> Breath <input type="radio"/> Blood <input type="radio"/> Urine	Test Results	(BAC)	
Drugs	<input type="radio"/> Yes <input type="radio"/> No	Test Type	<input type="radio"/> Blood <input type="radio"/> Urine	Test Results	(3 digit code from Appendix D*)	

Indicate whether, in the officer’s opinion, drugs had been involved. Next, indicate the type of test, if any, that was administered. If a test was given, enter the test results on the blank line. More than one bubble may be marked for Test Type.

***Enter the 3 digit code(s) from Appendix D for drug test result(s).**

Alcohol/Drug Evaluation & Ignition Interlock – Cont.

IGNITION INTERLOCK

Interlock	<input type="radio"/> Yes <input type="radio"/> No	<input type="radio"/> Refused	<input type="radio"/> Not offered	(Submit Results To FARS When Available)
Alcohol	<input type="radio"/> Yes <input type="radio"/> No	Test Type	<input type="radio"/> Field <input type="radio"/> PBT <input type="radio"/> Breath <input type="radio"/> Blood <input type="radio"/> Urine	Test Results (BAC)
Drugs	<input type="radio"/> Yes <input type="radio"/> No	Test Type	<input type="radio"/> Blood <input type="radio"/> Urine	Test Results (3 digit code from Appendix D*)

Indicate whether an Ignition Interlock device is installed in a vehicle involved in the crash in accordance with **Michigan Motor Vehicle Code, Sec. 257.622a, effective October 1, 1999**. See pictures below for examples of an Ignition Interlock system.

Note: Ignition Interlock device means an alcohol concentration measuring device that prevents a motor vehicle from being started at any time without first determining, through a deep lung sample, the operators breath alcohol level. Michigan Vehicle Code, Sec. 257.625L (6)

35

Injury

Injury
<input type="radio"/> K
<input type="radio"/> A
<input type="radio"/> B
<input type="radio"/> C
<input type="radio"/> O

Note: Any injured person(s) involved in the crash must be recorded in the Unit/Passenger section.

INJURY SEVERITY CLASSIFICATION

FATAL INJURY is any injury that results in death due to a motor vehicle traffic crash. Also be sure to mark Fatal under Special Checks, Data Element 17. **Fill in only one bubble.**

A INCAPACITATING INJURY is any injury, other than fatal, that prevents the injured person from walking, driving, or normally continuing the activities which he or she was capable of performing prior to the motor vehicle traffic crash.

Includes: Severe lacerations, broken or distorted limbs, skull fracture, crushed chest, internal injuries, unconscious when taken from the crash scene, unable to leave crash scene without assistance.

Injury – Cont.

Excludes: Momentary unconsciousness.

General: Determinations are made at the time the injured person leaves the crash scene. It is not necessary to consult with doctors or hospitals unless information is not otherwise available. Apparent condition immediately after the crash does not govern classification because the person may recover from hysteria quickly or may begin to feel the effects of internal or other injuries between the time of the crash and time of leaving the scene.

- a. Medical treatment at the crash scene or later makes no difference. What the person does at the scene is important.
- b. Hospitalization normally will be required for incapacitating injuries.
- c. Duration of the disability after injury makes no difference. Incapacitation is important.
- d. Developments after leaving the scene make no difference except in case of death.

B NON-INCAPACITATING EVIDENT INJURY is any injury that is evident at the scene of the crash, other than fatal and incapacitating injuries.

Includes: Lump on head, abrasion, and minor lacerations.

Excludes: Limping (the injury cannot be seen).

Example: Pedestrian is unconscious on the ground after a crash; his clothes are torn and blood oozes from abrasions. When the ambulance arrives he is conscious, able to give information, and walks around. He goes to the hospital in the ambulance, but is able to sit up in it; there is no evidence that he is incapacitated.

C POSSIBLE INJURY is any injury reported or claimed which is not a fatal, incapacitating, or non-incapacitating evident injury.

Includes: Momentary unconsciousness. Claim of injuries not evident. Limping, complaint of pain, nausea, hysteria.

General: Possible injuries are those which are claimed or reported, or indicated by behavior, but not by wounds.

Example: Occupant complains of pain but shows no signs of bleeding or other wound; leaves the scene in a taxi to keep an appointment; he dies; this is possible injury when classified at the time of leaving the scene, but should be changed to K upon notice of death.

O NO INJURY is a situation where there is no reason to believe that the person received any bodily harm from the motor vehicle traffic crash.

Note: Uninjured passengers are not required to be listed in the injury section with the exception of a fatality occurring within the crash at which point all involved parties must be listed.

Source: National Safety Council Manual on Classification of Motor Vehicle Traffic Accidents

Position

List the driver's position in the box marked Position. The driver position is usually "01," which is the left-side front seat. **Mark only one digit per box.**

If this unit is a Bicyclist, Pedestrian or Engineer, enter the corresponding code **B**, **P** or **E** in the right box.

A parked car without a driver/occupant does not have a position code.

For all vehicles with in-line seating, such as motorcycles and snowmobiles, the driver is also in position "01."

- | | | |
|--------------------------------------|---|--|
| 01 Driver | 07 3 rd Row-Left | 12 Other Unenclosed passenger or cargo area |
| 02 Front-Middle | 08 3 rd Row-Middle | 13 Riding in/on training unit |
| 03 Front-Right | 09 3 rd Row-Right | 14 Riding on vehicle exterior |
| 04 2 nd Row-Left | 10 Sleeper Section | 15 Unknown |
| 05 2 nd Row-Middle | 11 Other Enclosed Passenger area or cargo area (sidecar) | |
| 06 2 nd Row-Right | | |
| B Bicycle | P Pedestrian | E Engineer (train) |

Motorcycles/In-line Seating

- 01 Motorcycle Driver
- 04 Motorcycle Passenger-One
- 07 Motorcycle Passenger-Two
- 12 Other Unenclosed passenger or cargo area (sidecar)

Restraint

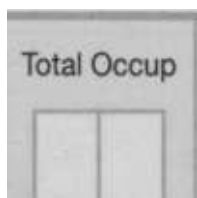

List the **type of restraint** used by the driver, or if appropriate, whether a **helmet** was worn. Helmet restraint use is not based off the requirement to wear a helmet, but whether or not one was worn. Refrain from using 09-Restraint use unknown, unless you truly do not know if a restraint was used (i.e., vehicle burned so badly it cannot be determined). **Mark only one digit per box.**

Restraint – Cont.

<u>Restraint</u>		<u>Helmet</u>	
01	No belts available	10	Helmet worn
02	Shoulder belt only used	11	Helmet not worn
03	Lap belt only	12	Helmet use unknown
04	Shoulder and lap belt used		
05	No belts used		
06	Child restraint used		
07	Child restraint not used, not available or improper		
08	Restraint failure		
09	Restraint use unknown		
06	Child restraint used		

38

Total Occupants

A rectangular form with the text "Total Occup" at the top. Below the text are two empty rectangular boxes for entering digits.

List the total occupants of the vehicle by marking one digit per box using one digit per box. (e.g., 01-11)

If the number of occupants is unknown, leave blank.

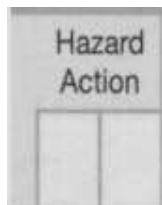

If unit is a pedestrian, mark 00.

If unit is a bicyclist, mark 01.

Each person on a bike is considered a separate unit. (e.g., child riding on pegs in back)

39

Hazardous Action

A rectangular form with the text "Hazard Action" at the top. Below the text are two empty rectangular boxes for entering digits.

Hazardous action coding reflects whether, in the investigating officer's opinion, a person is "at fault" in any way; i.e., did the person's action(s) contribute to the crash? A coded entry shall be made regardless of whether a citation was issued or a physical arrest was made. **Mark only one digit per box.**

Hazardous Action – Cont.

Choose the most significant hazardous action that applies. If no hazardous action, use code 00-None.

00	None	09	Improper turn
01	Speed too fast	10	Improper/no signal
02	Speed too slow	11	Improper backing
03	Failed to yield	12	Unable to stop in assured clear distance
04	Disregard traffic control	13	Other
05	Drove wrong way	14	Unknown
06	Drove left of center	15	Reckless driving
07	Improper passing	16	Careless/negligent driving
08	Improper lane use		

40

Ambulance/Hospital

Hospital
Ambulance

Enter the hospital code of the hospital where the individual was taken for treatment, see Appendix A. Other valid entries are listed below:

<u>Code</u>	<u>Hospital Name</u>
HOSPT	Generic Hospital Code
MORGUE	Morgue (Generic for any area)
NONE	None
OUTSTE	Out of State Hospital (Generic for any Out of State Hospital)
REFUSD	Refused Medical Treatment

Enter the ambulance code of the ambulance company that was notified, see Appendix B. Other valid entries are listed below:

<u>Code</u>	<u>Ambulance Name</u>
AIRLFT	Airlift Flight Service (Generic for any area)
AMB	Generic Ambulance Service
NONE	None
OUTSTE	Out of State Ambulance (Generic for any Out of State Ambulance)
REFUSD	Refused Medical Attention

See Appendix A & B for a list of hospital and ambulance codes. If the name is not found in the appendix, then enter name of the hospital or ambulance in the appropriate box and contact CJIC staff to have the code added to the appendices.

41

Ejected/Trapped

Ejected	<input type="radio"/>	Yes
Trapped	<input type="radio"/>	Yes

If the driver was ejected or partially ejected from the vehicle, fill in Yes.

If the driver was trapped as a result of the crash and mechanical means were needed to extricate the driver, mark Yes.

It may be appropriate to mark ejected and trapped, e.g., a driver whose body is found hanging outside the driver door but whose feet are pinned in to the point where mechanical means must be used to free them.

42

Airbag Deployed

Airbag	<input type="radio"/>	Yes	<input type="radio"/>	Not Equipped
Deployed	<input type="radio"/>	No		

Mark the appropriate bubble from the choices given. For vehicles with airbags installed, list Yes or No based on the visual observation of each occupant at the scene. For older model vehicles without airbags installed fill in the Not Equipped bubble. **Fill in only one bubble.**

Note: For positions 2, 5 or 8, select not equipped.

43

Citation Issued

Citation Issued	
Hazardous	<input type="radio"/>
Other	<input type="radio"/>

If a citation was issued, indicate whether the offense was Hazardous, Other or both. In the space provided record the offense code(s) using the Violation Code number and write in the actual violation.

44

Vehicle Registration

Vehicle Registration										State	

Enter the vehicle registration number and the two-letter abbreviation for the State where the vehicle is registered. If the registration is improper or none is displayed at the time of the crash, locate the actual registered license plate information and enter this on the UD-10. Record the improper plate or that no plate is displayed in the remarks section. **Mark one digit per box and make sure to print the registration number clearly.**

United States – State abbreviation, (i.e., MI) – see State Abbreviations

Canada – Province abbreviation, (i.e., ON) – see Canadian Territories

U. S. Government or International, enter XX

49

Location of Greatest Damage

Mark the bubble that identifies the **location of the most severe damage** to the power unit. If more than one area sustains equal damage, choose number 10 - Multiple. **Fill in only one bubble.**

- | | | | |
|---|---------------|----|---------------|
| 0 | Rollover | 7 | Side, Left |
| 1 | Front, Center | 8 | Front, Left |
| 2 | Front, Right | 9 | Undercarriage |
| 3 | Side, Right | 10 | Multiple |
| 4 | Rear, Right | 11 | Other/Unknown |
| 5 | Rear, Center | 12 | None |
| 6 | Rear, Left | | |

Example: Vehicle 2 is rear-ended by Vehicle 1, pushing 2 into the back of Vehicle 3. If the damage to the front and rear of Vehicle 2 is equal or near equal, mark 10 for multiple damage.

Example: A car leaves a roadway, enters a ditch, and strikes the far slope and overturns. The right front corner has minor damage from contacting the far slope, but the entire roof is crushed in the rollover. Mark 0 to record the roof damage as the area of greatest damage.

Note: In combination vehicles, if a towed or trailering unit is the only item damaged, then the location of greatest damage is "12" (none).

50

First Impact

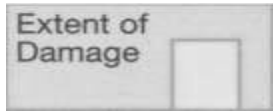

Indicate the **location of the first** point of impact, using the same coding choices used in the Location of Greatest Damage. **Mark only one digit per box.**

- | | | | |
|---|---------------|----|---------------|
| 0 | Rollover | 7 | Side, Left |
| 1 | Front, Center | 8 | Front, Left |
| 2 | Front, Right | 9 | Undercarriage |
| 3 | Side, Right | 10 | Multiple |
| 4 | Rear, Right | 11 | Other/Unknown |
| 5 | Rear, Center | 12 | None |
| 6 | Rear, Left | | |

Note: In combination vehicles, if a towed or trailering unit is the only item damaged, then the location of greatest damage is "12" (none).

Extent of Vehicle Damage

 A rectangular form field with the text "Extent of Damage" and a small square box to its right.

The purpose of this section is to describe the degree of damage to a vehicle in a crash. Mark the number that indicates the severity on a scale from 0 to 7, with 0 used to indicate no damage and 7 used to indicate a vehicle that is damaged to the point where it clearly cannot be repaired.

SLIGHT

0

1

2

MODERATE

3

4

5

HEAVY

6

7

The State of Michigan does not require an estimate of the monetary value of damage. If an estimate is given, that information may be entered in the Crash Diagram and Remarks, Data Element 75.

The extent of vehicle damage coding can be subjective. Attempt to indicate how much functional damage the vehicle sustained in this crash. Disregard any vehicle damage sustained from a previous crash.

Note: In combination vehicles, if a towed or trailering unit is the only item damaged, then the extent of damage must be zero.

Driveable

 A rectangular form field with the text "Driveable" and two radio buttons labeled "Yes" and "No".

Mark Yes or No as to whether the vehicle is capable of being driven from the scene. If the vehicle is towed due to an incapacitated driver or other disabling mechanical problem **not** caused by the crash, mark Yes. **Fill in only one bubble.**

Though damaged, if a vehicle could be driven from the scene without the need for special tools or parts, it would still be considered driveable. If simply changing a flat tire or prying a piece of damaged fender away from a tire so it can rotate would enable the vehicle to be driven away, then the vehicle shall be considered driveable.

Example: A driver is involved in a minor property damage crash. No damage prevents the car from being driven, but the driver states he is too shook up to drive. The vehicle is towed. Mark Yes in this instance.

Vehicle Type

Vehicle Type		
<input type="radio"/> PA	<input type="radio"/> CY	<input type="radio"/> OR
<input type="radio"/> VA	<input type="radio"/> MO	<input type="radio"/> Other
<input type="radio"/> PU	<input type="radio"/> GC	<input type="radio"/> Truck/Bus
<input type="radio"/> ST	<input type="radio"/> SM	(Complete Truck/Bus Section)

Use the following Department of State two letter code to identify the type of vehicle being reported. **Fill in only one bubble.**

VEHICLE TYPES

PA	Passenger car, SUV and station wagon
VA	Van, motor home
PU	Pickup truck
ST	Small truck (under 10,000 lbs.)
CY	Cycle
MO	Moped/Goped
GC	Go-cart
SM	Snowmobile
OR	Off road vehicle (ATV type)
Other	Non-registered farm equipment, combine, front end loader, motorized scooter, golf cart, or segway
Truck/Bus	Complete the Truck/Bus Section

If it is determined the vehicle is a truck or bus, mark Truck/Bus and complete the Truck/Bus section on the reverse side of the UD-10.

NOTE: For a vehicle not listed in this section, such as a snow plow, farm tractor or a road grader, list the vehicle as Other.

If this is a commercial vehicle, the Truck/Bus bubble must be marked. If not, the CDL information on the reverse side of the UD-10 will not be collected for the vehicle.

Vehicle Direction

Vehicle Direction	
<input type="radio"/>	North
<input type="radio"/>	South
<input type="radio"/>	East
<input type="radio"/>	West

Complete the bubble(s) that identifies the direction the unit was traveling **prior to** the crash, loss of control or turning movement. (i.e., N for north, N and E for northeast). **More than one bubble may be selected.**

Example: Unit 1 is traveling northbound and turns left in front of, and is struck by, Unit 2 which is traveling southbound. This should be coded as a Head On-Left Turn crash showing the direction of Unit 1 as North and the direction of Unit 2 as South.

Special Vehicles

Indicate whether the vehicle involved in the crash was one of the special vehicle types listed below. If this vehicle is not one of these types, leave blank. **Fill in only one bubble.**

- | | |
|--------------------------------------|------------------------------------|
| 1. Police vehicle | 4. Ambulance |
| 2. Fire vehicle | 5. Farm equipment (non-registered) |
| 3. Bus (commercial, private, school) | 6. Construction equipment |

Police Vehicle: Mark **1 – Police Vehicle** if the vehicle is owned by a governmental law enforcement agency. Mark **1 – Police Vehicle** in all cases whether the vehicle is being used routinely (e.g., patrol), in pursuit of a fleeing vehicle, or responding to an emergency call.

Fire Vehicle: Mark **2 – Fire Vehicle** only when the vehicle is owned by a fire department (including volunteer fire department).

Example: A volunteer fire fighter was involved in a crash while responding to a fire call. He/she was using his/her personal vehicle, including emergency lights and siren. Leave the Special Vehicle section blank. The vehicle is not considered a fire vehicle since it is not a fire department-owned vehicle.

Example: A city or township owned fire truck was involved in a traffic crash. Mark **2 – Fire Vehicle**.

Bus: Mark **3 – Bus** if the vehicle is a commercial, private, or church bus. See Section 9 for definitions of bus and school bus.

Example: An old commercial bus converted to a motor home was involved in a traffic crash. Leave 3 blank in this instance because the vehicle no longer meets the definition of a bus, it is a motor home.

Ambulance: Mark **4 – Ambulance** whenever the vehicle is a privately or publicly owned ambulance.

Farm Equipment: Mark **5 – Farm Equipment** if the vehicle is an implement of husbandry that cannot be registered with the Michigan Department of State, (i.e., farm tractors and combines). Farm owned pickup trucks and truck-tractor/semi-trailer combination vehicles can be registered, therefore, are not farm equipment.

Construction Equipment: Mark **6 – Construction Equipment** when the vehicle involved in the crash is a type of construction equipment or road maintenance equipment that would fit the definition of Special Mobile Equipment as defined by Section 257.62 of the Motor Vehicle Code.

Private Trailer Type

Private Trailer Type

① ② ③ ④ ⑤ ⑥ ⑦

Only personal utility trailers would be listed in this section. It is the design of the trailer rather than its use that is being sought here. For example, if a commercial truck-tractor with a flatbed semi-trailer is being used in farm operations, it will not be listed in this section. It will be listed in the Truck/Bus section. If the trailer is designed specifically for farm use, such as a hay wagon, then it will be listed in this section. If two trailers listed below make up a recreational double, list only the recreational double. **Fill in only one bubble.**

- | | |
|-------------------|------------------------|
| 1. Utility | 5. Towed Auto |
| 2. Travel Trailer | 6. Recreational Double |
| 3. Boat Trailer | 7. Other |
| 4. Farm Equipment | |

Example: A pickup truck involved in a crash was pulling a fifth-wheel travel trailer and a boat trailer. This combination would be a recreational double, thus **6 – Recreational Double** shall be used.

Example: A car towing another car is involved in a crash. The towed car is struck from the rear. Mark **5 – Towed Auto**.

Example: A pickup truck pulling a farm-type flatbed trailer is involved in a crash. Mark **4 – Farm equipment** in this instance. If the farmer loaned the trailer for use in a parade, it would still be a 4 because the **design of the trailer is the key factor, not the use** at the time of the crash. A utility trailer used for commercial use and causes the GCWR of the power unit and trailer to surpass the 10,001 weight limit it will need to be coded as a truck/bus.

Vehicle Defect

Vehicle Defect

① ② ③ ④ ⑤ ⑥

If the investigating officer finds a vehicle defect that may have contributed to the crash, mark the appropriate choice to note the most significant defect. Other defects may be noted in the Crash Diagram and Remarks, Data Element 75. If no defect is detected then leave blank. **Fill only one bubble.**

Note: Select only one of the following:

1. Brakes
2. Lights/reflectors
3. Steering
4. Tires/wheels
5. Windows
6. Other

Vehicle Use	①	②	③	④	⑤	⑥	⑦	⑧	⑨	⑩	⑪
-------------	---	---	---	---	---	---	---	---	---	---	---

Select the option that best identifies the Vehicle Use (operation) at the time of the crash. **Fill in only one bubble.**

1. Private
2. Commercial (business)
3. In Pursuit/On Emergency (police, fire, including volunteer firemen in personal vehicle, ambulance during an emergency run)
4. Farm
5. School/Education
6. Club/Church (any vehicle displaying a Y registration plate being used for that function)
7. Military
8. Other Government (government owned, federal, state or local, police and fire vehicles when not in pursuit/on emergency)
9. Utility (gas, electric, cable television company, etc.)
10. Road Construction/Road Maintenance
11. Other

Example: A driver is using a personal vehicle to deliver items (e.g., pizza, mail, newspapers, etc.) and is involved in a crash. Mark **2 – Commercial (Business)** because the driver was engaged in a commercial/business function at the time.

Example: A commercial truck is involved in a crash, mark **2 – Commercial (Business)**. If it is learned that the truck was borrowed or rented for purposes of moving personal goods, the correct use code would be **1-Private**.

Example: A volunteer fireman driving his personal vehicle (with lights and siren on) to a fire will be listed as **3 – In Pursuit/On Emergency**. This vehicle would not be listed as 8-Other Government Use.

Example: A patrol car involved in a crash while pursuing another vehicle would be a **3 – In/Pursuit/On Emergency**. A crash while in a non-pursuit or non-emergency response mode would be an **8 – Other Government Use**.

Note: This crash will appear on the UNEDITED version (LEIN 47:42 inquiry) of the police officer's driving record. The EDITED version (LEIN 47:36 inquiry) is sent to the insurance companies. Michigan law prohibits the release of such information to non-government agencies. This law applies only to vehicles OWNED by a government agency. So, for example, a volunteer firefighter driving their own vehicle does not qualify for this provision.

Action Prior	

Action Prior records what occurred immediately prior to the crash. **Mark only one digit per box.**

Choose the **ONE** option that best describes the action of this unit just prior to the first harmful event.

Driver Action

- | | | | |
|----|--|----|-------------------------------|
| 01 | Going straight ahead | 14 | Entering roadway |
| 02 | Turning left | 15 | Leaving roadway |
| 03 | Turning right | 16 | Making U-turn |
| 04 | Stopped on roadway | 17 | Overtaking or passing |
| 05 | Involved in prior crash at same location | 18 | Avoiding object |
| 06 | Changing lanes | 19 | Avoiding pedestrian |
| 07 | Backing | 20 | Avoiding vehicle (front/back) |
| 08 | Slowing/stopping on roadway | 21 | Avoiding vehicle (angle) |
| 09 | Slowing/stopping other area | 22 | Driverless moving |
| 10 | Starting up on roadway | 23 | Parked |
| 11 | Starting up other area | 35 | Other |
| 12 | Entering parking | 36 | Unknown |
| 13 | Leaving parking | 37 | Avoiding animal |

Pedestrian Action

- | | | | |
|----|------------------------------|----|--------------------------|
| 24 | Crossing at intersection | 31 | Other working in roadway |
| 25 | Crossing not at intersection | 32 | Playing in roadway |
| 26 | Getting on/off vehicle | 33 | In roadway other reason |
| 27 | In roadway with traffic | 34 | Not in roadway |
| 28 | In roadway against traffic | 35 | Other |
| 29 | Standing/lying in roadway | 36 | Unknown |
| 30 | Pushing/working on vehicle | | |

Example: If Unit 1 was engaged in making a left turn just prior to impact occurring, thus option **02 – Turning Left** is marked. Unit 2 was being driven straight ahead at impact, therefore, option **01 – Going Straight Ahead** is marked.

Sequence of Events – Cont.

Sequence of Events			
First	Second	Third	Fourth

Sequence of Events records step-by-step what happened during the crash. Up to four Sequence of Events may be recorded. The codes in Action Prior and Sequence of Events should reveal, from left to right the events immediately prior to and during the crash. Complete a separate Action Prior and Sequence of Events box for each unit (Motor Vehicle, Bicyclist, Pedestrian, and Engineer). **You can select up to four events, however mark only one digit per box.**

Begin by completing the Action Prior box. What was the driver doing immediately before impact? Action Prior sets the stage for the initial impact. Next, record the initial impact action (a non-collision event may also be selected, if applicable) in the First Event box. Use the Second Event box to record what happened next, up to four events.

If more than four occurred, only record those that were most significant in the officer's opinion based on: any/all injuries first, any/all property damage second, then actions leading up to, during or after those events. The sequence of events must still be in order of which they occurred. Events listing:

Non-Collision

- | | |
|----------------------------|---------------------------------|
| 01 Loss of control | 08 Fire/explosion |
| 02 Cross centerline/median | 09 Immersion |
| 03 Ran off road-left | 10 Jackknife |
| 04 Ran off road-right | 11 Downhill runaway |
| 05 Re-enter roadway | 12 Cargo loss/shift |
| 06 Overturn | 13 Individual fell from vehicle |
| 07 Separation of units | 14 Other non-collision |

Note: 07 – Separation of Unit refers to a power unit and trailer/towed vehicle separating (not when two (2) vehicles collide and separate from each other). 13 – Individual fell from vehicle is not when someone is ejected from the vehicle.

Collision With Non-Fixed Objects

- | | |
|--------------------------------|----------------------------|
| 15 Pedestrian | 19 Railroad train/engineer |
| 16 Pedalcycle | 20 Animal |
| 17 Motor vehicle in transport* | 21 Other non-fixed object |
| 18 Parked motor vehicle** | |

Sequence of Events – Cont.

Collision With Fixed Objects

22 Bridge/pier/abutment	34 Curb
23 Bridge parapet end	35 Ditch
24 Bridge rail	36 Embankment
25 Guardrail face	37 Fence
26 Guardrail end	38 Mailbox
27 Median barrier	39 Tree
28 Highway traffic sign post	40 Rail crossing signal
29 Highway signal post	41 Building
30 Luminary/light support	42 Traffic island
31 Utility pole	43 Fire hydrant
32 Other pole	44 Impact attenuator (crash cushion)
33 Culvert	45 Other fixed object

*In transport means a motor vehicle in motion, or on a roadway illegally parked.

**Motor vehicle parked legally.

74

Most Harmful

Most Harmful	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
--------------	-----------------------	-----------------------	-----------------------	-----------------------

Most Harmful records which event, in the officer's opinion, was most harmful to a human being. Mark the M bubble under this event. **Mark only one.** If no injury, mark the event that caused the most property damage.

Example: A driver tried to avoid an object in the road, Action Prior would be **18 – Avoiding Object.**

The car hit the curb, rolled over and then caught fire. The Sequence of Events would be completed as follows:

First **34 – Curb**
Second **06 – Overturn**
Third **08 – Fire/explosion**

The third event was the most harmful to a human being so the M bubble would be filled in under this event.

Note: There are several sequence of events that cannot be listed as most harmful because they did not cause an injury or damage. An example would be 01 – loss of control.

UD-10 Traffic Crash Report Instruction Manual

SECTION 4

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

Involved Parties

59

Passenger

First Name		Date of Birth	MMDDYYYY	Sex	<input type="radio"/> M <input type="radio"/> F
Middle		Street Address			
Last		City			
		State	Zip	Phone Number	

There are blocks for two injured or uninjured passengers per vehicle. If more passenger blocks are needed for injured passengers, they must be placed in a passenger section on a second UD-10 form. If there are additional uninjured passengers, see Uninjured Passenger, Data Element 66.

Note: If a single unit crash involves more than two (2) injured or uninjured passengers, list the additional passengers on the back side of the form. Remember to mark the Unit Number as 1.

Name

Enter first name, middle name or initial and last name.

Address

Enter the complete address, city, state, and zip code of the passenger. If the zip code is the extended nine-digit code, enter all nine digits.

Phone Number

Enter the phone number, including area code, where the passenger is most likely to be contacted.

Date of Birth

Enter the passenger's date of birth: MM/DD/CCYY. There must be a total of eight digits.

Sex

Mark passengers sex, M or F.

60

Injury (See Data Element 35)

Injury	<input type="radio"/> K	<input type="radio"/> A	<input type="radio"/> B	<input type="radio"/> C	<input type="radio"/> O

<input type="radio"/> Witness				
<input type="radio"/> Owner	Name			
<input type="radio"/> Uninjured Passenger	Phone Number	Age	Pos.	Rest.
<input type="radio"/> Witness				

The owner, witness or uninjured passenger information may be placed in this area. **Do not use this area for recording information on injured passengers.**

Indicate whether the information being entered is for an owner, witness of the crash or an uninjured passenger. Complete the name, address and phone number information for this person.

If this individual is an uninjured passenger, complete the Age, Position, (see Data Element 36) and Restraint (see Data Element 37).

UD-10 Traffic Crash Report Instruction Manual

SECTION 5

Damaged Property Elements

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

Damaged Property

67

Person Advised of Damaged Traffic Control

Person Advised of Damaged Traffic Control	Date
	Time
	Name

When there is damage to traffic control devices, telephone the proper road authority and report the damage. Any perceived engineering problems should also be reported to the proper road authority. Obtain the name of the person contacted and enter the date and time that person was notified and their name.

68

Damaged Property

Damaged Property

When property is damaged, other than vehicles, identify the object including domestic animals and traffic control devices, etc.

69

Public Property Damage

Public	<input type="radio"/> Y
	<input type="radio"/> N

Mark Yes (Y) if the damaged property was publicly owned. Examples of publicly owned property: **Fill in only one bubble.**

- Impact Attenuator
- Bridge/Pier/Abutment
- Bridge Parapet End
- Bridge Rail
- Guardrail Face
- Guardrail End
- Median Barrier
- Highway Traffic Sign Post
- Luminaire/Light Support
- Utility Pole
- Culvert
- Fence
- Highway/Rail Signal

Deer or domestic animals are NOT considered Public Property.

Owner and Phone Number of Damaged Property

Owner & Phone

Enter the full name and complete phone number of the owner of the damaged property.

UD-10 Traffic Crash Report Instruction Manual

SECTION 6

Truck/Bus Elements

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

Truck/Bus

FOR ADDITIONAL INFORMATION IN FILLING OUT THE TRUCK PORTION, ASSISTANCE MAY BE AVAILABLE BY CONTACTING THE MSP, MOTOR CARRIER DIVISION, AT (517) 336-6195

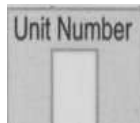

Definition of Truck/Bus

1. A truck or truck/trailer having a Gross Vehicle Weight Rating (GVWR) or Gross Combined Weight Rating (GCWR) of more than 10,000 pounds.
2. Any vehicle that displays a hazardous material placard, including automobiles and vans.
3. Any bus or school bus designed or used to transport 9 or more passengers including the driver. (Note: this includes limousines or courtesy vans)

Note: If an individual rents a moving truck that is above 10,001 GVWR or GCWR from a commercial company, the unit information will be added in the truck bus portion of the UD-10. The carrier name field should be written as "Individual" (Do not write his/her name). Areas to leave blank are the address, interstate/intrastate and USDOT/ICCMC/MPSC. Complete all vehicle identifiers such as Type & Axles, Cargo Body Types, GVWR/GCWR, license information and Hazardous Materials.

80

Truck Unit Number

A rectangular input field with the text "Unit Number" at the top left and a vertical line indicating a cursor position.

Mark the unit number that corresponds to the truck or bus assigned in the Unit Number, Data Element 30. **Mark only one digit.**

A truck or bus may be reported in any unit area on the UD-10. If the crash involves more than one truck or bus, they must have different unit numbers. However, **only one truck or bus may be reported per UD-10 form.**

81

Carrier Name

A long horizontal input field with the text "Carrier Name" at the top left and a vertical line indicating a cursor position.

List one of the following in the Carrier Name:

1. The carrier is the person, agency, or corporation that controls the movement of the vehicle for transport of the load. The carrier's name shall be obtained from one of the following in this order of preference:

Note: The carrier name can be different than the actual owner of the truck.

- a. Shipping papers and bills of lading (Figure 5), Page 6-15
- b. Side of the power unit (permanently or temporarily displayed) (Figure 6), Page 6-15
- c. Drivers daily log (Figure 7), Page 6-15
- d. From the driver

Note: Use the vehicle registration for information as a last resort.

Carrier Name – Cont.

2. For government owned and operated vehicles, either federal, state or local agencies, list the government entity as displayed on the vehicle, i.e., Grand Ledge Public Schools, Road Commission for Oakland County, U.S. Army, etc. If an address is given on the vehicle or the registration, list it in the address section.
3. For privately owned non-commercial vehicles, such as a six-wheel pickup or small truck, list the owner as it is displayed on the vehicle registration.

Note: It is very important that the carrier name be listed exactly as it appears on the documents used to identify that carrier. Do not abbreviate the name in any way except for the abbreviations that appear on the documents. Mark only one digit or letter per box.

82

Carrier Address

Address									
City					State				
Zip									

Enter the address of the carrier, company, agency or individual listed in Carrier Name section. Be sure to enter the zip code. List all nine-digit extended zip codes when they are available. **Mark only one digit or letter per box.**

83

Carrier Source

Carrier Source	
<input type="radio"/>	Papers
<input type="radio"/>	Vehicle
<input type="radio"/>	Log Book
<input type="radio"/>	Driver

Identifying the proper carrier is extremely important. The carrier identifies the company or entity responsible for the movement of the load. Mark the source used to obtain the carrier name. The four sources are discussed in Carrier Name, Data Element 81. **Fill in only one bubble.**

84

Gross Vehicle Weight Rating (GVWR)/ Gross Combination Weight Rating (GCWR)

GVWR/GCWR					

Enter the GVWR (Gross Vehicle Weight Rating) or GCWR (Gross Combination Weight Rating) for the vehicle. This information can normally be found on the power unit inside the drivers side door frame or within the cab. For a trailer, the information will normally be found half way down the driver side of the trailer. Both are normally a metal plate, but it can also be stamped into the metal or on a sticker.

Gross Vehicle Weight Rating (GVWR)/ Gross Combination Weight Rating (GCWR) – Cont.

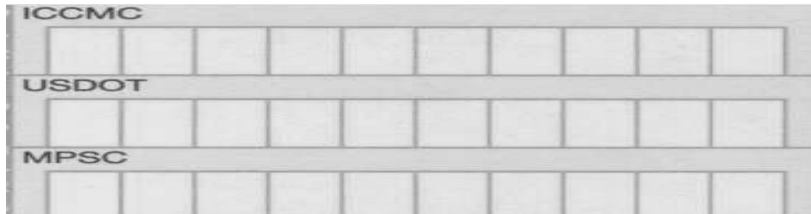

To determine if the unit is included in the truck/bus section, determine if the GCWR is over 10,000 lbs. and for hire (commercial purposes). Once that is determined, if the power unit's GVWR is less than 26,001 lbs., you must add the GVWR weight of the power unit to the GVWR of all the trailers to determine the GCWR. If the trailer is not displaying a GVWR plate, there are three options to determine its GVW (gross vehicle weight).

- 1) Check all paperwork for indications of the GVWR
- 2) The trailer and its load can be weighed by scales.
- 3) The method least preferred is to utilize the registration weight from Michigan Department of State (SOS). If no weight is listed on the registration, leave the area blank.

If the GVWR plate or sticker cannot be found on the power unit, enter the weight listed on the registration. If no weight appears on the registration, leave this box blank. **Mark only one digit per box.**

85

ICCMC/USDOT/MPSC

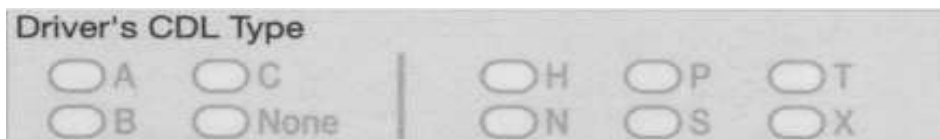

There are three types of carrier numbers that may be found on trucks and buses. Carrier licensing numbers are found on the power unit. As of January 1, 2008, all commercial carriers over 10,001 GVWR, whether intrastate or interstate will be required to obtain a USDOT Number. They will be required to display the number on the vehicle after January 1, 2009. **Mark only one digit per box.**

1. Interstate Commerce Commission Motor Carrier (ICCMC) See Figure 8, Page 6-16
2. United States Department of Transportation (USDOT) See Figure 10, Page 6-16
3. Michigan Public Service Commission (MPSC) See Figure 9, Page 6-16

These carrier numbers shall be listed on the report if available. See examples at the end of this section.

86

Driver's CDL Type

For commercial drivers, mark all code letters as displayed in the "C.D.L. Type" box on the driver license. **May fill in more than one bubble.**

Group
"A" "B" "C" with Endorsements
"H" "N" "P" "T" "X"

Driver's CDL Type – Cont.

The following is a list of required license endorsements and types for the specific vehicle driven. This list is a helpful tool for traffic enforcement. Continue to document what the driver is issued on the UD-10. Available Type/Endorsement combinations are:

Group A vehicle	A
Group A vehicle, Hazardous	AH
Group A vehicle, Tank	AN
Group A vehicle, Passenger	AP
Group A vehicle, Double/Triple	AT
Group A vehicle, Tank & Hazardous	AX
Group A vehicle, Tank & Double/Triple	ANT
Group A vehicle, Hazardous, Double/Triple	AHT
Group A vehicle, Hazardous Tank, Double/Triple	ATX
Group A vehicle, School Bus	APS
Group B vehicle	B
Group B vehicle, Hazardous	BH
Group B vehicle, Tank	BN
Group B vehicle, Passenger	BP
Group B vehicle, Tank & Hazardous	BX
Group B vehicle, School Bus	BPS
Group C vehicle, Hazardous	CH
Group C vehicle, Passenger	CP
Group C vehicle, Tank & Hazardous	CX
Group C vehicle, School Bus	CPS

Note: For further information regarding CDL requirements for commercial vehicle operation, see Vehicle Type, Data Element 90.

87

Interstate/Intrastate

Interstate
 Intra (MI Only)

If the power unit shows an Interstate Commerce Commission Motor Carrier (ICCMC), mark Interstate. **Fill in only one bubble.**

For all privately used (non-commercial/rental trucks), federal, state and local government owned vehicles, mark Intrastate (Michigan only).

To determine the transportation status of a carrier there are three resources to utilize:

- 1) Ask the driver
- 2) If a ICCMC is present, mark interstate.
- 3) Check the safer website, <http://safer.fmcsa.dot.gov/companynapshot.aspx>

CDL Restrictions

CDL Restrictions
 28 29 30

These restrictions are only for Michigan licensed drivers. A sticker with all restrictions is placed on the back of the driver's license and applicable restrictions are circled in red. Mark all those CDL restrictions in the "C.D.L. Restrictions" box that are circled in red on the back of the driver's license.

- 28 CDL Not Valid for Vehicle with Air Brakes
- 29 CDL P Endorsement Valid in Group B or C Vehicle Only
- 30 CDL P Endorsement Valid in Group C Vehicle Only

CDL Exempt

CDL Exempt Farm Other

If the driver is operating a commercial vehicle that requires a CDL but has no CDL, it **must** be determined if that driver is exempt from the CDL. That determination is made by the investigating officer and is based on the operation being performed. Exemptions are not listed on the driver license.

Exemptions:

1. **Farm**, if the driver is farm exempt.

The **Other** three exemptions to the CDL requirements are:

2. Qualified military drivers in military vehicles.
3. Qualified firefighters operating authorized emergency vehicles.
4. Persons operating a vehicle used exclusively to transport personal possessions or family members for non-business purposes. If one of these exemptions applies, mark Other.

Exemptions are listed in Section 257.302 and 257.312e, (9), (10), (11), (12) and (13) of the Michigan Vehicle Code (revised 2003).

Vehicle Type

Vehicle Type AS AL BS CX
 AA AT BB BX Other
 AH AX BH CH
 AN AY BN CP
 AP AZ BP CS

Vehicle Type – Cont.

Group A: Any combination of vehicles with a gross combination weight rating (GCWR) of 26,001 pounds or more provided the GVWR of the vehicle(s) being towed is in excess of 10,000 pounds. **Fill in only one bubble.**

Vehicle Two-Position Codes	
AA	Group A vehicle
AH	Group A vehicle, Hazardous
AN	Group A vehicle, Tank
AP	Group A vehicle, Passenger
AT	Group A vehicle Double/Triple
AX	Group A vehicle, Tank & Hazardous
AY	Group A vehicle, Tank & Double/Triple
AZ	Group A vehicle, Hazardous, Double/Triple
AL	Group A vehicle, Hazardous Tank, Double/Triple
AS	Group A vehicle, School Bus with Trailer

Vehicle Type – Cont.

Group B: Any single vehicle (including buses) with a GVWR of 26,001 lbs. and greater, or a combination of vehicles with a combined GVWR over 26,000 lbs. when towing a trailer that has a GVWR of 10,000 lbs. or less. **Fill in only one bubble.**

Vehicle Two-Position Codes	
BB	Group B vehicle
BH	Group B vehicle, Hazardous
BN	Group B vehicle, Tank
BP	Group B vehicle, Passenger
BX	Group B vehicle, Tank & Hazardous
BS	Group B vehicle, School Bus

Vehicle Type – Cont.

Group C: Any single vehicle with a GVWR of less than 26,001 lbs. or a combination of vehicles having a combined GVWR under 26,001 lbs. when the vehicle is required to display placards for hazardous material or designed to carry 16 passengers (including driver). **Fill in only one bubble.**

Vehicle Two-Position Codes	
CH	Group C vehicle, Hazardous
CP	Group C vehicle, Passenger
CX	Group C vehicle, Tank & Hazardous
CS	Group C vehicle, School Bus

Vehicle Type – Cont.

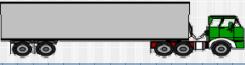

Group O: Any vehicle being used for commercial purposes and does not fall into the categories of Group A, B or C but is over 10,001 pounds and less than 26,001 pounds. Vehicle type must be marked as truck/bus, and the truck/bus section must be completed. Within the truck/bus section, vehicle type should be marked “Other.” **Fill in only one bubble.**

Type and Axles Per Unit

Type & Axles Per Unit	First	Second	Third	Fourth

Conventional Combination Vehicles

5-Axle Tractor Semi-Trailer 

Type & Axles Per Unit	First	Second	Third	Fourth
	T 3	S 2		

Twin 28.5-foot Double or STAA Double 

Type & Axles Per Unit	First	Second	Third	Fourth
	T 2	S 1	2	

Longer Combination Vehicles

7-Axle Double or Rocky Mountain Double (RMD) 

Type & Axles Per Unit	First	Second	Third	Fourth
	T 3	S 2	2	

8-Axle B-Train Double 

Type & Axles Per Unit	First	Second	Third	Fourth
	T 3	S 3	S 2	

10-Axle Resource Hauling Double 

Type & Axles Per Unit	First	Second	Third	Fourth
	T 3	S 2	4	

9-Axle Turnpike Double (TPD) 

Type & Axles Per Unit	First	Second	Third	Fourth
	T 3	S 2	4	

Triple Trailer Combination 

Type & Axles Per Unit	First	Second	Third	Fourth
	T 2	S 1	2	2

30

Enter the total number of axles per unit. Starting with the left box, first enter the power unit and then each trailer or towed unit. **Mark only one digit per box.**

If the truck is a truck tractor (a vehicle designed only to tow other units and has no cargo body), **place a “T” in front of the number** of axles for the power unit.

If the trailer is a semi-trailer (designed so that part of the trailer load is carried on the towing unit), **place an “S” in front of the number** of axles in the appropriate box.

A Bus (commercial or school) is now designated by the number of seats in the vehicle (including the driver’s) and **will not** list the number of axles.

For Type and Axles:

Enter **B1** in the first box if a bus has seating of 9 to 15 including the driver

Enter **B2** in the first box if a bus has seating of 16+”

Example: A dump truck pulling a utility trailer with a bulldozer would be listed as **3-S2**. The “S2” designates a two-axle semi-trailer that places part of the trailer weight on the towing unit.

Example: A truck tractor towing a van semi-trailer would be **T3-S2**. The “T3” designates a three-axle truck tractor and the “S2” designates a two-axle semi-trailer.

Example: A truck tractor towing a gravel semi-trailer/trailer combination (doubles) would be listed as **T3-S3-5**. The “S3” designates a three-axle semi-trailer, and the “5” designates a five-axle full trailer which does not place any of the load on the towing unit except for the tongue weight.

Example: A school bus with seating for 30 passengers including the driver would be B2 in the first box. The “B2” designates a bus with seating for 16 or more passengers.

Cargo Body Type

Indicate body type of the truck being reported and select **only one** of the following:

- | | |
|-----------------------|---|
| 1. Van (enclosed box) | 5. Concrete mixer |
| 2. Cargo tank | 6. Auto transporter |
| 3. Flatbed/platform | 7. Garbage/refuse |
| 4. Dump | 8. Other/unknown/Bus (commercial or school) |

Example: A dump truck towing a lowboy trailer with a dozer would be listed as a Dump truck. However, a truck-tractor towing a lowboy semi-trailer with a dozer will be listed as a Flatbed/platform because the truck tractor has no cargo body.

Van (enclosed box) is meant to be used with the normal enclosed cargo box whether it be a semi-trailer or a straight truck body. This category was not meant for use with a bus.

Cargo Tank means a completely enclosed tank type body designed to transport liquid, gaseous and flowable solid material (powder, granular, etc.).

Auto transporter is only used for truck/trailer auto transport vehicles. Straight trucks transporting vehicles will be listed under Flatbed/platform, as appropriate.

There are several types of vehicles that best fit in the Other category. These include such vehicles as tow trucks without a flatbed, utility and line trucks, pole trailers and special use vehicles not otherwise listed. Buses, pickups and bobtail truck tractors (without a trailer) will also be listed under Other.

Medical Card

Drivers of trucks with a gross vehicle weight greater than 10,001 pounds (4,537 kilograms) **actual weight or GVWR**; or interstate commercial buses designed for carrying 16 or more passengers including the driver; or any vehicle requiring placards for hazardous materials must be medically qualified and carry a medical examiners certificate (**See Figure 12**). Some intrastate drivers who have a long continuous service with a company may have qualified for the grandfather medical waiver and will carry a certificate stating so. A very limited number of drivers may carry a medical waiver certificate for a physical disability.

Mark Yes if the driver has a medical card, grandfather card, or medical waiver certificate. **Fill in only one bubble.**

Hazardous Material

Placard

If the vehicle had hazardous material placards displayed, mark Yes. This does not include Drive Safely or other similarly worded placards.

Hazardous Material – Cont.

Spill

If hazardous materials were spilled/released from the vehicle during the crash, mark Yes. Materials that spill but are contained within the vehicle and not released to the outside will not be considered as spilled/released for this report.

Only the cargo is to be considered for this question. This does not include fuel from the vehicle fuel tanks or other hazardous material spilled from a fixed containment that was struck by any of the vehicles during the crash.

If there is more than one type of hazardous material placard displayed on a motor vehicle, record the information of the hazardous material spilled. If no material was spilled, record a table 1 material over a table 2 material. If both are from a single table, record the material with the highest quantity of material transported.

The presence of any hazardous material should be reported. Any questions about a hazardous material spill, please contact the Michigan State Police, Motor Carrier Division, Hazardous Material Section at (517) 336-6580. Section investigators will assist with mitigating the incident and will check the motor carrier for Haz Mat regulation compliance. A section investigator may be reached at all times by call Michigan State Police Operations at (517) 336-6100.

95

Hazardous Material Placard Identification Number

ID #

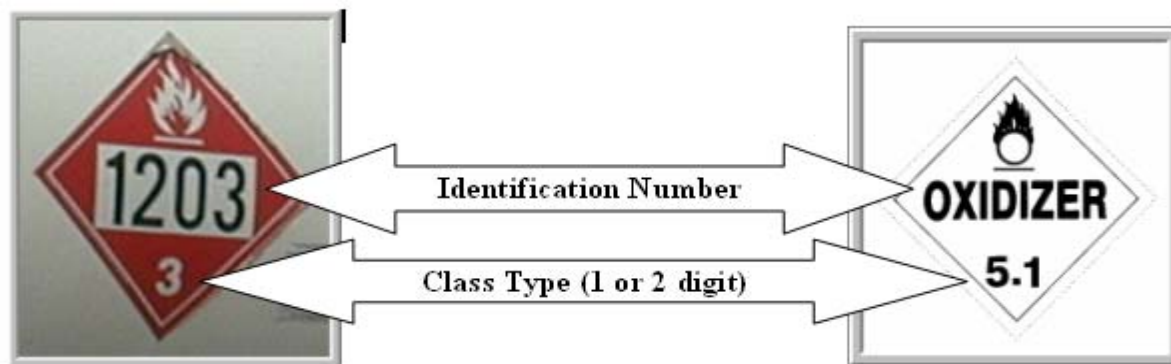

If a Hazardous Material Placard is displayed, mark the four-digit identification number that appears in the center of the diamond-shaped placard or orange panel, whichever is applicable. If more than one placard appears on the panel, list only one.

96

Class (International Classification)

Class #

Most Hazardous Material placards will display a single digit International Classification number in the bottom corner. If a number is displayed, mark it in this section.

Revised November 2008

Crash Diagram and Remarks

Crash Diagram and Remarks – Required for Fatal & Injury Crashes

Use this section to diagram the event and add any necessary remarks to explain what occurred. The Fatality Analysis Reporting System (FARS) requires this information.

Draw a diagram that conveys a good picture of the actual events leading up to the crash through the time period where events had stabilized

Example:

-If drugs or alcohol were involved but were not a contributing factor please make note of it in the remarks section

-List anything that might help to remind you what happened if you need to appear in court (UD-10's are not admissible)

-List advisory speed limits

-List any other vehicle not directly involved in the crash, but may have contributed to it

-The more detailed the diagram and remarks the more it assists engineers and road commissions to make better decisions in their efforts to minimize crash numbers and/or severity

If templates are needed for drawing, please contact (517) 322-1658.

UD-10 Traffic Crash Report Instruction Manual

SECTION 8

Fatality Analysis Reporting System (FARS)

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

Fatality Analysis Reporting System (FARS)

The Fatality Analysis Reporting System (FARS) gathers data on the most severe traffic crashes that occur each year - those that result in loss of human life.

The system was conceived, designed, and developed by the National Center for Statistics and Analysis (NCSA) of the National Highway Traffic Safety Administration (NHTSA) to provide an overall measure of highway safety, to help identify traffic safety problems, to suggest solutions and to help provide an objective basis on which to evaluate the effectiveness of motor vehicle safety standards and highway safety programs.

FARS became operational in 1975 and contains data on fatal traffic crashes within 50 States, the District of Columbia and Puerto Rico. To be included in FARS, a crash must involve a motor vehicle traveling on a trafficway customarily open to the public, and must result in the death of a person (vehicle occupants or non-motorist).

The FARS file contains descriptions, in a standard format, of each fatal crash reported. Each crash has more than 100 different coded data elements that characterize the crash, the vehicles, and the people involved. The specific data elements may be modified slightly each year to conform to changing user needs, vehicle characteristics, and highway safety emphasis areas. The FARS analyst reviews the UD-10 to complete all data elements reported on four forms:

The **Crash Form** asks for specific information such as the time and location of the crash, the first harmful event, whether it is a hit-and-run crash, whether a school bus was involved, the number of vehicles and people involved and weather conditions.

The **Vehicle Form** calls for data on each vehicle involved in the crash. Specific data include the vehicle type, role in the crash, initial and principal impact points, the most harmful event.

The **Driver Form** calls for the driver's record and license status including mandated CDL information.

The **Person Form** calls for data on each person involved in the crash: his or her age and sex, role in the crash (driver, passenger, non-motorist), alcohol and drug involvement, injury severity and restraint use.

The data collected within FARS do not include any personal identifying information such as names, addresses, or social security numbers. Thus, any data kept in FARS files are made available to the public to fully conform to the Privacy Act laws. An overview of FARS data is published in various fact sheets and in an annual report. These are all available to the public. The annual report contains a comprehensive analysis of the years data and includes some past years data with comparative analyses.

Michigan has participated in the FARS program since its inception. The FARS analyst gathers, translates and enters data via a local microcomputer directly into NHTSA's central computer data file. Data is automatically checked when entered for acceptable range values and for consistency.

Fatality Analysis Reporting System (FARS) – Cont.

FARS data is used extensively within NHTSA; and requests are received from sources such as state and local governments, research organizations, private citizens, the auto and insurance industries, Congress, and the media. Specific FARS data uses include the evaluation of:

- legal drinking age legislation
- motorcycle helmet usage legislation
- repeat offender
- restraint usage laws
- the 65 MPH speed limit
- safety design of cars and light trucks
- safety of large trucks on the highway

FARS data can be accessed at the state level by the FARS analyst to respond to state safety issues. Users may request specific data from the Center at no charge for most requests, generally within two weeks allowing more time for complex or lengthy reports. Also users can obtain a file on computer tape in one of several formats amenable to analysis. This will allow processing of the data using the law enforcement agency's computer system. FARS website address is: www-fars.nhtsa.dot.gov.

UD-10 Traffic Crash Report Instruction Manual

SECTION 9

Glossary

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

Glossary

Some definitions given are for purposes of UD-10 Traffic Crash Report completion only and should not be used for enforcement or prosecution purposes.

At-intersection crash

Traffic crash where the first harmful event occurs at the exact intersecting point of the centerlines of the two roadways. See Within-Intersection Crash.

Bicycle

Bicycle means a device propelled by human power upon which a person may ride, having either 2 or 3 wheels in a tandem or tricycle arrangement, all of which are over 14 inches in diameter. §257.4

Bridge abutment

Vertical support structure that retains the earth supporting the bridge ends. See Bridge pier.

Bridge parapet end

The end of a bridge or bridge rail, as opposed to the “facing” which is that portion of the bridge rail beyond its end.

Bridge pier

Freestanding column that supports the weight of a bridge. The column is not enclosed or backed by earth. See Bridge abutment.

Bus

Any passenger-carrying vehicle used for hire and used to transport 9 or more passengers, including the driver.

Commercial Motor Vehicle

Has a gross combination weight rating of 26,001 pounds or more inclusive of a towed unit(s) with a gross vehicle weight rating of more than 10,000 pounds; has a gross vehicle weight rating of 26,001 pounds or more; is designed to transport 16 or more passengers, including the driver; and is of any size and is used in Hazardous Materials transport.

Crash

An unstabilized situation that includes at least one harmful event. Also, that occurrence in a sequence of events that usually produces injury, death or property damage.

Crash cushion

See Impact attenuator.

Culvert

Enclosed (covered) channel under a road or driveway to allow water to pass.

Elected gross weight

Elected gross weight means the empty weight of a vehicle or combination of vehicles, fully equipped for service, plus the weight of the maximum load which the owner has elected to carry on such vehicle or combination of vehicles. §257.13a

Engineer, railroad

A person who operates an engine.

Glossary – Cont.

Farm tractor

Farm tractor means every motor vehicle designed and used primarily as a farm implement for drawing plows, mowing machines, and other implements of husbandry. §257.16

Fifth wheel travel trailer

A trailer designed for recreational use that is normally towed by a pickup truck. The fifth wheel hitch has an upper and lower coupling device; the lower half is mounted in the bed of the towing unit. The upper half consists of a plate and kingpin which is attached to the towed vehicle (fifth wheel travel trailer). A fifth wheel travel trailer is the only type of travel trailer that meets the requirement for use as the first towed unit in recreational doubles.

Gore

Gore means an area of land where two roadways diverge or converge. The area is bounded on two sides by the edges of the roadways that join at the point of divergence or convergence. The direction of traffic must be the same on both sides of these roadways. The gore is considered to start or end at the point where the painted pavement edge lines of the two roadways diverge or converge.

Gross Combination Weight Rating (GCWR)

The value specified by the manufacturer as the maximum loaded weight of a combination vehicle. In the absence of a label, the GCWR can be calculated by adding the GVWR of the power unit to the GVWR of the vehicle(s) or trailer(s) being towed.

Gross Vehicle Weight Rating (GVWR)

The maximum rated loaded weight in pounds of a single vehicle. Vehicle manufacturers specify the GVWR and this can be found on the vehicle certification label.

Gross weight

Gross weight means the weight of a vehicle without load plus the weight of any load thereon. §257.19

Harmful event

Harmful event means an occurrence of injury or damage.

Highway or street

Highway or street means the entire width between the boundary lines of every way publicly maintained when any part thereof is open to the use of the public for purposes of vehicular travel. §257.20

Ignition Interlock Devices

Ignition Interlock device means an alcohol concentration measuring device that prevents a motor vehicle from being started at any time without first determining through a deep lung sample the operators breath alcohol level. Michigan Vehicle Code, Sec. 257.625L (6).

Immersion

The act of plunging into a liquid (water).

Impact attenuator

A protective device that protects errant vehicles from impacting fixed-object hazards by (1) gradually decelerating the vehicle and (2) re-directing its path of travel away from the fixed object.

Glossary – Cont.

Implement of husbandry

Implement of husbandry means a vehicle which is either a farm tractor, a vehicle designed to be drawn by a farm tractor or an animal, a vehicle which directly harvests farm products, or a vehicle which directly applies fertilizer, spray, or seeds to a farm field. §257.21

Intersection

Intersection means:

(a) The area embraced within the prolongation or connection of the lateral curb lines, or, if none, then the lateral boundary lines of the roadways of two (2) highways which join one another at, or approximately at, right angles, or the area within which vehicles traveling upon different highways joining at any other angle may come in conflict.

(b) Where a highway includes two (2) roadways 30 feet or more apart, then every crossing of each roadway of such divided highway by an intersecting highway shall be regarded as a separate intersection. In the event such intersecting highway also includes two (2) roadways 30 feet or more apart, then every crossing of two (2) roadways of such highways shall be regarded as a separate intersection. §257.22

Also: An area within the extended pavement lines at points where two highways join or cross (from Dictionary of Civil Engineering).

In transport

The term in transport denotes the state or condition of a vehicle that is in motion or within the portion of a way ordinarily used by similar vehicles. When applied to motor vehicles, in transport means in motion or on a roadway.

Inclusions:

- Motor vehicle in traffic on a highway
- Driverless motor vehicle in motion
- Motionless motor vehicle abandoned on a roadway
- Disabled motor vehicle on a roadway
- And others

A parked motor vehicle in roadway lanes used for travel during rush hours and parking during off-peak periods is in transport during periods when parking is forbidden.

Luminaire/light support

A complete lighting unit, consisting of lamp(s), support pole and wiring

Median

The median is the distance or area between the inside left-hand pavement edges of a divided highway.

Moped

Moped means a 2- or 3-wheeled vehicle which is equipped with a motor that does not exceed 50 cubic centimeters piston displacement, produces 2.0 brake horsepower or less, and cannot propel the vehicle at a speed greater than 30 miles per hour on a level surface. The power drive system shall not require the operator to shift gears. 257.32b

Glossary – Cont.

Motorcycle

Motorcycle means every motor vehicle having a saddle or seat for the use of the rider and designed to travel on not more than 3 wheels in contact with the ground but excluding a tractor. §257.31

Motor home

Motor home means a motor vehicle constructed or altered to provide living quarters, including permanently installed cooking and sleeping facilities, and is used for recreation, camping, or other non-commercial use. §257.32a

Motor vehicle

Motor vehicle means every vehicle that is self-propelled and every vehicle which is propelled by electric power obtained from overhead trolley wires, but not operated upon rails. §257.33

Non-profit organization registration

A vehicle registration issued to certain non-profit organizations such as Civil Air Patrol, churches, and civic clubs. Sometimes referred to as a Y-Plate. See MVC 257.224 for details.

Non-traffic area

An area not designed for purposes of through vehicular travel. Generally, an area with roadways that is not part of the state, county, or local road system. Non-traffic areas include shopping center parking areas and service-access roads, parking ramps, parklands and school properties.

ORV

ORV vehicle means a motor-driven off-road recreation vehicle capable of cross-country travel without benefit of a road or trail, on or immediately over land, snow, ice, marsh, swampland, or other natural terrain.

It includes, but is not limited to, a multitrack or multiwheel drive or low pressure tire vehicle; a motorcycle or related 2-wheel or 3-wheel vehicle; an amphibious machine; a ground effect air cushion vehicle; or other means of transportation deriving motive power from a source other than muscle or wind.

ORV vehicle does not include a registered snowmobile; a farm vehicle being used for farming; a vehicle used for military, fire, emergency, or law enforcement purposes; a construction or logging vehicle used in performance of its common function; or a registered aircraft. §257.1601

Parking

Parking means standing a vehicle, whether occupied or not, upon a road, when not loading or unloading, except when making necessary repairs. §257.38

Pedalcycle

A non-motorized vehicle propelled by pedaling. It includes unicycles, bicycles, and tricycles.

Pedestrian

Person on foot; person on skis, skates or roller blades; rider of horse; horse and buggy (each occupant, including the driver, will be listed as a separate pedestrian unit); non-motorized wheel chair.

Glossary – Cont.

Ramp

An auxiliary roadway used for entering or leaving thru-traffic lanes.

Recreational double

Pulling vehicle equipped with fifth wheel and/or pulling two trailers, used for recreation and personal travel, as opposed to commercial use.

Roadway

Roadway means that portion of a highway improved, designed, or ordinarily used for vehicular travel. In the event a highway includes two (2) or more separate roadways, the term roadway, as used herein, shall refer to any such roadway separately, but not to all such roadways collectively. §257.55

School bus

School bus means every motor vehicle, except station wagons, with a manufacturers rated seating capacity of 16 or more passengers, including the driver, owned by a public, private, or governmental agency and operated for the transportation of children to or from school, or privately owned and operated for compensation for the transportation of children to or from school. School bus does not include buses operated by a municipally owned transportation system or by a common passenger carrier certificated by the state transportation department. §257.57

Semi-trailer

Semi-trailer means every vehicle with or without motive power, other than a pole-trailer, designed for carrying persons or property and for being drawn by a motor vehicle and so constructed that some part of its weight and that of its load rests upon or is carried by another vehicle. §257.59

Shoulder; ditch slope

Shoulder means that portion of the highway contiguous to the roadway generally extending the contour of the roadway, not designed for vehicular travel but maintained for the temporary accommodation of disabled or stopped vehicles otherwise permitted on the roadway.

Ditch slope is that portion of the highway adjacent to the shoulder if one exists or adjacent to the roadway on roads without shoulders, extending to the bottom of the roadside ditch and is not constructed or maintained for the use of any vehicles except those engaged in construction or maintenance. §257.59a

Snowmobile

Snowmobile means any motor driven vehicle designed for travel primarily on snow or ice of a type which utilizes sled runners or skis, or an endless belt tread or any combination of these or other similar means of contact with the surface upon which it is operated; but is not a vehicle which must be registered under Act No. 300 of the Public Acts of 1949, as amended, being sections 257.1 to 257.923 of the Michigan Compiled Laws. §257.1501

Glossary – Cont.

Special mobile equipment

Special mobile equipment means every vehicle not designed or used primarily for the transportation of persons or property and incidentally operated or moved over the highways, including farm tractors, road construction or maintenance machinery, mobile office trailers, mobile tool shed trailers, mobile trailer units used for housing stationary construction equipment, ditch-digging apparatus, well-boring and well-servicing apparatus. The foregoing enumeration shall be deemed partial and shall not operate to exclude other such vehicles which are within the general terms of this definition. §257.62

Street or highway

Street or highway means the entire width between boundary lines of every way publicly maintained when any part thereof is open to the use of the public for purposes of vehicular travel. §257.64

Thru highway

Thru highway means every state trunk line highway, or any other highway at the entrance to which vehicular traffic from an intersecting highway is required by law to stop before entering or crossing the same. §257.68

Towed vehicle

Vehicle being pulled or pushed by a tow truck or other motor vehicle, where some tires of the towed vehicle touch the road surface (does not include vehicles being transported on flat-bed truck).

Traffic

Traffic means pedestrians, ridden or herded animals, vehicles, street cars and other conveyances, either singly or together, while using any highway for purposes of travel. §257.69

Traffic Crash

An incident involving a motor vehicle, in transport, on a roadway, that resulted in death, injury or property damage of \$1,000 or more.

Traffic control devices

Traffic control devices means all signs, signals, markings, and devices not inconsistent with this act placed or erected by authority of a public body or official having jurisdiction, for the purpose of regulating, warning or guiding traffic. §257.70

Trailer

Trailer means every vehicle with or without motive power, other than a pole-trailer, designed for carrying property or persons and for being drawn by a motor vehicle and so constructed that no part of its weight rests upon the towing vehicle. §257.73

Transition area

Area of road where the number of travel lanes increases or decreases.

Truck

Truck means every motor vehicle designed, used, or maintained primarily for the transportation of property. §257.75

Glossary – Cont.

Truck Tractor

Truck tractor means every motor vehicle designed and used primarily for drawing other vehicles, and not so constructed as to carry a load other than a part of the weight of the vehicle and load so drawn, except that a truck tractor and semi-trailer engaged in the transportation of automobiles may transport motor vehicles on part of the power unit. §257.77

Unstabilized situation

Set of events not under human control. It starts when control is lost and ends when (1) control is regained or, (2) in the absence of persons who are able to regain control, when all persons and property are at rest.

Vehicle

Vehicle means every device in, upon, or by which any person or property is or may be transported or drawn upon a highway, excepting devices exclusively moved by human power or used exclusively upon stationary rails or tracks and excepting a mobile home. §257.79

Within-intersection crash

Traffic crash where the first harmful event occurs within the limits (corners) of the intersection. See At-intersection crash.

CDL Group Designations, Endorsements and Restrictions

CDL Group Designations (A Michigan resident needs a CDL with the appropriate group designation as follows):

Group A: To operate a combination of vehicles with a gross combination weight rating (GCWR)* of 26,001 pounds or more including a towed trailer or vehicle with a gross vehicle weight rating (GVWR)** of more than 10,000 pounds.

Group A allows you to operate Group B and Group C vehicles.

Group B: To operate a single vehicle having a GVWR of 26,001 pounds or more or any such vehicle towing a vehicle not in excess of 10,000 pounds GVWR..

Group B allows you to operate Group C vehicles.

Group C: To operate a single vehicle with a GVWR under 26,001 pounds or a combination of vehicles having a combined GVWR under 26,001 lbs. when the vehicle is required to display a hazardous material placard, or designed to transport 16 or more passengers including the driver.

*Gross Combination Weight Rating (GCWR) means the value specified by the manufacturer as the maximum loaded weight of a combination vehicle. In the absence of a label, the GCWR can be calculated by adding the GVWR of the power unit to the GVWR of the vehicle(s) or trailer(s) being towed.

**Gross Vehicle Weight Rating (GVWR) is the recommended maximum total weight of the vehicle and load as designated by the vehicle manufacturer. The GVWR label is usually found on the driver side door post of the power unit and on the front left side of the trailer. The GVWR should not be confused with the elected gross vehicle weight (GVW) which is declared by the vehicle owner for registration purposes.

Endorsements

In addition to the appropriate CDL group designation, endorsements are required for the following:

- **T - Double or Triple Trailers:** (Triple trailer combinations are not permitted in Michigan.)
- **P - Passenger:** For vehicles which are designed to carry 16 or more people (including the driver).
- **N - Tank Vehicles:** For vehicles designed to haul liquids or liquefied gases in bulk in permanently mounted tanks or portable tanks rated at 1,000 gallons or more.
- **H - Hazardous Materials:** To carry hazardous materials in amounts requiring placards. Before applying for this endorsement, you must have a Federal Security Threat Assessment. For more information about the Federal Security Threat Assessment, click [here](#).
- **X -** This X-endorsement code will appear on the license instead of the H and N codes when an applicant receives both the tank and hazardous materials endorsements.
- **S - School Bus:** For commercial motor vehicles used to transport pre-primary, primary, or secondary school students from home to school, school to home, or to and from school-sponsored events.

Drivers License Types – Cont.

Examples of Commercial Driver Licenses – Cont.

Restrictions

You could receive restrictions on your CDL under the following conditions:

- **Code 28 Restriction** – “CDL not valid for operating vehicles equipped with air brakes.” If you do not pass the air brake knowledge test, or if the vehicle you use for the CDL skills tests is not equipped with air brakes, you will be restricted from operating vehicles with air brakes.
- **Code 29 Restriction** – “CDL-P endorsement valid in Group B or C vehicles only.” If you are adding the P-Passenger endorsement to your current Group A designation, you must complete the CDL tests in a bus or school bus. If the bus you use for the P-Passenger endorsement skills tests is a Group B-Bus, your P-Passenger endorsement will be restricted to Group B and C vehicles.
- **Code 30 Restriction** – “CDL-P endorsement valid in Group C vehicles only.” If you are adding the P-Passenger endorsement to your current Group A or B designation, you must complete the CDL skills tests in a bus or school bus. If the bus you use for the P-Passenger endorsement skills test is a Group C-Bus, your P-Passenger endorsement will be restricted to Group C vehicles.

UD-10 Traffic Crash Report Instruction Manual

Appendix G

Driver Record Information for Crashes

**Michigan Department of State Police
Criminal Justice Information Center
Traffic Crash Reporting Unit**

Revised November 2008

DRIVER RECORD INFORMATION FOR CRASHES

The Master Driver Record (MDR) File identifies each Michigan driver and maintains the history of their driving record. The MDR File is a historical driving record for each individual licensed in Michigan; and for each non-licensed Michigan resident having driving information reported to the Department of State (non-licensed drivers having been involved in accidents and/or convicted of traffic violations). The MDR File also contains information regarding out-of-state drivers having Failure to Comply with Court actions related to alcohol involvement.

Driver record information originates from license branch offices, police agencies, courts, other states, internally from within the Department of State, Department of Public Health, and Department of Education.

A driver record includes: Current license application information, convictions for traffic violations, civil infraction determinations, failure to answer court judgments, accidents, and license withdrawal actions or restrictions on driving privileges.

Driver License Number

The driver license number is a unique number assigned by the Department of State to an individual, upon application for a Michigan driver license, or is assigned by the department when processing an abstract from a court pertaining to a non licensed individual. The driver license number is a unique Soundex Code derived from a driver's last, first, and middle name, and month and day of birth. The driver license number identifies the driver and is used as the driver file key.

License Issued

The MDR File specifies whether the current license application on file is an original, renewal, duplicate, or correction. If the driver does not have an application on file, the record will show "No License".

O = Original	C = Correction
R = Renewal	D = Duplicate

License Application codes may be preceded by:

E = Extension. The last application renewal was by mail.
P = Probation. The driver is a probationary driver.

Probationary

The MDR file contains an indicator for probationary drivers. Since October 1, 1979, a license issued to a person not previously licensed in Michigan or another state is designated as probationary for three years after the original license date.

Driver License Type

The Department of State issues two basic types of driver licenses---Operator and Chauffeur. A Motorcycle, Farm, and/or Recreational endorsement may be added to the operator or chauffeur license. Less frequently used are Moped and Minor Restricted licenses. Since January 1, 1990, some commercial drivers may need a Commercial Driver License (CDL). Commercial Driver License Group and CDL endorsements are added to the chauffeur license. The requirements for a Chauffeur license do not change; however, upon application for a Chauffeur license, determination is made if a CDL is necessary. The CDL is based on the gross vehicle weight rating (GVWR) of a vehicle and designation of what the vehicle is hauling or towing. See Box 2 on next page for listing of license type codes.

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

Driver License Type Codes

CHAF	=	Chauffeur's License
CHAF-CY	=	Chauffeur's License with cycle endorsement
MINOR-REST	=	Minor Restricted License
MOPED	=	Moped License
OPER	=	Operator's License
OPER-CY	=	Operator's License with cycle endorsement

may be followed by:

TIP	=	Temporary Instruction Permit allows the holder to practice driving for up to 150 days with a licensed adult.
------------	---	--

may be followed by:

F =	Farm Endorsement	R =	Recreational Endorsement
------------	------------------	------------	--------------------------

License type may be followed by CDL Group code:

A =	CDL Group A	B =	CDL Group B	C =	CDL Group C
------------	-------------	------------	-------------	------------	-------------

CDL Group code may be followed by CDL endorsement code:

H =	Hazardous Cargo	N =	Tank
P =	Passenger	T =	Double/Triple Trailers

License Expiration

The license expiration year shown on a driver license and on the MDR File, is the year in which the current driver license expires on the driver's birthdate.

Birthdate

The birthdate on the driver license application must be the driver's legally recorded date of birth.

Name

A driver's name for license application, and the name maintained on the MDR File must be the full legal name of the driver, as verified by acceptable legal documents.

Description of Driver

Beginning January 1, 1990, Height, Weight, and Eye Color is retained on the MDR File, once this data is collected from license applications.

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

Driver Moved Out-Of-State

The MDR File maintains an indicator of a driver having moved out-of-state and becoming licensed in another state. The indicator specifies the issuing state upon transferring from Michigan.

Special Restrictions

The MDR File reflects "special restriction" on an individual's driving privilege when that driver has need for special equipment and/or restricted time of day, or radius of driving limitations. These special restrictions are an effort toward safe operation of motor vehicles by drivers, including those having artificial limbs or physical disabilities requiring special steering knobs, cushions, hand controls, and/or sight problems. Also, there are special restrictions that place limitations on some CDLs.

Change of Address – Address History

A history of all address changes for any individual is maintained, through access to microfilm and microfiche, up to the three most current changes prior to the current license address. The date of change is the date on which the driver actually notified the department of the address change.

Previous Name/Alias Name

A previous name other than the name of an individual, if currently licensed, is a name changed by marriage or court order. A previous name is maintained on the master file for four years subsequent to the posting of the name change. An alias name, or assumed name, is a name used for licensing purposes by an individual, not resulting from marriage or court order.

Convictions & Civil Infraction Determinations

Conviction and civil infraction records include date of court finding, arrest date, court location, name of offense, miles per hour (if offense was speeding), if more than one violation was reported at the "same incident", if the abstract was "late received" by the department from the court, and the type of vehicle used at time of violation.

Failure To Answer Citation/Failure To Comply With Court Judgment

Courts notify the Department of State if a driver has failed to answer the court after 40 days subsequent to the date of prescribed hearing. The notice from the court is the notice for this department to suspend the driver's license, and to notify the driver of the suspension by regular mail. Records of failing to comply with a court contain: violation date, hearing date, location place of arrest, type of offense, miles per hour (if the violation was speeding) date of suspension and the court date or the court file number.

Upon compliance with the court, the court subsequently notifies the department that the driver did appear, a determination was made, and if convicted, whether or not the driver paid the required reinstatement fee to the court.

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

Crashes

Crash information retained on the MDR File includes: date of crash, number of vehicles involved in the incident, number of persons injured, number persons killed, if any; policing agency, police agency report number. Crash information is reported to the Department of State by the Michigan State Police. All other police agencies report crashes to MSP, and they subsequently submit crash information to this department (See Crash Codes).

Court Actions

When District Courts take action against an individual's driving privilege, they notify the Department of State by abstract of conviction. District courts may order revocations, suspensions and/or restrictions. Circuit Courts submit to this department decisions on appeals of departmental actions, and additions to or amendments to previous court actions (suspensions, revocations, restrictions, or denials). Court action information includes: type of action, occurrence date, dates on which the action is effective and termination intended, reason(s) for the action, and court name.

Departmental Actions

Actions taken by the Department of State Bureau of Driver Assessment are: Warning Letters, re-examination interviews with the driver, license cancellation, restricted licenses, suspensions, suspension with restrictions, revocation, or denial of driver license. The department's licensing branch offices may deny issuance of a license based upon license application test results. Departmental actions are maintained on the MDR File with the reason(s) for the actions, their effective and termination dates, and whether the required reinstatement fee has been paid (see Referral Reasons).

Financial Responsibility Action (Fr)

The Department of State is notified by courts to take action on a driver's eligibility to be licensed to drive, upon judgment arising out of ownership, maintenance, or use of a motor vehicle. Detailed information pertaining to Financial Responsibility is maintained on a separate FR File, although the action information is recorded, maintained, and accessed via the MDR File.

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

Commercial Driver License

CDL Groups

- A = CDL Group A** (To operate a vehicle which tows another vehicle with GVWR of 10,000 pounds. Group A allows Group B & C vehicles)
- B = CDL Group B** (To operate a single vehicle having GVWR of 26,001 or more and/or combination of vehicles having GVWR of 26,001 or more towing a vehicle not more than 10,000 GVWR. Also allows Group C)
- C = CDL Group C** (To operate small vehicles designed to carry 16 or more passengers including driver and/or small vehicle carrying hazardous material in small amounts requiring placard)

CDL Group may be followed by:

CDL Endorsement

There are four endorsements which can be added to a CDL when operating specific types of vehicles. The endorsements are as follows:

T – Double trailers. Needed on a group A license when towing two trailers. (Triple trailers are not permitted in Michigan.)

N – Tankers. Required on a group A or B license when hauling liquids or liquefied gases in bulk in permanently mounted tanks or portable tanks rated at 1000 gallons or more. A tanker endorsement may also be needed on a group C license when hauling hazardous materials in a small tanker.

H – Hazardous Materials. Needed on a group A, B, or C license when carrying hazardous materials or hazardous waste in amounts requiring the vehicle to be placarded.

P – Passenger. Required on a group A, B, or C license when the vehicle is designed to carry 16 or more people including the driver.

CDL records contain the drivers Social Security Number in addition to the Driver License Number.

The preceding sample driver record would be interpreted as follows:

- Line 1** Driver License Number, coded using last, first, & middle names, and month and day of birth.
- Line 2** Driver's legal name, date of birth and sex code (M or F)
- Line 3** Street address, license type and application (Renewal Chauffeur license with cycle endorsement, with CDL Group A, & endorsements to haul hazardous cargo, operate tank, passenger, or double/triple trailers), license issue date and year of expiration.
- Line 4** City, state, and zip code, social security number (only appears on CDL licenses)
- Line 5** Issued citation on 1/15/88 for energy speed violation (driving 70 in 65/55 zone) while operating a passenger vehicle. Was convicted of violation on 2/8/88 in Midland.
- Line 6** Issued ticket on 5/26/88 for failing to signal or observe while driving a passenger vehicle. Was convicted on 6/28/88 in Detroit.
- Line 8** Was referred on 8/2/88 for re-exam by Driver Improvement for unsatisfactory driving record. Was issued a suspension at an administrative review by DI on 12/02/88 effective from 12/7/88 thru 4/6/89.
- Line 15** Paid reinstatement fee on 2/7/90 to reinstate driving privilege.
- Line 17** Conviction from Illinois for energy speed violation. Was late received abstract and assessed one point for violation.
- Line 19** Disobeyed traffic signal violation on 7/19/91, convicted on 10/25/91 in Midland, assessed 3 points.
- Line 20** Operated while impaired violation on 1/10/92, convicted on 01/22/92 in Marine City and assessed 4 points.
- Line 21** Involved in accident on 7/19/91 in Midland involving 2 vehicles, no injuries. Accident was caused because of a failure to yield (V03) and the driver had not been drinking (X04). Accident report can be found on reel 20, frame 440.
- Line 23** End of record (MI SOS) and authority statement.

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

The Master Driver Record File identifies each Michigan driver and maintains the history of their driving record. The MDR File is a historical driving record for each individual licensed in Michigan: and for non-licensed Michigan resident having driving information reported to the Department of State (non-licensed drivers having been involved in accidents and/or convicted of traffic violations). The MDR File also contains information regarding out-of-state drivers having Failure to Comply with court actions related to alcohol involvement.

Driver record information originates from license branch offices, police agencies, courts, other states, internally from within the Department of State, Department of Public Health, and Department of Education.

A driver record includes: Current license application information, convictions for traffic violations, civil infraction determinations, failure to answer court judgments, accidents, and license withdrawal actions or restrictions on driving privileges.

License Issued

The MDR File specifies whether the current license application on file is an original, renewal, duplicate, or correction. If the driver does not have an application on file, the record will show "No License."

O = Original	R = Renewal
C = Correction	D = Duplicate
License Applications may be preceded by:	
E = Extension. The last application renewal was by mail	
P = Probation. The driver is a probationary driver	

Beginning April 1, 1997, Michigan implemented the Graduated Driver License Program. What level the driver currently has is indicated to the right of the driver's license number and a description of the restrictions are listed below the address. **GDL LEVEL 1, GDL LEVEL 2 or GDL LEVEL 3**

Driver License Type

The Department of State issues two basic types of drivers licenses – Operator and Chauffeur. A Motorcycle, Farm and/or Recreational endorsement may be added to the operator or chauffeur license. Less frequently used are Moped and Minor Restricted licenses. Since January 1, 1990, some commercial drivers may need a Commercial Driver License (CDL). Commercial Driver License Group and CDL endorsements are added to the chauffeur license. The requirements for a Chauffeur license do not change: however, upon application for a Chauffeur license, determination is made if a CDL is necessary. The CDL is based on the gross vehicle weight rating (GVWR) of a vehicle and designation of what the vehicle is hauling or towing. It is possible for a driver in Michigan to have an operator's license with a CDL group. See box below for listing of license type codes.

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

Driver License Type (Cont.)

CHAF	=	Chauffeur's License
CHAF-CY	=	Chauffeur's License with cycle endorsement
MINOR-REST	=	Minor Restricted License
MOPED	=	Moped License
OPER	=	Operator's License
OPER-CY	=	Operator's License with cycle endorsement may be followed by:
TIP	=	Temporary Instruction Permit allows the holder to practice driving for up to 150 days with a licensed adult.

May be followed by:
F = Farm Endorsement **R** = Recreational Endorsement

License type may be followed by CDL Group code:
A = CDL Group A **B** = CDL Group B **C** = CDL Group C

CDL Group code may be followed by CDL Endorsement code:
H = Hazardous Cargo **N** = Tank
P = Passenger **T** = Double/Triple Trailers

Crashes

Crash information retained on the MDR File includes: date of crash, number of vehicles involved in the incident, number of persons injured, number persons killed, if any; policing agency, police agency report number. Crash information is reported to the Department of State by the Michigan State Police. All other police agencies report crashes to MSP, and they subsequently submit crash information to MDOS/SOS.

Accident Codes

The Violation and Drinking Item Codes follow the counts in accident records at SOS. See below listings.

Violation Codes

V1	Speed too fast
V2	Speed too slow
V3	Failed to yield
V4	Disregard traffic control
V5	Drove wrong way
V6	Drove left of center
V7	Improper passing

Violation Codes

V8	Improper lane use
V9	Improper turn
V10	Improper/No Signal
V11	Improper backing
V12	Unable to stop
V13	Other
V14	Unknown

Drinking Item Codes

X3	Had Been Drinking
X4	Had Not Been Drinking
X5	Not Stated

The Violation and Drinking Item codes are underlined below:

ACCIDENT 07/12/1999 #321123 LANSING PD
2 VEH 0 INJ 0 KILLED V1 X4

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

Vehicle Codes

A four-numeral code may follow the drinking item code in an accident record. These codes indicate what type of vehicle was involved. The first two numbers indicate the Vehicle Make:

Passenger Cars

00 Amer Motors/ Renault	05 Dodge	11 Oldsmobile	17 Honda
01 Buick	06 Ford	12 Plymouth	18 Other Foreign
02 Cadillac	07 Imperial	13 Pontiac	19 Other Domestic
03 Chevrolet	08 Jeep	14 Volkswagen	70 Mazda
04 Chrysler	09 Lincoln	15 GMC	71 Nissan (Datsun)
	10 Mercury	16 International	72 Toyota

Trucks

20 Chevrolet	25 GMC	30 White (Volvo)	35 Kenworth
21 Diamond T	26 International	31 Jeep	36 Mercedes-Benz
22 Dodge	27 Mack	32 Freightliner	37 Nissan
23 Federal	28 Peterbilt	33 Hino	38 Western Star
24 Ford	29 Reo	34 IHC (Navistar)	39 Other Trucks

Special Vehicles

40 Motorcycle	41 School Bus	42 Commercial Bus	43 Farm Equipment
44 Road Construction Equip	45 Fire Equipment	46 Ambulance/Hearse	47 Police Equipment
48 Snowmobile	49 Other or Not Known	50 Off-Road	51 Go-Cart
52 Moped	63 Motor Home/Recreational		

The third number indicates the Vehicle Type:

- 1 Passenger car (incl. station wagon)
- 4 Van (passenger or utility)
- 5 4-Wheel Drive utility vehicle (jeep, blazer, bronco, scout, etc.)
- 6 Pickup (2 & 4-Wheel Drive)
- 7 Truck (stake, dump, step van, flat bed, etc.)
- 8 Truck tractor (semi)
- 9 Other or Not Known

The fourth number indicates the Trailer Type:

- 0 None
- 1 All trailers, except below
- 2 Towed vehicles
- 3 Single bottom semi
- 4 Double bottom combination
- 5 House trailer
- 6 Semi with no trailer (bobtail)

An example of these codes is underlined below, indicating a Chevrolet (03), Passenger Car (1), and No Trailer (0):

ACCIDENT 08/31/1999 065-3361 GLADSTONE
2 VEH 1 INJ 0 KILLED X4 0310

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

Older Accident Codes

Prior to 1992 the vehicle type consists of four numbers. The first two denote the type and make of vehicle; the third indicates body style, and the fourth is a trailer indicator.

First Two Digits (type and make of vehicle)

00	American Motors	20	Chevrolet TK	40	Motorcycle
01	Buick	21	Diamond T TK	41	School Bus
02	Cadillac	22	Dodge TK	42	Commercial Bus
03	Chevrolet	23	Federal TK	43	Farm Equipment
04	Chrysler	24	Ford TK	44	Road Const. Equip.
05	Dodge	25	GMC TK	45	Fire Equipment
06	Ford	26	International TK	46	Ambulance/Hearse
07	Imperial	27	Mack TK	47	Police Equipment
08	Jeep	28	Peterbilt TK	48	Snowmobile
09	Lincoln	29	Reo TK	49	Other/Not Known
10	Mercury	30	White TK	50	ORV
11	Oldsmobile	31	Jeep TK	51	Go-Cart
12	Plymouth	32	Freightliner TK	52	Moped
13	Pontiac	33	Hino TK	63	Motor Home
14	VW	34	Navistar TK	70	Mazda Auto
15	GMC	35	Kenworth TK	71	Nissan/Datsun Auto
16	International	36	Mercedes TK	72	Toyota Auto
17	Honda	37	Nissan TK	99	Unknown
18	Other Foreign	38	Western Star TK		
19	Other Domestic	39	Other Truck		

Third Digit (body style)

1	Passenger	4	Passenger Van	7	Truck
5	4-wheel drive	8	Truck Tractor		
6	Pickup (2 or 4 wheel)	9	Other/Unknown		

Fourth Digit (trailer)

0	No Trailer	3	Single unit semi	6	Tractor w/no trailer
1	All other trailers	4	Double unit semi	7	Pickup w/2 trailers
2	Towed vehicle	5	Mobile home	0	Unknown

DRIVER RECORD INFORMATION FOR CRASHES – Cont.

Prior to 1993 the violation/hazardous action codes were as follows (Code Before 1992 During 1992):

- V01 Speed too fast None
- V02 Speed too slow Speed too fast
- V03 Failed to yield/disregard traffic control device Speed too slow
- V04 Drove wrong way Failed to yield
- V05 Left of center/improper passing/improper lane use Disregard traffic control device
- V06 Improper turn/no signal Drove wrong way
- V07 Improper backing/unsafe start Drove left of center
- V08 Following too close/unable to stop Improper passing
- V09 Other Improper lane use
- V10 Improper turn
- V11 Improper signal
- V12 Improper backing
- V13 Unable to stop
- V15 Reckless driving
- V16 Careless driving
- V17 Unknown
- V01 Speed too fast None

Complete Driving Records

EDITED (47:36)

This response provides convicted driver accident and traffic violations. This response does not include accident, traffic, and other actions for which SOS has no violation conviction information. DO NOT attempt to determine current status from this response; use the 47:35 response for driver eligibility checks.

UNEDITED (47:42)

This response includes all driver accident and traffic information and other actions (conviction and non-conviction violations). This record is to be obtained only on a need to know basis. DO NOT attempt to determine current status from this response; use the 47:35 response for driver eligibility checks.
